The ATARI bookmarks page <http://eureka.atari.org/atari.html> was updated. The goal consists in valid links, even if it corresponds to sometime dated information. Part of these bookmarks persist since the creation of the WEB page, in 1996.

The interest with these numerous bookmarks, there's almost 600, is to constitute an ATARI uptodate and dedicated search engine of the online scene. It is a service provided by Google Co-op. The base of this engine is a collection composed from time to time. It has now become quite consistent.

This is a first experience in the direction of WEB 2.0, because
even if I'm responsible of its creation, *ATARI Search Engine*
can possibly be extended by everybody connecting at

<http://www.google.com/coop/cse?cx=3D014753128619202207476%3Atzogojpdahi>=

Have a good ATARI WEB Surfing :-)

-=-=-=-=-=-=-=-=-=-=-=-=
-= harassment at. work -=
-=-=-=-=-=-=-=-=-=-=-=-=

Once I stopped watching television. and listening to the radio at the end of
1990, "they" had to find other ways. of committing abuses. So they took what
must be for them a tried and tested route; they get at you by. subversion of
those around you.. Since they wouldn't be able to do that with my family or
friends, that meant getting at people in the workplace to be. their
mouthpieces and. do their dirty work for them.

They supplied my employers in Oxford with. details from what was going on in my private life, and what. I and other people had said at my home and accommodation in Oxford. So. people at work repeated verbatim words which had been said in my home, and repeated what I'd been doing recently.. Often the most trivial things, the ones from your domestic life,. are the ones which hurt most. One manager in particular at Oxford continuously. abused me for ten months with verbal sexual abuse, swearing, and threats. to terminate my employment. After ten months. I was forced to seek psychiatric help and start taking. medication, and was away from work for two months. I spoke later with a. solicitor about what had happened at that company; he advised it was only possible to take action if you. had left the company as a result of harassment, and such an action would have. to be started very soon after leaving.

Over a year later the same manager picked. on another new worker, with even more serious results; that employee tried to commit suicide. with an overdose as a result of the ill-treatment, and was forced to leave his. job. But. he didn't take action against the company, either. Abuse at work is comparable to that elsewhere. in that tangible evidence is difficult to produce, and the. abusers will always have their denials ready when challenged. And even if a court accepts what. you say happened, it still remains to prove that abuse causes the. type of breakdown I had at the end of 1992. In a recent case before a British court, a former. member of the Army brought a case against. others who had maltreated him ten years previously. Although the court accepted that. abuse had occurred, it did not agree that depressive illness necessarily followed, and. denied justice to the. plaintiff.

BBC. h2g2 16/Sept/1999

The BBC's h2g2 website. is billed as "Earth Edition of The Hitchhiker's Guide to the Galaxy!". Naturally, one of its pages
is about me, me, me. It. starts off with the lines;

Every now and then. something comes along which makes you
think "Ah! That's what the Internet is for!" Mike. Corley
is one such. case.

The. page itself can be found at http://www.bbc.co.uk/dna/h2g2/alabaster/A164404

The user comments linked from h2g2. are less than respectful, but given the point of view my website promulgates that is
understandable. It's true that without the communications ability afforded by the internet, which came along at. just the
right time, my complaints would be getting nowhere. But that's a two edged sword also; miniature. cameras only appeared
around 1990, so the advantage of technology is. up to the adopter. Secret service intrigues, and on the other side of the
coin human. paranoia, have both been going on for centuries; what changes now is an increased technologisation of both sides.

You should just cut out the old chip. Carefully unsolder each leg from the
Falcon PCB, then install a nice socket.

Did this a few months ago, it was pretty easy....

Here's my post from Nov. 2006:

The Dallas clock chip is shaped like a rectangle, much like a 2 x 4 square LEGO brick:

```
0000
0000
```

If you take a cutting wheel (Dremel) tool and grind down the top half of the center portion away from the keyboard you will eventually uncover the battery and the battery tabs:

```
.  | Grind here
.  v
0    0
0000
```

Note that some chips have a soft rubbery filling that is easily removed. Mine had hard plastic throughout, so the cutting made a lot of plastic dust, but that was easily blown from the motherboard. I know that this sounds scary, but as long as you go slowly you should be O.K.. There is a crystal on the left (by the dot on top of the chip) that you don't want to damage, so keep your cutting to the center of the chip away from the keyboard.

Both the battery and its tabs are silver, which stand out strongly against the black plastic. The layout kind of resembles Mickey Mouse with the circular battery "head" and the "ear" tabs at roughly 10:00 and 2:00 positions. The left tab is positive, and you need to cut it away from the battery without destroying it in order to disconnect the old battery. Again, a Dremel cutting wheel works nicely.

Now solder about 10 cm of wire to each of the two tabs. These are reasonably large tabs and even a novice should be able to heat a wire, melt some solder onto the wire, and touch the hot wire onto the tab so that it sticks. (I know this isn't good soldering practice, but my point is that you can do this if you can figure out which end of the solder iron is the hot one!). Attach the other end of the wires to a battery holder, preferably to a coin cell holder. These are a bit hard to find, but a electronics shop should have one.

Place your 3V (preferably lithium) battery (size really doesn't matter, but the CR2032 is easy to find) into the battery holder and check that everything now works. Don't forget to insert the battery in the proper direction. (Remember, the left connection on the chip is for +.)

Finally, figure out where the battery holder will sit. The Falcon doesn't have much space available in the front, which is why your wires needed to be so long. Don't place the holder on a chip as that may lead to overheating problems. It may well be useful to wrap the battery and holder in tape so that it can't short out the motherboard. Personally, I removed my Falcon's fan (which only cools the RAM -- it's not needed with my RAM upgrade) and attached the battery holder to the fan mount.

Replace the battery every 5 - 10 years.

```

Worth noting that some NVRAM chips have a top that is easily removable, so if the thought of grinding away at the plastic is too much, then it's worth looking to see if you're one of the lucky ones.

I can add that it is possible that other host adapters might work as well:
e.g. I use a 2.1GB IBM SCSI drive with a GeSoft adapter and. However,

a suitable driver is also needed, and that certainly is NOT AHDI.

Thanks the same to you. I unfortunately had to work New Year's Eve night and then New Year's Day. First time ever that has happened to me in 30 years of having a job, but then the guy who is now doing the schedule does not have a clue of what he is doing.

Would anyone have a copy of MagicMac they would be willing to sell?
It works on my blue and white g3 with os 9.2.
Thanks

their friends, and even with the property and the
honour of their friends. They are overwhelmed with business, with the study
of languages, and with physical exercise; and they are made to understand
that they cannot be happy unless their health, their honour, their fortune
and that of their friends be in good condition, and that a single thing
wanting will make them unhappy. Thus they are given cares and business which
make them bustle about from break of day. It is, you will exclaim, a strange
way to make them happy! What more could be done to make them
miserable?--Indeed! what could be done? We should only have to relieve them
from all these cares; for then they would see themselves: they would reflect
on what they are, whence they came, whither they go, and thus we cannot
employ and divert them too much. And this is why, after having given them so
much business, we advise them, if they have some time for relaxation, to
employ it in amusement, in play, and to be always fully occupied.

How hollow and full of ribaldry is the hea

use of their own reason much
more sensibly than in others. Oftentimes persons have (so far as could be judged) received the first saving conviction from reasoning which they have heard from the pulpit; and often in the course of reasoning they are led into in their own meditations.

The arguments are the same that they have heard hundreds of times; but the force of the arguments, and their conviction by them, is altogether new; they come with a new and before unexperienced power. Before, they heard it was so, and they allowed it to be so; but now they see it to be so indeed. Things now look exceeding plain to them, and they wonder they did not see them before.

They are so greatly taken with their new discovery, and things appear so plain and so rational to them, that they are often at first ready to think they can convince others; and are apt to engage in talk with every one they meet with, almost to this end; and when they are disappointed, are ready to wonder that their reasonings seem to make no more impression. Many fall under such a mistake as to be ready to doubt of their good estate, because there was so much use made of their own reason in the convictions they have received; they are afraid that they have no illumination above the natural force of their own faculties: and many make that an objection against the spirituality of their convictions, that it is so easy to see things as they now see them. They have often heard, that conversion is a work of mighty power, manifesting to the soul what neither man nor angel can give such a conviction of; but it seems to them that these things are so plain and easy, and rational, that any body can see them. If they are asked, why they never saw thus before, they say, it seems to them it was because they never thought of it. But very often these difficulties are soon removed by those of another nature; for when God withdraws, they find themselves as it were blind again, they for the present lose their realizing sense of

us and heaven or hell there is only life, which is the frailest thing in the world.

214. Injustice.--That presumption should be joined to meanness is extreme injustice.

215. To fear death without danger, and not in danger, for one must be a man.

216. Sudden death alone is feared; hence confessors stay with lords.

217. An heir finds the title-deeds of his house. Will he say, "Perhaps they are forged" and neglect to examine them?

218. Dungeon.--I approve of not examining the opinion of Copernicus; but this...! It concerns all our life to know whether the soul be mortal or immortal.

219. It is certain that the mortality or immortality of the soul must make an entire difference to morality. And yet philosophers have constructed their ethics independently of this: they discuss to pass an hour.

Plato, to incline to Christianity.

220. The fallacy of philosophers who have not discussed the immortality of the soul. The fallacy of their dilemma in Montaigne.

221. Atheists ought to say what is perfectly evident; now it is not perfectly evident that the soul is material.

222. Atheists.--What reason have they for saying that we cannot rise from the dead? What is more difficult, to be born or to rise again; that what has never been should be, or that what has been should be again? Is it more difficult to come into exi

of thoughts born from the common
talk of life. As when we speak of the common error which exists among men that the moon is the cause of everything, we never fail to say that Salomon de Tultie says that, when we do not know the truth of a thing, it is of advantage that there should exist a common error, etc.; which is the thought above.

19. The last thing one settles in writing a book is what one should put in first.

20. Order.--Why should I undertake to divide my virtues into four rather than into six? Why should I rather establish virtue in four, in two, in one? Why into Abstine et sustine[1] rather than into "Follow Nature," or, "Conduct your private affairs without injustice," as Plato, or anything else? But there, you will say, everything is contained in one word. Yes, but it is useless without explanation, and when we come to explain it, as soon as we unfold this maxim which contains all the rest, they emerge in that first confusion which you desired to avoid. So, when they are all included in one, they are hidden and useless, as in a chest, and never appear save in their natural confusion. Nature has established them all without including one in the other.

21. Nature has made all her truths independent of one another. Our art makes one dependent on the other. But this is not natural. Each keeps its own place.

22. Let no one say that I have said nothing new; the arrangement of the subject is new. When we play tennis, we both play with the same ball, but one of us places it better.

I had as soon it said that I used words employed before. And in the same way if the same thoughts in a different arrangement do not form a different discourse, no more do the same words in their different arrangement form different thoughts!

23. Words differently arranged have a different meaning, and meanings differently ar

Well today I came across something of interest to me. I was on Sourceforge.net and came across the Draconis MagiCPC TCP/IP connector. Well I downloaded and read the docs and gave it a try. I had a dual core 3.4ghz XP Pro Machine to test it out on. I took a pretty stripped down MagiCPC setup that I had setup with CAB and IConnect for dial up and very few other applications installed and gave it a whirl.

Setup was pretty easy just copy a folder to the Windows MagiCPC folder that had a .DLL file in and then copy a program to the GEMSYS/MAGIC/STARTUP folder. Then boot up MagiCPC and see what happens. I tried Adamas but it pooped out saying it was missing COLORS.CFG and FONTS so I had to kill MagiCPC because it would not close. I then tried the Telnet application. I attempted to connect to atarinews.org. I started getting the connection to the server and MagiCPC locked up. I tried connecting to a known local server and I did get a login screen but it also locked up. That?s as far as I got with this today.

I?m thinking that the PC that I was using was too fast for MagiCPC. I?m going to try the exact setup on a slower PC and see what happens. Another reason why I think the PC was too fast was that when typing in server addresses I was getting double and triple characters of what I was typing. I did try the old tip of starting MagiCPC via a BAT file and setting the priority to /LOW but that made little difference.

I?ll post a followup on what happens when I try this setup on a 800mhz Windows XP machine and see what happens.

Has anybody else have and experience with the Draconis and the MagiCPC connector? If so how did it work for you?

Well on the slow 800mhz XP Home machine Draconis still locked up. At least I did not get triple characters being typed on the screen so speed may be an issue with MagiCPC. My version of MagiCPC is 1.01 dated 09-18-1996.   Pretty old for sure.

I run magicpc 6.2 on a Athlon 64 3200+ machine and have tried the draconis stuff, mpcstik setup and incat2.dll with win_ovl. None of these have worked for me, no lockups, just no route to host messages from highwire and other error messages from cab and draconis. In the end I used the mpc_acc.acc in magicpc. I installed mpc_acc.acc with the file extensions *.exe and *.com. Now when I open a directory window in magic with my windows browser in it I can doubleclick the browser's exe file and magicpc starts it, when I'm done and close the browser (IE7) I am returned to magicpc. Only downsides, It's not an Atari browser and there is a noticeable lag in loading pages. See http://www.atari-forum.com/viewtopic.php?f=3D8&t=3D12984 for d/l of mpcstik (you must be logged in to d/l) and do google search for win_ovl with incat2.dll.
If you do get any solutions to work I'd love to hear what worked for you.
Jim

Well today I tried a PIII 667mhz running Windows 2000, Xandros Linux with Crossover, and Windows 98 on the same machine and all connected to the remote host and then locked up MagiCPC. So it appears that my setup of Draconis is just not going to work...

Yes that is expensive, but will be well worth it. Didier I also wish you luck
and hope someday that I can buy an Atari-based Coldfire computer.

Hi,

I am too also waiting for my CT63 to arrive, but I would buy the M54455EVB anyway. You just cannot have too many fast Atari computers around the house.

Hello all,

I am soon going to have to install an Effel Interface in my old Hades tower. I was wondering if anyone knew of a part I could use to do this? The Effel board is small (about 2 x 2 inches) and has ports for the keynoard and joystick. Is there a website that sells parts like this?

Hello,

Yes I am in the same boat as you are. I will soon be putting my Flcon motherboard in my old Hades060 tower. I have searched the Internet and found hardware to extend most of the ports. From the top of my head I know you can got to Best Electronics for hardware to extend the cartridge port. I bought an Effel Interface for the joysticks and keyboard. I bought hardware from various sites to extend the printer, MIDI, SCSI and VGA ports. I am still looking for a way to extend the MIC/Headphone, DSP ports.

>Hi All,
>

Hello Doc,

I installed some new simm chips which did not agree with the Hades. The first two simm slots were blown. I sent it out to Lyndon Amdsdon in the UK. He got it to work and sent it back to me. I tried it out and it did not work. Something may have happened during shipping. Lyndon sent it to Fredi A. of Medusa Systems and Fredi told me he did not know what was wrong with it. I told him to send it back to me, but I never heard bck from him.

But when I finally get the CT63 and install the Falcon MB into my old tower, I will have a system even faster than the my Hades and with better sound.

>What happened to your Hades if you don't mind me asking?
>

But also with worse graphics, unfortunately.

It's an edited video put out by Geek Entertainment TV and Blip.tv.   The full Jack Tramiel video interview is at http://blip.tv/file/564449 , and the full Leonard Tramiel interview is at http://blip.tv/file/564483 .

I can't find the full Steve Wozniak and Bill Lowe interviews at Blip.tv, and so if you find them, let us know. At least the edited video gives us part of their interviews.

Thanks for the info,
Robert Bernardo

Um dumb question, Does this connector require MagiC6? If so then my version of MagiC will not work. I have MagiC PC 1.01 from the mid 90's that I believe is MagiC 5 based.

The CT60 is twice as fast as the Hades - except when it comes to
video. Graphics performance is the big bottleneck, and you will notice
this when running 8bpp and 16bpp modes. I've been using 1024x768i in
256 colours for a long time though. Just make sure to use NVDI and
you'll get used to it.

The answer is NO. I downloaded the MagiCPC 6.10 Demo and tried Draconis with it. Well one thing was obvious was that my keyboard hick ups were fixed with the newer version. The main issue though of Draconis working under MagiCPC 6.10 it did not matter. Draconis still locked up on me...

About a year ago I tried getting my MagiCMac and MacTCP-Connect working together to use my Mac's TCP/IP under MagiCMac. A file was corrupt and other issues. I gave up for a few months.

I got the bug again to attempt to get this going on my G4-450 Cube running Mac OS9.22. I went through and attempted to get a clean MagiC environment setup and going. One thing I did come across is that MagiCMac is fussy with a USB floppy drive. I never had so much problems with floppies under MagiCMac ever. I ended up doing my CAB 2.7 install on my Windows PC in MagiCPC and copying the finished install via the network to my Mac. It was far more pain than it needed to be that's for sure. No matter how hard I tried I could not get Jinnee to load for anything either. I dug out my EASE 4.0 floppies and that installed. The MagiC Desktop is OK but not my favorite. I know I could have used Thing but I have not used that in years so I went with something more familiar.

After spending way too much time getting MagiCMac going I went through the setup for MacTCP-Connect, STIP, Icconect, MacSTip. When ever I went into Iconnect MagiC and Mac OS9 would crash and look up the Mac. After a few lock ups I gave up on the Cube. Someone last year said that MacSTip would only work on Old World Macs. (The old Beige machines). I have a couple of those still. Trouble for me was finding one that worked. My 9500MP bit the dust last week. I am assuming a failed hard drive but I don't know for sure. So I fired up my FTP Server. It's an old Mac 8500-120 with 64 Meg RAM running Mac OS 8.51 and BeOS R5.03. I booted into Mac OS and copied the MagiCMac setup from the Cube over to that machine over the network and gave it a shot. Well after a couple of more attempts I got Iconnect to go and fired up CAB 2.7 and I was finally on!!!

A couple of side notes. The 10+ year old Mac 8500 with 64 Meg of RAM running Mac OS 8.5.1 and a PPC 604 120mhz CPU does not feel much faster than my TT! I guess an old machine is an old machine no matter what;) I have Cable Modem so fetching data for pages is quick but rendering on the old beast takes time. I tried the included FTP that came with CAB 2.7 but it failed to connect to Atarinews.org. I never did have much luck with that program on my TT via dialup either so that was no a huge surprise. I will have to get my G3 running OS 8.51 or get another hard drive for my 9500MP and see if it is the Mac OS9 that is causing the lock ups or the newer machines.

I'm just getting started with this as there are more programs that I can try now. I'd like to thank people here on comp.sys.atari.st for helping me last year with English instructions and sending me a replacement file for the one file that was corrupt in my MacTCP-Connect. Lastly YES I did make a backup of the MagiCMac folder.

This is fantastic. I didn't even know they released it. Didier I
will be buying one of these ASAP.

Thanks,
Mark

Hello guys,

I was wondering where to buy an eiffel these days. I tried fujiman.no-ip.com because I thought Rory who runs that site was selling them but
it seems down. I need to get one for coldfire development.

Thanks,
Mark

Someone is selling Eiffel boards here:
http://www.atari-forum.com/viewtopic.php?f=15&t=12554&start=15#p111305

There's also a German guy called Tuxie which is working on a newer

version of Eiffel which looks to be very professionally done. I don't
know when it'll be done though.
More about this here:
http://www.atari-forum.com/viewtopic.php?f=15&t=12554

Edward,

I know a person who can make the cable extensions, but I think I
should ask him before I give you his email address.

Thanks

I meant I tried the included Telnet program that came with CAB 2.7. I have to try Teli and see how that works. If anybody has suggestions on Telnet programs that work with Iconnect please let me know. I'm open to trying them out.

FMH wrote:
> About a year ago I tried getting my MagiCMac and MacTCP-Connect working together to use my Mac's TCP/IP under MagiCMac. A file was corrupt and other issues. I gave up for a few months.
>
> I got the bug again to attempt to get this going on my G4-450 Cube running Mac OS9.22. I went through and attempted to get a clean MagiC environment setup and going. One thing I did come across is that MagiCMac is fussy with a USB floppy drive. I never had so much problems with floppies under MagiCMac ever. I ended up doing my CAB 2.7 install on my Windows PC in MagiCPC and copying the finished install via the network to my Mac. It was far more pain than it needed to be that's for sure. No matter how hard I tried I could not get Jinnee to load for anything either. I dug out my EASE 4.0 floppies and that installed. The MagiC Desktop is OK but not my favorite. I know I could have used Thing but I have not used that in years so I went with something more familiar.
>
> After spending way too much time getting MagiCMac going I went through the setup for MacTCP-Connect, STIP, Icconect, MacSTip. When ever I went into Iconnect MagiC and Mac OS9 would crash and look up the Mac. After a few lock ups I gave up on the Cube. Someone last year said that MacSTip would only work on Old World Macs. (The old Beige machines). I have a couple of those still. Trouble for me was finding one that worked. My 9500MP bit the dust last week. I am assuming a failed hard drive but I don't know for sure. So I fired up my FTP Server. It's an old Mac 8500-120 with 64 Meg RAM running Mac OS 8.51 and BeOS R5.03. I booted into Mac OS and copied the MagiCMac setup from the Cube over to that machine over the network and gave it a shot. Well after a couple of more attempts I got Iconnect to go and fired up CAB 2.7 and I was finally on!!!
>
> A couple of side notes. The 10+ year old Mac 8500 with 64 Meg of RAM running Mac OS 8.5.1 and a PPC 604 120mhz CPU does not feel much faster than my TT! I guess an old machine is an old machine no matter what;) I have Cable Modem so fetching data for pages is quick but rendering on the old beast takes time. I tried the included FTP that came with CAB 2.7 but it failed to connect to Atarinews.org. I never did have much luck with that program on my TT via dialup either so that was no a huge surprise. I will have to get my G3 running OS 8.51 or get another hard drive for my 9500MP and see if it is the Mac OS9 that is causing the lock ups or the newer machines.

Hi All,

Finally able to start my CT60/Falcon after over a year, and that's the
message I've gotten on 2 different vga monitors!!

I don't understand. What would cause that, and how do I resolve
it?!?!?!?!? :?

Thanks and have a great day one and all!!

Samf,
I have gotten the same message from time to time (although not lately). I think it all stopped when I sent my Falcon to Rodolphe to do some major work on my Falcon and CT60. I had my battery in my NVRAM replaced, the 25/50 mhz bus boost, the clock patch and several minor tweaks that were listed for the Falcon and CT60 for best hardware optimization. It seems after he had worked on my Falcon and CT60 I never had that issue since. As to what may be causing your situation, I found that making sure that the contacts on the CT60 were seated good made a difference and also just hitting the reset on the Falcon was enough to get the Falcon to synch up with the monitor. I am certianly not suggesting that you have a problem with your Falcon. But check all possibilities and make sure that the VGA cable is connected securely.

Just my two cents.

Thanks,
Falcon060

I'd recommend hitting the reset button. That always fixes this for me.

Well, I did get that taken care of, but now the Falcon doesn't seem to
be accessing any of the drives. And it just boots up to a very plane
desktop in low rez, then after a few minutes, 2 bombs.

Attention! Don't buy anything from this guy! He did not only rip me off
but others as well.

Regards,

Frank

Yes, be careful, I sent him 45? (Paypal) in march 2007.
Never heard of him since...

Guillaume.

So I know a minimum of four people who were ripped off by him. :-(

What a shame, not typical for an ATARIan. From my experiences I can say
that ATARIans are usually helpful and friendly.

Regards,

Frank

I don't think it's released quite yet. I'm thinking he's still got
quite a few things left to do on it.
BTW, would this fit in any but small pc cases?

That's sad to hear. I didn't know that when I posted about this.
well, at least by telling people about this thread more people know
NOT to buy from this person.

What's the name and location of this seller? Does he have a website?

I agree that most Atari ST users are great, helpful people, but
there's always got to be a rotten apple in there somewhere :-(

Of course it was not your fault. ;-) Don't be afraid: Nobody is blaming
you.

> well, at least by telling people about this thread more people know
> NOT to buy from this person.

Well, after searching the web for a while it seems that this would be a
very good advice. :-)

> What's the name and location of this seller? Does he have a website?

Paweł Kaznowski, Gdansk, Poland

He had. It vanished (was: http://ago.atari.org/)

Seems he ripped some people off at ebay as well
(his former profile: http://myworld.ebay.com/ago_030/)

Here is a picture of him: http://atariki.krap.pl/index.php/Vulgar

> I agree that most Atari ST users are great, helpful people, but

Not only ST users but 8 bit ones as well, as TT, Falcon etc. users. :-)
SCNR.

> there's always got to be a rotten apple in there somewhere :-(

;-)

Regards,

Frank

Including me.

I wanted two Eiffels, and even paid him more to do a customized Eiffel for
the coldfire board.

Nothing ever arrived.

Alan.

Hello All,

Where can one find CT60 Hypertexts?

Thanks

The CT60.HYP is included in the software distribution for the CT60,
which you can find on Didiers website:

http://pagesperso-orange.fr/didierm/files/ct60_404.lzh

(You should find the file you need in the subdir /doc/english/)

You might need a hypertext viewer to read it:

http://home.ewr-online.de/~gstoll/bin/hypview_0352e.zip

/Joakim

Thank you so very much Joakim! I'm having a bad problem with my CT60
and I need to figure out what the heck is going on.

Have a great day!!

Folks,
 I have some boards I made, but I have an issue with Joystick Fire. Has any
one a working Eiffel board and has tested this?
Dave

Yes, there was Hyperactive, which was a really nice service with a plethora of the Atari hyps present in an online archive. It has been put on hold though, due to server problems. It used to be available on this URL:

http://atari.coazter.com:81/

There is however another service claiming to handla HYPs in a similar way, but I haven't tested that one myself:

http://phoenix.inf.upol.cz/~opichals/libhyp/

MI5 Persecution Update: Friday 25 March, 1999

If You Intend To Reply, Please Read This
Please.... keep your response to one page if you can!. Faxes over a page or two will be deleted without being read.

The Usual Words

The persecutors-who-wont-admit-theyre-MI5 have been active again this week. On Saturday 20/3/99 I visited Ravenscourt Park in west London, and was verbally assaulted with the usual words, "something wrong with him". This audio file is on the web at URL;

This afternoon (Friday 26/March) I was again verbally assaulted while travelling by bus. The same sexual obscenity was thrown at me, and the incident was recorded on my minidisc-walkman. Because of the deeply offensive nature of the slander, I will not be posting this on the website.

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Persecution : Browse Website

The March 1998 issue (number 42) of .net Magazine reviews the website describing it as an "excellent site". Since August 11, 1996 over 50,000 people have browsed this website.

You are encouraged to read the web pages which include

a FAQ (frequently asked questions) section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me

objective descriptions of the state security agencies involved

scanned texts of the complaints I have made to media and state security agencies involved

posts which have been made to netnews over the last four years on this topic

This article outlines what is to be found on the webpages, which you are encouraged to browse for the complete story.

Frequently Asked Questions

Your excursion through the website starts with the "FAQ - Frequently Asked Questions" portion. MI5s campaign of harassment against me has been going on for almost 9 years, and its longevity and breadth is reflected in the FAQ. Many thousands of people in Britain and abroad, including some recipients of this fax, have known for many years of MI5s activities against me. The FAQ describes the mass "Omerta suppressing its publication"; we pretend Britain is part of the "Free World", yet the British Secret Police, which is what MI5 are, carry on for many years a campaign which politicians and the media know about, and rely on the silent complicity of so many thousands of people.

The FAQs introductory article names those who are "in the know"; media figures like Martyn Lewis, Michael Buerk, entertainment figures like Chris Tarrant, politicians and many in the general public, "all united in a conspiracy which breaks the laws which the UK does have regarding harassment, and all completely uncaring for any semblance of decency or elementary respect for individual rights.

Broadcast media play a key role in the harassment. The very first incident in June 1990 was when a television newsreader reacted to what she saw happen in my living room at home; such incidents of "interactive television" are still happening in 1999. The same goes for radio stations such as Capital FM. In spring 1994, Chris Tarrant on his Capital morning show made an aside to someone else in the studio, about a person he didn't identify. He said, "You know this bloke? He says we're trying to kill him. We should be done for attempted manslaughter". Tarrant and Capital have made strenuous efforts to avoid answering this charge.

Perhaps worst of all, MI5 have deliberately set-up many incidents in public places such as tube stations, shops, cinemas, where they have paid people to throw abuse at me. Since MI5 obtains funds to the tune of 160 million a year to fund its criminal activities, it has funds both to pay its operatives and to "buy" media figures and members of the public to take part in its campaign of persecution.

The Security Service are professional liars. They throw slanderous abuse, yet they refuse to admit out loud that they are doing so. When challenged about their activities through the Security Service Tribunal they lie and deny their activities. They induce other workers and managers at places of employment to take part in their campaign of abuse, presumably by buying them in the same way they buy media figures.

Complaints, and Press Coverage (BBC Lies, MI5 Lies)

As you might expect I have challenged both the Security Service, through the Security Service Tribunal, and offending broadcasters, to own up to what they have been doing. And as you might also expect, all of these people have lied through their teeth. Still worse, they have refused to commit unambiguous lies on paper; they have couched their lies in bureaucratic language, and allowed others to make false assurances and tell lies on their behalf. So when their lies are exposed, they will then tell further Clintonesque lies about how they werent really telling lies in the first place!

On 6/Feb/1997 the BBC told me they would "never engage in any form of surveillance activity such as you describe". The BBC told me Buerk and Lewis had refused to put their lies in writing, but had stated verbal falsehoods denying my accusations of "interactive watching" during news broadcasts. Clearly Buerk and Lewis fear being caught and exposed, so they hide behind their Viewer Correspondence department.

In March 1997 I issued a summons against the BBC to try to "smoke them out". This summons was struck out as "disclosing no reasonable cause of action", because I had acted as a Litigant-in-Person and most LiP summons are treated thus. My case was arguable in law, so the striking out was unjust.

In June 1997 the Security Service Tribunal wrote to me regarding the complaint I had brought against MI5 in February. They say, "The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint." I think you can guess the contempt which I feel for the Security Service Tribunal, who have never made a determination against MI5, and act as merely a whitewashing body for the Security Service. Unsurprisingly in May 1997 the Interception of Communications Tribunal gave the same result.

The last few items of "Press Coverage" give details of mentions of the MI5 Persecution in various magazines and newspapers such as BBCs Ariel, the Observer and .net magazine.

Evidence

Some audio and video clips of evidence have been recorded. My weakness in this area is because most of the really unambiguous evidence would have been obtainable in 1990-92, but I wasnt taping anything at the time, and its very difficult to now obtain recordings from that period.

The audio clip "Life is so Hard" relates to harassment at my workplace in Canada. In the latter half of 1996, I was sitting near to co-worker Mark

Lee, who kept coming out with words and phrases which showed MI5 were supplying him with data from my home life. For example, I would say something on the telephone at home, and the following day he would repeat verbatim what I had said. When Mark Lee saw I was recording what he was saying, he started to make his remarks more ambiguous, or make the obvious ones out of earshot of the recorder.

However, during the evening of 12 November 1996, at home in my apartment (flat to you UK-ers), I said "life is so hard, and then you die". A nihilistic, negative thing to say, but quite distinctive. The following day, 13 November, Mark said loudly, "life is so hard eh, and then you die" followed by loud laughter. I captured this on my tape-walkman and the computer-audio file is posted on the website.

There are a number of other audio files in the websites "Evidence" area demonstrating the abuse to which MI5 subject me to through their paid agents.

Also in this section is a very interesting article by journalist Bernard Levin, which followed a meeting I had with a friend in 1991, and to my mind describes in some details Levins "artists impression" of the meeting. He talks about a "madman" who "bursts into tears, and swears it is all true. And it is."

Internet Newsgroup (Usenet) archive

From May 1995 until the present day, this matter has been discussed exhaustively on internet newsgroups. The most interesting articles from the first two years of posts are documented here. This area is worth reading since most of the questions which the reader would ask, have been asked at some time or another by someone on usenet. Perhaps the very first article posted sums it all up so succinctly;

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?
Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their victim.
And the most remarkable thing about it is that what they do is not even illegal - the UK has no laws to protect the privacy of its citizens, nor does it proscribe harassment or abuse except in the case of racial abuse.
A lot of people in England know this to be going on, yet so far they have maintained perfect "omerta"; not a sound, not a squeak has escaped into the English press, and for all the covert harassment absolutely nothing has come out into the public domain.
Have the British gone mad? I think we should be told.

So how much deeper will the persecutors-who-wont-admit-theyre-MI5 sink in their campaign of lies and intimidation? Each time I thought they could sink no lower, they have managed to surprise me. You thought it could never happen here? When the MI5 British Secret Police make their smears against me, it is the corruption of the Establishment, which they are part of, that is demonstrated.

MI5 Persecution Update: Friday 16 April, 1999

If You Intend To Reply, Please Read This
Please.... keep your response to one page!. Faxes over a page or two will be deleted without being read.

BBC newscaster Nicholas Witchell cant stop himself laughing

During 1990-91 there were very many instances of "interactive television" where newscasters and other TV presenters saw on a screen before them what was happening in my home, and reacted, frequently by laughing at me. During this period I unfortunately did not record these programmes. For the last year or two, I have been recording everything I watch, and there has been a drastic decrease in such incidents.

However, on occasion, television presenters do still engage in "interactive watching" and react to what they see. This has been evident with Jon Snow of Channel Four News recently - a particularly interesting case, since it has been established that he cannot be corrupted by money (it is well-documented that MI5 offered him a tax-free salary and he turned them down). I wonder what device MI5 are using to encourage him to do the "interactive watching"?

On Saturday 10 April 1999 at 7pm, Nicholas Witchell on BBC2 News reacted when he saw that I was watching the programme, and I have his reactions stored safely on videotape. I have watched this tape several times and I am entirely confident that my evaluation of his reactions is correct. For several minutes his upper lip quivered in mirth as he attempted to keep a straight face. Then finally his self-control evaporated through the excuse of a weak joke and his face collapsed into a grin.

The strange thing is that I dont know why he was laughing at me, what I had done recently to "deserve" to be laughed at. The MI5 persecutors usually manage to invent some justification as to why people should laugh at and/or abuse me ("hes an X", "it was so funny" etc), so Mr Witchell could have been laughing for any number of reasons. Perhaps he found the views I have been expressing in these articles amusing? I suppose if youre paid enough money and ordered to laugh then even the most innocuous thing becomes funny.

Jon Snow of Channel Four News cant stop himself smirking, either.

On 12 February 1999 I was watching Channel Four News presented by Jon Snow. As usual, I was recording the programme, so that if anything out of the ordinary happened, Id be able to go back and watch it again.

Now, Jon Snow, by his own claim, is uncorruptible. He says he turned down an offer of a substantial tax-free salary from MI5 - they wanted to make him their mouthpiece, and he told them where to get off.

So you will be most surprised to learn that Jon Snow "interactively watched" me that evening, and on many other evenings. Approximately fifteen minutes into the programme, he announced that the US President would be making a live appearance at about 7.30pm; I looked at the clock on the mantelpiece; and Snow saw me looking at the clock, and visibly tried to suppress a smirk.

Uncorruptible, are you, Mister Snow? If not money, then why are you watching me, Mister Snow? Are they forcing you to watch me? Cant you turn the monitor off, Mister Snow?

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

Comparing the MI5 Persecution with German "Final Solution"

It might seem offensive to compare the mass murder of millions of civilians in wartime with the peacetime persecution of merely one person. Yet the comparison has been coursing through my mind for several years now, because the brutality of German intent to "sub-humans" is very much comparable to the brutality of British intent to someone they vituperate and term "not up to British standards". The methods may differ, but the persecutors mindset is the same.

The Germans first targeted the mentally disabled, too

During WW2 millions of ethnic Russians, Poles, Jews, mentally ill, gypsies and other minorities were rounded up and murdered in purpose-built camps by the German regime, in the name of "racial superiority". Fifty years on, the British Secret Police, MI5, instituted a campaign of mass hysteria; but in their cowardice, limited their activities to one single victim.

It is instructive to note that the early German "cleansing" effort was directed primarily not at Jews, but at the mentally ill. The Nazis set up the T4 project in the thirties to "cleanse" away 70,000 mentally disabled people, including schizophrenics and epileptics. After WW2 the Jews with their media influence used the reaction from the holocaust to roll back anti-semitism in the Western countries; however, the mentally ill are today still a persecuted group in the modern Western world as they were under the Nazis (the current Jewish home secretary in the UK intends to bring in laws for incarceration without any criminal charge for some mentally ill people - he protects his own minority, but does nothing for the other minorities in todays society), and this continuing bias forms a central cause for the current acts of persecution in the UK.

Widespread knowledge of what is happening to the "un-British" minority

In both the German persecution of the thirties and early forties, and the current British persecution, many, many people are well aware of whats happening. There is widespread complicity through inaction of populace; and in a substantial proportion of the mainstread population, the persecution had/has widespread enthusiastic support; yet in both the German case in the 1940s and the British today, the existence of persecution is a mass secret which must be never admitted out loud. In the recent Lawrence case this "secret bigotry" has been termed "institutionalised racism", and that is a very good word for what the British are doing today The persecutory attitudes and omerta regarding them are so deeply ingrained in the national psyche that they define the national mood

During WW2 many Germans knew minorities were disappearing, and through inaction quietly condoned their government's mass murder of "un-German" minorities and inferior "foreigners"; and in the 1990s, similarly, many English people know what the MI5 British Secret Police have been doing, and not only condone it, but actively take part, because of xenophobia against the "un-British" unit minority that is the target of "British" actions. This attitude by the British persecutors has been made explicit through the words "he's not up to British standards"; the British seem to have found their very own "untermenschen" to victimise.

Why these obsessive "holy wars" happen

This type of aggression occurs when the majority is threatened or humiliated in some way, economically, militarily or culturally. In pre-WW2 Germany the threat was primarily economic and military, following Germany's humiliating defeat in the first world war and the reparations it was forced to pay. In modern Britain, one might guess that the majority English who are behind the persecution feel pressured by the swiftly diminishing status of Britain in the world, and the rapidly increasing coloured colonisation of their country, which in time will see the ethnic English a minority in their own land, and their more antisocial elements, unable to reply to the obvious threat, instead project their aggression onto another, weaker, unit minority

In both cases there is a whiff of "holy war" or irrational obsession with the persecution. Certainly the German behaviour fifty years ago bordered on the not-quite-sane, and the current British behaviour towards their chosen victim is strongly tinged with a leave-taking of reason. And the choices open to the victims are the same, since MI5 will never allow me to escape them, "if he tries to run away we'll find him", just like the commandant of Auschwitz telling the new arrivals, "the only escape is through the chimney".

The Victim Will Destroy Us if We Dont Destroy Him First

The persecutors propaganda is the same. Fifty years ago the Germans said, "if we don't do it to the Jews then the Jews will do it to us"; and MI5's propaganda in the early nineties concentrated on their victim as a "monster" aesome "untermenschen" minority.

"We are decent fellows" say the Brutal Persecutors

During the course of researching this article I read part of the very interesting book, "Hitler - A Study in Tyranny", by Alan Bullock. This volume contains a quote from Himmler on the "Final Solution";

"Most of you know what it means when a hundred corpses are lying side by side, or five hundred or one thousand. To have stuck it out, and at the same time .... to have remained decent fellows, that is what has made us hard. This is a page of glory in our history which has never been written and is never to be written."

In the MI5 persecution, too, there is a thread of deliberate brutality to the sick and vulnerable, while the persecutors maintain that "we are decent fellows". There is almost a conscious schizophrenia in the self-attitudes of the Security Service operatives and those in the public who they employ against me, which reflects the contradiction evident in the German attitude above. On the one hand, they stoop to the lowest and most base behaviour; yet at the same time, the MI5 operatives tell themselves that since they are civilised British people, then surely they must by definition be "decent fellows". Any indecency is made the fault of the victim; "hes making us persecute him, so we need feel no guilt".

Yet the conduct is atypical of the way these peoples see their normal modes of behaviour. Befslaughter was not typical of normal German behaviour up to that point. Similarly, the current MI5 abuse goes against the grain of British self-image as being "reserved" and "decent", since they are using terms of abuse which are common among blacks and other supposedly less-developed races, but not among the English.

Conclusion

The ultimate aim of both persecutions is the humiliation and physical extinction of the persecuted group. The Germans did this in a very direct way; the British Secret Police MI5 are acting indirectly and relying on self-extinction of their target, because in peacetime and in the current somewhat false climate of "political correctness" more direct methods are impossible. If MI5 undertook more direct action the mass "omerta" would be broken.

I have written this article with sincerity to show how a historically recent persecution in another country parallels what is being done in this country today. In both cases, the evil-doers are of their countries establishments, and rely on widespread tacit support to maintain the persecution and omerta around it. While the holocaust was undoubtedly the greater evil, it is important to be aware of the fact that had the Germans not been defeated fifty years ago, their plans would have gone through to total completion. In Britain today no force threatens the "permanent government" of which the Security Service forms a part; and it looks very unlikely that the wrongs perpetrated by the MI5 secret police will ever be revealed to public view, and the British secret state brought to justice for its evil actions.

MI5 Persecution Update: Friday 30 April, 1999

If You Intend To Reply, Please Read This
Please.... keep your response to one page!. Faxes over a page or two will be deleted without being read.

Somewhere between 0 and 100%

The last few days there have been no clear recordable instances of abuse. However, while travelling on the Underground, while walking around near my home and going to friends homes, I am constantly troubled by thoughts that those people over there might be about to get at me; that the couple sitting in the opposite seats laughing are in fact laughing at me; et cetera, et cetera.

A comment by a scientist to the BSE inquiry sticks in my mind. He described the possible scale of the epidemic as "between 0% and 100%". It might not be happening, it might not happen at all, to any discernable degree.... or it might be total. Without clear recording, which seems to have become impossible the last couple of weeks, there is no way of knowing whether the harassment really is continuing, whether we have entered a temporary hiatus, or whether perhaps it has perhaps stopped for now.

But for the time being I think there arent any reasons to dicontinue these faxes. I only re-started them six weeks ago in response to a resumption of MI5 harassment; and I think I will need to be more convinced of absence of persecution before I discontinue my complaints.

The Newscasters are still watching

In the last few weeks there have been at least a couple of fairly overt instances of "interactive watching" by newscasters. I reported this in a previous "MI5 Persecution Update".

These instances are really very rare compared to 1990-91, when there were many dozens of such occurrences. Undoubtedly the reduction is due to my practice of videotaping everything I see. Recently I had the opportunity of showing this years "happenings" (Jon Snow/Nicholas Witchell) to my psychiatrist, and he agreed that in both cases the newscasters were expressing merriment without visible cause, and that objectively it might be possible for my claims to be true - although of course other people reported similar thoughts to him, and this thinking is usually a symptom of illness.

MI5 Waste Taxpayer Millions on Pointless Hate-Campaign

Recently I was talking to an independent observer about the nature and purpose of the perceived campaign of persecution against me. The person I spoke to, a highly intelligent man, said he was struck by the utter pointlessness of the perceived campaign against me. He also said that, if my theories were in fact true, many people would have to be involved, in the surveillance itself, and in the technical side of the delivery of information from my home to TV studios for example, if the "interactive watching" were happening as described. He voiced these thoughts without any prompting from me; but both I and other observers had arrived at pretty much the same conclusions, some years ago.

I saw a team of four men at Toronto Airport in 1993

To carry out the surveillance alone, full-time, would employ four or five men, or their equivalent in terms of man-hours. Each man would "work" an eight-hour shift, so you would need at least three men doing the surveillance, plus a connecting link / manager. An indicator that this estimate is correct arrived in 1993, when I was accosted by one of a group of four men at Toronto Airport; he said, laughing, "if he tries to run away well find him". Plainly these were the men who had been involved in the intrusive surveillance of me for the preceding three years.

On other occasions, I have seen the same man on two or three occasions. On one such occasion, at Ottawas Civic Hospital in November 1996; he gave his name to the doctor as "Alan Holdsworth" or some such; my hearing is not very good sometimes and I am not sure of the surname, although I am sure "Alan" was his first name. I saw exactly the same man again in Ottawa, at the airport, in July 1998. Obviously, other people must be "working" with this person; he would not be the sole agent employed in this case.

Usenet readers views on the Cost to MI5 of Running the Campaign

Here's what a couple of other people on internet newsgroups / Usenet (uk.misc) had to say regarding the cost of running such an operation...

PO: >Have some sense, grow up and smell reality. What you are talking about
PO: >would take loads of planning, tens of thousands of pounds and lots of
PO: >people involved in the planning, execution and maintenance of it. You
PO: >must have a very high opinion of yourself to think you are worth it.

and......

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that makes

PM: >it worth the while of the state to spend over one and a quarter million
PM: >on you?

Those are pretty much the sort of calculations that went through my head once I stopped to consider what it must be costing them to run this operation. At the very least, a quarter million a year - and probably much more, given the intrusive and human-resource-intensive methods employed. Times nine years. Equals well over two million pounds - and probably much, much more.

Its wasteful for someone with my skills to be unemployed

The wastefulness of the MI5 campaign against me is not just that of futile expenditure on their side. It is also extremely wasteful for someone with my talents to be unemployed and on a disability pension. I am highly qualified in numerate disciplines, yet am unable to work, specifically because of the MI5 hate-campaign against me. It is a terrible waste of resources for a supposedly efficient economy like that of the UK to be squandering the talents of a skilled and capable worker.

I made every effort to remain in employment for as long as I could, but ultimately I was defeated by MI5s employment of massive resources specifically targeted on my workplaces with the sole aim of seeing me evicted from those workplaces. You might expect this sort of behaviour from the Stasi or some other secret police force in a communist country where labour is cheap, and the governments aim on seeing its citizens confined; but for a supposedly free and efficient economy like Britains, the wastefulness resulting both directly and indirectly from the Security Services activities is simply criminal, and should never be allowed.

The international dimension means the costs are multiplied many times overoer had any sense, then they have surely taken leave of them over the last nine years.

Four years of persecution in Canada

The persecution re-started within less than five minutes of my arrival in Canada, as documented above, and in the "frequently asked questions" article on the website. The words, "if he tries to run away well find him" spoken by one of the harassers at Toronto Airport are now imprinted on my mind.

A year later I emigrated to Canada, intending to find a job and settle there, hoping that MI5s interest in me might dim with time. I did manage to find work there, but my hopes of avoiding Security Service interest were ground into dust. As detailed above, I saw the same man in November 1996 and July 1998, both times in Ottawa. Apart from these encounters, there were numerous incidents between 1994 and 1998 of harassment, of an identical nature and in most cases using identical words to what had occurred in the UK. It became quite clear to me that the permanent surveillance and harassment operation which MI5 had subjected me to in England was being continued.

For a team of four or five men to be employed overseas must cost a lot more than if they operate in their home country. And for MI5 to continue the operation for a period of over four years, continuously, must cost many hundreds of thousands of pounds. This confirms my belief that the state is funding the campaign against mehat the Security Service receives current annual funding of #160M. Divided by 1850 staff, works out at #86,000. But the unit annual cost of each "watcher" must be much higher than this, especially given the frequently mobile and overseas nature of their actions of the last few years. A very conservative figure might be a little over #100,000 pa for each of a team of five people, or half a million pounds per year. For nine years, so far. So the most conservative estimate of the surveillance element alone is perhaps four or five million pounds since 1990.

This guesstimate is of course theoretical - I am not privy to inside details of how MI5 split their funding. But to take some other examples, the cost of a US counter-surveillance specialist per day is USD 5,000. Even if the agents permanently assigned to me are not of this calibre - even if they employ specialists when difficult work planting bugs etc is encountered - their salary and support costs must still be very high. The individual agents are doing well for themselves as they are well-paid to exercise psychopathic instincts which in any sane society would see them in prison; but the taxpayers who must fund this terribly wasteful exercise are being "done" out of hundreds of thousands of pounds each year.

It must be emphasised that the above estimates are highly conservative. Besides the surveillance operation, it must carry a high cost in man-hours to propagate covert slanders through the population; to setup and maintain the "interactive watching" links to TV and radio stations, which these organisations continue desparately to "lie and deny"; and to induce antipathy in co-workers which would not otherwise exist.

Why they are wasting Millions of Pounds on a "Nobody from South London"

As remarked in the prologue to this article, it is really most extraordinary that the Security Service spends a chunk of its budget, every year for nine years so far, on a meaningless campaign against a "nobody from South London". That they are spending such a large amount of money has been confirmed to me on several occasions, usually by oblique references to "its costing this country millions". The supposed "logic" behind the persecution is that MI5 wish to avoid their harassment of me, and the involvement of the UK media, to be made public; yet as the reader will appreciate that is a circular argument, "theyre doing it because they want to keep it secret and avoid humiliation for themselves and their country" begs the question, "why did they start doing it in the first place?", to which in truth I myself do not know the answer.

Plainly MI5 with its rich budget can afford half a million pounds a year to waste on a "nobody from South London". Some time ago I was talking to a British surveillance professional on Compuserve who told me "this work costs a lot of money and is usally because the person I am following has done something (usually criminal) to warrant all this money and time being spent." Yet in this particular case it is plainly not the "victims fault" that the harassment is taking place. The hate-campaign against me is completely the creation of the obsessive psychologies of the MI5 agents who have made themselves my persecutors; it is obviously a "personal" campaign for them, and for years they misuse taxpayer funding to feed their insane, unnatural and fixated fantasies.

Four Years of "MI5 Persecution" Posts on Internet Newsgroups

For approximately the first three years of the MI5 persecution, from June 1990 until late 1992, I kept as quiet as possible, in the hope that by not reacting, MI5s interest in me would decrease and they would simply go away of their own accord. This is the sort of behaviour some people employ against bullies; if the bullies arent getting a reaction, then they might simply go away and victimize someone else.

Unfortunately, this tactic didnt work. The quieter I became, the more shrill and hysterical the noise from the Security Service operatives. For about two years I didnt watch TV news at all. Yet this only heightened their obsessed fixation; they continued to follow me wherever I went, they continued to induce harassment at work by managers and fellow workers, and they continued to encourage me to commit suicide. They seemed to regard my refusal to react as a crime which they would have to "put right" by ever more extreme forms of abuse.

Finally, in 1995, I changed tactics radically. Since late 1994 I had had accounts with internet providers in Ontario, Canada. I discovered the cornucopia of internet newsgroups, on every topic from consumer electronics, to politics and legal topics, and I discovered online services such as Compuserve and AOL. In May 1995, I made the first posting to the conspiracy newsgroup, on the subject of "BBCs Hidden Shame".

BBC's Hidden Shame

The internet newsgroup discussion, which has now reached its fourth anniversary, started with an article in alt.conspiracy, which I reproduce here.

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?

Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their "victim".

And the most remarkable thing about it is that what they do is not even illegal - the UK has no laws to protect the privacy of its citizens, nor does it proscribe harassment or abuse except in the case of racial abuse.

A lot of people in England know this to be going on, yet so far they have maintained perfect "omerta"; not a sound, not a squeak has escaped into the English press, and for all the covert harassment absolutely nothing has come out into the public domain.

Have the British gone mad? I think we should be told

At this point, I did not name MI5 as my persecutors. I was still unsure that they were the ones responsible for the "psychological terrorism". In followup posts however I did name them; and the persecutors have never denied the claim; so I think my guess is valid. (The Security Service Tribunal in 1997 have said "no determination in your favour was made", but it is a well established fact that MI5 lies routinely to the Tribunal which has never found in favour of a plaintiff, so no conclusions can be drawn from this.)

This first post was made to alt.conspiracy, but further posts were made to the UK-local newsgroups, in particular uk.misc but also uk.legal and uk.politics (which is now called uk.politics.misc). Some time ago I tried to take the battle to the Compuserve forums, UKPOLITICS (which is now called UKCURRENT - current affairs), but my articles were censored by the forum operators. Such censorship is impossible on the internet newsgroups.

Police Refuse to Act

I have complained several times to the Metropolitan Police, who have each time refused to help.

Subject: Re: MI5 Persecution: Why Aren't the British Police Doing Their Job?
Reply-To: Green@guidion.demon.co.uk
Date: Sun Apr 7 21:13:30 1996

In article <DpIE0r.736.0.bloor@torfree.net>
bu765@torfree.net "Mike Corley" writes:

> Last Easter (1995) I went into the local police station in London and spoke to an officer about the harassment against me. But I couldn't provide tangible evidence; what people said, in many cases years ago, is beyond proof, and without something to support my statements I cannot expect a police officer to take the complaint seriously.

This in itself dos not suggest that the police have it in for you. The old bill operates on extremely tight spending limits forced on them by that pillock Michael Howard, and without evidence, they often have higher priorities than chasing something that cannot go to court.

I doubt that the police are actually being leant on, but they probably realise that if they looked into this, they would be leant on hard. The met always stays away from anything that looks like it has Defence, Security or secret service interest already, because they realise that they are below these government agencies in the general pecking order.

If I walked into my local nick and complained that MI5 were snooping on me, they would show me the door without even looking at my evidence, because that bored desk seargant with only five years to go before he retires doesn't want to start fucking about with somebody who has incurred the wrath of Stella Rimington. He would rather deal with the lost dogs and driving licence producers, eat his cheese and pickle sandwiches and piss off home at the end of his shift than have some high ranking spook having a go at his boss and getting him a bollocking.

In short, you have earned much sympathy but little surprise. Just remember that saying about the enemy of your enemies.

Most recently, I wrote in March 1999 to Charing Cross Police Station CID. They did not acknowledge or reply to my letter. When I phoned them up, the detective Id written to treated me to a sadly not unusual display of police bigotry, with an uneducated rant about "your paranoid rubbish".

It would be nice to think that such uneducated bigotry is something other than wholly typical of police behaviour, but unfortunately that is an illusion that is rapidly dispelled.

Uncorruptible Jon Snow of Channel Four News

From previous articles the reader will know what I think Jon Snow has recently been watching me while he reads Channel Four News in the evening. Recently I digitized a few moments of one such broadcast, where his face twists into a smile, without there being anything in the news broadcast to cause merriment. Here is a usenet post from some time ago on MI5s "bought and paid for" tools in the so-called "free" press.

Peter Harding (harding@ermine.ox.ac.uk) wrote:
: I was at speakers' corner on Sunday. There was one chap who was bellowing
: about something or other, I don't know what, but one thing he said to
: someone caught my ear:

: "BBC, MI5, same thing."

Can't disagree with that sentiment.

Wasn't it documented that MI5 sometimes "bought" journalists and broadcasters? I remember reading a report by some jouralist who had been offered an extra tax-free income by MI5 to become their covert mouthpiece, and had refused.

....

> : >mouthpiece, and had refused.
> :
> : It was Jon Snow of Channel 4.
>

> Was it reported in any of the papers?

It has been reported several times. The most recent was in Private Eye, a few months back. As I recall they also wanted information from him; journalists would be a natural choice for members of the Security Service and the Secret Intelligence Service for information sources.

> It might be interesting to see what he had to say regarding their
> attempt to recruit him.

He was most concerned that many others would have accepted such an offer. However, we can probably make an educated guess as to some of those who accepted: Nigel West (Rupert Allason, MP) and Chapman Pincher would come near to the top of the list.

Corrupt Security Service agents steal millions from taxpayers

Money is of course a factor in the grand equation which is the MI5 persecution. It costs money for the Security Service to "buy" people in the media etc. But that is only a small part of their expenditure of taxpayers resources. Most of the expenditure is directly on the salaries if the agents involved; and in this post I put forward the theory that MI5 are trying to draw out their involvement for as long as possible, very cynically, to maximise their income and line their own pockets.

At each stage they have tried to pretend that I am something out of the ordinary. Either I was very stupid ("he's an idiot") or very clever ("he's like a genius"). Either I was a threat to Western civilization (Levin once referred to me as the next Hitler) or I was completely defenceless ("a soft toy").

Now, it should be obvious to any person with common-sense that I am not out of the ordinary in any way. I have an IQ which is average for the Web, I am racially white European, and there are plenty of other people with schizophrenia or epilepsy out there who haven't been targeted for MI5 attention, so why me?

I think the answer is that the MI5 agents who harass me have cynically exploited the situation by painting me as extraordinary in order to assure themselves of well-paid employment funded by the ordinary British taxpayer. To put it bluntly, they are stealing millions of pounds from the taxpayer to feed their own pockets.

This assertion is supported by the observation that it's the same agents who are doing the harassment. Six months ago in a local hospital I was harassed by someone whose face I had seen (he had stared straight at me aggressively, at the time I just thought it was some nutter but it turns out he was one of "them") aboard a KLM flight a couple of years ago. It's presumably been the same people most of the time. I've seen the way contractors act when they don't want their positions terminated. Would these agents really want to lose their well-paid employment harassing me? Presumably they are promising their bosses a "breakthrough" (ie my demise) real-soon-now and have been for the last seven years, while all the while these MI5 agents skim millions off the taxpayer.

I wouldn't mind a job like that. Perhaps if I persecute myself a little bit, like standing in front of a mirror and shouting mindless obscenities, do you reckon I'd get a slice of the caky Service Tribunal. This year Nick Brooks, current Tribunal Secretary, confirmed to me that he could not think of a single case where the Tribunal had found in favour of a complainant. Here is my usenet post from two years ago.

Subject: MI5: "It wasn't us"
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net

"The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint."

Signed ER Wilson, Tribunal Secretary

Well that's a relief then. All that spamming for nothing eh. Gaw blimey, if they say they're not doing it then it can't be them, can it?

In a recent letter to Mr Brooks I expressed the opinion that the Tribunal were unable to fulfil their responsibilities in the face of MI5 falsehoods. Nevertheless, I do intend to make another complaint to the Tribunal in the near future, despite the Tribunal appearing to be a toothless watchdog.

Discrimination against a Unit Minority

MI5 have been very clear in their instructions as to what I should do. They have openly shouted at me the word "suicide", and also from the other abuse it is clear that they want my existence terminated.

This point is covered in more detail in a previous article. The following post describes the xenophobic nature of MI5s campaign against me. They have refined their bigotry down to a unit minority, yet they make use of the discrimination against the mentally ill which is a feature of current British society.

>Indeed. If you've ever had a 'conversation' with someone suffering
>from florid schizophrenia, you'll know how difficult it can be to
>'argue' with them.

I don't have florid symptoms. But I'm in a difficult situation, because those people who don't know, aren't going to believe, and those who do, they just go along with the crowd. It's never a good idea to go against the grain, and the grain here is defined by interests in the establishment and the media. Even people who could say out loud what was happening won't, because then there's a risk that they'll be seen as traitors and ostracised.

Usually this type of 'hidden abuse' is racial and targetted at a racial minority within a country. You keep the minorities out of the good jobs, but you don't admit discrimination exists. It happens everywhere, not just in Britain. The persecution that is going on now is in reality a refined form of racism. Instead of "nigger" it's "nutter", and abusing the mentally ill is still socially acceptable today. In 50 years it might not be, but today there isn't any social or legal sanction against it.

So really they've refined racial harassment down to a minority of one. The words may be different, but the methods are the same.

MI5 Persecution: BBC Newscasters Lie & Deny They're Watching Me

Central to the persecution campaign waged against me for some nine years now by the Security Service is their use of the media, and in particular the broadcast media, to make clear to me that I am under surveillance and being watched within my own home, even by BBC newscasters while they read the news. This is really an act of arrogance; MI5 and their tools in the television and radio are so sure that they can never be caught, that they have many times made explicity clear on broadcast programmes that they are as capable of seeing me as I am of seeing the broadcast pictures. Even when they have known I am taping the programmes they still carry on this practice; for examples of TVand radio presenters caught "in action", see the Evidence area of my website.

If you wish to reply to this article......
then please include your name and fax number! I provide the means for recipients to send me their thoughts on the topics discussed, but ask that you provide me with your fax number or email address if you require a response. Also would you please send not more than one or two pages, if by fax. Thank-you!

It started with a Newscaster, and it continues with Newscasters today

The very first incident in the story started with a reaction by an ITN newscaster, Sue Carpenter, in June of 1990, almost nine years ago now. She reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

However, I have been busy recording everything Ive watched the last couple of years, and the taping has yielded some nuggets, which you will find if you point your Web browser at the "evidence" area of my website, whose URL address is given above. Strangely it is not particularly the BBC who are "after me" at the moment (with the exception of occasional fire from Nicholas Witchell), but that supposed paragon of virtue and decency Jon Snow of Channel Four TV News (he actually works for ITN), who once claimed hed turned down MI5s offer of a tax-free salary. I will cover Snows recent actions in a future article.

BBCs Hidden Shame

The first ever Usenet post (internet newsgroup article) on the subject of the MI5 bugging / BBC watching occurred, as stated in a previous article, in early May 1995. It is reproduced here;

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?

Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their "victim".

I suppose "BBCs Hidden Shame" is more of a wish than a fact. It may be hidden, but the BBC and other media and security organisations seem to have no shame whatever in their anti-social, not to say criminal, actions. Nor do the general public, who seem quite happy to parrot the vilest obscenities without much hesitation or apparently thought.

Martyn Lewis, Nicholas Witchell and the rest

Most of the harassment occurred in 1990-92, when I wasnt making any recordings, and the BBC wont release copies of current affairs programmes from that period.... so although I can remember there were many incidents in that time, even many specifics, I cant dig up the actual programmes to flesh out the bones.

This year, there has been at least one incident with Nicholas Witchell as newsreader, which I have successfully recorded and digitized, i.e. converted into a computer Quicktime movie file. This has not yet found its way onto my website (Im a busy man, dontcha know) but you can be sure I will let the readership of these articles know when that clip makes it onto the web. The Witchell clip was recorded on Saturday 10 April 1999 at 7pm, and shows Witchell trying to restrain his features from collapsing into a smirk. First his upper lip quivers for several minutes, then with the non-excuse of a non-joke his entire face twists into a grin. It looks as if he finds me so funny, that he allows himself to submerge any pretence at professionalism in a sea of MI5-inspired sarcasm and harassment.

The two BBC newscasters whose reactions to me I can remember most vividly over the years are Martyn Lewis and Nicholas Witchell. I can remember thinking years ago that Michael Buerk was also seeing me at home; and if the other two are watching then there would be no reason why he wouldnt be doing the same; but in all honesty I cannot remember a single clear instance of his reacting through facial or verbal expression to me.

I can remember several instances of Martyn Lewis reacting to what he saw of me, however. In early 1992 I was watching the BBC news with Lewis on a small black-and-white portable TV at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

And in spring 1991 I remember Martyn Lewis clearly reacting to what he saw of me at my then accommodation in Woking, Surrey, by continuing to stare at some fixed point near the camera after the news had finished - presumably this is where the monitor interactively showing pictures of my room was located.

Why would BBC and other Newscasters Watch and Harass Me, Watching Them?

This is a very difficult question, and I dont actually know the answer. It is a matter of record that the Secret Services are very much part of the Establishment. The recent exposure of the "MI6 Agent List" on the internet, and its coverage in the newspapers, reveals how much MI5 and MI6 are recruited from the ranks of the Establishment. Obviously the relationship is bi-directional; the Establishment influences MI5/MI6, but the secret services (well, perhaps not so secret now we know who works for MI6!!!) also influence the machinery of power and information dissemination i.e. media in this country. So they must have a lot of covert leverage with the BBC and ITN.

Some of this leverage is obviously through bribery. It is a matter of record that MI5 tried some years ago to "buy" Jon Snow of Channel Four TV. He turned them down - obviously they must have approached other media people as well, and from the lack of other reports of people turning them down, it may be presumed that some other journalists will have accepted the sugared carrots put before them. Ironically, Jon Snow has been taking part in the recent "watching" actions against me - but why he has allowed himself to be used by the secret services is something which I do not know.

Perhaps the Security Service uses blackmail to twist arms of journalists into co-operating with them? I have always thought there was something slightly odd about Martyn Lewiss demeanour. At the time of the Ron Davies "rough trade" scandal it was reported that MI5 had known all about Davies predilections and the sham of his pretence to be a happily married man. Perhaps MI5 have been able to dig something up from Martyn Lewiss private life to blackmail him into acting on their behalf? And if there wasnt anything before the "newscaster watching" started then there most certainly is something now.... once theyve started watching, the newscasters will surely wish their activities to remain covered-up, and co-operate with the security service.

"Newscaster Watching" Deliberately Constructed to Mimic Schizophrenia

Presumably this is the first case in history of television journalists actually taking part in acts of real-time, live spying and reacting against one of their viewers. What you have to understand, though, is that I was quite mentally healthy in June 1990, certainly relative to November 1992, when after two and a half years of harassment I was finally admitted to hospital as an out-patient. MI5 decided from the outset that they would make me mad; they constructed the media harassment to resemble what would be reported by a person with mental illness; and then they carried on years of abuse to inflict on me the condition which they wished to use as an excuse to cover up their abuses.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

When I started publicising my case on internet newsgroups in 1995, I was met with the disbelief one might expect to be accorded to a mentally ill person who talks about "newscaster watching" and media persecution. Some newsgroup participants thought I had started a "troll", an invention made to obtain a reaction; one bright spark even suggested a group of psychology students were behind the articles. But most people thought the articles were symptomatic of derangement - and that is exactly what MI5 want people to think. MI5 chose me as a target because I was mildly mentally ill at the outset in 1990, although I stress my illness then was very mild in comparison with November 1992, and because they knew that enough abuse would (a) make me much more seriously ill, and (b) once I was more ill, they would "get away" with a harassment deliberately constructed to look like the symptoms of paranoid schizophrenia.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "real-time spying" on me. They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

BBC-VLC also said that the BBC "would never engage in any form of surveillance activity" such as that described. Clearly Martyn Lewis and the rest have lied to their own organisations personnel about their criminal actions. So much for the "objective", "truthful" BBC, a nest of shabby liars.

Summons against the BBC, for Nuisance caused by Newscaster Spying

In March 1997 I issued a civil summons against the BBC, seeking injunction against further "newscaster spying", and token damages for what the BBC had done to me until that date. The purpose of the summons was to try to "smoke out" the BBC, since obviously I did not have good evidence which would be necessary for either a civil or criminal case to be made against them. My summons was worded as follows;

1. The plaintiff is and was at all material times residing at [home address]. At some time prior to or during June 1990, persons of unknown identity entered Plaintiff's premises and installed concealed television equipment in said premises.

2. A campaign of harassment was launched against the Plaintiff by the persons of unknown identity, which in part took the form of instigating harassment by BBC TV newscasters (including specifically Michael Buerk and Martyn Lewis) as they read news bulletins, by making direct and personal comments to Plaintiff.

3. The campaigns purpose was to subject Plaintiff to great mental stress and induce mental breakdown. As a result of it Plaintiff did indeed suffer from severe mental strain in 1990-97.

4. In order to avoid the mental strain being caused to him the Plaintiff has been compelled to stop watching BBC TV news. Defendant therefore committed the tort of private nuisance, since normal use of home was interfered with.

5. Plaintiff claims a permanent injunction prohibiting further nuisance, and damages for nuisance suffered limited to 5,000.

Naturally, my attempt to smoke-out the BBC and its lying newscasters failed. The BBCs litigation department sought to have my summons struck out; and they succeeded in doing so, on the grounds of my action "disclosing no reasonable cause of action". I was also prevented from issuing further civil claims against the BBC without leave of the Court. Apparently litigants-in-person frequently / usually have their claims struck out with this wording, regardless of the merit of their claims.

BBC Suppresses my Claims of "Watching by Newscasters"

BBCs staff magazine Ariel ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm
Clearly the BBC will not allow claims of its wrongdoing to be made public in the media channels it controls.

On several occasions people said to my face that harassment from the TV was happening. On the first day I worked in Oxford, I spent the evening in the local pub the Rose and Crown with the company's technical director Ian, and Phil, another employee. Ian made a few references to me and said to Phil, as if in an aside, "Is he the bloke who's been on TV?" to which Phil replied, "Yes, I think so".

The reader might think that mere "watching" by newscasters etc might be a relatively benign happening. But it is not; it is part of MI5s framework of harassment and lies. On many occasions the reactions of the BBCs newscasters to me has been in the nature of sarcasm, implicit contempt and abuse. This is visible in Witchells news programme mentioned above, where he engages in abuse by laughing at me during his newsreading. It was particularly visible in the early period of 1990-92, and as late as Autumn 1993, when during a Newsnight broadcast Jeremy Paxman interviewed a football person about soccer hooliganism, and the interviewee gave vent to an unsubtle rant about "theyre idiots, theyre just idiots, keep up the surveillance". Paxman started grinning, showing he understood and was taking part in the abuse being perpetrated on that programme.

Conclusion

The MI5 Persecution started with harassment by television newscasters, and today harassment by TV and radio presenters still forms a key part of MI5s activities against me. When this business started in June 1990 I was in relatively good health of mind. Years of persecution by the secret police and their mouthpieces in the state-run BBC and other media eroded my health until MI5 achieved their aim of seeing me rendered mentally ill in November 1992. The diagnosis which was forced on me unfortunately and ironically meant that my reports of the harassment are disregarded, because the mentally ill are second-class citizens in todays Britain.

Yet TV and radio harassment continues, albeit in a reduced form, despite my taping all the programmes I watch, resulting in my being able to obtain and demonstrate objectively on the website instances of media presenters attacking me. Unfortunately these recorded instances are quite tenuous; I might understand them, the presenters understand what it is theyre doing, but despite many thousands of people knowing the truth of the "newscaster watching", the omerta continues and they continue to refuse to admit the truth of the matter. It is a terrible indictment of British society that there is not even one decent person willing to speak out. I look forward to the day when the truth does finally emerge, and the mass corruption which has allowed the MI5 persecution to take place is finally purged and the Establishment criminals caught and appropriately punished.

MI5 Persecution: Molestation during Travel

MI5s persecution of me varies in intensity. Since 1990 it has been steady for perhaps 80% of the time; there was a notable quiet period in 1993, and another quiet period in Jan-Feb 1995, as well as a hiatus in the first two months of 1999. It puzzles me that they cease and restart, seemingly without any logic or reason. But one aspect of MI5s activities against me which is relatively predictable is this weeks articles topic, which is Molestation during Travel. Almost every time I cross the Atlantic, go to the Continent or even try to enjoy a holiday in this country, you can bet that MI5 will be there doing their utmost to wreck it all.

This aspect of the harassment is particularly relevant as I will be travelling to Europe again in a months time, with naturally the Minidisc recorder in tow; so it will be interesting to see if I can record the abuse which will almost certainly take place, either on the Tube going to the airport, at the airport, on the flight, in the terminal building - MI5 have previously instituted instances of abuse at each of these locations, so well see how much taxpayers money they waste this time, and whether it will prove possible to capture their abuse on minidisc.

Read about the MI5 Persecution on the Web

June 1992 in Polands mountain resort of Zakopane

The persecution started in June 1990, and for the first two years I stayed in the UK apart from a couple of brief day trips to Calais. By the summer of 1992 Id had enough of being cooped up in England with abusive fellow employees egged on by an abusive secret police service, and decided to spend 10 days in southern Poland, on what was intended to be a holiday at the mountain resort town of Zakopane.

Unfortunately the psychopaths of the Security Service were not willing to allow me to enjoy a holiday in peace and quiet. The journey to Zakopane was by coach from the meeting point at Londons Victoria coach station (National Express) followed by ferry followed by another coach across Europe. As we left Victoria a youth and his girlfriend started a loud tirade of abuse directed at "this bloke", where the "bloke" was never named, but it was very clear that the "bloke" was myself. The youth said "they" had "found somebody from his school, and he was always really stressed at school, a real psycho". Again, the label "they" was not elaborated on, but it was clear that "they" = the persecutors from MI5. The boy also said, "he was in a bed and breakfast for only one night and they got him". By a not unexpected coincidence I had been in a B&B in Oxford a week previously, which had been booked from work; other things lead me to the conclusion that the company's offices were bugged for most of the 2 1/2 years that I was there, so "they" would have known a room in the B&B had been booked. After a few minutes of this I went back to where they were sitting and asked where they were travelling. The boy named a village in France, and the girl's giggling suddenly ceased; presumably it permeated to her brain cell what the purpose of the boy's abuse was.

It is now very clear to me that MI5 were trying to have me incarcerated, assaulted or killed on this trip across Europe. The degree of verbal violence inescapably leads to this conclusion. When we arrived at our destination, it became clear that many people, both in our tour group and its guide, and among the ordinary residents of the town, knew there was a movement under way to "get" me. MI5 employed many people and significant resources for an action which they knew would only take a maximum of ten days. A commercial operation would never have felt able to waste such resources on such an unproductive and temporary action; only a state-sponsored, taxpayer-funded entity like the Security Service would be able to be so wasteful.

To give some examples of what happened in those ten days; I was walking in some woods outside the town, when a Polish woman, looking at me, said the English "shit" in a strongly Polish-accented voice. For the first three years 1990-92 MI5 had been trying to force this word on me. Another example; I was walking near my "hotel" when a mother said laughing to her child, "a wiesz ze to prawdziwy wariat" which means "you know hes a real madman". And the "TV reacting" happened there too; on Polish TV, a bemused looking journalist said to another, "to jest sprawa Anglikow", which means "its the concern of the English", in other words, none of our business, despite what the English are trying to force down our throats.

Just before we left for home, I went with some others from our group to a nearby bar. There a man shouted at me the same sexual obscenity which MI5 have constantly thrown at me these last three years. I think MI5 try to justify their various terms of abuse by repeating them at me until I say them, either while conscious or while talking in my sleep; and then they seize on my saying those words to "prove" that the obscenities are "my fault", et cetera. This rather stupid reasoning of theirs can actually be seen as indicative of the psychopathic condition attributed to them in a previous article; blaming the victim for the crime you inflict on him is how psychopaths think.

Nor did the persecutors let up during the return trip. Returning on the ferry over the channel, a rather insalubrious-looking guy talked to his mates about "and you know this bloke, hes really mad you know, hes really mad". On the National Express return coach to London, a group of five or six young people started shouting at me. I slumped in my seat and tried to avoid presenting a target, so they got ever more strident - "whats the matter with you, cant you hear us?" One of the other people who had been on the trip to Poland asked them why they were shouting at me, and they said, "hes been to Cambridge", to which the co-holidayer asked them, "have you been to Cambridge?" presumably thinking they were aggrieved fellow students, but they answered "no". Even after I left the coach at Elephant and Castle abuse continued; in the tube station, two kids started throwing abuse at me; one of them said to the other, "and you know he works?" to which the other answered "yes".

Immediate Aftermath of November 1992

As you will know from previous articles, my manager at OCG - ARIS/Oxford, Mr Mitchell, induced a mental breakdown in me in the months leading up to Nov/92. The diagnosis was regarded by the persecutors as a victory for them, because few if any people give credence to allegations of harassment when they are made by somebody suffering from schizophrenia. There is also a bias against the mentally ill, an "institutionalised bigotry" in society comparable to the institutionalised racism against blacks.

However, MI5 did not let up on persecuting me following Nov/92. In December 1992 I flew by charter jet to Alicante in Spain for two weeks recuperation. MI5 planted one of their people on the flight, a youth who tried to start some noises that "hes a nutter". One of the other passengers replied, "oh hes a nutter is he? oh well!" and the youth shut up and said nothing for the rest of the flight. I think it would be fair to say that the youth on the flight was embarrassed by what he had been asked to do in making the flight "uncomfortable" for me; he sounded defensive rather than aggressive.

My first trip to Canada in June 1993

Ive already covered this in a previous article so Ill just give a brief summary here. On 10 June 1993 I flew British Airways from Heathrow to Torontos Pearson Airport. On de-planing from the aircraft, one of a group of four fellow passengers looked at me and said, laughing, "if he tries to run away well find him". It was quite obvious that these four men were the ones who had been harassing me since 1990.

I did nothing to apprehend them or bring this incident to the attention of the airport authorities, mostly because this was my very first visit to Canada, and the last thing I wanted was to get into a dispute before I had even finished disembarking. In retrospect, I can see this was a terrible mistake; I should have made every effort to detain and identify these people.

Subsequently I have made numerous attempts to obtain the names of these people from British Airways passenger lists, by talking to BA, through a lawyer in Ontario, through a solicitor in England, through the UK police, and also through private detectives in the UK. But all my efforts have come to nothing. BA have told me they keep passenger lists for a period of seven years, so they will still have the list for this 1993 flight. I did not see or hear anything during the rest of my visit to Ontario in 1993 which would have lead me to believe that I was being watched or followed.

Journey across Canada in summer 1994

As I think Ive already said in previous articles I emigrated to Canada in late May 1994. For six weeks between late May 1994 and early July 1994 I travelled across Canada from coast to coast, starting in Toronto, visiting various cities and ending up in British Columbia. I saw this both as something of a holiday, and the chance to get to know a little better my adopted country.

As you can guess, MI5 followed me everywhere I went during these six weeks. In Toronto, where I started this trip in late May, I was spoken about by one youth to another with the words "hes an idiot", to which the other replied, laughing sympathetically, "good luck to him".

A couple of days later I went to Montreal and stayed at the YMCA downtown. As you can guess (this is all so predictable, isnt it?) MI5 followed me there and bugged my room at the YMCA. Not only that, but they managed to set-up an instance of "newscaster reaction" from a local television station; while I was watching a Vermont TV news programme on the set in my room, the woman reporter said, "well theyre just tired and they want to go home", which sounds like a pretty unprofessional thing to say until you realise she was trying to say of me that I was the one that was supposed to be tired, and they (ie MI5) wanted me to go home to the UK.

On the bus journey across the North American continent, it was quite clear that MI5 were following me every step on the way. For the first part of the journey they actually put someone on the bus with me, a youth who said at me "that guys paranoid" and tried to incite other passengers to attack me. I stopped for a couple of days in Winnipeg in central Canada, and on leaving the town heard on the radio a female presenter ranting about "insanity! insanity!". It is very tiring travelling such a long distance by bus; I took the journey in two steps, each of about 36 hours; and it is especially tiring when you know MI5 are watching you and harassing you every step of the way.

When I finally got to Vancouver, MI5 instituted the usual harassment, in very short order. I was surprised how quickly they were able to induce hatred towards me in elements of the general populace; the Security Service must have employed a number of agents and serious resources in a very short period of time; and for no real gain, because I havent been back to BC for almost five years, so all their "work" appears to be for nothing. In downtown Vancouver a street person said in front of me, "theyre all talking about him". For a few days I was staying at Pauls Guest House (345 W.14th Ave); on the day I left, the owner Paul shouted at no-one in particular, "hes going to Victoria" - which was quite accurate, I was indeed going to the provincial capital Victoria on Vancouver Island. But I had not told anyone at the guest house where I was going; I had only mentioned to my parents back in England on the phone that I was going away from Vancouver for a few days. Which leads me to suppose that MI5s bugging of the phone in my parents house yielded the "intelligence" that I intended to visit Victoria, and they had passed the information on to Paul.

When I got to Victoria it was again obvious that the persecutors were "doing their stuff" there as well. On the street I was identified as being English, although I had not said anything so my accent hadnt given me away; and returning by ferry to the mainland, I was abused by a Canadian woman who said, "hes a nutter! you can run but you cant hide". During my years in Canada I have never heard the word "nutter" on any other occasion; I do not think it is part of Canadians vocabulary; so the Canadian woman on the ferry, who was obviously talking about me, must have been supplied with this word by the English persecutors. And once I got back to Vancouver, staying at the Austin Hotel on Granville St, I listened to a conversation in the apartment block directly opposite, and a man saying, "hes paranoid, so thats as bad as it can be, so why are they doing this to him?".

Holiday in the States, August 1995

By 1995 I was living in Canada, and in August I went down the eastern seaboard to Florida and as far as Key West by car. As you can guess (this is all so boring and predictable, isnt it?) MI5 followed me every step of the way. I can see in retrospect that this must have been quite easy for them as they had my car bugged, both on the inside to listen to anything that was said and what radio station I was listening to, as well as what must have been a tracker device installed to track it across long distances.

The first city I visited was Philadelphia. In the old Congress Hall where the first US Congress assembled, the woman guide started referring to my situation, saying that "all these people in Europe were watching it", and they were "a little paranoid" at this 18th-century experiment in democracy. Also I had recently written a newsgroup post where Id described a (female) poster as "wet-nosed" (implying "canine"), and a young girl in Philadelphia remarked, "so he thinks were dogs?" There were two or three more incidents during this holiday in the eastern States, including a radio station down near Miami, showing "they" had tracked me all the way there, and were bugging the inside of my car; but I didnt record the details and Ive forgotten some of it now. Also down in Miami Beach a French tourist in a lift expressed support for me with the words, "cest incroyable" ie. its incredible, meaning that MI5s well-known actions against me were beyond belief.

To go back a bit, in about May/June 1995 Id visited New York, again by car, and was insulted several times by people using the same words that had been used against me in England. In Central Park, and elderly Englishman (not a real gentleman - but then the Engish view of themselves as "gentlemen" etc is quite laughable) looked at me and said "idiot". And while I was eating in a streetside restaurant a New York youth started laughing and said something like, "I cant believe it, hes actually here" - I think that was because I had had an expressed wish to visit New York for some years before this, although after this visit I wont be going there again for a very long time.

Visit to Poland December 1995/January 1996

In December 1995 I flew (BA again, unfortunately - every time Ive flown BA one of these incidents has happened, presumably MI5 is happier setting up harassment on British-domiciled carrier) from Montreal to Berlin and travelled on to Poland to visit family. MI5 naturally harassed me in Poland during my brief stay. They followed me around and got Polish people to take part in the harassment. In one case two Polish youths talked in front of me saying in English (with marked Polish accents), "fucked up men, fuck you". There were also other incidents which I dont remember too clearly since it was some time ago.

The return flight connected through Heathrow, and in the transit lounge MI5 again set-up harassment against me. In Poland they were talking their abuse in English, and in London they set Polish people after me to speak in Polish; they heard me on the phone to my father, and said "a wiesz ze to Polski wariat", in an almost sympathetic, inclusive fashion (translation. "you know hes a Polish nutter"). Once on the flight to Montreal I was again set upon by two English youths, one of whom spoke and the other listened. The aggressive "fat bastard" youth said, "if he wants to be a wanker" (its my fault theyre harassing me, you see), self-justification that "hes a nutter" (so we have to keep on abusing him, because hes ill), as well as talking about the town in Poland where I had been staying. He also said, "he doesnt know who we are", but as already remarked in a previous article, that was at best a half-denial of my guess expressed in internet newsgroups that the people after me were MI5 - if anything its a half-confirmation rather than a half-denial.

These incidents are still going on. You can hear digitised audio files of abuse on a BA flight to Berlin in 1998 on the Web at address

On this flight they were again attacking my mental health; "paranoid, hes paranoid" and "nutter" are discernable. The last "during travel" contact was at Ottawa Airport on 21 July 1998, when "Alan Holdsworth" the psychopath MI5 agent, dressed as a vagrant, was pacing aggressively in the departure area. In three weeks I will again be travelling to Europe; we will see what fresh acts of molestation MI5 perpetrate during this trip.

MI5 are Afraid to Admit They're Behind the Persecution

MI5 have issued a formal denial of any involvement in my life to the Security Service Tribunal, as you might expect them to; but, more importantly, the persecutors have never denied that theyre from the Security Service, despite several years of accusations from my corner on usenet and in faxed articles. I am not surprised that the Security Service Tribunal found "no determination in your favour". I am however a little surprised that the persecutors have refused to confirm my identification of them; by doing so, they implicitly admit that my guess was right.

"No determination in your favour" says the Security Service Tribunal

In 1997, I made a complaint to the Security Service Tribunal, giving only the bare outlines of my case. I do not think it would have made very much difference if Id made a much more detailed complaint, since the Tribunal has no ability to perform investigatory functions. It can only ask MI5 if they have an interest in a subject, to which MI5 are of course free to be "economical with the truth". A couple of months after my complaint the Tribunal replied that;

The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint.

Needless to say this reply didnt surprise me in the slightest. It is a well established fact that the secret service are a den of liars and the Tribunal a toothless watchdog, so to see them conforming to these stereotypes might be disappointing but unsurprising.

It is noteworthy that the Tribunal never gives the plaintiff information on whether the "no determination in your favour" is because MI5 claims to have no interest in him, or whether they claim their interest is "justified". In the 1997 report of the Security Service Commissioner he writes that "The ambiguity of the terms in which the notification of the Tribunals decision is expressed is intentional", since a less ambiguous answer would indicate to the plaintiff whether he were indeed under MI5 surveillance. But I note that the ambiguity also allows MI5 to get away with lying to the question of their interest in me; they can claim to the Tribunal that they have no interest, but at a future date, when it becomes clear that they did indeed place me under surveillance and harassment, they can claim their interest was "justified" - and the Tribunal will presumably not admit that in their previous reply MI5 claimed to have no interest.

"He doesnt know who we are"

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly. What he was trying to do was to half-deny something he knew to be true, and he was limited to making statements which he knew to be not false; so he made a lukewarm denial which on the face of it means nothing, but in fact acts as a confirmation of my guess of who "they" are.

On one of the other occasions when I saw the persecutors in person, on the BA flight to Toronto in June 1993, one of the group of four men said, "if he tries to run away well find him". But the other three stayed totally quiet and avoided eye contact. They did so to avoid being apprehended and identified - since if they were identified, their employers would have been revealed, and it would become known that it was the secret services who were behind the persecution.

Why are MI5 So Afraid to admit their involvement?

If you think about it, what has been going on in Britain for the last nine years is simply beyond belief. The British declare themselves to be "decent" by definition, so when they engage in indecent activities such as the persecution of a mentally ill person, their decency "because were British" is still in the forefront of their minds, and a process of mental doublethink kicks in, where their antisocial and indecent activities are blamed on the victim "because its his fault were persecuting him", and their self-regard and self-image of decency remains untarnished. As remarked in another article some time ago, this process is basically the same as a large number of Germans employed fifty years ago against Slavic "untermenschen" and the Jewish "threat" - the Germans declared, "Germans are known to be decent and the minorities are at fault for what we do to them" - so they were able to retain the view of themselves as being "decent".

Now suppose this entire episode had happened in some other country. The British have a poor view of the French, so lets say it had all happened in France. Suppose there was a Frenchman, of non-French extraction, who was targeted by the French internal security apparatus, for the dubious amusement of French television newscasters, and tortured for 9 years with various sexual and other verbal abuse and taunts of "suicide". Suppose this all came out into the open. Naturally, the French authorities would try hard to place the blame on their victim - and in their own country, through the same state-controlled media which the authorities employ as instruments of torture, their view might prevail - but what on earth would people overseas make of their actions? Where would their "decency" be then?

This is why MI5 are so afraid to admit theyre behind the persecution. Because if they did admit responsibility, then they would be admitting that there was an action against me - and if the truth came out, then the walls would come tumbling down. And if the persecutors were to admit they were from MI5, then you can be sure I would report the fact; and the persecutors support would fall away, among the mass media as well as among the general public. When I started identifying MI5 as the persecutors in 1995 and 1996 there was a sharp reduction in media harassment, since people read my internet newsgroup posts and knew I was telling the truth. The persecutors cannot deny my claim that theyre MI5, because then I would report their denial and they would be seen as liars - but they cannot admit it either, as that would puncture their campaign against me. So they are forced to maintain a ridiculous silence on the issue of their identity, in the face of vociferous accusations on internet newsgroups and faxed articles.

Have MI5 lied to the Home Secretary?

In order for the Security Services to bug my home, they would either have needed a warrant from the Home Secretary, or they might have instituted the bugging without a warrant. Personally I think it is more likely that they didnt apply for a warrant - I cannot see any Home Secretary giving MI5 authority to bug a residence to allow television newscasters to satisfy their rather voyeuristic needs vis-a-vis one of their audience. But it is possible that the Security Service presented a warrant in some form before a home secretary at some point in the last nine years, for telephone tapping or surveillance of my residence, or interception of postal service.

So the possibility presents itself that a Home Secretary might have signed a warrant presented to him based on MI5 lies. Just as MI5 lie to the Security Service Tribunal, so they might have lied to a Home Secretray himself. MI5 and MI6 are naturally secretive services former home secretary Roy Jenkins said, they have a "secretive atmosphere ... secretive vis-a-vis the government as well as [enemies]". Jenkins also said he "did not form a very high regard for how they discharged their duties".

It was only a few years ago that MI5 was brought into any sot the extraordinary thing is that British media organisations like the state- and taxpayer-funded BBC take such an active part in the MI5-inspired campaign of harassment. We have after all heard of MI5 trying to bribe broadcast journalists; but surely there must be a substantial number who are not bought or blackmailed by the Security Services, and who take part in the "abuse by newscasters" of their own volition? The BBC is supposed to be independent of the government of the day as well as the Establishment in general. While perhaps it is childish to think that the BBC is anything other than effectively state-controlled, the degree of collusion between the BBC and the British Secret Police MI5 is something you would not find in many countries. Individual tele-journalists in other countries would have enough self-esteem not to allow themselves to be controlled by their secret police - seemingly, BBC broadcasters like Martyn Lewis and Nicholas Witchell have such a low opinion of their employing organisation that they see no wrong in dragging the BBCs no-longer-good name through yet more mud, at the mere request (whether supported by financial or other inducements) of the British secret Police, MI5.

And when challenged, these broadcasters LIE about their involvement, with just as little shame as MI5 themselves. The BBCs Information dept have said that;

"I can assure you that the BBC would never engage in any form of surveillance activity such as you describe"

which is an out-and-out lie. Buerk and Lewis have themselves lied to their colleagues in the BBCs Information department over the "newscaster watching", but unsurprisingly they refuse to put these denials in writing. Doubtless if the "newscaster watching" ever comes to light, Buerk and Lewis will then continue to lie by lying about these denials. So much for the "impartial" BBC, a nest of liars bought and paid for by the Security Services!

It is obvious that the persecution is at the instigation of MI5 themselves - they have read my post, and only they have the surveillance technology and media/political access. Yet they have lied outright to the Security Service Tribunal. Similarly, BBC newscasters Michael Buerk and Martyn Lewis have lied to members of their own organisation. The continuing harassment indicates they are all petrified of this business coming out into the open. I will continue to do everything possible to ensure that their wrongdoing is exposed.

MI5 Persecution Update: Friday 11 June, 1999

Harassment in a pub in Clapham, Tuesday lunchtime

Once a month, or once every other month, I meet a Polish friends of mine who lives in Clapham North, and sometimes we go to a particular pub near where he lives. The last time was some two months ago; I did not have my minidisc-walkman with me, and consequently was seriously harassed by people MI5 had instructed to harass me, in the pub.

This Tuesday, 8 June 1999, we again went to the same pub for a pre-meal drink. This time I did have my minidisc-walkman with me. As you can guess, we were followed into the pub by a couple of young people (Im getting older and older - isnt it funny how the MI5 agents all look young these days?). They started talking about my situation, in particular some travel I had booked the previous day. Unfortunately, they were talking fairly quietly, and my minidisc didnt pick up their speech.

MI5s schizophrenic reasoning is that simultaneously I am very important and worthy of their acts of persecution, and I am also totally unimportant and their abuse of me "doesnt matter". Perhaps they should test their agents and managers for obsessive personalities or psychotic features in the same way as employees are drug-tested. MI5 might lose their "worst cases" employees if some psychological testing were applied to their recruitment procedure.

Toothless Watchdogs. What a Surprise.

Recently I have been engaging in communications with two watchdogs, the Security Service Tribunal which deals with complaints against the security service (and always clears MI5 of any wrongdoing), and the Data Protection Registrar, which is mandated to investigate misuse of personal data held on computer.

In a letter to Nick Brooks, Security Service Tribunal secretary, dated 20 April, I asked him if the Tribunal, as an allegedly independent body, had the means to investigate complaints against MI5 other than asking MI5 to themselves investigate complaints. To my disappointment, his reply two weeks later answered the question only indirectly, in the negative. Whatever the reader might think of the merits of the case I have been putting before you in faxed articles this last year and half, you will surely recognise that it is a significant anomaly for the Tribunal to have no independent means of investigating complaints, particularly given the view expressed even by previous home secretaries that the security services are untrustworthy.

MI5 Persecution: No Justice for the Victims of MI5

In a previous article I detailed the similarities between the current MI5 Persecution in England, and other historical instances of similar persecution, notably that by the Nazi Germans in the thirties and forties. The Germans persecuted first the mentally ill, the epileptics and those suffering from schizophrenia, then moved on to racial groups; in todays Britain the persecution is again directed at those with mental illness, which the British in their cowardice find easier than taking on racial groups as the Germans did. But just as in Thirties Germany there was no recourse against a malign and omnipotent state, so the MI5 Secret Police in the modern British Fascist State allow no justice for their victims.

No Recourse Against the Security Services Illegal Harassment

It has become apparent to me over the last nine years just how loaded the dice are in todays Britain, a fundamentally fascist country which masquerades as a democracy. Britain is a democracy in name only; the Establishment, the defence and MI5 secret police are always there, regardless of which party has been voted into power most recently - and from "New Labours" conduct in office one finds it difficult to tell them apart from Old Tories, in their crackdowns on the sick and vulnerable in society.

In thirties Germany the victims of the Nazi regime had no legal recourse against their State oppressors; and in todays Fascist British state, the victims of the Establishment and its MI5 Secret Police similarly have no recourse against the illegal state-funded and organised oppression. There is supposed to be a mechanism for dealing with MI5 crimes, in the shape of the Security Service Tribunal and Commissioner; yet these have never found favour of a plaintiff. One might as well ask the Nazi SS to investigate crimes against epileptics or Jews as ask the Security Service Tribunal to investigate MI5 crimes against British citizens; it is quite obvious what the answer is going to be, regardless of what you say to them, and what evidence you provide. The Tribunal and Commissioner are a mere formality, a whitewashing body to give the Secret Services a veneer beneath which they hide their shabby criminality.

"Institutional Racism" and Bigotry in the Metropolitan Police

The recent inquiry into the racist murder of Stephen Lawrence found clear evidence of systematic and deliberate racism in the Metropolitan Police, which cannot have surprised anyone. Commissioner Sir Paul Condon accepted a somewhat lukewarm definition of institutional racism as being "unconscious". In truth, and this truth must surely be obvious to anyone who has any familiarity or encountered the great British police, the Met has not just "unconscious" racism, but very clearly "conscious" and deliberate racism, of the kind that would have done Thirties Germans proud. And it is a bastion of such open racism - when many other parts of society are learning to live in a multicultural environment, the Met is still living in the past in its attitude to the minorities.

But in addition to the systematic racism confirmed by the Lawrence inquiry, there is also something much more relevant to this case, which is systematic police bigotry against the physically and mentally disabled, which I personally have experienced in my dealings with the police over the years. You cannot expect equal treatment if you are mentally disabled. I tried to make a complaint to the police in 1995 about the harassment I had been subjected to for several years. As soon as they found out I had mental illness, they refused to even talk to me. I tried again in March 1999; the police made various threats to me, while ranting about "your paranoid rubbish" in reference to the complaints expressed to them.

The police refusal to do the job they are employed and paid to do is extremely serious, particularly as this case is highly important, indeed key to the whole issue of British self-perception at the end of the 20th century and the beginning of the 21st century. Britain has lost much in the last fifty years - it has lost an empire, it has lost its self-respect and its identity as a people. If the MI5 persecution finally makes it into the light and the Security Services are seen for the rather cheap bullies their behaviour indicates, it will have a massive and harmful effect on British self-perception in the new century.

Security Service Tribunal - Blatant Whitewashing

A few weeks ago I spoke on the phone to Nick Brooks, the Secretary of the Security Service Tribunal, which is supposed to deal with cases of MI5 transgression. I asked him if the Tribunal had ever found in favour of a plaintiff and against the Security Service. He answered that as far as he knew, it had not.

I also asked Mr Brooks if the Tribunal had any means of investigating allegations of criminal activity by MI5, other than asking MI5 themselves if they had engaged in such activity. His rather circuitous written reply states that the 1989 Security Service Act provides that "it shall be the duty of every member of the Service to disclose or give to the Tribunal such documents or information as they may require for the purpose of enabling them to carry out their functions under this Act". Which is a very round-about way of saying - "No" - the Tribunal has no way of investigating MI5 crimes - None At All.

Setting up the S.S. Tribunal, and creating a Security Service Commissioner, was really an act of falsehood by the government. It is generally recognised that MI5 are out of reach of the normal criminal justice system - the police, as we have seen, have no intesot answer to the government; in a previous article I quoted Roy Jenkins speaking of "a secretive atmosphere.... secretive vis-a-vis the government as well as [enemies]", and a "lack of frankness" from MI5.

If the government wanted to, it could reform the secret services and ensure they acted in conformance with the laws which have been enacted for them in the last ten years. But apparently the present government does not see any need to ensure security service compliance with the law. As noted above, the regulatory machinery for MI5 is deliberately weak; the Tribunal has no independent means of investigation, and it is simply a waste of time complaining to the Tribunal or Commissioner.

Every so often, fresh revelations come to light of secret service transgressions. We have heard from Shayler that MI5 bugged Jack Straw and Peter Mandelson; we have heard from Peter Wright that MI5 plotted to see Wilson ejected from office; yet so closed is the system of government that the law is never enforced against MI5 when they "bug and burgle" everyone from politicians to ordinary citizens.

No Justice from the Legal System, either

Britain has a civil and criminal justice system which effectively limits many complaints from being heard. For a civil complaint to be brought before a court, you need a solicitor willing to act on your behalf. Supposedly it is possible to represent yourself as a Litigant-in-Pthe basis of being "frivolous and vexatious" or "disclosing no cause for action in law". This is exactly what happened to me in 1997 when I twice tried to take the BBC to court for spying on me in my living room at home; my case was twice struck out, and on the second occasion an order was made against me that I could not bring further civil litigation against the BBC without leave of the court.

As the reader can guess it is quite impossible for a person with schizophrenia, who complains about the secret services and media interfering in his life, to find a solicitor willing to represent him in legal action against the persecutors. I have quite a lot of evidence of the continuing persecution which I have posted on the website, even if the evidence is quite tentative and perhaps open to varying interpretations. But I have tried several firms of solicitors; some of them have acted unprofessionally and abused me; all of them have refused to represent me. My psychiatrist gave me the name of the firm of Bindman and Partners in central London, and I have approached them twice. On each occasion they refused to accept my instructions. Plainly the problem with Bindmans, which they have admitted, is their bigotry against mentally disabled people; yet this is not just something that is wrong with Bindmans, it is something that is wrong with the legal system as a whole, since the legal system necessitates finding a solicitor willing to represent you in order to bring a case to court, but it does not have a mechanism for providing a lawyer in the case where no solicitor is willing to take on your case. So the British legal system is such as to prevent cases such as mine from ever receiving an airing in a court.

So much for the civil courts. But the criminal justice system is no better. Two years ago the Protection from Harassment Act came into force. But again, while the Act is all very well on paper, in practice it is unenforceable in my case, since it would require Police action to see the law implemented, and if the police cannot even be trusted to conduct a murder investigation competently (in the Lawrence case), then what chance is there of their investigating complaints against the Security Service? Of course, it would be possible for me to personally issue proceedings through a private prosecution either against MI5 themselves, or against one or more of their media tools; but here we see the same problems as with the civil courts, because first of all I would have to find a lawyer willing to act on my behalf. Litigants-in-person do exist in the criminal courts, but the Attorney General can bring such a prosecution to an end by taking it over and entering a plea of "nolle prossequi"; and I suspect that if I were to bring a private prosecution against either MI5 or one of their media tools, then this is exactly what would happen.

So much for British justice. But if anything the wrongs that have been perpetrated on me by the British justice system are quite mild to what others have suffered. Others have been wrongly convicted based on police evasions and lies, and spent many years in jail based on false charges. I should count myself lucky that despite the best efforts of the MI5 secret police, I have not acquired any criminal charges or convictions; which shows that for all their resources and influence, and the clear imperfections in the British legal system, there are still limits on how much subversion MI5 can achieve.

The latest in a long line of injustices

A comment I heard during the recent scandal of the police mishandling of the Lawrence murder investigation is that "its not as if the police themselves murdered him". This is not a particularly wise statement to make about the case, since it could be argued that the four alleged murderers were aided in their crime by the expectation that the police would deliberately botch the investigation - which of course is exactly what the police did.

But in my case, this would be a completely inaccurate thing to say - since the MI5 secret-police have expressly been trying to nine years now to see an end put to my life, either by having me incarcerated and my liberty ended, or by forcing self-termination on me. It is exactly as if the secret police "themselves murdered [me]", since that is what their aim is in their campaign against me.

The public has heard of instances of police mishandling of cases, of police manufacturing evidence, lying in court, extracting false confessions to clear up crimes, et cetera. Various instances of extra-legal activity by the secret services have also come to light in the last few years. The unhappy truth is that what MI5 have been doing to me for the last nine years is really nothing out of the ordinary for them. To me it seems unbelievable that this sort of systematic campaign of harassment, which thousands and thousands of people in this country and abroad are well aware of, could exist for such a long period of time with the media maintaining "omerta". But my case is not the first such instance of persecution by the "British secret police", and judging by the lack of any real controls on MI5, I very much doubt it will be the last.

MI5 Have Systematically Destroyed My Life

This is getting depressing. From the feedback Ive received, the recipients of these faxes are tired of hearing my complaints, and in truth I am tired of sending them. The reason I havent yet ceased sending faxes is because I cannot think of any other effective means of replying to MI5s actions against me, and I feel I have to do something to try to defend myself. Three/four years ago I got the MI5 harassment out of my system by posting about it on Internet newsgroups, and for a few months this tactic was quite effective - I received (and indeed still do today) support from newsgroup regulars, and felt I could make my voice heard and break the MI5 monopoly on access to the British media. But that was years ago, and today nobody gives a tinkers cuss about my internet posts - so I have sought to escalate matters by communicating directly with the politicians who allegedly say how this country is supposed to be run.

Of course, its quite expensive to keep up a campaign of fax messages for many weeks. Each set of faxes takes approx 50 hours to send over the weekend, and costs perhaps 35. My phone bill for the last quarter was 350. These figures are naturally insignificant compared to what MI5 have been spending against me over a similar period. It also takes a lot of time and energy to create a new article every week, and try and find new and fresh aspects and viewpoints on MI5s persecution of me. I am beginning to run out of both new topics and energy to write these articles.

So I have a suggestion to put before the MI5 persecutors who have been wrecking my life since 1990. In a few days time I will be going on holiday to Poland and Germany, for a couple of weeks. Previously, almost every time I have travelled by plane, or gone anywhere on holiday, the MI5 "wreckers" have been most assiduous in destroying these trips. My suggestion is; if MI5 leave me alone on this next trip, I will cease transmitting these articles. If, however, there are any clear instances of harassment (and I am very capable of recognising MI5 harassment when I see it), then I will make public these instances and publish any recordings I may make of them, and, unwillingly and unhappily, continue the articles.

Read about the MI5 Persecution on the Web

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Refuse to Allow me to have a Normal Life

Its kind of difficult to contemplate having a normal existence when you know your entire house is bugged from top to bottom, for audio and, very unpleasantly, video; when your employment is systematically destroyed, over and over again; when every time you leave the country your travel is disrupted by MI5 plants on the plane yelling abuse at you..... you get the idea. I would like to have some semblance of a normal life, like my Polish and English friends do. But MI5 have made this impossible, and they have leached massive resources from the taxpayer to institute a life not worthy of the name on me.

A few years ago MI5 were very open about their aims in persecuting me. They were shouting "suicide" at me, both in Canada where I lived at the time, and during my occasional visits to London. You cant get much clearer than that. There have been instances as recently as a few weeks ago of this intention being voiced by their side; on 15 April 1999, a woman at the next ticket counter at the Royal Festival Hall said;

"it would kill it, you know, it would just be overkill... they can't stop can they"

meaning that "they" were trying to "kill it" i.e. me and they "cant stop". The audio file is at;

I wonder why they "cant stop". Nobody (who doesnt know already) believes my claims - so what difference would it make, if they were to "stop" persecuting me? Perhaps what this persons remarks indicates, is the depth of the obsession MI5 have with this case. They have chosen at random a person from the general population, and done their worst to ruin my life. What is wrong with these people, that they persecute a national of the country whose citizens they are supposed to protect?

No Chance of a Harassment-Free Job

Since the harassment started in 1990 I have had three jobs, the first near Guildford, the second in Oxford, and the third overseas in Canada. All three jobs have been systematically destroyed by MI5. It is so ironic that MI5 employs a team of agents, each well compensated for their efforts, to persecute just one person paid a mere fraction of what they get for their "work". In fact, it is a joke that MI5 is allocated resources for this sort of effort. If this area of government were run along commercial lines then MI5 would be very rapidly closed down, they produce nothing of any value, instead spending their time obsessed with the bugging and surveillance of their former employees like Shayler, dangerous subversives like Straw and Mandelson, and "threats to national security" like yours truly.

Applying for my first post university job

When I was applying for my first post-university job in the closing months of 1990, I found at two or three job interviews that MI5 had got there ahead of me. Interviewers knew what words to repeat from what had been said at my home recently; MI5 had supplied them with words to hurt me, and the "British secret police" were trying to wreck my job search and discourage me from joining the world of work. This and the continuing harassment in the media and by the public meant that the search for a job took very much longer than it would ordinarily be expected to take for a person with my qualifications.

With my first job near Guildford came the knowledge that MI5 were doing everything possible to make me lose the job. Despite their efforts I managed to stay in work for ten unhappy months, during which they made very clear to me that they were bugging my workplace, my accomodation in Woking, my car, my home..... and they also made clear that they had "got to" my employer in Guildford.

Employment with Oxford

I was able to find a new job, with Oxford Computer Training Services (now ARIS/Oxford), quite quickly. But it became very clear, very quickly, that MI5 were treating this job the same as the first; they tried to get the other employees and in particular the managers to attack me. It was plainly MI5s intention that I be sacked fro this job. But I was not sacked; instead, after almost a year of abuse from OCTS managers, I was forced to seek medical help, and had to take two months off for medical leave. OCTS MD Hugh Simpson-Wells was motivated in keeping me on by the fear that if he sacked me, then I would take him to court for the treatment OCTS managers had meted out to me during 1992.

Emigration to Canada

When I emigrated to Canada in 1994, I did think that perhaps MI5 would leave me alone, given that I had made the effort to leave the UK and try to find a new life overseas. I could not see any reason why they would continue to harass me over in Canada. But clearly the MI5 agents had their salaries to think about, since continue to harass me they most certainly did, at my home in Ottawa, and by getting fellow employees to speak against me, as had happened with previous jobs in the UK.

MI5 are denying me a future in work

Former Chief Constable of Devon and Cornwall John Alderson had this to say regarding MI5's activities;

"MI5 is not under the same restraints as the police. They infiltrate organisations, people's jobs and lives. They operate almost like a cancer."

Currently I am on disability, and I can see that MI5 are denying me a future in work. It would be an insult to logic for me to return to work and find a job, in the knowledge that an entire team of MI5 agents, paid in total many times what I would be earning, would have the objective of seeing me "done down" in the employment, and ejected from the place of work. This situation is completely wrong and nonsensical - I would very much like to have a job, but MI5 are preventing me from even thinking about returning to work. The culture of secrecy in MI5/MI6 means there is no objective oversight of their expenditure, when external oversight and greater transparency might lead to wasteful and illogical operations such as that against me being shelved.

Watched and Harassed at my Home and Accommodation

As you will know if you have been reading these articles, MI5 have watched and harassed me at my home, and at every accommodation Ive had since 1990. Theyve also watched me at neighbours houses in London, and at short-term accommodation such as hotels and bed-and-breakfasts. They have used the "words" gained from these watching activities against me, by passing these words on to other people such as OCTS managers for them to make clear that I am being watched where I live.

Harassed at rented rooms in Oxford in 1992

This was at its worst in 1992 in Oxford, where during the week I lived at rented accommodation in Oxford, and at weekends returned to my parents home in London. I was being severely harassed by managers at my place of work, OCTS; and it was clear from the things they said that they were being supplied by MI5 with details of my home life, that they were being supplied with words to repeat at me.

In 1992 I moved house in Oxford many times, living at a total of five rented accommodations in ten months. In January I started off living in a rented room at Headington near the ring road / A40 intersection; then when it became clear that house was being bugged, moved to a rented room in Botley, some miles away. It was at the house in Botley that I had an "interactive watching" experience with Martyn Lewis while he was reading the news; I threw a term of abuse at him; he first flinched, then gave a gsult of what I had just said, he was no longer "on my side".

So I moved house again. This time to a place in Cowley, near the Rover car works, where I stayed for a few weeks. Because of continuing harassment at work, I soon moved from this accommodation, to yet another rented room on Iffley Road. By this time I was very ill and being abused continuously at work. Again, MI5 followed me to the rented room on Iffley Road, and created new instances of "newscaster watching". There was a television in the room which I watched, and as you can guess the newscasters got at me when I was watching the television. Also once I was assaulted, if thats the word for what happened, on leaving the house; a youth grabbed me by the coat lapels, roughed me up a bit with various terms of abuse. I did not report this assault to the police, because what was happening to me at work was very much worse, and nobody seemed to think that that was worthy of being reported to the police. Later that day at work, Alex G, a fellow employee, said "I heard he was assaulted".... I had not told anyone at work about the incident that morning..... so once again it was made very clear that MI5 were watching my rented accommodation and giving information about what was going on there to managers at work.

So I moved house yet again in late autumn 1992, this time to a rented room in a large house on Woodstock Road. I stayed there for several weeks as the situation at work deteriorated due to OCTS managers abuse, until I was forced to take sick leave from work for two months and attend hospital as an outpatient; at which point I gave notice on the room, and returned to London.

MI5 continued to harass me after the diagnosis of serious illness was made. As reported previously, they harassed me on a flight to Spain in December 1992; and in 1993, when I returned to live and work in Oxford, they again bugged my rooms, as well as my workplace, although the intensity of the harassment was very much less than in 1992.

Watched, followed and harassed in Canada

It dismayed me to find that MI5 would not leave me alone after I had settled in Canada. In January 1995 I rented an apartment at the Bayshore complex in Ottawas west end. For some weeks there was no sign of the "buggers". But then it started all over again. They first bugged my car, which had a car alarm installed - the alarm went off two or three times in a single evening, and the following day gave a signal that the car had been broken into. Then they bugged my apartment, and in particular they installed bugs on the phone line in my apartment.

In September 1995 I moved to a new apartment in Ottawas Bytown Market area, the restaurant and entertainment heart of Canadas capital. This proved a serious mistake. In the west end I had been fairly distant from the centre of town where MI5 concentrated their efforts at turning people against me. In the Market area it was much easier for the persecutors to motivate people to harass me, and over the next couple of years there were frequent instances of harassment by the general public.

From 1995 I had some Polish friends in Ottawa, and as the reader can guess, MI5 have spent much effort trying to break up this friendship. They supplied various things about my home life to these friends, for example where I was living in the Market, directly over the road were the studios of a music radio station, which you had to "look up" to see; and MI5 told these friends that I was "looking up" to see the radio station; so the friends then replayed these words back to me, that I was "looking up". MI5 have also made various sexual slanders against me, and these friends also unwittingly replayed some of the words they had been imprinted with by the MI5 persecutors.

MI5 Will Never Allow Me to have a Normal Life

I have heard many excuses as to why MI5 continuously prevent me from having a normal life. We are told that MI5 are defending the country against a tere to zero.

When I have travelled abroad, they always put their people on the flights, on the journeys I undertake, to continue the harassment, so that I am put off further overseas travel, and chained to my home in London. Yet even this is illogical, because when I lived in Canada, they would still put people on flights back to the UK.... and what possible reason would they have for doing that? Perhaps the truest words to describe the MI5 persecution is that reason has nothing to do with their activities - sane people do not behave in the way the MI5 British Secret Police have been doing.

Summer 1999 - more MI5 harassment?

In only a few days time I will be going to Europe again. This time I have deliberately chosen to travel by a non-UK airline; so we will see if they put their paid agents on this foreign carrier, we will see if they try to harass me on this non-British flight.

If they do harass me on this trip to Europe, or if they resume the harassment in London after I return home, then I will continue to report their activities in these faxes. As I said at the beginning of this article, I would very much like to not have to send these articles any more, but that is not my decision to make - it is entirely up to MI5 to cease their pointless persecution of me, once and for all.

Hi,

Do you know about

<http://www.vintagetechnology.co.uk/>

remembering us good old days.

I first started with programming and games in 1981.

That speaks to me :-)

Merry Christmas 2U.

Thanks for the feedback, Uwe! The board is obviously capable of high rates - in fact IIRC 4Mbits/sec is about the maximum to be expected on a 10Mbps ethernet, so your performance is pretty good. Sounds like either a MintNet or driver problem ... perhaps I should take a look at the Linux drivers and see if they're doing anything noticeably different when talking to the hardware.

Maybe for a Riebl card - 10Mbps ethernet is capable of just a bit less than
10Mbps - I have regularly seen 800KB/s TCP throughput on ISA PC cards, and
more than 1MB/s on SUN and PCI-based PC hardware. The theoretical maximum is
for back-to-back frames without collisions, backoff delay and header
overhead is 1250KB/s, so 1100KB/s TCP throughput is a good result.

You're right, I was having a nap. Now I think about it some more, I
believe I saw the 4Mbits/sec number quoted as the approximate total
throughput when you have many multiple transfers going on concurrently,
with collisions & resulting backoffs. A straight ftp with no other
traffic is of course not much like that.

Thanks,
Roger

Sounds like either a MintNet or driver problem ... perhaps I should take a look at the Linux drivers and see if they're doing anything noticeably different when talking to the hardware.

The first place I should have looked was in the mirror. I was doing a transfer to the root directory which (I believe) is not on a regular disk in MiNT. When I changed to a normal directory, in this case in a FAT filesystem, I got transfer rates of 285 kbytes/sec for PC->TT, 300 kbytes/sec for TT->PC, which is a lot closer to what I expected.

But I did turn up something (slightly) interesting in the MintNet driver: it's only using 4 transmit buffers, whereas there's space for 8 (and that's how many the Linux driver uses). One of these days I must try playing with that ...

Roger

Folks, we're down right now. Apparently, my UDS10 has died.

I'm saving up to get a new one - as soon as we're up and running
again I'll post messages all over.

Apologies for the down time, and thanks to everyone for being
patient.

Greetings,

I have 2 Atari Falcon RGB Monitor Adapters for sale/trade.

Both are new in the original package. (Made by Atari especially
for the Atari Falcon 030)

These allow you to connect the Atari Falcon 030 to a RGB monitor.

Not sure what these are now worth, so just make me a cash offer on
one or both.

Or a trade offer for Atari Falcon hardware/software.

Will accept overseas offers if you pay shipping.

Also, be patient for a reply as I don't check e-mail daily.

phantomm@bellsouth.net

Hey Chuck, any further status on this? I was updating the Atari BBS gateway at telnet://rdfig.net (hit x at main menu, a for Atari, then select)   Let me know if you have plans to reopen soon as we are updating the list currently for all the current BBS's, and you are there listed.

I'm slow to knock BBS's off the list. :D

FamilyNet International Newsgate

Some interesting BBS news... this is just to catch you up so that you can go into the BBS's without having to dig for this and can therefore just jump in....

1) Boot Factory - sysop Abdul
(Atari 8-bit BBS, emulation, ATASCII option)
     Running well. Marius (of the fifth BBS to be mentioned here) mentioned thinking about selling his Atari equipment on the message base here. I really hope he didn't.

GAMES ON THE BOOT FACTORY
1. Blackjack
2. Rule Prometheus! (Kingdom)
3. Pro-Zee
4. Keno!
5. Life Expectancy
-. Coal Mines of Midlothian (Selectable from main menu ATASCII needed)

2) Inside The Atari 8 Bit - sysop Steve (Atari 8-bit BBS, Real equipment, ATASCII option) Up and going. Been a little activity on the first message base. The game menu does not seem to be active at this time. However this BBS is known for being possibly multi-channel, so you can have more than one user on at a time, and this is run on the real equipment. Good ANSI screens and menus too for the
non-Atari user getting on this one.

3) Mousenet BBS
(Atari 8-bit BBS, Real Equipment?, ATASCII option)
"11-04-07 BBS Crash"
"sh*t happens, the BBS was crashed the last days and killed all the Boardfiles and my Boot partition. The userist was not deleted. not I have installed an older Backup from 10-03-07 (only the Boardfiles on Partition 5)"

When I checked the message base was not letting me post. So if someone could please let the sysop know if you know him.

MOUSENET has ATASCII cartoons and ASCII picture galleries.

4) Darkforces BBS
(Atari ST BBS run on a Mega ST 2)
UDS-10 (Serial to Ethernel adaptor) is down. Will be back up when a replacement comes.

DARKFORCES, when it comes back up, is a great ST BBS that has a variety of message areas, and many online games. More on this soon.

5) Atari 8-bit Inside - Sysop Marius (Atari 8-bit BBS run on the real hardware)
See the first entry for the Boot Factory. Possibly down for good. :(

6) ST Guild BBS - Sysop Chuck B
(ST BBS run on... ???)
telnet://stguild-bbs.dydns.org/
On Thu, 25 Oct 2007 22:16:19 -0400, Chuck B wrote:
> I have had some problems with over the last few months. I and had to shut it
> down. But if you want I will put it back up right now!! I am going to see
> how things go for a month so give it a try.

Will have to see if he is willing to give this another go. Posted a message on the Atari ST newsgroups to see what the plans are. Hopefully Chuck will reply.

7) Closer To Home - Sysop Tom Hunt (Atari 8 bit BBS run under emulation, ATASCII option)

This long time BBS has been basically up for forever. It has spells where it is down while family uses the computer, so who knows on this one. There is a discussion about Tom Hunt's work at http://www.atariage.com/forums/index.php?showtopic=101584&pid=1310240&st=0&#entry1310240

8) The Grove BBS
(Atari ST BBS run under emulation.) Telnet://shadow.skeleton.org
(Type BBS and then nothing for the password)

Just got on this BBS the other day, looks really promising.

Here are the games...
1. Assassin
2. Galactic Empire 2.41
3. Final Frontier 1.53
4. Space Trader Elite
5. Mount NevereST Trivia
6. Cows 9.0
7. Super Star Trek
8. Death
9. Air Defence 3.8
10. Moria/ST
11. DDST (AD&D ST)
12. Pirate Adventure
13. Ghost Town Adventure
14. Blackjack
15. James Bond: World Domination
16. Trivial Pursuit

PLEASE if you know of any BBS's that are up that are not listed, please let me know ASAP as we are adjusting the BBS list at telnet://rdfig.net (again "X" at the main menu for internet options, then "A" for Atari, then select the Atari BBS on the list. There are broken links, this will be all updated completely soon).

Also don't forget the Atari IRC chat starting at 8 pm CST. (I'll be a late arrival, but plan to be there eventually.) (telnet://irc.ataricchat.net port 800 will take you there, otherwise irc.newnet.net #atari)

Take care!

Probably the right thing to do. I don't remember any serious traffic
coming in over that list.

GFA support is available at www.atari-forum.com if you like forums ;)

cheers,
Matthias

Hi,

Here is a list of servers that seem to be down

<http://www.atari.org/>
<http://www.triple-a-mag.de/>
<http://www.atari-st.lovely.net/>
<http://dhs.nu/>
<http://atariforge.org/>
<http://ihrisko.org/~mikro/>
<http://www.klockars.net/>
<http://cracatek.no-ip.org/>
<http://cip.physik.uni-wuerzburg.de/~ischmidt/>

Something can be done ?

Regards,

FamilyNet International Newsgate

[We are looking for current BBS's of other retro platforms aside from Atari. Please write the E-mail address at the bottom of this message!]

[[This announcement will be the last posting regarding the Atari Telnet BBS Gateway till at least March 2008, so please save this message. The Prison Board BBS is not here to Spam newsgroups, but inform of a FREE SERVICE of the Prison Board BBS to make access to the Atari BBS's and chats much much easier.]]

FANS OF BBS's and Atari chat rooms...

The ATARI GATEWAY has all known Atari BBS's, and a some unknown. To find out which is which, come check it out. :)

There are also links to the Atari IRC chat (which meets at 8 pm CST Thursday, and off and on throughout the week at random times.)

And there is a link to the telnet chat (Which meets at 10 am CST Sunday and 7 pm CST Tuesday, and it good as a message area after that)

All this updated TODAY! icon_mrgreen.gif Merry Christmas to all BBS & chat fans, and please come see what is new at the Atari Gateway...

telnet://rdfig.net

X at the main menu (after you get past all the intro screens) for "Internet" A for the Atari menu
Then select 1 though 11.

Important details and FAQ Answers
- I don't think Inside the Atari 8-bit second line is active, but left there since it is off and on.
- Dark Forces is not currenlty up, but will be VERY soon.
- Some of these BBS's like Boot Factory will output character in a strange order when you type. This is a strange echo effect over telnet that needs to be ironed out eventually. However, you can read fine, and if you just type away, the output will look normal on the other side. it is only messed up on your side of the screen.
- The Prison Board BBS that runs the Atari Gateway can run as low as 300 baud, however, it will take about 45 minutes to get past the intro screens. We are currently working on this.
- The Prison Board BBS has a dialup line in addition to telnet access at 972 329 0781
- The Prison Board BBS is considering adding Atari Newsgroups as well as making areas for other computer enthusiasts such as Commodore and others.

> Thanx. Do you reply sometimes on e-mails ?

I do, but since this summer I have had to attend to some exceptional and not very pleasant matters, so I do not have a chance to sit at a computer as often as before- therefore my replies sometimes come after a considerable delay. Hopefully the situation will stabilize in a few weeks.

> (2x-)

If you are referring here to your recent e-mails I -did- reply to them: there were two in September (I wrote one replay to both on Sep.9th) and one a few days ago to which I have just replied (Dec.23rd). Did not you get them? Maybe some messages have been somehow lost in cyberspace which has happened to me earlier on several rare occasions. It is certanily not my intention to ignore anyone writing to me on a serious subject.

Regards;

Hello,

I release the Version 5.2 from the database program Phoenix with sourcecode.
This version based on the code from Dieter and J�rgen Gei�.

At the momenten there is only a english resource. The docu is in german.

Gerhard

Nice to see Dennis's work from way back finally in use :-)

There's still some German text around, but not enough to make it
unusable for any non-German readers I think.

Cheers!

     Hello Gerhard,

GS> I release the Version 5.2 from the database program Phoenix with sourcecode.
GS> This version based on the code from Dieter and J�rgen Gei�.

Nice gesture to give free the sources. Phoenix still is my favourite
database.

I've only had a short look at the sources but does the "BASE" subdirectory
contain the part that once was sold by ASH as "Phoenix Base"?

     Regards,

          Alexander

Yes, the title form the dialogboxes are in german, because they will used for the hypertext. And the Alertbox also in german.

If someone translate it ...

Gerhard

No worries about translating those texts, but the hypertext would be
well beyond me I'm afraid :-(

Do you want to send me the bits of German from the binaries, or point
me to the right files from the source code?

Hey, Doc.
Can you remove Cold Winter Knights BBS (STinGadel) from any listings it's
currently on?  I've lost the time to do any work on the BBS for now - just
too much stuff to do with my new promotion at work.

I may go at it again sometime in the future, but it's a stalled project
at the moment. :(  It was definitely fun while it lasted...

Thanks kindly and happy holidays, all!

I've seen that, quiet helpful for getting into it, thanks!

The db interface itself is compiled into a lib file, so I think that the Geiss brothers prefer to have that "protected" to some extent.

Regards,

Alexander

With AHDI you can only access the first GByte of such a drive, and with
some drives AHDI will not work at all.
In order to access drives bigger than 1 GByte with their full capacity
you need a Link host adapter, preferably a LINK96 or LINK97, since those
are the only ones that work with any SCSI drive.

Hi,

Did I correctly understood what Mr Jack Tramiel told here ?

<http://dl.free.fr/mVpeiVnYj/jackaboutatari.mov> 2007/12/10

I'm celebrating 25th anniversary of Personal IT since 1981 :)

Is Mr J.T. just only kidding ? Is it his deep conviction ?

I'm wondering ?

Best ATARIan wishes.

The question was, Mr J.T. you left Commodore to look after ATARI.
But then your job became to "destroy" Commodore from the ATARI point
of view. Wasn't it a betray regarding Commodore company you've funded ?
Did you manage a way through being able to join Commodore again ?

He said "My aim, and I won, was to destroy ATARI :-D"
Everybody was amazed, and laughed ...

I'm doing a kind of interpretation, but the full conference is there

<http://archive.computerhistory.org/lectures/impact_of_the_commodore_64_a=
_25_anniversary_celebration_lecture.2007.12_EDITED.wmv>

I can listen to it on my PlayStation 3, in the video section :-)

Regards,

>=20
> Of course JT is joking. Just like Francois's post is a joke.

Mr Jack Tramiel says "My aim, and I won, was to destroy ATARI :-D"

We'll never know about his deep thought, because first everybody
was amazed, and then everybody laughed to laughter, what prevent J.T.
to go further on explanations. We can only guess that after this
assassin sentence, Mr J.T. murmured "We've done a really good job ..."
so far as I understand in the middle of the general enjoyment of
Commodore fans.

That reveals how difficult it was, remembering the past, for Mr Jack
Tramiel to have left his own Commodore company. And what deep regrets
he has both company closed finally, Commodore in 1994 and ATARI in 1996.

So far ATARI is concerned, there's no reason to be so preoccupied
Mr Jack Tramiel, when we figure out today's position of the company.

Best wishes for new year 2008 coming soon :-)

Regards,

Hello,

Does anyone know how to make a screen dump under Spectre CGR (while running in Mac mode) ?

Is there a key combination?
A tool?

Thanks!

Guillaume.

The standard Mac keyboard shortcut for a full-screen dump is
command-shift 3 (apple-shift 3) - that shortcut has been there since
forever, and I'm pretty sure it was still there in System 6 which is
most likely what you're running.

Not sure what the Apple key maps to on the ST, but have a go with that.

Cheers,
Ian

I also have had a transistor pop on me. I had installed a PC power supply onto my stock Falcon after the original went out. Someone told me that the colors for the wires should be the same, so I went with that. Bad mistake. I connected the wires, powered it up (with the top of the case off in case I had to make any other changes), and I heard a loud pop, saw a puff of smoke, and heard half of the transistor hit the wall on the opposite side of the room! Very exciting! Fortunately, the transistor, which was part of the audio system, was easy to replace, and after doing that and connecting the power supply the correct way, everything worked perfectly again.

It was a general statement. If he had said he made a connection and had to
do a run, duck and cover the answer would have been different :). Assuming
he needed to ask. Usually the capacitor is the victim of another component.

Hi Paul,

PM>Kobold 3.5 (I would also buy the 3.51 upgrade)
maybe you don't need to do so.

I just had a look at the README file of the 3.51 version:

==================================zip===
Bei der Version 3.51 und den aktuellen Tools handelt es sich um ein Fresh-Up
zur Version 3.5. Hierbei wurde einige kleinere Darstellungsprobleme mit neuen
MagiX!-Funktionalit�ten sowie Jahr-2000 Probleme behoben.

==================================zip===
That means that they fixed some smaller representation problems
concerning MagiX and Y2K problems.

Und TTsch�
ps

Hi Gerhard,

This is what I have in mvdi.cnf. The card is an ATI Rage Pro but I don't know how much memory it has.

Peter

Does anyone know if the author os Scan-X is still supporting it ?

There is nothing greatly wrong with Scan-X but it would be
nice if it had an update to make it a bit more modern
and Mint friendly.

Peter

hello ! ! !welcome to visit our website: http://www.shoes-ec.com
Our main products : shoes Hoodies T-Shirt Jeans Jacket bags
Electronic and so on

we can supply many popular shoes model,bag,clothes ,bikini,sunglass
and watch and so on.$B!!(BWe can give you products with good quality and
reasonable price! We are looking forward to do business with you. Do
not hesitate and contact with us!

our website: http://www.shoes-ec.com
e have so many good quality and funny products.
we accept paypal,honest suppliers also will save your charges.
LOOKing for some partners,sell products together,you receive
payment,pay us by paypal,we ship to your customers

Our main products are:

Shoes

Nike shoes,such as air Jordan,air force one,Tn,air max 90/93/95/97/2003/2005/2006,shox TL,R4,NZ,Turbo,james lebron,Nike air rift.

Prada,Adidas,Puma,Timberland,Bapesta,G-unit,Ice Cream

Bags
Chanel bags,Louis Vuitton bags,Gucci bags,Hermes bags,Coach bags

Clothes
Lacoste,Seven,Evisu,Levi's,Bape,Red Monkey and so on.

Hoody Jacket Jeans Coat

Watches such as Chael,Rolex...

Suglasses like Chanel,Gucci,Dior...

first : drop ship business
MOQ : one pair up
model Sizes:US8--13 with true sizes.
Package: box+Retro Cards
Shipment: DHL, EMS, TNT, UPS, etc.
Shipping time: in 5 business days
Service:Door to door directly to your clients with guaranteed Shipping.
profit : save the shipping fee and trouble of you to ship the items to your clients
Payment:paypal or western untion
second: bulk business
MOQ : 10 pair up
model Sizes:US8--13 with true sizes.
Package: box+Retro Cards
Shipment: DHL, EMS, TNT, UPS, etc.
Shipping time: in 5 or 6 business days
Service:Door to door directly to your with guaranteed Shipping.
profit : you can get more shoes for you to keep in your store or stock with a little

I really do fancy running the Geoff Crammond classic Stunt Car Racer
again.
 To that end is there anyone here able to tell me how to wire a null
modem cable for that all important link for 2 ST's.
I have a 5 core cable (that used to work fine) with 1 end still on
and wired....the other end was cut by the builders when we had som e
work done about 15 years ago.
I believe 2 wires had to be reversed but which ones?
On this 25 way d plug I have 2,3,4,5 and 7 wired.
Your help will be much appreciated

Isn't this a complex article. You need to cross 4 wires. 2-3/3-2 and 4-5/5-4
and 7-7 is uncrossed.

Didn't actually read it. Do recall thinking the diagram seemed busy. Point was it's very easy to type "null modem" into a search engine. Get lots of info someone has already produced.

Not when its wrong. e.g. here:-

http://en.wikipedia.org/wiki/Ethernet_crossover_cable

it says you can make a token ring cross over cable. You can't.....

Assuming your are correct, and I have no desire to find out if you are, are
you saying no one should ever use Wikipedia because you found an error?

I normally get more than one source for things that might let the smoke out
of my components. The internet like most other things requires a little
common sense. I wouldn't believe one person's posting in a newsgroup either.

Google is a search engine.

I found a number of references for Token Ring crossover cables online,
including some cable stores with them available.  I used 16Mbit token ring
years ago, but never heard of direct connections between machines.  Are
these cables maybe for use in connecting hubs/rings/routers (whatever the
correct device name is for TR) instead of PCs?

My video will be sent to Dave Haynie, who will do the final edit, and then post it to YouTube. The Computer History Museum will edit together their video and eventually post it up to the website at http://www.computerhistory.org

My knowledge of Token Ring is basic from a text book and that memory is
fading. I Was kind of wondering why you'd even need a crossover cable for it
but not enough to research it. Chances I'll ever see a Token Ring let alone
work on one is almost nil. Not too lazy to read what you 2 post though. :)

No, you use straight through cables on up-links as well.....

You don't ever need a token ring cross over cable. You always need a hub
....

Macworld has posted an article of the event. Go to

http://www.macworld.com/news/2007/12/12/innovators/index.php

It's the same Agam Shah article.

Mac Life has posted a blurb about the event at

http://www.maclife.com/article/
time_picks_iphone_for_top_spot_again_and_woz_remembers_the_good_old_days

but when you click on the link to read more of the Commodore 64,
it shoots you over to the article at the InfoWorld site.

From: Cameron Kaiser

References trimmed.

A rough cut should be up shortly at

http://video.google.com/videoplay?docid=504862715223996474&hl=en

I just noticed two typos while scanning the cut. I mistakenly rigged
the date
as 12/11 (not 12/10), and it should be Monte Sereno, not Mount. This
is what
you get for trying to do this quickly, but it takes about nine hours
to
render, transcode and upload, so people can just deal with that for
now.

The quality of the video is not very good because I had only a single
camera,
there was audience activity I could not always get, and there were
glitches
in the PA system. Robert's two camera video will undoubtedly be
better, so
I am not going to lose a lot of sleep over it.

Hi,

The updated *Mini Pack* <http://eureka.atari.org/MacAranym.zip>
now supports

`MacAranym` allows launching on Macintosh with Mac OS X
`MacAranym JIT` allows launching on MacIntel with Mac OS X
`run_x86.sh` allows launching on PC with x86-Linux
`run_ppc.sh` allows launching on Mac _and_ PS3 with PPC-Linux

So Macintosh - PC - PlayStation3 are all supported with
both Mac OS X and Linux.

Merry Christmas 2U.

Hello Peter,

I am not sure of this, but I did buy a new AStra Umax scanner from Homa Systems about two years ago and talked with them about ScanX. Which version do you have? I have the Pro edition and am sure when the Hades was running, I had Scanx working under Mint. What is the problem?

It's been a long time coming (you can blame Halo 3 and my new Nintendo DS), but here it is, scanned and html-ised:

http://www.stickhead.pwp.blueyonder.co.uk/stformat/

Packed full with the following content:

Features
======

The Verdict - We rip Atari's new STE wide open to bring you the definitive report.
Viruses: Are You Safe?
Cracking: How It's Done
Laser Show - A laser printer round-up featuring reviews of the Atari SLM804,

Seikosha OP-105A, Star Laser Printer 8, HP LaserJet II, and Crystal Print Series II.
Lord British Interview - STF talks to the founder of Origin Systems.
GFA Basic Tutorial - Call the operating system or your own C and assembly programs and use windows and drop-down menus.

Regulars
======
News - Reports from the Personal Computer Show, but where are the new machines?
From America - Atari's top dogs play dirty.
Cover Disk
Public Speaking
Desktop - Some help with STOS, boot up from drive B and the Degas file header, among others.
Education Roundup - Learn spanish, learn to spell!
Letters - Controversy surrounding the recent violent games feature and a critic of mainstream MIDI programs.

On Review
========
Virus Killer
Laser Printers - Reviews of Atari's SLM 804, Seikosha's OP-105A, Star's LP8 and HP's Laserjet II.
Megafile 44 - A portable hard disk? Gear!
PC Speed - A hardware PC emulator.
US Software - A round-up of software available in the states including G+Plus, Neodesk, and more.
Quantum Paint II
S.E.U.C.K. - Shoot-Em-Up Construction Kit: Does exactly what it says on the tin.

Art and Noise
==========
Graphics Section
Animation Tutorial - Get to grips with the Cyber series.
TT Graphics
MIDI Mouse
FM Melody Maker
Music Project - An interview with a community project for budding computer-aided musicians.
Voice Assignment - Part 3 of the sequencer tutorial and a little music theory.

Games
=====
Screenplay
Indiana Jones - Lucasfilm's classic graphic adventure.
Interphase
Altered Beast
Hound of Shadow - Preview and interview with the creators of this illustrated text adventure.
Games Special - a look at two distinct software houses in the run up to

Chrimbo.
Continental Circus
Stunt Car Racer
Ferrari F1
TV Sports Football
Rainbow Warrior
Adventuring
Battletech
Space Quest III
Gamebusters - Tips include: Forgotten World, Rick Dangerous, Double Dragon and more!

All feedback thoroughly appreciated, it really does spur you on to do some more, you know! Let me know what you think of the new layout. How does it look on Atari machines?

Happy reading!

Version 3.94 of TeraDesk open-source desktop for the 16-bit and 32-bit lines of Atari computers is available at:

http://solair.eunet.yu/~vdjole/teradesk.htm

This release brings several improvements to existing features, including new capabilities related to shutdown, special applications and display of the hypertext help. It also fixes a number of bugs noticed since the previous release. See the history file for more information.

Btw. it is almost exactly four years since the release of TeraDesk 3.0 on December 14th 2003...

Have fun.

I'm curious if anyone (else) has measured the throughput of their Riebl card. Running the MintNet ftp client to the FileZilla ftp server on a Windoze system, I get around 100 kbytes/sec for PC->TT, and 85 kbtes/sec for TT->PC. This is for files of a "reasonable" size, around 10MB. It seems to be slower than the Daynaport SCSI/Link, which is a bit surprising (to me at least). Comments welcome :-).

MI5 Persecution: How Could It Be True?

If you have the patience to read these articles you will be struck by how apparently fantastic the claims being put forward are. You may ask yourself why such seemingly nonsensical assertions are made. This matter has been discussed on the Internets UK-local newsgroups for three years now, and the denizens of the uk.misc newsgroup (the so-called "miscreants") have come up with a number of theories to explain these posts; it has been variously suggested that they are a troll (an artificial creation for the amusement of its author), that they are made by MI5 themselves with the purpose of discrediting other conspiracy theories, and that the poster is mentally ill and the articles are symptomatic of the illness (the view held by most miscreants).

Are these claims the product of mental illness, or is that just a cover?

The most obvious explanation, that the claims made result from the admitted mental illness of the author, is the one which the persecutors intend be the one accepted without consideration being given to the possibility of the claims being true. The persecutors have actually been very clever about this, both in selecting as their target someone who was known from school or university as being borderline schizophrenic, and in ensuring the nature of their persecution corresponds to what often features in the delusions of a schizophrenic.

The very first incident of the persecution occurred in June 1990, when I was still a student at university in London. It consisted of a reaction (giggling) from the newsreader, Sue Carpenter of ITN, to what she saw happening in my living-room at my parents home where I was living. Before your imagination gets the better of you I should make clear that what the newsreader was reacting to was not too embarrassing in nature; my mother had brought an apple for me into the the room, and Sue Carpenter found this amusing.

I recognized that Carpenter had reacted to what she had seen in my living-room, yet this idea still seemed completely fantastic to me. My reaction was to continue watching television, particularly the news, to see if this incident would be repeated. It was, many times, both on BBC and ITV. An intelligent person would have thought to obtain a video recorder and capture some of these incidents in order to try to explain to an observer what he saw in these broadcasts. Unfortunately, I failed this test of intelligence, since I did not record these programmes. I have recently attempted to obtain from ITN tapes of their news programmes dating back to summer 1990, but, unhappily, they have advised me that they do not have complete programmes including newsreaders comments dating back to that period.

From the outset, the persecutors structured their actions to ensure that any complaint would be met with disbelief, and dismissed as delusional. This is why they chose as their target someone who was known at school and university to be borderline mentally ill; and it is why they fired the first shots of their campaign through the broadcast media. Schizophrenics commonly believe the media harass them; it would be exceptional for "full-duplex television" to exist in reality. Those with schizophrenia also commonly believe people are talking about them; again, the persecutors have shown themselves very rarely, but act through intermediaries, both in the workplace, and in public and during travel.

Mental illness is not the cause of these claims, but the simulation of its symptoms is a cover used by the persecutors to deny their victim the ability to have his compaints believed.

What evidence exists to support these claims of "interactive television/radio";?

Quite frankly, I have very little evidence to support my claims. You may examine the "Evidence" area of my website to see such evidence as I have been able to gather. None of it is remotely conclusive. The "smoking guns" all date back to 1990/91, and it is really rather late now to start trying to look for material dating back seven or eight years. In 1997 I started tape-recording every programme I watched or listened to. I also started carrying with me a high-fidelity minidisc-recorder with good quality microphone to catch incidents of public harassment, but this also has not been as successful or conclusive as I had hoped.

Perhaps the best item in the "Evidence" section is the audio file "Life is so hard" (it is labelled with Garfield the cartoon character on the site), which I have given a certainty level of 100%. This item relates to harassment at my workplace in Canada in 1996. A co-worker called Mark was coming up with phrases and expressions which were repeating things being said at my Canadian residence, consequently leading me to believe that my apartment and home phone were bugged, and that the persecutors were passing their gathered information on to Mark. On one particular evening I said in my apartment, "life is so hard, and then you die". The following day I was able to record Mark saying exactly the same phrase at work.

Unfortunately when "they" know you are recording them, they simply dont say things which would unambiguously show harassment. When Mark the co-worker knew he was being recorded, he only made his remarks out of range of the recorder, for example outside the building. When the TV newscasters or radio disc jockeys know they are being taped, they limit themselves to saying things which are ambiguous, which even in my mind may or may not be personally directed against me.

Who knows about this persecution?

Surprisingly many people know. People in the media, such as BBC and ITN newscasters including Martyn Lewis and Michael Buerk, and radio disc jockeys such as Chris Tarrant of Capital Radio, know what is going on, and take part in it. Some co-workers at my former workplaces in England and Canada have known about the harassment. Quite a few people in the general public are also included. I believe the police are aware of the persecution, but, unfortunately, have chosen not to take any action to stop it. I have complained at my local police station in London several years ago, and I have stated on the internet newsgroups that I have done so, hence the police will be well aware of my wish to see the matter resolved. I believe their inaction denotes a dereliction of duty, but without good evidence, I am powerless to compel them to take steps to prevent further harassment, or deal with what has already taken place.

What is the purpose of sending these faxes?

These faxes are being sent to three distinct groups of people, namely Members of Parliament, the media, and diplomats & legal people. As you will have observed I am making use of the email-to-fax gateway at Demon Internet to send these faxes. I am forced to use this gateway since I currently live in North America, and cannot afford the high cost of direct phone calls to the UK.

My purpose in publicising my claims is firstly to discourage the persecutors from continuing their campaign, and also to attempt to bring their campaign out into the open, and thus perhaps identify the persecutors. Neither aim has been achieved yet, but I hope that with sufficient stimulation these aims may yet be accomplished.

The problem with the second aim is that those who read this article will fall into two groups, those who dont know anything about the persecution and consequently will disbelieve my claims as delusional, and those who do know about the harassment and may have some idea of who is behind it, but realise that if the harassers are exposed and the truth brought out into the open, then powerful British institutions will substantially lose prestige, and be exposed to ridicule.

It would give me hope to believe that these faxes will create a third group of people, those who find out that I am telling the truth, and who follow their consciences in standing up and seeing justice done. Only time will tell if this hope will be realized.

Why do you think MI5 are responsible?

The question of who is ultimately responsible for this eight-year harassment is one which is very difficult to answer, as the persecutors have never clearly made their identities known to the persecutee. However, I believe I am correct in attributing the continuing victimisation to elements of the British Security Service MI5, and in this article, I will try to explain the reasons for this belief.

The British internet magazine ".net" featured my website on page 17 of their March 1998 issue (number 42). Their review kindly describes it as an "excellent site" and gives some details of what the net surfer will find there. Should you wish to reply to this article you can do so;

"When did you first suspect MI5 were responsible?"

Over Easter 1995 I went to see a local solicitor in London with a view to talking to the police about the harassment. Soon afterwards I did go to my local police station in Clapham and spoke to an officer there. The solicitor made a comment which suggested to me that the persecution I had been experiencing may have been organised by an intelligence service.

Up to this point, I did not have any clear idea as to who was behind the harassment. Only their agents were visible, in the media, on television news programmes, and on the radio; in the workplace, where things said at my home were repeated verbatim; and in some cases abuse in public and during travel, for example on the trip to Poland in June 1992 which I have already described.

Both from the fact that widely disparate individuals and organisations were employed as agents in the campaign against me, and from the fact that an entity would be required to marshal their resources in the areas of spying on my home and giving gathered information to their agents, it was clear to me that a single entity was responsible for carrying out the campaign. Yet from June 1990 until Easter 1995 I did not have a clear idea of who might be responsible. I guessed that perhaps some private individual or group of persons who saw themselves as my enemies had perhaps paid private detectives to organise the harassment. Alternatively, since the campaign had started in the media, I made a far-fetched supposition that perhaps it was an ad-hoc group of media people who had set themselves up in opposition to me. After Easter 1995 I saw that these guesses were wrong, and I made an I believe much more accurate estimate as to who my enemies really are.

"Why couldn't a private group be behind the persecution?"

There are several reasons why a private individual or group would not be behind this campaign.

Quantity of resources / Money. Here is what one Usenet (internet newsgroup) participant had to say (several years ago) on the topic of how much money it would cost just to keep the surveillance going.

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that
makes
PM: >it worth the while of the state to spend over one and a quarter
million
PM: >on you?

A private individual or group would not spend over a million pounds to verbally torture a victim without some financial motive or gain. Private industry is driven by the profit motive, and there is no financial profit to be had from carrying out a campaign in this way. If a private enterprise were behind it then they would have taken direct physical action a long time ago.

State enterprises, on the other hand, can afford to be wasteful, since they are funded by the taxpayer. They do not have to show a money profit. The employees or contractors employed by a state organisation such as MI5 are driven by their own personal profit motives, to make the most money out of their employers for the longest period of time. MI5 is funded to the tune of #150M p.a.; even a few hundred thousand a year would to them be affordable if their managers could convince themselves of the necessity of what they were doing.

Quality of resources / Technical resources - electronic and other surveillance. In summer 1994 a reputable and competent private detective agency was employed to conduct a counter-surveillance sweep of my home in London. They charged us over #400 for this, conducted a thorough search for radio transmitting devices, hard-wired "probe" microphones and also tested the telephone line. They found nothing. This was not altogether surprising, since it had been made very clear to me that there were bugs in my home; the "buggers" would not have made this clear unless they had felt their bugs were of sufficient sophistication as to be safe from detection.

But there is another lesson to be gained from the failure of the private detectives to find anything. The agency employed was one of the most reputable in London. They were employed on the principle of "setting a thief to catch a thief", for if the harassment were being carried out by private detectives, as I then believed, then surely another set of private detectives would be able to find the bugs that they had planted. That these "private eyes" were unable to find anything, and that the harassers were confident that they would not be able to find any bugs, points to the harassers being an order of sophistication above a private agency, and leads me again to believe that a state intelligence service is responsible for the surveillance and harassment.

Quality of resources / Technical resources - Interception of Postal service. In summer 1994 when I emigrated to Canada to try to escape the harassment, I wrote letters home to my family and friends in London. Quite soon after my arrival in Canada, the harassers were able to find precisely where I was staying. The only way I can see of "their" being able to find out my new address was by interception of my letters to the UK.

Later in 1994, I conducted an experiment to see if my letters home were indeed being read. In a letter home I wrote of being depressed and talked in vague terms of suicide. I deliberately chose this topic, since I believed it was the outcome my harassers were trying to achieve, and that if they read the letter, they would "echo" its contents. Sure enough, soon afterwards there were two incidents of people shouting "suicide" at me in public places in Canada.

It is inconceivable for a private agency to have the ability to intercept postal mail. The state security service on the other hand is well known to engage in these activities.

Quality of resources / Access to Media. One of the strangest aspects of this case is the access "they" have to the broadcast and print media. I still do not understand what could persuade newscasters such as Martyn Lewis and Michael Buerk, who consider themselves "gentlemen", to behave in an almost voyeuristic way by "peeking" into the living room of one of their viewers. A year ago I wrote to the BBC asking if these newscasters would confirm or deny the accusations made against them. The BBC replied that their newscasters had denied the accusations, but refused to do so in writing.

It is well known that MI5 have the ability to plant stories in certain newspapers, but convincing television newscasters to "watch" a viewer while they read the news would surely be very difficult for them to accomplish, unless they presented themselves to these journalists as being, for example, a group in the media who were seeing to it that I got my "deserved" treatment. MI5 has a history of manipulating the media, so it might not be too difficult for them to accomplish such a trick, whereas a private group would not have this ability.

"Have they ever denied that they are the Security Service?"

No. Never. This is in fact the main reason why I believe "they" are MI5 and not a privately funded group. If my guess had been wrong then I am sure that "they" would have crowed over my mistake, but they have never admitted nor denied that they are employees of MI5.

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly.

"If MI5 were behind it, why would they wish to mask their involvement?"

I have heard a number of times a belief from people in the media that it is they, the media people, who are behind the abuse. In spring 1994 Chris Tarrant the Capital Radio D.J. said sarcastically on his breakfast show, "You know this bloke? he says were trying to kill him. We should be done for attempted manslaughter". We, we, we. Tarrant thought it was a media conspiracy.

Returning to the question of "interactive watching" by television newscasters, it would again be much easier for them to take part in that sort of activity if they convinced themselves that the surveillance and abuse were organised by "their own", by media people. It must be second nature to MI5 to mask their involvement in the matters they deal with; in this case, they pretend the campaign is organised by a group in the media, and any journalists who suspect otherwise keep their silence.

Conclusion

Over the last three years I have stated with some force my belief that MI5 are responsible for my misfortunes. I have done so on Internet newsgroups, in letters and faxes to people in politics and the media in the UK, and in 1997 I made a formal complaint to MI5 regarding their activities; the Security Service Tribunal replied in June 1997 that "no determination in your favour has been made on your complaint". (I believe the statement by the Security Service Tribunal can be disregarded, as they have never, ever made a ruling in favour of a complainant.) In three years of naming MI5 as my oppressor "they" have never denied the charge. To me, their silence on this point indicates that my guess was accurate. I believe my persecutors stand identified. The question of why they should carry out this campaign is one I will try to answer in a future article.

MI5 Persecution Update: Friday 15 May, 1998

The persecution has been quite severe for the last week. It appears that my enemies are reacting to the steady stream of faxes making their way over the Atlantic to the fax machines of Westminster politicians and the media. Here is whats happened in the last few days;

The week started off with an incident in the cafeteria at a local shopping centre where I habitually drink my morning coffee. My enemies have concentrated since winter 1995/96 on throwing a particularly horrible sexual slander against me. They "put people up" to repeat this slander against me, and this is what happened again here.

On Thursday morning (yesterday), instead of going to the usual cafeteria I went to a nearby convenience store for coffee. The same horrible sexual slander was shouted at me very loudly by a member of staff as I walked into the store. This was the first time I had ever bought morning coffee in that shop. The other staff obviously knew what was going on, one of them said, "they screwed up my life".

The fax gateway I use to send these faxes to the UK has been working hard these last few days to shut down my access by barring the accounts I use to send these faxes.

I have received an anonymous threat from fax number 0171-219-6101 (the machine gave its name as "ETRA-HoC") which said, "Stop sending to this fax no 0171-219-6101 or else" (the consequences of continued transmission were unspecified). I invited the sender to apologise for his threat, but received no response.

This all adds up to quite a severe reaction to my faxes of the last few weeks. I actually find this quite heartening since it shows that my faxes are finding the mark and there may yet be a breakthrough in my efforts to expose the Security Service conpiracy of abuse against me which has now been going on for eight years.

MI5 Persecution: "Why would they be doing this to you, sir?"

This article will concentrate on the difficult question of "Why". The question which forms the title of this piece was asked of me by the police officer I spoke to in Easter 1995, when I went to make my complaint.

There are really two sides to this question. Firstly, why should MI5 be harassing anybody in this fashion? Secondly, if they choose to behave in this way, why should they have selected me in particular, and not somebody else? Alternatively, why did the persecution start, and why is it continuing?

I do not have definite answers to either side of this question, since my persecutors have usually kept themselves hidden and only acted through other parties. To know "why", one would have to know who the persecutors are, and something of their personalities, since their abuse is almost certainly symptomatic of a personality disorder of the abusers. Certain things however can be deduced about the abusers from the nature of their behaviour, and I will talk about this later in the article.

Why did it start?

It is clear that the persecution must have been initiated by someone who knew me personally, either at school, or at university, or socially, and knew that I was borderline mentally ill, since this is what makes me a target for the persecutors. Unfortunately, the originators have never been identified, and there are several possible candidates. Neither has the link from the originators of the persecution, to the persecutors themselves, ever been made clear. So who are the originators?

University Staff

The identity of the originators may lie in the timing of the persecution. It started in June 1990, while I was finishing a course at Imperial College in London, and a year after I graduated from Cambridge, where I received a degree in computer science. At Cambridge I had achieved some notoriety in the computer lab from various nefarious exploits. Roger Needham attacked me by saying that "there were great hopes for it, but it failed terribly". When I started at Imperial I found that my reputation had preceded me; Cambridge computer lab had spoken to I.C. lecturers about me. I.C. lecturer Frank McCabe summed up commenting about "setting up a straw man so you can tear him down". (Despite being "torn down" by the Cambridge computer labs lecturers, I still achieved a good first degree and a Masters degree at Imperial.)

Other students at university

So, the originators may have been university staff who knew me from my student days. But there are other possibilities. I had other enemies at university, including some fellow students. At my Cambridge college it was common knowledge that my mental health was dubious, and it was known that I talked to myself in my sleep - the floor and walls were quite permeable to noise, so other students heard. I was given the nickname "gibber" because of this habit. Sometime later, I managed to catch myself talking in my sleep when I woke up in the middle of the night.

Here is a quote from a participant in the internet newsgroup where I have been posting for the last three years;

>One thing which has been missing from this discussion is this simple
>prognosis: that maybe he is right and that, despite his admitted
>mental condition, there really is a campaign against him organised by

>now-influential ex-students of his university.

People I knew socially

I had yet other enemies in 1990 (I am a man of many enemies!). In January 1990 I broke up with some people I had been going out with socially. One of them, by the name of Andy Turner, wrote a letter to Alan Freeman, who at the time was a Radio 1 DJ. Freeman read part of the letter out on his Rock Show, about the "one who wore out his welcome with random precision", saying "thats a hell of a letter you wrote there Andy", and "with a schizophrenic youre never alone".

It is my belief that Andy Turner and his friends were trying to make trouble for me, and Turner wrote to Freeman with this in mind. Freeman may have discussed the letter with others, and things may have snowballed from there. This is, of course, pure supposition. The fact is that I do not know who the originators are, and can only guess.

Once it started, why is it continuing?

The answer to this question is obvious. It is unacceptable to the "powers that be" in the UK to have somebody running around who knows he has been targeted by the Security Service and media organizations, and who is in a position to embarrass British institutions. This has become particularly evident in the last week; as I send more faxes to UK politicians and media, so the pressure on me grows, and the volume of abuse increases.

Part of the reason the persecution continues is in the personalities of the abusers, and it is this subject to which I will turn to next, since the key to understanding the persecution lies in understanding those who carry it out, as much as we can.

The Security Service operatives, the persecutors, are they psychopaths?

Let us first examine the definition of the term "psychopath". DSM-IV defines "anti-social personality disorder" as a "pattern of disregard for and violation of the rights of others ... deceitfulness, irritability and aggressiveness ... consistent irresponsibility and lack of remorse". The Harvard Mental Health Letter of Sept 1995 describes these people as using "charm, manipulation, intimidation and violence to control others and satisfy their own needs. Lacking in conscience and in feelings for others, they cold-bloodedly take what they want and do as they please", having "no guilt or regret".

I must say, reading this description of the condition, that it fits the persecutors perfectly. The persecutors have never shown the slightest remorse or guilt. Even when I was severely ill, they continued to abuse me. They have repeatedly blamed their actions on me, which is another trait common amongst psychopaths. They have no respect for my legal or personal rights, and they use intimidation and verbal violence.

If the MI5 operatives are psychopaths then it would explain both why the persecution started, and the degree of verbal violence. Psychopaths by definition damage other people; here, the MI5 operatives find an outlet for their personality disorder, through "cripple-kicking".

Xenophobia on the basis of mental illness, and race

My enemies have made clear many times that one of the reasons they are persecuting me is because of my admitted mental illness. However, it is my belief that they are also persecuting me because I am not of ethnic English origin, and the fact that there have been several incidents of an overtly racist nature reinforces this view.

In one case, two youths on a tube train in London made openly racist references to me as a "soft toy, not up to British Standards". Another person near my home made remarks about "Polish people". In yet another incident in Croydon, a youth made comments about "foreigners".

But the main thrust of their xenophobia is because of my mental illness. I should make clear that I do not look ill; if you met me, you would not know that I had the illness. I take a relatively low dose of medication, and feel quite well. But the persecutors have repeatedly harped on about my supposed serious mental illness; they have called me a "nutter", a "schizophrenic", etc. They have also persuaded other people to use these terms of abuse. They are able to get away with this because abusing the mentally ill is still something which is mostly acceptable in Britain; the media do it, "nutter" is not taboo in the way that "nigger" is.

Conclusion

There are several groups of people who might have wished to cause me trouble, and I still do not know who originated the persecution. Nor do I know how the originators came to be in contact with the (presumed) Security Service operatives who have been carrying out the campaign. To know conclusively why it started, we would have to know who started it, and this information is not available.

However, we can infer some things about the personalities of the persecutors from their methods, and from the degree of verbal violence they employ. It is clear that a main reason for the continuing harassment is the psychopathic disorder of the MI5 agents who carry it out. That they have never been "brought to book" for their misdeeds reinforces their belief that they do no wrong; and, unhappily, until they are brought to book, their persecution campaign looks set to continue.

When transferring a file of 11 MB from my Linux PC to a TT with a Riebel card (also running under Linux) I get transfer rates between 220 and 250 KB/s from PC to TT and a rate of 380 KB/s from TT to PC.

MI5 Persecution: .net Magazine Applauds my Website

The March 1998 issue (number 42) of .net Magazine reviews the MI5 Persecution website describing it as an "excellent site". The webpages describe in detail the nature of my persecution since 1990 by what are believed to be elements of the UK security service.

(snip image)

You are encouraged to read the web pages which include

o a FAQ section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public
o an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me
o factual descriptions of the state security agencies involved
o scanned texts of the complaints I have made to media and state security agencies involved
o posts which have been made to netnews over the last three years on this topic

MI5 Persecution Update: Friday 13 November, 1998

If You Intend To Reply, Please Read This

If you have any questions or observations you would like to share with me, then you are very welcome to reply to my fax number 0171-681-1190. But please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. I do not know if he had anything intelligent to say in his 20-page fax because I applied judicious use of the "Delete" key on my computer. Faxes over a page or two will be deleted without being read.

MI5 Resume Hostilities in Response to these Faxes

When I wrote last weeks "MI5 Persecution Update" I remarked how quiet my life had become. No longer! MI5 have restarted hostilities with a vengeance the past week, in response I believe to the faxes I have been sending to members of the House of Commons.

On Saturday 7 November I went to Clapham Picture House cinema to see the film "Antz" (a very enjoyable film). At the cinema, I was verbally assaulted by a group of teenagers with the words "still crazy", repeated about ten times. There was a film with that name showing at the cinema, but it was clear their abuse was directed at me. I do not look ill, so why would they pick on me? answer, the incident was set-up by the persecutors. One of the teenagers also said to another, "I don't know what we're laughing at".

The following day, Sunday 8/11/98, I was on my way to play squash when I was verbally assaulted by a youth who said "it was so funny", without the slightest trace of humour. What he meant by this phrase was that was funny, and they were trying to humiliate me. I have heard this phrase "it was so funny" used at me before many, many times over the last eight and half years.

Please Encourage Keith Hill MP to Help Me

I live in a bugged house, bugged both for audio and video. My movements are monitored by MI5. The Security Service have followed me to Canada, to Poland and the Continent, to the States. I cannot work anywhere, not in England, not in Canada, because MI5 will destroy whatever employment I am able to obtain. I have asked Keith Hill MP to help me, and he has refused.

The situation is intolerable. It is Mr Hills job to help me out of this mess. So, please, as I said in the last fax a week ago: Do not waste your time returning multiple copies of my faxes to my fax mailbox, as some of you have done. Instead;

Please encourage Keith Hill M.P. to help me.

I am sorry to be using this device to encourage Mr Hill to help, but I think eight and half years are quite enough and it is time something was done to bring this matter to a close.

MI5 Persecution : BBC Newscasters Spying on my Home

This week's topic is the quite extraordinary claim that BBC newscasters such as Martyn Lewis and Michael Buerk have spied on my living room while they read the news. I currently have an advert running for the next six months in Private Eye's "Eye Say" column (at a cost of over #200) which says,"MI5 Persecution - BBC Newscasters Spying on my Home"; the story of my campaign in the Eye is on my Website at; http://www.pair.com/spook/evidence/plaint/priveye.htm

BBCs staff magazine Ariel also ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm

Beginnings

The very first incident in the "MI5/BBC Persecution" occurred in June of 1990, when a newsreader reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

Most of the "TV watching" has occurred on the news, and most of it in summer 1990, although some as late as autumn 1993. My website has a few extracts of what might be politicians "getting at" me, in particular John Major and interviewer Dimbleby sharing a joke about the "Knutsford Guardian" which is almost certainly about me.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

Examples of Media Harassment

Here are a few examples which I can still remember of media harassment;

In early 1992 I was watching the BBC news with Martyn Lewis on a small black-and-white portable television at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

Victor Lewis Smith in his TV (BBC2?) program at the end of 1993, had a taxi-driver saying, "theyre all out to get me", to which VLS replied, "but you're quite intelligent aren't you?" (what a nice chap VLS is, compliments no less!)

Paul Daniels the TV magician, sometime in 1990-92 (sorry I can't be more precise but it was so long ago), made a "crying face" and put his face in his hands, which was his way of expressing that I was frequently crying in 1990-92, and that he and other media people found my crying funny.

Kenny Everett (deceased) on some talk show, compared me to a "huge ape" who "scratches himself"; he made some other remarks about what the "ape" got up to which unfortunately I cant remember. (I remember that Everetts comments were quite sympathetic and human, but were obviously about me.)

Stephen Fry on another talkshow (Wogan I think) talking about "masturbatory fantasies", he then referred to me with the words "you prat"; I wonder if the studio audience knew what he was talking about and to whom his comments were directed?

Griff Rhys Jones on Clive James' TV show, made a "lunatic face" (wide fixed grin) to which I said to the TV that he had a "face like a horse's arse", to which Clive James said to GRJ "did you hear that?"

Crimestoppers summer 1990, remarks by a Midlands police officer on the programme, while Nick Ross was presenter (as far as I can remember). The officer talked about "in car entertainment". Nick Ross said to officer, "why don't you stop doing it?" to which he replied, "we can't while he's like this".

BBC2 Newsnight in autumn 1993 had a piece on football hooliganism. A black interviewee said apparently of the hooligans, but in fact of me; "they're just idiots, carry on with the surveillance".

There was an incident with Jonathan Ross which I remember clearly; he was on both BBC and ITV television at the same time, one (ITV I think) was recorded, the other channel was live. Ross has a speech impediment which causes him to pronounce his "r"s as "w". I sarcastically said something about "Mr Woss" to the recorded channel, then turned over to where he was live, and he repeated "Woss" with heavy emphasis and sarcasm.

On the radio, in spring 1994, Chris Tarrant made a sarcastic remark in his morning show, saying "he says were trying to kill him, we should be done for attempted manslaughter", to which another of the studio staff said, "oh no, dont say that". His comment was in reply to a comparison Id made the previous evening between my persecutors and the Polish secret police who murdered dissidents.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "interactive watching". They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

I can understand that they might think that if they were to make written denials to me, then many other people with my condition might write to them with similar questions. But Ive asked a couple of journalists if theyve been writing about me, theyve made written denials, Ive believed them, and I have not put their denials on my website because, since I believe their denials, it would not be relevant to publish them.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

One of the strangest aspects of "TV watching" is that Buerk and Lewis have convinced themselves that their "interactive spying" is reasonable behaviour. Martyn Lewis thinks of himself as a "gentleman". He expressed in 1992 that he was "on my side". If this matter ever comes out into the open, I wonder what these newscasters will have to say for themselves, and what the British public will make of their behaviour?

Media Persecution Evidence on my Website

You may directly access the Evidence section on my website at URL;

The category currently contains four video segments, a number of audio files and three published articles. The first video of ITN's John Suchet is unfortunately a mistake - after looking at it again it is obviously not about me. The two Ken Clarke excerpts may or may not be about me; it is funny that he should keep on harping about "paranoia" and "madness", but I have given these ratings of only 30% certainty, as it is more likely that they are not about me in particular, and Clarke is simply displaying the normal prejudices against the mentally ill found in much of society.

The piece I find most interesting is the Dimbleby/John Major interview from April 1997. I have assigned this a 90% rating. Dimbleby starts by emphasising a report from the "Knutsford Guardian". Major recognizes what's going on and joins in with a falsely apologetic "heaven forfend". The emphasis is on the first syllable pronounced "nuts" in "Knutsford", which is repeated three times. Of course this is hardly anywhere near convincing evidence; the really clear items were all in 1990-92, and they are basically unobtainable now.

If you're reading the website, have a look at the two files from David Hepworth's programme on GLR radio. The first one from 21/Feb/1997 has him talking about an "embarassment" of prizes and "absolute obscene", in reference I believe to the verbal sexual abuse that was being used against me at the time (and which unfortunately is still current). In the second file dated 9/May/1997 he again talks about "absolute embarrassment" of prizes, followed by laughter. To my mind he knows I am listening to his programme, and deliberately makes these remarks for my benefit, with very little attempt to disguise their purpose.

Bernard Levin - "Fanatic's Fare for the Common Man"

On 21 September 1991 this article by Bernard Levin appeared in The Times. It is reproduced in the Evidence section of the website, or may be accessed directly at URL;

To my mind, Levin's article described the situation at the time and in particular a recent meeting with a friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment over the previous year and a half.

Levin writes about a "madman running loose about London" who "bursts into tears, and swears it is all true. And it is." I am pleased to agree with his assertion that "it is all true" because the truth is what I presented to my friend in September 1991 and it is what is being presented to the readership of these articles now.

Conclusion

The harassment, in particular media persecution, was at its strongest in 1990-92. Today, I am recording everything I watch, read and listen, and the media have pretty much given up. It is now incidents "in public" which make up what there is of MI5s persecution. But much of the material from 1990-92 still exists in archives, although the organisations which have those archives generally wont make the material available to the public, for copyright and other reasons.

MI5 can no longer employ the media to persecute me, partly because journalists now know who is behind the persecution, and also because I would publish any instances. My mistake during 1990-92 was to not record instances as they happened; Ive learned from that mistake, and know better now.

MI5 Persecution Update: Friday 19 March, 1999

If You Intend To Reply, Please Read This

Please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. Faxes over a page or two will be deleted without being read.

Theyve started again. Why? I have no idea.

Unhappily, the persecutors, whoever they might be, have started their activities again over the last two weeks. Usually they try to blame their activities on their victim, but this time they have stopped even pretending that the persecution is my fault. Their verbal abuse appears as gratuitous as it is vicious.

Last Sunday 14 March, I went for a meal in Londons Chinatown with some friends. As we were walking down Gerrard St, a man shouted loudly, twice, the obscenity which has been directed at me for some three years now. This followed previous incidents where the same words had been used. It is very upsetting to be verbally abused in this way and to know that the cowardly abusers are guaranteed to "get away with it" because if you report it then it will be assumed to be part of your illness.

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Persecution : How to Identify the Persecutors

Usually delusional thinking does not allow the perpetrators to be identified, or the alleged persecution to be proved. My so-called "delusions" are different, because I have several times over a period of some nine years seen the same people, in widely varying places. Most importantly, their names have been recorded, on aircraft passenger lists and hospital register; and if only the police would do their job conscientiously then the persecutors could be identified and this unhappy story brought to a final conclusion.

BA93 Heathrow->Toronto, 10 June 1993

In 1993 I flew to Toronto for a holiday. On disembarking from the aircraft, a group of four men who travelled together looked in my direction, and one of them said, laughing, "If he tries to run away well find him".

I was absolutely stunned when I heard this. I wasnt surprised that they had followed me to Canada, but it shocked me that they had been on the same flight, and that one of them had foolishly given their group away. Unfortunately I was so stunned that I made no attempt to stop them as they got off the flight and proceeded into the terminal. I did not see these people again during my visit to Toronto. I do not know whether they followed me, or whether they were only part of a larger group, some of whom may have already been on the ground and awaiting my arrival.

Over the next few years I made a number of attempts, all unsuccessful, to obtain the passenger list for this flight. British Airways keeps passenger flight coupons for each flight; so if only the police would do the job that is being asked if them, then these four persecutors could be identified, and thus their employing organisation, which is very likely to be the Security Service, determined.

These four men were, apart from the joker who looked the odd man out in the pack, very serious individuals. They appeared to be in their forties or fifties, and my impression on seeing them was that they might have been former soldiers. Their campaign against me concentrates on how "funny" their abuse is; but in this they are plainly lying, because they realise how awful will be the damage to the establishment of which they form part, if the truth about the persecution ever sees the light of day.

The riddle of "Alan Holdsworth"

During Oct/Nov 1996 I saw a doctor several times about an infection, and on 2 Nov 1996 I went to Emergency at the Ottawa Civic Hospital and saw Dr Worthington, who was then Chief of Emergency Medicine. I had to wait several hours before being seen, and several people jumped ahead of me in the queue. One of these was a grey-haired man in his forties or fifties. This may have been one of the men on the BA flight in 1993; I cannot be sure. When Dr Worthington asked his name, he loudly said, "Tad", which is the common abbreviation of my name. Dr Worthington looked puzzled, glanced at the sheet in front of him, and said, "but your name is Alan Holdsworth isnt it?". (I am pretty sure his Christian name was Alan; I cannot be sure of the surname). The man looked put out, and said quietly, "yes".

Unfortunately, I did not follow up this incident immediately. Some time later, I wrote to Dr Worthington to ask the name of this patient, but he refused to give the name out.

I saw this person again two and a half years later, at Ottawa Airport, just as I was about to leave for England. In the warm weather, he was wearing a coat and woolly cap, and pacing up and down in a menacing and aggressive manner. Presumably he thought he was pretending to be a "nutter" and in this way was getting at me; my impression is that he doesnt need to pretend, Holdsworth or whatever his name is is clearly a psychopath and in a healthy society such a person would be locked up, instead of being paid public money to exercise his psychopathic instincts. But todays Britain, a country where the MI5 secret police are given free rein and nobody dares raise a voice in protest, is not a healthy society.

"He doesnt know who we are"

For some reason, whenever I take a British Airways flight, I get hassled by the "persecutors who wont admit theyre MI5". Since this business started, I have travelled BA three times; once in June 1993 BA93 (see above), once to/from Europe during Dec 95/Jan 96, and once in June 1998 with my mother to visit her family. The last journey, I was abused by two "plants" who kept repeating, loudly, "paranoid" (I have this recorded on minidisc). Presumably British Airways gives MI5 the seating plans for their flights, which allows MI5 to position their agents of abuse three rows behind me, so I cant face them, and they are throwing abuse at the back of my head. I have travelled BA as infrequently as possible; to Canada, I usually travel Air Canada.

Anyway, lets return to the second of the three BA trips, and in particular to the flight on 2 January 1996 from Berlin Tegel, to Heathrow, and onwards to Montreal Mirabel. Id waited all night at Tegel for the flight, and was very tired on reaching Heathrow. On the plane to Montreal, two youths sat about three/four rows behind me and to the right, in the window seats. One of them, a rather fat "asshole" to use the Americanism (it fits), kept on going on about "this bloke", saying among many other things, "he doesnt know who we are".

Now that form of words is particularly interesting, because from May 1995, some 8 months previously, I had been vigorously denouncing the "MI5 Persecution" on Usenet. So if Id guessed wrong, then you might expect the harassers to crow about it; which they have not done. If I had guessed right, and the persecutors have been silent before and since this flight, then they could either admit they were MI5, which would be a very serious thing for them to own up to, or they could brazenly lie, in which case I would report their lie, and since many people must surely know who they are, they would lose all credibility. So they have remained silent; apart from this one phrase on the BA flight, where one of their agents said, "he doesnt know who we are". Note carefully that this phrase is NOT a denial, it only appears to be a denial; since it does not say that my guess was wrong; it only states the objective fact that I do not know the identity of the persecutors, without giving any information as to the validity of my guess. Which leads me to posit that my guess was correct.

I am (at last) going to connect up the USB ports on my EtherNat board. I need to know the correct pinouts, which unfortunately were not supplied with the board. I found a little discussion on the DHS web site, but the answer was ambiguous. I checked on the net for PC motherboard pinouts, and discovered that they varied :-(. So now I'm asking here.

Here is a little ASCII drawing of the (male) connector on the board itself:

```
    A  B  C  D  E
    F  G  H  I  J
```

(the pin at location A is missing, presumably for keying purposes).

Can someone please tell me how the four USB signals for each port (+5V, Data-, Data+, Ground) map to the pins?

Thanks very much,
Roger Burrows

The only wrinkle is that the Link97 gets its power from the SCSI TermPWR
line, and the SCSI/Link doesn't provide any power on that line. So you
need something else on the SCSI chain that *does* provide TermPWR (most
hard drives do or can be jumpered to do so).

I have tested the SCSI/Link with a Link97 and it works fine.

Roger

Speed is around 60-80 kBYTES/sec using STiNG, 100-140 kBYTES/sec on
MintNet (this is on a TT). I have had no problems with reliability, and
haven't had any bug reports, but that perhaps doesn't mean much ...

>As my cartridge port is already filled up with several other devices

Interference with hard disk I/O is more of a potential problem under
STiNG than MintNet. Because it does share the bus, and I *really* don't
want a mob burning down my house if their hard drives get corrupted, I
decided that a warning would be a good idea ...

> I'm reading between the lines that the Daynaport

>finding a Daynaport Link seems to be both hard and expensive -and yes,
>I've searched eBay etc.).
>

Right now (well yesterday anyway) on eBay there were 3 suitable
SCSI/Links available at prices between $20 and $35. I say nothing about
the reliability/reputation of the sellers, but they are available at
not-unreasonable prices.

H Hello, all.  This megaas a color monitor, and I cannot find a control
panel that works. It seems to be fussy, and zControl does run, but the
display is too large in ST Medium. Yes, I do have mono monitors.

So has anyone ever gotten xcontrol or zcontrol to run in ST Medium with a
color monitor, and if so how?

Hi Roger,

Lucky you, i'm still waiting :-(

The link on nature's pages point to this...

http://www.frontx.com/cpx108_2.html

Hope that helps.

Alan.

The Daynaport.... (well actually labeled "Falleron" but its a re-badged Daynaport)

> Do you have an "Ethernet adapter II"?
> As for a "proper" SCSI host-adapter I'm assuming my Link 97 will work

Roger says that will work provided you get power to it. Drop me an e-mail as above and you can borrow one to trry. If you like it we can sort out its worth .....

Dave

This should be all you need to decide whether it[0] really is "fun" or
not:

<URL:http://groups.google.com/groups?
q=sinclap+group%3Acomp.sys.atari.*&start=0&scoring=d&num=100>

After adding it to my killfile years ago, I didn't even know it was
still posting. Nice to know it's still as much a failure now as it was
when I killfiled it.

[0] What else can you call such a wannabe troll?

Regards,
        David Bolt

Thanks Peter I really appreciate that. I have managed to get hold of
version 3 (E-bay) but not 3.51 I am going to have to give up on
this!!!!

Update

**************** Update*******************

I have so far managed to buy secondhand complete versions of the following NVDI 5, MagiC 6.2, Thats Write 3, Straight Fax 2 and Calamus SL. Both Protext 6 and
Positive Image 2 have been offered to me for the cost of posting I am in the process of sorting these out (thanks to those who offered). I have updated my list below:

Kobold 3.5 (I would also buy the 3.51 upgrade)
Jinee 2.5
ImageCopy 4CD
View II
Calligrapher Professional Fonts disks (I am in the process of purchasing Calligrapher Gold)
LayoutTC
Neodesk 4 and Gemini (Gribnif)
Apex Media (Falcon)
CalAssistant (Calamus Hypertxt help)
PageAssistant (Pagestream 2 Hypertxt help) (I am in the process of purchasing Calligrapher Gold)
Didot range of applications
Codehead Codekeys (macro utility)

Thanks to everyone who has taken the time to reply to the post I really appreciate it.

Thanks

Paul

> For those interested, google "google groups filtering" and "google groups killfile" etc.

One other option is to use a web browser instead of a news reader. The interface at www.deja.com (which is really groups.google.com -- the former is just faster to type) has improved over the years, and when set to display just the titles of posts it really isn't difficult to simply ignore the 20 MI5 posts.

I admit that csast isn't as busy as it used to be, but unfortunately, there aren't many new users of Ataris any more, and we "old-timers" tend not to need much assistance so we post infrequently. Still, I'll be around a few more decades.

Galen

O.k. so my Falcon's clock chip has died and it was the MK48T87B-24 variant.

I've heard that the DS1287 works as a replacment or you can hack at the chip to expose the pins. Unfortunately mine was the hard top version and it broken away.

So I'm looking for a replacement device with a 24 pin socket.

Anyone ordered from somewhere before, prefereably in the UK, but I'm quite happy if it's somewhere else.

I have googled, but I want to make sure it's the right device.

Thanks for any advice!

Alan.

Not all of these chips have the easily-removable top, as you've found :-(

You could try asking Maxim for a free sample - there's a form to fill
out on their web site, or someone at the recent JagFest came up with
the idea of ordering some of these chips and selling them on. Maybe
someone in here will have some more info.

If you are desperate you can order them from Farnell, however by the time you add VAT as delivery you will be looking at about �12 or you could try getting a sample, just make sure you get the correct part, the DS12887 should be ok but the DS12887A has an extra pin.

I was the person approached at JagFest UK about ordering some as I work in electronics and I have an account with Farnell which will result in cheaper prices than that mentioned above, I am also looking at purchasing direct from Maxim which should be even cheaper. I am currently waiting for clarification from Maxim on a definition in their terms and conditions before I decide from where and in what quantity to purchase.
I should have some DS12887s from one of these sources in the new year if you can wait until then.

Stephen Moss.

I don't have a Falcon any more, but I do know that the Falcon owners at
the Cheshunt Computer Club will already have their hands up.

Thanks for taking on this task, Stephen.

Hi Derryck

Thanks for responding to my requests again, I really do appreciate it.

> > CalAssistant (Calamus Hypertxt help)

Are we talking about the full package? If so please let me know the
total cost including postage to Dublin otherwise please send via e-mail to paul_matthews@yahoo.com

Thanks again.

Paul

O.k.

So RS Components have the 12887 as well at �7.20 a pop. So I've ordered one
of those with a socket.

Thanks for the confirmation a 12887 should do Stephen.

Alan.

A follow-up to my previous post: Jan Thomas kindly provided the following info, using my little ASCII drawing of the (male) connector on the board itself:

```
    -  B  C  D  E
    F  G  H  I  J
```

. port A is the top row (pins B->E); port B is the bottom row (pins F-J)
. the missing pin is a key
. pin F is not connected
. pins B/G are Ground; pins C/H are Data+; pins D/I are Data-; pins E/J are +5V

As noted, this info is also available via a link from the Nature web site (look on the Downloads page for the link).

Hi all,

Those using ICQ might have noticed that there have been problems with their contact lists last few days. Depending on which server you have been directed to when logging in, your contact list might have only contained contacts showing as offline. Even if you knew that some of them were in fact online.

It seems like the reason is that AOL (who are responsible for ICQ these days) are changing things on the server side to prevent spammers from exploiting the ICQ protocol. Reports from the Miranda (other ICQ clone, for PCs) forum suggests that the problem is related to unauthorized contacts.

If you have contacts on your contact list that has not authorized you to add them will most likely show up as offline at all times. Try to re-request authorization and see if this makes a difference! If not, then it seems like this change is something that actually is pushing towards the server side list being required in order to use ICQ clients properly. In the latter case, you could temporary log into your account using a client such as Miranda or similar, and make sure all of you contacts are present on the server side list.

I am curious to hear how things work out.

In a little while we should have a better idea of exactly what is needed to get things going again I hope..

Regards,

/Joakim

MI5 Persecution Update: Friday 30 April, 1999

If You Intend To Reply, Please Read This
Please.... keep your response to one page!. Faxes over a page or two will be deleted without being read.

Somewhere between 0 and 100%

The last few days there have been no clear recordable instances of abuse. However, while travelling on the Underground, while walking around near my home and going to friends homes, I am constantly troubled by thoughts that those people over there might be about to get at me; that the couple sitting in the opposite seats laughing are in fact laughing at me; et cetera, et cetera.

A comment by a scientist to the BSE inquiry sticks in my mind. He described the possible scale of the epidemic as "between 0% and 100%". It might not be happening, it might not happen at all, to any discernable degree.... or it might be total. Without clear recording, which seems to have become impossible the last couple of weeks, there is no way of knowing whether the harassment really is continuing, whether we have entered a temporary hiatus, or whether perhaps it has perhaps stopped for now.

But for the time being I think there arent any reasons to dicontinue these faxes. I only re-started them six weeks ago in response to a resumption of MI5 harassment; and I think I will need to be more convinced of absence of persecution before I discontinue my complaints.

The Newscasters are still watching

In the last few weeks there have been at least a couple of fairly overt instances of "interactive watching" by newscasters. I reported this in a previous "MI5 Persecution Update".

These instances are really very rare compared to 1990-91, when there were many dozens of such occurrences. Undoubtedly the reduction is due to my practice of videotaping everything I see. Recently I had the opportunity of showing this years "happenings" (Jon Snow/Nicholas Witchell) to my psychiatrist, and he agreed that in both cases the newscasters were expressing merriment without visible cause, and that objectively it might be possible for my claims to be true - although of course other people reported similar thoughts to him, and this thinking is usually a symptom of illness.

Read About the MI5 Persecution on the World Wide Web

The March 1998 issue (number 42) of .net Magazine reviews the website describing it as an "excellent site". Since August 11, 1996 over 50,000 people have browsed this website.

You are encouraged to read the web pages which include

a FAQ (frequently asked questions) section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public

an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me

objective descriptions of the state security agencies involved

scanned texts of the complaints I have made to media and state security agencies involved

posts which have been made to netnews over the last four years on this topic

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Waste Taxpayer Millions on Pointless Hate-Campaign

Recently I was talking to an independent observer about the nature and purpose of the perceived campaign of persecution against me. The person I spoke to, a highly intelligent man, said he was struck by the utter pointlessness of the perceived campaign against me. He also said that, if my theories were in fact true, many people would have to be involved, in the surveillance itself, and in the technical side of the delivery of information from my home to TV studios for example, if the "interactive watching" were happening as described. He voiced these thoughts without any prompting from me; but both I and other observers had arrived at pretty much the same conclusions, some years ago.

I saw a team of four men at Toronto Airport in 1993

To carry out the surveillance alone, full-time, would employ four or five men, or their equivalent in terms of man-hours. Each man would "work" an eight-hour shift, so you would need at least three men doing the surveillance, plus a connecting link / manager. An indicator that this estimate is correct arrived in 1993, when I was accosted by one of a group of four men at Toronto Airport; he said, laughing, "if he tries to run away well find him". Plainly these were the men who had been involved in the intrusive surveillance of me for the preceding three years.

On other occasions, I have seen the same man on two or three occasions. On one such occasion, at Ottawas Civic Hospital in November 1996; he gave his name to the doctor as "Alan Holdsworth" or some such; my hearing is not very good sometimes and I am not sure of the surname, although I am sure "Alan" was his first name. I saw exactly the same man again in Ottawa, at the airport, in July 1998. Obviously, other people must be "working" with this person; he would not be the sole agent employed in this case.

Usenet readers views on the Cost to MI5 of Running the Campaign

Here's what a couple of other people on internet newsgroups / Usenet (uk.misc) had to say regarding the cost of running such an operation...

PO: >Have some sense, grow up and smell reality. What you are talking about
PO: >would take loads of planning, tens of thousands of pounds and lots of
PO: >people involved in the planning, execution and maintenance of it. You
PO: >must have a very high opinion of yourself to think you are worth it.

and......

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that makes
PM: >it worth the while of the state to spend over one and a quarter million
PM: >on you?

Those are pretty much the sort of calculations that went through my head once I stopped to consider what it must be costing them to run this operation. At the very least, a quarter million a year - and probably much more, given the intrusive and human-resource-intensive methods employed. Times nine years. Equals well over two million pounds - and probably much, much more.

Its wasteful for someone with my skills to be unemployed

The wastefulness of the MI5 campaign against me is not just that of futile expenditure on their side. It is also extremely wasteful for someone with my talents to be unemployed and on a disability pension. I am highly qualified in numerate disciplines, yet am unable to work, specifically because of the MI5 hate-campaign against me. It is a terrible waste of resources for a supposedly efficient economy like that of the UK to be squandering the talents of a skilled and capable worker.

I made every effort to remain in employment for as long as I could, but ultimately I was defeated by MI5s employment of massive resources specifically targeted on my workplaces with the sole aim of seeing me evicted from those workplaces. You might expect this sort of behaviour from the Stasi or some other secret police force in a communist country where labour is cheap, and the governments aim on seeing its citizens confined; but for a supposedly free and efficient economy like Britains, the wastefulness resulting both directly and indirectly from the Security Services activities is simply criminal, and should never be allowed.

The international dimension means the costs are multiplied many times overoer had any sense, then they have surely taken leave of them over the last nine years.

Four years of persecution in Canada

The persecution re-started within less than five minutes of my arrival in Canada, as documented above, and in the "frequently asked questions" article on the website. The words, "if he tries to run away well find him" spoken by one of the harassers at Toronto Airport are now imprinted on my mind.

A year later I emigrated to Canada, intending to find a job and settle there, hoping that MI5s interest in me might dim with time. I did manage to find work there, but my hopes of avoiding Security Service interest were ground into dust. As detailed above, I saw the same man in November 1996 and July 1998, both times in Ottawa. Apart from these encounters, there were numerous incidents between 1994 and 1998 of harassment, of an identical nature and in most cases using identical words to what had occurred in the UK. It became quite clear to me that the permanent surveillance and harassment operation which MI5 had subjected me to in England was being continued.

For a team of four or five men to be employed overseas must cost a lot more than if they operate in their home country. And for MI5 to continue the operation for a period of over four years, continuously, must cost many hundreds of thousands of pounds. This confirms my belief that the state is funding the campaign against mehat the Security Service receives current annual funding of #160M. Divided by 1850 staff, works out at #86,000. But the unit annual cost of each "watcher" must be much higher than this, especially given the frequently mobile and overseas nature of their actions of the last few years. A very conservative figure might be a little over #100,000 pa for each of a team of five people, or half a million pounds per year. For nine years, so far. So the most conservative estimate of the surveillance element alone is perhaps four or five million pounds since 1990.

This guesstimate is of course theoretical - I am not privy to inside details of how MI5 split their funding. But to take some other examples, the cost of a US counter-surveillance specialist per day is USD 5,000. Even if the agents permanently assigned to me are not of this calibre - even if they employ specialists when difficult work planting bugs etc is encountered - their salary and support costs must still be very high. The individual agents are doing well for themselves as they are well-paid to exercise psychopathic instincts which in any sane society would see them in prison; but the taxpayers who must fund this terribly wasteful exercise are being "done" out of hundreds of thousands of pounds each year.

It must be emphasised that the above estimates are highly conservative. Besides the surveillance operation, it must carry a high cost in man-hours to propagate covert slanders through the population; to setup and maintain the "interactive watching" links to TV and radio stations, which these organisations continue desparately to "lie and deny"; and to induce antipathy in co-workers which would not otherwise exist.

Why they are wasting Millions of Pounds on a "Nobody from South London"

As remarked in the prologue to this article, it is really most extraordinary that the Security Service spends a chunk of its budget, every year for nine years so far, on a meaningless campaign against a "nobody from South London". That they are spending such a large amount of money has been confirmed to me on several occasions, usually by oblique references to "its costing this country millions". The supposed "logic" behind the persecution is that MI5 wish to avoid their harassment of me, and the involvement of the UK media, to be made public; yet as the reader will appreciate that is a circular argument, "theyre doing it because they want to keep it secret and avoid humiliation for themselves and their country" begs the question, "why did they start doing it in the first place?", to which in truth I myself do not know the answer.

Plainly MI5 with its rich budget can afford half a million pounds a year to waste on a "nobody from South London". Some time ago I was talking to a British surveillance professional on Compuserve who told me "this work costs a lot of money and is usally because the person I am following has done something (usually criminal) to warrant all this money and time being spent." Yet in this particular case it is plainly not the "victims fault" that the harassment is taking place. The hate-campaign against me is completely the creation of the obsessive psychologies of the MI5 agents who have made themselves my persecutors; it is obviously a "personal" campaign for them, and for years they misuse taxpayer funding to feed their insane, unnatural and fixated fantasies.

Hello Alan,

Yeah mine has died also. I am waiting for my CT-63 upgrade from Czuba Tech. That will have a 90mhz non programable clock chip on it. I read where a guy actualy hooked up a battery to his dead clock chip and it worked fine. I guess you have to dig in the top of the chip, pull out some contacts and connect the battery.

Four Years of "MI5 Persecution" Posts on Internet Newsgroups

For approximately the first three years of the MI5 persecution, from June 1990 until late 1992, I kept as quiet as possible, in the hope that by not reacting, MI5s interest in me would decrease and they would simply go away of their own accord. This is the sort of behaviour some people employ against bullies; if the bullies arent getting a reaction, then they might simply go away and victimize someone else.

Unfortunately, this tactic didnt work. The quieter I became, the more shrill and hysterical the noise from the Security Service operatives. For about two years I didnt watch TV news at all. Yet this only heightened their obsessed fixation; they continued to follow me wherever I went, they continued to induce harassment at work by managers and fellow workers, and they continued to encourage me to commit suicide. They seemed to regard my refusal to react as a crime which they would have to "put right" by ever more extreme forms of abuse.

Finally, in 1995, I changed tactics radically. Since late 1994 I had had accounts with internet providers in Ontario, Canada. I discovered the cornucopia of internet newsgroups, on every topic from consumer electronics, to politics and legal topics, and I discovered online services such as Compuserve and AOL. In May 1995, I made the first posting to the conspiracy newsgroup, on the subject of "BBCs Hidden Shame".

BBC's Hidden Shame

The internet newsgroup discussion, which has now reached its fourth anniversary, started with an article in alt.conspiracy, which I reproduce here.

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?

Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their "victim".

And the most remarkable thing about it is that what they do is not even illegal - the UK has no laws to protect the privacy of its citizens, nor does it proscribe harassment or abuse except in the case of racial abuse.

A lot of people in England know this to be going on, yet so far they have maintained perfect "omerta"; not a sound, not a squeak has escaped into the English press, and for all the covert harassment absolutely nothing has come out into the public domain.

Have the British gone mad? I think we should be told

At this point, I did not name MI5 as my persecutors. I was still unsure that they were the ones responsible for the "psychological terrorism". In followup posts however I did name them; and the persecutors have never denied the claim; so I think my guess is valid. (The Security Service Tribunal in 1997 have said "no determination in your favour was made", but it is a well established fact that MI5 lies routinely to the Tribunal which has never found in favour of a plaintiff, so no conclusions can be drawn from this.)

This first post was made to alt.conspiracy, but further posts were made to the UK-local newsgroups, in particular uk.misc but also uk.legal and uk.politics (which is now called uk.politics.misc). Some time ago I tried to take the battle to the Compuserve forums, UKPOLITICS (which is now called UKCURRENT - current affairs), but my articles were censored by the forum operators. Such censorship is impossible on the internet newsgroups.

Police Refuse to Act

I have complained several times to the Metropolitan Police, who have each time refused to help.

Subject: Re: MI5 Persecution: Why Aren't the British Police Doing Their Job?
Reply-To: Green@guidion.demon.co.uk
Date: Sun Apr 7 21:13:30 1996

In article <DpIE0r.736.0.bloor@torfree.net>
bu765@torfree.net "Mike Corley" writes:

>Last Easter (1995) I went into the local police station in London and spoke to
>an officer about the harassment against me. But I couldn't provide tangible
>evidence; what people said, in many cases years ago, is beyond proof, and
>without something to support my statements I cannot expect a police officer to
>take the complaint seriously.

This in itself dos not suggest that the police have it in for you. The old bill operates on extremely tight spending limits forced on them by that pillock Michael Howard, and without evidence, they often have higher priorities than chasing something
that cannot go to court.

I doubt that the police are actually being leant on, but they probably realise that if
they looked into this, they would be leant on hard. The met always stays away from anything that looks like it has Defence, Security or secret service interest already,
because they realise that they are below these government agencies in the general pecking order.

If I walked into my local nick and complained that MI5 were snooping on me, they would show me the door without even looking at my evidence, because that bored desk seargant with only five years to go before he retires doesn't want to start fucking about with somebody who has incurred the wrath of Stella Rimington. He would rather deal with the lost dogs and driving licence producers, eat his cheese and pickle sandwiches and piss off home at the end of his shift than have some high ranking spook having a go at his boss and getting him a bollocking.

In short, you have earned much sympathy but little surprise. Just remember that saying about the enemy of your enemies.

Most recently, I wrote in March 1999 to Charing Cross Police Station CID. They did not acknowledge or reply to my letter. When I phoned them up, the detective Id written to treated me to a sadly not unusual display of police bigotry, with an uneducated rant about "your paranoid rubbish".

It would be nice to think that such uneducated bigotry is something other than wholly typical of police behaviour, but unfortunately that is an illusion that is rapidly dispelled.

Uncorruptible Jon Snow of Channel Four News

From previous articles the reader will know what I think Jon Snow has recently been watching me while he reads Channel Four News in the evening. Recently I digitized a few moments of one such broadcast, where his face twists into a smile, without there being anything in the news broadcast to cause merriment. Here is a usenet post from some time ago on MI5s "bought and paid for" tools in the so-called "free" press.

Peter Harding (harding@ermine.ox.ac.uk) wrote:
: I was at speakers' corner on Sunday. There was one chap who was bellowing
: about something or other, I don't know what, but one thing he said to
: someone caught my ear:

: "BBC, MI5, same thing."

Can't disagree with that sentiment.

Wasn't it documented that MI5 sometimes "bought" journalists and broadcasters? I remember reading a report by some jouralist who had been offered an extra tax-free income by MI5 to become their covert mouthpiece, and had refused.

....

> : >mouthpiece, and had refused.
> :

> : It was Jon Snow of Channel 4.
>
> Was it reported in any of the papers?

It has been reported several times. The most recent was in Private Eye, a few months back. As I recall they also wanted information from him; journalists would be a natural choice for members of the Security Service and the Secret Intelligence Service for information sources.

> It might be interesting to see what he had to say regarding their
> attempt to recruit him.

He was most concerned that many others would have accepted such an offer. However, we can probably make an educated guess as to some of those who accepted: Nigel West (Rupert Allason, MP) and Chapman Pincher would come near to the top of the list.

Corrupt Security Service agents steal millions from taxpayers

Money is of course a factor in the grand equation which is the MI5 persecution. It costs money for the Security Service to "buy" people in the media etc. But that is only a small part of their expenditure of taxpayers resources. Most of the expenditure is directly on the salaries if the agents involved; and in this post I put forward the theory that MI5 are trying to draw out their involvement for as long as possible, very cynically, to maximise their income and line their own pockets.

At each stage they have tried to pretend that I am something out of the ordinary. Either I was very stupid ("he's an idiot") or very clever ("he's like a genius"). Either I was a threat to Western civilization (Levin once referred to me as the next Hitler) or I was completely defenceless ("a soft toy").

Now, it should be obvious to any person with common-sense that I am not out of the ordinary in any way. I have an IQ which is average for the Web, I am racially white European, and there are plenty of other people with schizophrenia or epilepsy out there who haven't been targeted for MI5 attention, so why me?

I think the answer is that the MI5 agents who harass me have cynically exploited the situation by painting me as extraordinary in order to assure themselves of well-paid employment funded by the ordinary British taxpayer. To put it bluntly, they are stealing millions of pounds from the taxpayer to feed their own pockets.

This assertion is supported by the observation that it's the same agents who are doing the harassment. Six months ago in a local hospital I was harassed by someone whose face I had seen (he had stared straight at me aggressively, at the time I just thought it was some nutter but it turns out he was one of "them") aboard a KLM flight a couple of years ago. It's presumably been the same people most of the time. I've seen the way contractors act when they don't want their positions terminated. Would these agents really want to lose their well-paid employment harassing me? Presumably they are promising their bosses a "breakthrough" (ie my demise) real-soon-now and have been for the last seven years, while all the while these MI5 agents skim millions off the taxpayer.

I wouldn't mind a job like that. Perhaps if I persecute myself a little bit, like standing in front of a mirror and shouting mindless obscenities, do you reckon I'd get a slice of the caky Service Tribunal. This year Nick Brooks, current Tribunal Secretary, confirmed to me that he could not think of a single case where the Tribunal had found in favour of a complainant. Here is my usenet post from two years ago.

Subject: MI5: "It wasn't us"
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net

"The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint."

Signed ER Wilson, Tribunal Secretary

Well that's a relief then. All that spamming for nothing eh. Gaw blimey, if they say they're not doing it then it can't be them, can it?

In a recent letter to Mr Brooks I expressed the opinion that the Tribunal were unable to fulfil their responsibilities in the face of MI5 falsehoods. Nevertheless, I do intend to make another complaint to the Tribunal in the near future, despite the Tribunal appearing to be a toothless watchdog.

Discrimination against a Unit Minority

MI5 have been very clear in their instructions as to what I should do. They have openly shouted at me the word "suicide", and also from the other abuse it is clear that they want my existence terminated.

This point is covered in more detail in a previous article. The following post describes the xenophobic nature of MI5s campaign against me. They have refined their bigotry down to a unit minority, yet they make use of the discrimination against the mentally ill which is a feature of current British society.

>'argue' with them.

I don't have florid symptoms. But I'm in a difficult situation, because those people who don't know, aren't going to believe, and those who do, they just go along with the crowd. It's never a good idea to go against the grain, and the grain here is defined by interests in the establishment and the media. Even people who could say out loud what was happening won't, because then there's a risk that they'll be seen as traitors and ostracised.

Usually this type of 'hidden abuse' is racial and targetted at a racial minority within a country. You keep the minorities out of the good jobs, but you don't admit discrimination exists. It happens everywhere, not just in Britain. The persecution that is going on now is in reality a refined form of racism. Instead of "nigger" it's "nutter", and abusing the mentally ill is still socially acceptable today. In 50 years it might not be, but today there isn't any social or legal sanction against it.

So really they've refined racial harassment down to a minority of one. The words may be different, but the methods are the same.

I have not tried version 3 of Kobold with long names but it works great on normal files and the jobs part is superb I picked mine up on e-bay for around 15e including postage to Dublin. It was mentioned previously as it was slow at copying files with long file names as it had to revert back to Gemdos routines.

thanks again to everyone who has replied to my posts.

Paul

I did that about a year ago. Works fine, and you just need a dremel
and a bit of patience. Also, it's a fairly idiot proof task -- about
the worst you can do is to ruin the chip, and you were planning on
replacing it anyways!

Dunno what this is meant to do!

> I have not tried version 3 of Kobold with long names but it works
> great on normal files

Kobold uses GEM to copy LFN files, ie is no quicker than a straight file copy.

I was trying to find out if the ATI driver for the Milan will support
```

widescreen resolutions like 1440x900

I think that the pci card can handle but I don't know about the driver.

I tried adding 1440x900 to mvdi.conf but when I rebooted it didn't appear in the selection list. At first I thought this was because 1440 is greater than the res that the monitor can handle.

So I tried 1280x720 but again it didn't appear in the selection list. Then i noticed that although there are only 15 resolutions defined in mvdi.cnf there are 25 listed in the selection screen. So I guess that the driver doesn't just list the ones defined.

What's going on ? And can I use a widescreen monitor ?

Peter

Hi all,

The Cheshunt Computer Club is the only Atari-supporting user group
left in the UK. We meet in Cheshunt, Herts usually on the 4th
Wednesday in the month. The December meeting is next week on the 12th.

We are looking for new members at the moment, as the club has lost
quite a few members over recent years. If you are in the UK, why not
come to one of our meetings?

See our website at http://ccc.atari.org/ for more details.

Hope to see you there!

James Haslam,
Chairman,
Atari Falcon030 owner

Capacitors pop. Smell may be good tool in this case. Besides looking for
toasty.
Good Luck.

Hi Alan,

>O.k, so i've got an eiffel hooked up to my Falcon, and something has
> shorted and popped something on the falcon mainboard.

What version of the Eiffel do you have? I have one that Satantronic
made, the version that fits in a slot on a PC tower case. In my case,
the Eiffel was shortcircuited when put in a metal case, the shieldning
of the joystick port carried some voltage.

had a look on the PCB layout and found out where it came from, and now
it seems ok. But do check things out carefully with a multimeter

before trying to hook it up to the Falcon again!

> > I'm not sure what to look for, any ideas anyone ?

Check this out:

http://groups.google.com/group/comp.sys.atari.st/msg/a1ca52fb18919bec?fwc=1

Hello Galen,

I have a dremel tool, so maybe I will give it a try some day. Just where on
the chip did you drill and what dremel bit did you use?

Hi Peter

I have been trying for over two months to buy Kobold 2.5 or 3 I
received a copy of 2.5 with my Falcon which I purchased from Germany.
I have e-mailed Ash, Shareware Europe, various German suppliers and
received no responce. My only option is to buy secondhand.

When I can get my hands on version 3 I will let you know.

Thanks a million.

Paul

Hi Peter

Thanks for the reply I am thinking about learning German to be honest
althoughat nearly 40 it might be too late!! Thanks for the offer of
speaking to your friend that would be great lucky him to get a free TT
if he gets tierd of it I will happily help him by taking it off his
hands!!! I had a TT in the 90's and loved it wish that I had not moved
over to windows. I have a Falcon now and love it.
```

Thanks again and I will contact you with any Kobold related questions.

thanks

Paul

I picked up an unused "eICo High Density Module" in amongst other Atari stuff. It's a small circuit board that allows you to replace the DD floppy in an ST with an HD floppy drive ***as long as you have a suitable floppy controller***. It comes with detailed instructions, software on a diskette, and the required wires & connectors, but NO floppy controller. You do have to have some expertise with a soldering iron to install it. And, as noted above, you DO need a suitable floppy controller; the standard ST one won't take being clocked at 16MHz.

Please email me if you would like it for the cost of shipping (around $2 to North America, $3.50 elsewhere). Otherwise it will probably find its way to the dumpster ...

Roger

Hi Mark,

MB>Yes, it may work if you flag it to run in STram.
that was my first thought. But no chance.

I had a closer look at these two cards. The one I've been using for 12 years now, is an aixTT with 32 MB. The card I was offered is magnumTT with twice 32 MB.

So, for the moment, I fell back to 32 MB, but am able to acceed to partitions beyond P.

But I don't give up hope that there is an expert to give me the correct jumper settings (if that's the problem).

Thank you anyway

Hi Paul,

PM>Thanks for the reply I am thinking about learning German to be honest
PM>althoughat nearly 40 it might be too late!!
it's never too late. :-)

And you need not speak a language if you just want to understand a
manual of a topic you're familiar with.

PM>Thanks again and I will contact you with any Kobold related questions.
Don't hesitate to do so. Even if I don't know a solution to a problem
of yours, I'll have a look in the manual for I own KOBOLD 3.51, the
most recent version as I know.

I use it for backups, and for a fast copy in between.

Early this November, Vendors began Advertising for the Christmas Season, But forgot the season for Giving Thanx. This November I'm Giving Thanx for wonderful Atari Customers. Atari Customers are the Best. A real Blessing. They're Loyal & keep coming back for more. Real Die-Hards. I'm Showing my Appreciaton to my Customers This November. Buy from Bravo Sierra Computers and get a gift from Ben Smith! Goto http://BenSells.Atari.org E-Mail BenSells@Atari.org or Call Ben anytime at (503)256-9974! Got Atari?

http://www.aracnet.com/~atari/specials.htm	ATARI THANK YOU SPECIALS!
http://BensCatalogs.Atari.org	BEN'S FREE ATARI CATALOGS!

I've got a fast turnaround rate. Usually, Once I receive payment your order goes out the same day. Customers love the speedy service! I have lots of Atari SoftWare & Books. Which I can send by Media Mail Rate!

Please Direct all Replies Through E-Mail to: BenSells@Atari.org or Atari@aracnet.com. If you can't reach me, see my info at the Bottom!

Atari Jaguar, 8 Bit and ST Games/Software, Hardware/Accessories & References/ Books. FREE Catalogs on Ben's Domain at http://BensCatalogs.Atari.org or at http://BenSells.Atari.org Catalogs can be attached to,Requested by & Received Through E-Mail at Atari@aracnet.com or BenSells@Atari.org and Please Specify Atari 8 Bit, ST, Jaguar and/or all 3! Or Call Ben anytime at (503)256-9974!!!

BA984 LHR->TXL 13/June/1998

Certainty level: 100%

In June 1998 I travelled on the above British Airways flight to Berlin with my mother, to visit her family. There were two women in seats 30D/E, about 4/5 rows behind us. It was quite obvious from the torrent of abuse during these flight that these women had been instructed to harass me and attempt to obtain a reaction.

I did manage to record much of the flight, but unfortunately much of the recording is unclear because of high background noise on the aircraft. The following three excerpts from the recording are the best I can do.

The segment at position 11:34 minutes on my recording contains a fairly quiet word "paranoid", followed immediately by a much louder "yeah, he's paranoid, yeah". During the flight the abuse was not sexual, as it so often is elsewhere, but attacking my mental health.

One of the women in seats 30D/E said "paranoid" very clearly towards the end of the flight, but unfortunately I had run out of minidisc space and stopped recording by then. There is absolutely no doubt in my mind that these women were directed to harass me. This harassment happens without fail on British Airways flights; I've been on something like three or four BA flights in the last 5 years and it's happened each time. Presumably this is because of international law which says incidents on aircraft during flight are actionable in the airline's country of origin - so my persecutors want a reaction from me, and they want to see me "done" in the UK where they can influence the justice system.

These incidents never happen on foreign-domiciled carriers.

Evil old bat in BHS 18/12/98

Certainty level: 40%

Not quite sure how sure I am about this one. I went down to Croydon (Surrey) with my mother to buy her a beret. After doing the shopping, we went to the BHS store restaurant to lunch on fish and chips.

You can guess the rest. Auditory hallucinations my shrink calls them, faithfully recorded on Sony minidisc. Some old cow going on about "see that chap, the one over there, something's wrong with him".

It is quite tiring being attacked by random idiots in the street, or as in this case, by some random, evil old bat in a restaurant. Fortunately it is only a sporadic occurrence. My enemies seem of late reluctant to waste resources in my direction. Should I take this as an insult? Am I not worth the millions of taxpayers money which has been wasted on me? Are the obsessives of MI5 themselves the "nutters" and "really mad" which they accuse me of being? Interestingly this suggestion as to the psychological profiles of Security Service personnel has been made by others... it does lead one to wonder, doesn't it?

Ravenscourt Park 20/3/99

Certainty level: 70%

On Saturday I went to Hammersmith, specifically Ravenscourt Park. There had recently been a resurgence of persecution activity, following the Capital spams. I went to the cafe in the park and had a cup of coffee outside, with my mother. As I went inside the cafe to return the cups, a woman shouted a sexual obscenity (not present on this audio file - don't ask), and she said loudly "something's wrong with him". You can just about hear it in the audio file; listen very carefully, several times; it is distinguishable.

Much less subtle is the male voice shouting "take care he's a nutter" immediately after the woman's voice. As on the other recordings there's a lot of noise, but what the people say can be clearly heard.

Given that I take medication and look and behave quite sanely, and that there had been increased abuse over the last couple of weeks, it seems pretty unlikely that this incident was just spontaneous.... of course, you couldn't prove otherwise, but then that's the way MI5 mean their abuse to look.

Battersea Library 29/3/99

Certainty level: 60%

This one is quite dull. During the month of March 1999, MI5 made another determined attempt to "get" me, substantially through radio programmes, through Jon Snow on Channel Four News, and through abuse in public, of which this is one example.

Recorded on my minidisc-walkman on Monday 29 March 1999, this audio file consists of two girls talking. One says to the other, "he's got something wrong with him." The usual words. How many millions a year do the Security Service waste on this? But they've denied it - how silly of me to forget. And they're not liars either, are they?

Royal Festival Hall 15/4/99

Certainty level: 100%

Another "day in the life of", this one. January and February were quiet; in March it all started again; by the middle of April the resurgence of abuse had been going on for over a month. And this, with 100% certainty, is one manifestation of the abuse.

On Thursday 15 April 1999, 1pm lunchtime, I was at the booking office at the Royal Festival Hall near Waterloo Station in London, buying a ticket for a friend. A woman was at the counter next to me. She said;

"it would kill it, you know, it would just be overkill...
.. they can't stop can they"

It was obvious to everyone, the ticket agents included, that her comments were directed at me, and that "they" (ie. MI5) were "killing" me.

I've heard similar things said at various other times, but rarely have their intentions been expressed as clearly as this. The woman also expressed the obsessive nature of MI5's preoccupation with me, by saying, "they can't stop can they".

Balham - LT bus (8/July/1999)

Certainty level: 90%

I am very sure about this one. I got back from holidays on Wednesday. There were two incidents, both on the tube, on the way back from the airport. There was a further incident the following day, Thursday, on the bus (the 155 I think) in Balham, where two girls started spouting abuse about "crazy", etc. Naturally I had my minidisc with me and was able to record their words.

The cynical reader might think my demeanour or behaviour had given rise to the taunts of "crazy" recorded above. But I assure you my behaviour on the bus would not have made anyone think I was ill; and the taunts the previous day were the same sexual words as previously; so I'm quite sure that these incidents are either deliberately staged, or indicative of an overall high level of awareness among the London public, particularly in the part of London where I live.

Clapham South (17/Feb/2000)

Certainty level: 100%

In February 2000, MI5's hate campaign against me was in full swing. They sent people into the road where I live in south London, to swear at me and abuse me as I was leaving or returning home. One such instance is recorded on the above audio file.

On Thursday 17 February 2000, I had just left my home, en route for Croydon, when two youths approached, going in the other direction. One of them said with a smile on his face something which I didn't recognize, and still don't understand despite it being on this audio clip. His demeanour made it clear his statement was directed at me. I coughed, and in response to that, he continued his insult, calling me a "wanker", which is very clearly recorded on this audio clip.

Two days later, in the very early morning of Sunday 20 February 2000, MI5 inflicted another insult against me just outside my house, when, returning from Croydon, two youths approached (MI5 agents always go in packs of at least two - they're too cowardly to go anywhere on their own) and one of them said quietly and bitterly to the other that "he's shitty, very shitty".

It is still comparatively rare for MI5 to send people to my house, or to my road, to harass me. Usually they know where I'm going to, since they have bugs on my phone and in each room of my house; and they send people to that location, or on the train or tube getting there.

Clapham Junction (6/May/2000)

Certainty level: 60%

On Saturday 6 May 2000, I was in Clapham Junction, shopping and visiting the library. At precisely 12:29pm, the above audio clip was recorded, in front of Arding and Hobbs department store. One girl was saying to her friend,

"He's a homosexual, they can say whatever they want."

There are several reasons why I think this comment might be about me. Firstly, temporal proximity to other such incidents. The persecution had restarted about two to three days before this clip was recorded. Cause of restart unknown. Personally I think it's because I was going on holiday to France the following Monday - MI5 do like to take holidays abroad at the taxpayer's expense, and inventing reasons to resurrect their hate campaign just before I go on holiday is something they've done before.

Secondly, although I am not gay, they have used such references against me before. At Oxford Computer Group in 1994, manager Steve Mitchell simultaneously abused me and another employee but saying we were "of a similar bent". Such insults show latent or quite overt homosexuality on the part of the abuser.

Thirdly, the sort of people who abuse on the basis of mental illness are the same people who abuse others on the basis of sexuality, race, religion, etc. If they can abuse a disabled man, then they will surely do so based on the other criteria mentioned.

There is still some room for doubt, though, which is why I have assigned this recording a certainty level of only slightly above evens. But "they can say whatever they want" is what gives the game away; they just choose a differentiating feature on which to base their abuse; and if one such feature gets too boring ("we've called him a nutter for the last ten years so now we'll call him something else") then they invent a different lie to throw at me.

Balham High Road (3/Nov/2000)

Certainty level: 60%

On 3 November 2000, I had just got off the bus in Balham High Road,
when I heard a group of schoolgirls shouting and laughing. One of them yelled;

"He's an idiot you know."

You can hear this on the above clip; it is followed by laughter. I am
not quite sure this is about me, which is why I have only given it
a two in three probability. I have been attacked many times with the
word "idiot", which seems to be a favourite with intellectual lightweights
who want to bring down bigger game. (Back in 1992 I was so worried by the
attacks on my intelligence that I took the test and joined Mensa......
does that make me a *clever* idiot? Never mind.)

Crescent Grove, Clapham Common (2/Dec/2000)

Certainty level: 100%

This is one of those clips where I am absolutely, 100% certain it's inflicted by MI5 on me, because of background, context. On Saturday 2 December 2000, I was walking from my home to a pub on Clapham Common, and on the way was in proximity to a group of three English youths who were walking the other way. They turned from the main road into a private estate called Crescent Grove. Here is what they said;

(first youth) "He masturbates!"
(his mate responds) "Yeah, he masturbates!"
(and again) "Thief!"

There is a lot of context associated with this incident, which I will now relate.

Firstly, the verbal sexual abuse is a popular one with MI5, and as a statement about me is currently mostly in their imaginations. The accusation has to be seen relative to MI5's persecutory actions in late November and early December 2000, and in fact for some months leading up to this. Their relevant activities in June 2000 are documented in a message in this evidence item;
following from that, they sent someone to simulate an act in front of my window, which was captured on film.

It is the publication of the video of their agent performing the act on himself which caused MI5 to restart this thread of harassment in the first few days of December 2000. But there are some subtleties; I uploaded the digitised video to this website on 26/November/2000; but I did not announce its existence on the newsgroups until Sunday 3/December/2000. These youths' slur was made the previous day, on Saturday 2/Dec. That tells us quite a lot. According to my website logs, there were no accesses to the video file before Sunday 3/Dec. So why did MI5 restart this particular thread of abuse, before their agent's activities were published on the newsgroup? The conclusion we reach is that they were watching my internet connection, either decoding the telephone line, or at the ISP; and/or they may be able to physically see what is on my notebook computer's screen, from RF transmissions from its VGA circuitry. I do not know whether the latter is technically feasible, but the former certainly is, and I have known for years that MI5 bugs my internet activities and phone calls. It is from their observation of my internet connection that they were able to tell, without accessing the video file over the net, that it was of their agent in a compromising position; and it was from that observation that their shouted slur on 2/Dec emanates.

The second accusation, "Thief!", is even more interesting. It relates to occurrences from June of 2000, some six months before these youths threw the word at me. It shows just how wide in reach geographically and temporally the MI5 persecution is; they react to something which happened half a year previously.

In the first half of 2000, MI5 made a determined assault on my friendships. In one particular case, that of A. whom I had known for virtually all my life, they partly succeeded. This person made pointed references to me which made it clear he knew what was happening; at one point he started asking "do you know anything about the FBI and the CIA". In June 2000, we went to see a film in the West End. I paid for both of us, and then asked him to return what I had paid for his ticket, some �7.50. He was reluctant to do so. Eventually he returned �5, settling for the lesser gain of �2.50.

I did not call him a thief to his face, but I may have spoken the word while I was at home, either conscious or in my sleep. MI5 have very tight control over everything I do and say in my home through their bugs; if I say anything against someone in "their" camp, they turn round the accusation against me. So, from the fact that A. tried to garner a few pounds at my expense, MI5 create the accusation, six months later..... "thief!".

Virgin Radio-Jon Holmes (4-5/Jan/2002)

Here are two segments from Virgin FM, one on Friday, the other on Saturday, both from the Jon Holmes evening show.

Certainty level: 80%

In early January 2002 I listened for the first time in some months to Virgin Radio, specifically to the Jon Holmes evening show on Friday 4 January 2002. They promptly attacked me verbally. Again, context is relevant. There are three instances in the space of two minutes on this extract;

00:18 "are you lying?"
00:22 "it's not fair"
01:24 "everyone at the amateur c+ turbo programmers club found it hilarious"

The first phrase is a straight slander. MI5 were trying to portray me as a liar at around this time; I have other audio with the same accusation. "are you lying?"; unsophisticated.

It's closely followed by the words "it's not fair". Note carefully the way he says

it,
quickly, as if to deny what he says. The phrase "not fair" was first created by
OCTS MD
H S.-W. in Nov/1992, and picked up on my first visit to hospital soon after
"they should have paid your fare").
Again, unsophisticated parrotting of a key phrase.

The third phrase is explicable through contemporaneous context. That morning I had
phoned about a C++ course. "c+ turbo programmers club"... again, somewhat brazen
we're-listening-to-what-he-says-on-the-phone, and he-can't-prove-it. Something got
lost
in translation from MI5's watchers to Virgin, because "c+ turbo" means nothing....
there
is no C+ turbo language, only C++, of which Turbo C++ is one implementation.

Certainty level: 80%

I wasn't entirely convinced from Friday's programme, but the following evening's
show confirmed it. It contained a number of references to my condition, of which
the
following excerpt is one such;

00:09 "I'm not well, and no-one cares"
00:24 "my voice sounds all funny"
01:01 "do you mean people that aren't mad"
01:05 "medical problem is it"

"I'm not well" doesn't mean he has a cold; it means he is being sarcastic about my
mental illness. "my voice sounds all funny" refers to the change in nature of my
voice when acute illness hits. "do you mean people that aren't mad" is obvious.
"medical problem is it"..... rubbing salt into the wound.

Balham Hill Post Office (14/Nov/2002)

Certainty level: 80%

By mid-November 2002 the persecution had again dwindled, as happens sometimes, when along came this item.
I spent most of my time at home, going occasionally to the shops in Clapham South, or into town to meet people. On this particular
Thursday I only left the house once, for less than fifteen minutes to post a letter (special delivery, because my ordinary and
recorded delivery letters had been disappearing en route for some time - not that anyone would accuse MI5 of such petty harassment).
At the post office counter there was an Asian guy talking into his mobile phone and grinning away. There is a probability that
his comments were directed at me, as I will explain further. The second segment of audio closely follows the first segment.

"you'll do it today? let's meet about 3 o'clock and have some lunch. I got stuff to do and I'll go to the bank,
get this sh.. fucking moving yeah. Even just a little bit do something. He doesn't understand, you know what it is,
I don't want to tell him again cause then he might, he thinks we're having a go at him, I'm not having a go at him,
I'm explain to him"

Explanation: The guy is talking about some bloke who is unnamed, however it might be interpreted as being in code about me.
"I'll go to the bank"... variously interpretable, either literally, or as sounds-like "wank" which has been a consistent
theme in MI5's abuse. "get this shit fucking moving"... abuse... could be interpreted as MI5's criticism of my inertness.

The state spends hundreds of thousands of pounds a year - they want to see some result, not just neutrality and ordinariness.
"he doesn't understand"... MI5 claim I'm stupid... but the numbers and bits of paper prove otherwise, so perhaps what that
is really about is their agents' subconscious perception of themselves.

"having a go at him"... sounds like they're having a go at me, doesn't it? You might take the audio at face value and assume
it's about some other guy, but it's normal MI5 procedure to pretend to be talking about someone else, and make the content of
the message very relevant to me, or their perception of me.

"for some reason it doesn't get into his head, I don't know why... he's lost it completely, hasn't he"

What reason is there for it not getting into his (my) head? Stupidity is implied. Also implied is that it does get into his head;
we're intentionally causing him damage. He's lost it completely... for some time I have suffered from OCD... lost it completely
is the persecutors' observation of my illness, which they see through the surveillance on my home, which they caused.

Eclipse pub in Balham (20/Dec/2002)

Certainty level: 70%

On Friday 20/December/2002 I went to Balham to do some shopping and eating. When I went into the Eclipse pub for a meal there were two girls already at the bar being server, I ordered and sat down near the window. They sat down at the opposite window seat, out of sight. After a few minutes they started screaming repetitively "section, section". They were reading something and were trying to pretend that they were just repeating from what they were reading, but in reality it was quite obvious they were talking about me, specifically to confinement under mental health.

As you can guess the behaviour of these unwise young things shows them to be from the underprivileged category which due to the natural laws of society is seldom seen in the better classes of restaurant - the McDonald's next door is their more usual habitat. My guess is that these two females were deliberately placed in the Eclipse with orders to be offensive to me personally. The alternative would be that no-one had ordered them and they were just being rude on their own account, but that is improbable, for two reasons; first, I was out of sight of them and one does not usually "pick on" a person one cannot see; secondly, there had that afternoon in Balham been other, less distinct incidents immediately preceding this, and it is inferable that MI5 were making quite a serious effort to create a physical incident, as they have done on numerous occasions previously. I give my interpretation a two in three chance of validity.

Barbican Library - 6/Feb/2003

Certainty level: 100%

Here's an item from early February 2003, at which time Security Service were re-igniting hostilities against me, a direct result of my appeal for a legal hearing against their organisation. On Thursday 6/Feb/2003 I went to the Barbican in central London with my mother to visit the library and have a meal. Security Service naturally knew about it because it had been mentioned the previous day in our house which is under constant surveillance on grounds of "National Security", so they may have been able to inform staff there to say something to me, as has been done elsewhere.
Two of the people at the Enquiries desk in the library obviously knew of my circumstances, I spoke to one of them who was very polite, and while I was waiting I heard the other speaking with a little less politeness, as recorded on this audio file. He said, "I spy", to start a game of guess what "I spy"; unsubtle, MI5 Spy. Then, at the 34 second mark on this clip he said;

"So obvious you couldn't even get that. I shall have to kill you. ha, ha, ha"

The words "I shall have to kill you" are interesting because such overt expression is rarely heard. Security Service wish me extinct.
Some years ago they were openly shouting "suicide" at me, so that is established.
But there is an element of doublethink in their attitude;

they use people's natural prejudice against mentally ill, who are popularly painted by media as being aggressive, to try to tinge the group's view of me and MI5's actions against me. The Security Service religion is that the country's enemies are deadly, and must therefore be extinguished. Hence, we must seize eagerly upon the disabled schizophrenic from Clapham, and throttle him, because who knows what'll happen if we don't.

There may be a subtle agenda of population control in what the Security Service have been doing in this country since 1990. In the current issue of 2600 Magazine (the Hacker quarterly, which I read from time to time) there is a quote from Hermann Goering on page 2; "the people can always be brought to the bidding of the leaders. All you have to do is tell them they are being attacked. It works the same in any country".
2600 printed the quote as a comment on the projected war against Iraq, which does not appear to pose any threat to the territory of those countries which wish to invade it. However the quote is somewhat relevant to my case, which is widely known about within Britain;
the security service instructs all right thinking citizens to do MI5's bidding and band together against a common enemy, while at the same time
there is a suggestion of "look what'll happen to you if you don't obey us".

Fanatic's Fare for the Common Man

Certainty level: 90%

The article reproduced below was penned by Bernard Levin for the Features section of the Times on 21 September 1991. To my mind, it described the situation at the time and in particular a recent meeting with a friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment over the previous year and a half.

There is a madman running loose about London, called David Campbell; I have no reason to believe that he is violent, but he should certainly be approached with caution. You may know him by the curious glitter in his eyes and a persistent trembling of his hands; if that does not suffice, you will find him attempting to thrust no fewer than 48 books into your arms, all hardbacks, with a promise that, if you should return to the same meeting-place next year, he will heave another 80 at you.

If, by now, the police have arrived and are keeping a close watch on him, you may feel sufficiently emboldened to examine the books. The jackets are a model of uncluttered typography, elegantly and simply laid out; there is an unobtrusive colophon of a rising sun, probably not picked at random. Gaining confidence - the lunatic is smiling by now, and the policemen, who know about such things, have significantly removed their helmets - you could do worse than take the jacket off the first book in the pile. The only word possible to describe the binding is sumptuous; real cloth in a glorious shade of dark green, with the title and author in black and gold on the spine.

Look at it more closely; your eyes do not deceive you - it truly does have real top-bands and tail-bands, in yellow, and, for good measure, a silk marker ribbon in a lighter green. The paper is cream-wove and acid-free, and the book is sewn, not glued.

Throughout the encounter, I should have mentioned, our loony has been chattering away, although what he is trying to say is almost impossible to understand; after a time, however, he becomes sufficiently coherent to make clear that he is trying to sell the books to you. Well, now, such quality in bookmaking today can only be for collectors' limited editions at a fearsome price - �30, �40, �50?

No, no, he says, the glitter more powerful than ever and the trembling of his hands rapidly spreading throughout his entire body; no, no - the books are priced variously at �7, �8 or �9, with the top price �12.

At this, the policemen understandably put their helmets back on; one of them draws his truncheon and the other can be heard summoning reinforcements on his walkie-talkie. The madman bursts into tears, and swears it is all true.

And it is.

David Campbell has acquired the entire rights to the whole of the Everyman's Library, which died a lingering and shameful death a decade or so ago, and he proposes to start it all over again - 48 volumes this September and 80 more next year, in editions I have described, at the prices specified. He proposes to launch his amazing venture simultaneously in Britain and the United States, with the massive firepower of Random Century at his back in this country, and the dashing cavalry of Knopf across the water, and no one who loves literature and courage will forbear to cheer.

At the time this article was written I had believed for some time that columnists in the Times and other journalists had been making references to my situation. Nothing unusual about this you may think, plenty of people have the same sort of ideas and obviously the papers aren't writing about them, so why should my beliefs not be as false as those of others?

What makes this article so extraordinary is that three or four days immediately preceding its publication, I had a meeting with a friend, during the course of which we discussed the media persecution, and in particular that by Times columnists. It seemed to me, reading the article by Levin in Saturday�s paper, that he was describing in some detail his "artist�s impression" of that meeting. Most telling are the final sentences, when he writes, "The madman bursts into tears, and swears it is all true. And it is." Although I did not "burst into tears" (he seems to be using a bit of poetic licence and exaggerating) I did try hard to convince my friend that it was all true; and I am able to concur with Mr Levin, because, of course, it is.

At the beginning of the piece Levin reveals a fear of being attacked by the "irrational" subject of his story, saying "I have no reason to believe that he is violent, but he should certainly be approached with caution". This goes back to the xenophobic propaganda of "defence" against a "threat" which was seen at the very beginning of the harassment. The impression of a "madman running loose" who needs to be controlled through an agency which assigns to itself the mantle of the "police" is also one which had been expressed elsewhere.

In the final paragraph of this extract, his reference to Everyman�s Library as having "died a lingering and shameful death a decade or so ago" shows clearly what sort of conclusion they wish to their campaign. They want a permanent solution, and as they are prevented from achieving that solution directly, they waste significant resources on methods which have been repeatedly shown to be ineffective for such a purpose.

Private Eye, 23 Oct 1992

Certainty level: 25%

I'm not really sure whether this cover was intended to get at me, or whether it was re-interpreted after publication to be about me. This issue of Private Eye came out in October 1992, by which time I had been under severe continuous pressure at work and from the general population in Oxford for many months. It had John Major saying to his wife, "Come back, Norma!" under the title "Major's support lowest ever".

There's a story behind this. In late October I was in the local pub (the Rose and Crown, nice traditional name eh) with two people from work, Simon and Phil. Phil had with him a copy of the current Private

Eye. These are both "nice people" and on my side, I hasten to add. Simon pointed out the message on the magazine's cover to Phil, and asked "what do you think about that". Phil answered, "Well usually they [Private Eye] get it right". This exchange happened in front of me. Although I was ill at the time (this was before I'd started taking medicines) I hadn't read anything into the Eye cover until these guys pointed it out to me.

Sometime later, again in the same road, a student shouted to one of his friends, "so when are you COMING BACK?", again in front of me.

What I realised Phil thought it meant was a double-entendre, the "coming" referring to the act of ejaculation, the "back" referring to the human back-side. So in a play on words you get a person who is referred to as a back-side ejaculating. Charming.

Of course, Phil could have been wrong. Perhaps there was no such meaning intended by Private Eye. Perhaps he saw meaning which wasn't there. Perhaps the moon is made from green cheese. Who knows?

Victor Lewis-Smith

Certainty level: 10%

Victor Lewis-Smith has issued a denial through his webmaster John Hayward-Warburton regarding this article; he says quite categorically it's not written about me. I kind-of sort-of believe him, but I think the conspiracy is so wide that the phrase "Eventually, I had to leave because they were all trying to kill me" could have been intended to be as if from any paranoid person, but could have been influenced by my case in the particular. So the influence could have been sort-of subconscious.

This article is from the Evening Standard of Thursday May 8, 1997. It is titled "Goon, and best forgotten" and may be found on page 31.

I think VLS has written/produced stuff specifically about me in the past, both in his Evening Standard column, one of which is reproduced below (in another case, he was talking about computer hacking, and I think that was directed at me), and a television programme in around late 1993 when he has a taxi driver who says "they're all trying to kill me guv" and VLS responds "you're supposed to be quite intelligent aren't you".

However, his webmaster has issued a formal denial on his behalf, so it is not for me to oppose what he has stated categorically.

Introduction to the Sent Faxes webpages

Between 1998 and April/2000 I sent some thirty articles on the subject of the MI5 Persecution to British politicians, media, legal and diplomatic entities in the UK. Of those articles 24 are reproduced on this part of the website. They were originally composed as Microsoft Word documents, and saved to HTML form for publication here. A few of them were slightly edited in format for readability.

You will see that these articles cover quite comprehensively what has been going on since 1990, there being quite a lot of material to cover, since it is a rare week that goes by without MI5 making some harassing or threatening action against me. "How could it be True?"... they use the mental illness which they induced in me as a ready explanation for my complaints. Who started it, why did it start, why it continues... these faxed articles provide examination in more depth of the treatment in the Frequently Asked Questions webpages.
The sheer meaninglessness of the Secret Police actions is highlighted; their operatives make their livelihoods by cynically exploiting the taxpayers, when in a more responsible country they would be looking at the inside of prison cells.

The validity of this observation is proven by their reaction to my several suggestions in the articles that I would cease sending faxes if MI5's agents (and it's always the same people doing the persecution) desisted from continually harassing me. A number of times, you will see in the faxed articles, I have suggested that we come to a "peace of mind agreement" where I cease complaining and they cease harassing. On one occasion, I wrote to Hugh S.-W., the director of OCTS where I was employed in 1992-94 and who is aware of the circumstances, asking that he intercede to bring this matter to a close, by initiating a meeting between myself and the persecutors to mutually settle our differences; he didn't reply, but MI5 did soon after - they said "This is what you wanted, wasn't it?, some sort of confrontation?". The reality is the people stalking me are not interested in any settlement; for them crime pays, and pays handsomely; moreover it is State-approved crime; the Police will never investigate or take action; it is corruption on an incredible level and scale, and it has gone on for over a decade.

You will see that the articles contain three elements; firstly, there are original written articles, many in the first half of 1999 when I was writing new articles every week and sending them by email and fax during the weekend; then there are "MI5 Persecution Update" articles, which list happenings recent to a particular transmission; and finally there is the "old faithful" Frequently Asked Questions article which was sent on a few occasions during the three year period. These articles generated a number of interesting responses from politicians and other recipients, many of which are documented in the "received faxes" area of these webpages.

I hope you enjoy reading these articles. I'm not as angry as these articles necessarily make out, only sometimes, usually soon after the persecutors have said something unpleasant at me; the purpose of putting lots of fire and ire into the mix is to try to chuck it into the public domain which might lead to MI5 being forced to curb their actions. Unfortunately that aim was not achieved, despite many, many thousands of faxes being sent. Also, if any policemen are reading this, then I'm (a bit) sorry about the rude things I said about "the Bill" in one or two of the articles; the police have never done me any harm (yet) by commission, only by omission of doing anything to investigate my complaints or treat them seriously.

Faxes Sent to British Diplomatic/Legal logs

During the 1998-2000 period my records indicate that I sent at least 3,642 faxes to diplomatic and legal offices located in the British isles, of which 3,345 went via TPC's email-to-fax service and 297 were sent via fax-modem direct from my computer. The actual figure is somewhat higher since, for most of this period, whenever a recipient asked to be deleted from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes was to keep more accurate and complete records, but the intention was thwarted by the police complaint.

Faxes Sent to British Media logs

During the 1998-2000 period my records indicate that I sent at least 6,137 faxes to the British media,
of which 5,775 went via TPC's email-to-fax service and 362 were sent via fax-modem direct from my computer.
The actual figure is obviously higher since, for most of this period, whenever a recipient asked to be deleted
from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than
wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a
recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes
was to keep more accurate and complete records, but the intention was thwarted by the police complaint.
Also in April 2000, I added some further fax numbers to my media mailing list and records, which is why some of the
faxnumbers below have only a single entry, and some indeed have none.

I've uploaded new versions of the SCSI/Link drivers for STiNG and
MintNet to the Anodyne Software web site; you can download them from
this URL:
http://www.anodynesoftware.com/ethernet/main.htm
The previous versions are still there, just in case ...

The fixes are as follows:
STiNG: Fixed bug that caused problems when the MAC address of the
SCSI/LINK changed, either due to replacing the device, or due to
overriding the default MAC address.
MintNet: Fix problem with ARP when using Daynaport firmware v1.4a.

Any problems, please let me know,
Roger Burrows

Faxes Sent to British Parliament logs

During the 1998-2000 period my records indicate that I sent at least 14,480 faxes to the British Parliament in Westminster, of which 9,138 went via TPC's email-to-fax service and 5,342 were sent via fax-modem direct from my computer. The actual figure is obviously much higher since, for most of this period, whenever a recipient asked to be deleted from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem. "E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted. "y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes was to keep more accurate and complete records, but the intention was thwarted by the police complaint.

MI5 Persecution: How Could It Be True?

If you have the patience to read these articles you will be struck by how apparently fantastic the claims being put forward are. You may ask yourself why such seemingly nonsensical assertions are made. This matter has been discussed on the Internets UK-local newsgroups for three years now, and the denizens of the uk.misc newsgroup (the so-called "miscreants") have come up with a number of theories to explain these posts; it has been variously suggested that they are a troll (an artificial creation for the amusement of its author), that they are made by MI5 themselves with the purpose of discrediting other conspiracy theories, and that the poster is mentally ill and the articles are symptomatic of the illness (the view held by most miscreants).

Are these claims the product of mental illness, or is that just a cover?

The most obvious explanation, that the claims made result from the admitted mental illness of the author, is the one which the persecutors intend be the one accepted without consideration being given to the possibility of the claims being true. The persecutors have actually been very clever about this, both in selecting as their target someone who was known from school or university as being borderline schizophrenic, and in ensuring the nature of their persecution corresponds to what often features in the delusions of a schizophrenic.

The very first incident of the persecution occurred in June 1990, when I was still a student at university in London. It consisted of a reaction (giggling) from the newsreader, Sue Carpenter of ITN, to what she saw happening in my living-room at my parents home where I was living. Before your imagination gets the better of you I should make clear that what the newsreader was reacting to was not too embarrassing in nature; my mother had brought an apple for me into the the room, and Sue Carpenter found this amusing.

I recognized that Carpenter had reacted to what she had seen in my living-room, yet this idea still seemed completely fantastic to me. My reaction was to continue watching television, particularly the news, to see if this incident would be repeated. It was, many times, both on BBC and ITV. An intelligent person would have thought to obtain a video recorder and capture some of these incidents in order to try to explain to an observer what he saw in these broadcasts. Unfortunately, I failed this test of intelligence, since I did not record these programmes. I have recently attempted to obtain from ITN tapes of their news programmes dating back to summer 1990, but, unhappily, they have advised me that they do not have complete programmes including newsreaders comments dating back to that period.

From the outset, the persecutors structured their actions to ensure that any complaint would be met with disbelief, and dismissed as delusional. This is why they chose as their target someone who was known at school and university to be borderline mentally ill; and it is why they fired the first shots of their campaign through the broadcast media. Schizophrenics commonly believe the media harass them; it would be exceptional for "full-duplex television" to exist in reality. Those with schizophrenia also commonly believe people are talking about them; again, the persecutors have shown themselves very rarely, but act through intermediaries, both in the workplace, and in public and during travel.

Mental illness is not the cause of these claims, but the simulation of its symptoms is a cover used by the persecutors to deny their victim the ability to have his compaints believed.

What evidence exists to support these claims of "interactive television/radio";?

Quite frankly, I have very little evidence to support my claims. You may examine the "Evidence" area of my website to see such evidence as I have been able to gather. None of it is remotely conclusive. The "smoking guns" all date back to 1990/91, and it is really rather late now to start trying to look for material dating back seven or eight years. In 1997 I started tape-recording every programme I watched or listened to. I also started carrying with me a high-fidelity minidisc-recorder with good quality microphone to catch incidents of public harassment, but this also has not been as successful or conclusive as I had hoped.

Perhaps the best item in the "Evidence" section is the audio file "Life is so hard" (it is labelled with Garfield the cartoon character on the site), which I have given a certainty level of 100%. This item relates to harassment at my workplace in Canada in 1996. A co-worker called Mark was coming up with phrases and expressions which were repeating things being said at my Canadian residence, consequently leading me to believe that my apartment and home phone were bugged, and that the persecutors were passing their gathered information on to Mark. On one particular evening I said in my apartment, "life is so hard, and then you die". The following day I was able to record Mark saying exactly the same phrase at work.

Unfortunately when "they" know you are recording them, they simply dont say things which would unambiguously show harassment. When Mark the co-worker knew he was being recorded, he only made his remarks out of range of the recorder, for example outside the building. When the TV newscasters or radio disc jockeys know they are being taped, they limit themselves to saying things which are ambiguous, which even in my mind may or may not be personally directed against me.

Who knows about this persecution?

Surprisingly many people know. People in the media, such as BBC and ITN newscasters including Martyn Lewis and Michael Buerk, and radio disc jockeys such as Chris Tarrant of Capital Radio, know what is going on, and take part in it. Some co-workers at my former workplaces in England and Canada have known about the harassment. Quite a few people in the general public are also included. I believe the police are aware of the persecution, but, unfortunately, have chosen not to take any action to stop it. I have complained at my local police station in London several years ago, and I have stated on the internet newsgroups that I have done so, hence the police will be well aware of my wish to see the matter resolved. I believe their inaction denotes a dereliction of duty, but without good evidence, I am powerless to compel them to take steps to prevent further harassment, or deal with what has already taken place.

What is the purpose of sending these faxes?

These faxes are being sent to three distinct groups of people, namely Members of Parliament, the media, and diplomats & legal people. As you will have observed I am making use of the email-to-fax gateway at Demon Internet to send these faxes. I am forced to use this gateway since I currently live in North America, and cannot afford the high cost of direct phone calls to the UK.

My purpose in publicising my claims is firstly to discourage the persecutors from continuing their campaign, and also to attempt to bring their campaign out into the open, and thus perhaps identify the persecutors. Neither aim has been achieved yet, but I hope that with sufficient stimulation these aims may yet be accomplished.

The problem with the second aim is that those who read this article will fall into two groups, those who dont know anything about the persecution and consequently will disbelieve my claims as delusional, and those who do know about the harassment and may have some idea of who is behind it, but realise that if the harassers are exposed and the truth brought out into the open, then powerful British institutions will substantially lose prestige, and be exposed to ridicule.

It would give me hope to believe that these faxes will create a third group of people, those who find out that I am telling the truth, and who follow their consciences in standing up and seeing justice done. Only time will tell if this hope will be realized.

Why do you think MI5 are responsible?

The question of who is ultimately responsible for this eight-year harassment is one which is very difficult to answer, as the persecutors have never clearly made their identities known to the persecutee. However, I believe I am correct in attributing the continuing victimisation to elements of the British Security Service MI5, and in this article, I will try to explain the reasons for this belief.

The British internet magazine ".net" featured my website on page 17 of their March 1998 issue (number 42). Their review kindly describes it as an "excellent site" and gives some details of what the net surfer will find there. Should you wish to reply to this article you can do so;

"When did you first suspect MI5 were responsible?"

Over Easter 1995 I went to see a local solicitor in London with a view to talking to the police about the harassment. Soon afterwards I did go to my local police station in Clapham and spoke to an officer there. The solicitor made a comment which suggested to me that the persecution I had been experiencing may have been organised by an intelligence service.

Up to this point, I did not have any clear idea as to who was behind the harassment. Only their agents were visible, in the media, on television news programmes, and on the radio; in the workplace, where things said at my home were repeated verbatim; and in some cases abuse in public and during travel, for example on the trip to Poland in June 1992 which I have already described.

Both from the fact that widely disparate individuals and organisations were employed as agents in the campaign against me, and from the fact that an entity would be required to marshal their resources in the areas of spying on my home and giving gathered information to their agents, it was clear to me that a single entity was responsible for carrying out the campaign. Yet from June 1990 until Easter 1995 I did not have a clear idea of who might be responsible. I guessed that perhaps some private individual or group of persons who saw themselves as my enemies had perhaps paid private detectives to organise the harassment. Alternatively, since the campaign had started in the media, I made a far-fetched supposition that perhaps it was an ad-hoc group of media people who had set themselves up in opposition to me. After Easter 1995 I saw that these guesses were wrong, and I made an I believe much more accurate estimate as to who my enemies really are.

"Why couldn't a private group be behind the persecution?"

There are several reasons why a private individual or group would not be behind this campaign.

Quantity of resources / Money. Here is what one Usenet (internet newsgroup) participant had to say (several years ago) on the topic of how much money it would cost just to keep the surveillance going.

```
PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
```

PM: >a quarter million a year. Over five years. What are you doing that makes
PM: >it worth the while of the state to spend over one and a quarter million
PM: >on you?

A private individual or group would not spend over a million pounds to verbally torture a victim without some financial motive or gain. Private industry is driven by the profit motive, and there is no financial profit to be had from carrying out a campaign in this way. If a private enterprise were behind it then they would have taken direct physical action a long time ago.

State enterprises, on the other hand, can afford to be wasteful, since they are funded by the taxpayer. They do not have to show a money profit. The employees or contractors employed by a state organisation such as MI5 are driven by their own personal profit motives, to make the most money out of their employers for the longest period of time. MI5 is funded to the tune of #150M p.a.; even a few hundred thousand a year would to them be affordable if their managers could convince themselves of the necessity of what they were doing.

Quality of resources / Technical resources - electronic and other surveillance. In summer 1994 a reputable and competent private detective agency was employed to conduct a counter-surveillance sweep of my home in London. They charged us over #400 for this, conducted a thorough search for radio transmitting devices, hard-wired "probe" microphones and also tested the telephone line. They found nothing. This was not altogether surprising, since it had been made very clear to me that there were bugs in my home; the "buggers" would not have made this clear unless they had felt their bugs were of sufficient sophistication as to be safe from detection.

But there is another lesson to be gained from the failure of the private detectives to find anything. The agency employed was one of the most reputable in London. They were employed on the principle of "setting a thief to catch a thief", for if the harassment were being carried out by private detectives, as I then believed, then surely another set of private detectives would be able to find the bugs that they had planted. That these "private eyes" were unable to find anything, and that the harassers were confident that they would not be able to find any bugs, points to the harassers being an order of sophistication above a private agency, and leads me again to believe that a state intelligence service is responsible for the surveillance and harassment.

Quality of resources / Technical resources - Interception of Postal service. In summer 1994 when I emigrated to Canada to try to escape the harassment, I wrote letters home to my family and friends in London. Quite soon after my arrival in Canada, the harassers were able to find precisely where I was staying. The only way I can see of "their" being able to find out my new address was by interception of my letters to the UK.

Later in 1994, I conducted an experiment to see if my letters home were indeed being read. In a letter home I wrote of being depressed and talked in vague terms of suicide. I deliberately chose this topic, since I believed it was the outcome my harassers were trying to achieve, and that if they read the letter, they would "echo" its contents. Sure enough, soon afterwards there were two incidents of people shouting "suicide" at me in public places in Canada.

It is inconceivable for a private agency to have the ability to intercept postal mail. The state security service on the other hand is well known to engage in these activities.

Quality of resources / Access to Media. One of the strangest aspects of this case is the access "they" have to the broadcast and print media. I still do not understand what could persuade newscasters such as Martyn Lewis and Michael Buerk, who consider themselves "gentlemen", to behave in an almost voyeuristic way by "peeking" into the living room of one of their viewers. A year ago I wrote to the BBC asking if these newscasters would confirm or deny the accusations made against them. The BBC replied that their newscasters had denied the accusations, but refused to do so in writing.

It is well known that MI5 have the ability to plant stories in certain newspapers, but convincing television newscasters to "watch" a viewer while they read the news would surely be very difficult for them to accomplish, unless they presented themselves to these journalists as being, for example, a group in the media who were seeing to it that I got my "deserved" treatment. MI5 has a history of manipulating the media, so it might not be too difficult for them to accomplish such a trick, whereas a private group would not have this ability.

"Have they ever denied that they are the Security Service?"

No. Never. This is in fact the main reason why I believe "they" are MI5 and not a privately funded group. If my guess had been wrong then I am sure that "they" would have crowed over my mistake, but they have never admitted nor denied that they are employees of MI5.

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly.

"If MI5 were behind it, why would they wish to mask their involvement?"

I have heard a number of times a belief from people in the media that it is they, the media people, who are behind the abuse. In spring 1994 Chris Tarrant the Capital Radio D.J. said sarcastically on his breakfast show, "You know this bloke? he says were trying to kill him. We should be done for attempted manslaughter". We, we, we. Tarrant thought it was a media conspiracy.

Returning to the question of "interactive watching" by television newscasters, it would again be much easier for them to take part in that sort of activity if they convinced themselves that the surveillance and abuse were organised by "their own", by media people. It must be second nature to MI5 to mask their involvement in the matters they deal with; in this case, they pretend the campaign is organised by a group in the media, and any journalists who suspect otherwise keep their silence.

Conclusion

Over the last three years I have stated with some force my belief that MI5 are responsible for my misfortunes. I have done so on Internet newsgroups, in letters and faxes to people in politics and the media in the UK, and in 1997 I made a formal complaint to MI5 regarding their activities; the Security Service Tribunal replied in June 1997 that "no determination in your favour has been made on your complaint". (I believe the statement by the Security Service Tribunal can be disregarded, as they have never, ever made a ruling in favour of a complainant.) In three years of naming MI5 as my oppressor "they" have never denied the charge. To me, their silence on this point indicates that my guess was accurate. I believe my persecutors stand identified. The question of why they should carry out this campaign is one I will try to answer in a future article.

MI5 Persecution Update: Friday 15 May, 1998

The persecution has been quite severe for the last week. It appears that my enemies are reacting to the steady stream of faxes making their way over the Atlantic to the fax machines of Westminster politicians and the media. Here is whats happened in the last few days;

The week started off with an incident in the cafeteria at a local shopping centre where I habitually drink my morning coffee. My enemies have concentrated since winter 1995/96 on throwing a particularly horrible sexual slander against me. They "put people up" to repeat this slander against me, and this is what happened again here.

On Thursday morning (yesterday), instead of going to the usual cafeteria I went to a nearby convenience store for coffee. The same horrible sexual slander was shouted at me very loudly by a member of staff as I walked into the store. This was the first time I had ever bought morning coffee in that shop. The other staff obviously knew what was going on, one of them said, "they screwed up my life".

The fax gateway I use to send these faxes to the UK has been working hard these last few days to shut down my access by barring the accounts I use to send these faxes.

I have received an anonymous threat from fax number 0171-219-6101 (the machine gave its name as "ETRA-HoC") which said, "Stop sending to this fax no 0171-219-6101 or else" (the consequences of continued transmission were unspecified). I invited the sender to apologise for his threat, but received no response.

This all adds up to quite a severe reaction to my faxes of the last few weeks. I actually find this quite heartening since it shows that my faxes are finding the mark and there may yet be a breakthrough in my efforts to expose the Security Service conpiracy of abuse against me which has now been going on for eight years.

MI5 Persecution: "Why would they be doing this to you, sir?"

This article will concentrate on the difficult question of "Why". The question which forms the title of this piece was asked of me by the police officer I spoke to in Easter 1995, when I went to make my complaint.

There are really two sides to this question. Firstly, why should MI5 be harassing anybody in this fashion? Secondly, if they choose to behave in this way, why should they have selected me in particular, and not somebody else? Alternatively, why did the persecution start, and why is it continuing?

I do not have definite answers to either side of this question, since my persecutors have usually kept themselves hidden and only acted through other parties. To know "why", one would have to know who the persecutors are, and something of their personalities, since their abuse is almost certainly symptomatic of a personality disorder of the abusers. Certain things however can be deduced about the abusers from the nature of their behaviour, and I will talk about this later in the article.

Why did it start?

It is clear that the persecution must have been initiated by someone who knew me personally, either at school, or at university, or socially, and knew that I was borderline mentally ill, since this is what makes me a target for the persecutors. Unfortunately, the originators have never been identified, and there are several possible candidates. Neither has the link from the originators of the persecution, to the persecutors themselves, ever been made clear. So who are the originators?

University Staff

The identity of the originators may lie in the timing of the persecution. It started in June 1990, while I was finishing a course at Imperial College in London, and a year after I graduated from Cambridge, where I received a degree in computer science. At Cambridge I had achieved some notoriety in the computer lab from various nefarious exploits. Roger Needham attacked me by saying that "there were great hopes for it, but it failed terribly". When I started at Imperial I found that my reputation had preceded me; Cambridge computer lab had spoken to I.C. lecturers about me. I.C. lecturer Frank McCabe summed up commenting about "setting up a straw man so you can tear him down". (Despite being "torn down" by the Cambridge computer labs lecturers, I still achieved a good first degree and a Masters degree at Imperial.)

Other students at university

So, the originators may have been university staff who knew me from my student days. But there are other possibilities. I had other enemies at university, including some fellow students. At my Cambridge college it was common knowledge that my mental health was dubious, and it was known that I talked to myself in my sleep - the floor and walls were quite permeable to noise, so other students heard. I was given the nickname "gibber" because of this habit. Sometime later, I managed to catch myself talking in my sleep when I woke up in the middle of the night.

Here is a quote from a participant in the internet newsgroup where I have been posting for the last three years;

>One thing which has been missing from this discussion is this simple
>prognosis: that maybe he is right and that, despite his admitted
>mental condition, there really is a campaign against him organised by
>now-influential ex-students of his university.

People I knew socially

I had yet other enemies in 1990 (I am a man of many enemies!). In January 1990 I broke up with some people I had been going out with socially. One of them, by the name of Andy Turner, wrote a letter to Alan Freeman, who at the time was a Radio 1 DJ. Freeman read part of the letter out on his Rock Show, about the "one who wore out his welcome with random precision", saying "thats a hell of a letter you wrote there Andy", and "with a schizophrenic youre never alone".

It is my belief that Andy Turner and his friends were trying to make trouble for me, and Turner wrote to Freeman with this in mind. Freeman may have discussed the letter with others, and things may have snowballed from there. This is, of course, pure supposition. The fact is that I do not know who the originators are, and can only guess.

Once it started, why is it continuing?

The answer to this question is obvious. It is unacceptable to the "powers that be" in the UK to have somebody running around who knows he has been targeted by the Security Service and media organizations, and who is in a position to embarrass British institutions. This has become particularly evident in the last week; as I send more faxes to UK politicians and media, so the pressure on me grows, and the volume of abuse increases.

Part of the reason the persecution continues is in the personalities of the abusers, and it is this subject to which I will turn to next, since the key to understanding the persecution lies in understanding those who carry it out, as much as we can.

The Security Service operatives, the persecutors, are they psychopaths?

Let us first examine the definition of the term "psychopath". DSM-IV defines "anti-social personality disorder" as a "pattern of disregard for and violation of the rights of others ... deceitfulness, irritability and aggressiveness ... consistent irresponsibility and lack of remorse". The Harvard Mental Health Letter of Sept 1995 describes these people as using "charm, manipulation, intimidation and violence to control others and satisfy their own needs. Lacking in conscience and in feelings for others, they cold-bloodedly take what they want and do as they please", having "no guilt or regret".

I must say, reading this description of the condition, that it fits the persecutors perfectly. The persecutors have never shown the slightest remorse or guilt. Even when I was severely ill, they continued to abuse me. They have repeatedly blamed their actions on me, which is another trait common amongst psychopaths. They have no respect for my legal or personal rights, and they use intimidation and verbal violence.

If the MI5 operatives are psychopaths then it would explain both why the persecution started, and the degree of verbal violence. Psychopaths by definition damage other people; here, the MI5 operatives find an outlet for their personality disorder, through "cripple-kicking".

Xenophobia on the basis of mental illness, and race

My enemies have made clear many times that one of the reasons they are persecuting me is because of my admitted mental illness. However, it is my belief that they are also persecuting me because I am not of ethnic English origin, and the fact that there have been several incidents of an overtly racist nature reinforces this view.

In one case, two youths on a tube train in London made openly racist references to me as a "soft toy, not up to British Standards". Another person near my home made remarks about "Polish people". In yet another incident in Croydon, a youth made comments about "foreigners".

But the main thrust of their xenophobia is because of my mental illness. I should make clear that I do not look ill; if you met me, you would not know that I had the illness. I take a relatively low dose of medication, and feel quite well. But the persecutors have repeatedly harped on about my supposed serious mental illness; they have called me a "nutter", a "schizophrenic", etc. They have also persuaded other people to use these terms of abuse. They are able to get away with this because abusing the mentally ill is still something which is mostly acceptable in Britain; the media do it, "nutter" is not taboo in the way that "nigger" is.

Conclusion

There are several groups of people who might have wished to cause me trouble, and I still do not know who originated the persecution. Nor do I know how the originators came to be in contact with the (presumed) Security Service operatives who have been carrying out the campaign. To know conclusively why it started, we would have to know who started it, and this information is not available.

However, we can infer some things about the personalities of the persecutors from their methods, and from the degree of verbal violence they employ. It is clear that a main reason for the continuing harassment is the psychopathic disorder of the MI5 agents who carry it out. That they have never been "brought to book" for their misdeeds reinforces their belief that they do no wrong; and, unhappily, until they are brought to book, their persecution campaign looks set to continue.

MI5 Persecution: .net Magazine Applauds my Website

The March 1998 issue (number 42) of .net Magazine reviews the MI5 Persecution website describing it as an "excellent site". The webpages describe in detail the nature of my persecution since 1990 by what are believed to be elements of the UK security service.

(snip image)

You are encouraged to read the web pages which include

o   a FAQ section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public

o   an evidence section, which carries audio and video clips of media and
    workplace harassment, rated according to how directly I think they refer to me
o   factual descriptions of the state security agencies involved
o   scanned texts of the complaints I have made to media and state security agencies involved
o   posts which have been made to netnews over the last three years on this topic

I'm curious.. just how well does the Daynaport Link SCSI solution work
compared to the other ethernet solutions available for our platform?
Speed, reliability etc?
As my cartridge port is already filled up with several other devices
using a NetUSBee is out of the question (besides, it doesn't seem to
be available any longer: http://hardware.atari.org/netusbee/netus.htm).
The EtherNEA and Ethernet Adapter II (http://www.asamnet.de/
~hilgarte/) seems unavailable as well (the author doesn't reply to his
email), so apart from the NetUSBee nothing else apart from the
Daynaport Link setup seems to be available if you want to network an
STe using Ethernet. Correct me if I'm wrong.

According to the Anodyne page (http://www.anodynesoftware.com/ethernet/
main.htm), the Daynaport seems to be a fully working solution, but the
warning about the possibility of it interfering with the I/O of the
hard drive scares me. I'm reading between the lines that the Daynaport
is a highly experimental solution which might or might not work well
in the long run. I'm not sure if I want to take that risk.
I'd like to hear from others who have been using this sort of setup,
and also if there are other Ethernet solutions available (after all,
finding a Daynaport Link seems to be both hard and expensive -and yes,
I've searched eBay etc.).

We really could need someone to bring back the EtherNEA and/or
Ethernet Adapter II projects by Elmar Hilgart and Thomas Redelberger:
http://home.arcor.de/thomas.redelberger/prj/atari/etherne/index.htm
http://www.asamnet.de/~hilgarte/

At present, rough schematics etc. are available for the EtherNEA (from
Thomas' site above), but if you're not an engineer who can figure out
the rest yourself it's simply not a simple "etch-a-PCB-and-solder"
type project.
The Ethernet Adapter II (http://www.asamnet.de/~hilgarte/
acsi2ether2.php) looks like an even better solution because it has
everything available on one PCB (unlike the EtherNEA which needs a
separat NE-2000 ISA ethernet board), but for that one no schematics or
further information is available at all. It seems that only a single
prototype has been made, then scrapped. Something which surprises me
as there's an obvious demand for ethernet boards for the ST.

It needs a "proper" SCSI adaptor, but won't work on many of the ASCI<=>SCSI
solutions out there that don't implement SCSI pass through. I have used one
on my TT, and apart from blocking the floppy its fine. If you have a
suitable SCSI adaptor I'll lend you one to try...

Which Ethernet solution are you referring to? (you quoted my entire
posting where I discussed several solutions).
Do you have an "Ethernet adapter II"?
As for a "proper" SCSI host-adapter I'm assuming my Link 97 will work
fine, at least from what I've heard.

Umm, lets see...

Ishar 2
Ishar 3
Crown of Creation
Running
Robinsons Requiem
Killing Impact

and ST or STe games that I just like better on the Falcon:

Stardust
Obsession
Ultima 6

and actually many more, but thats it off the top of my head. :)

What's the connector on the left side of the Mega STe keyboard for?
Apparently the mouse doesn't work with it, so is it for a joystick?
Strange that they're not marked in any way.

Is it possible to (with the aid of e.g. an AUTO program) to make it
work with a mouse?

Finally, is there a downloadable user-manual for the Mega STe
somewhere? Actually, user-manuals for all the Atari ST computers would
be nice, but I've only found sites containing service manuals,
schematics etc (which is also great of course).

Digital joystick connector. Like all ST's the JS is controlled by the keyboard controller. No manuals available afaik, system disks would be handy too.

Mark

Yeah, I agree. There are many more nice programs for Mint, then for Magic. Right now I use mainly Magic on my Falcon, but I will change to Mint as soon as I get my CT63 upgrade. Too bad about Magic though. It is a great OS and just needs a BIG upgrade that, for now, will never come.

I used to have the MSTE disks somewhere. There's nothing different about
them from the stock STs. The 16Mhz mode is automatically picked up by the
later CPX versions.

I think you'll find that Kobold 3.5 was never released in English.
I have a version of 3.51 that I translated for my own purposes,
but as it's still commercial, I don't think I am at liberty to
distribute it.

Regards, /Peter/

I'm hoping some of the German Atari ST users out there can help me....

I'm very interested in the EtherNEA solution ("EtherNE" interface
board to be used together with PC compatible ISA type NE-2000
networking card and finally an "EtherNEA" board which connects
everything to the ACSI port), or even better: the self-contained
"Ethernet Adapter II" which connects to the ACSI port.
Unfortunately the authors have never replied to my email, even though
their websites are still active.

I'm trying to get in touch with:

Thomas Redelberger (http://home.arcor.de/thomas.redelberger/prj/atari/etherne/index.htm)
and
Elmar Hilgart (http://www.asamnet.de/~hilgarte/)

Perhaps someone who speaks better German that me could ask in a few
German Atari ST newsgroups in case someone else knows about their

whereabouts and possible new email addresses.
Thanks!

I don't think that these two have been involved for some time now. Lyndon built the last one I got. Whilst I don't use mine very often I guess I could probably answer questions about them,

Dave

Wasn't Lyndon Amsdon involved only with the EtherNEC (the cartridge
port version)?
I'm interested in the EtherNEA (the "A" standing for "ACSI" meaning it
plugs into the Atari ACSI hard drive port).
Is that the version you have?

Hi Peter

Thanks for your reply, I have Kobold 2.5 german edition that was included with my Falcon which I purchased from Germany. I have tried to buy Kobold 3, MagiC 6.2, Jinee 2.5 and NVDI 5 directly from Ash, EuropeShareware and not one of these online companies has bothered to reply to my mail let alone take my credit card and sell me the stuff. I am left with no other option but to buy second hand or use copies. I want the full pack with manuals but two months i have only managed to buy NVDI 5 from a chap in Wales.

How did you translate kobold as there is no resource file? I would be happy to try out your versiopn of Kobold and would be willing to buy the 3.5 German edition if somebody would sell it to me.

Paul

```

Last week I received a call from Karen Tucker, who is organizing the December 10th appearance of Jack Tramiel at the Computer History Museum in California. The event will include key people from Apple, IBM, and Amiga (see below). When writing the book "On the Edge: the Spectacular Rise and Fall of Commodore" I tried getting an interview with Jack by calling him almost a dozen times, writing several letters to him, and getting his son Leonard to convince him - everything short of showing up at his ranch and demanding an interview. I'm in awe that Karen has been able to make this happen. Apparently she and Leonard convinced Jack that it was important for him to talk about his experiences before it was too late.

Karen wanted me to pass on some information. Basically Jack is done with the confrontational period of his life where he had to be hard nosed in order to run a company in a cutthroat industry. He's now a retired grandfather who spends most of his time traveling with his family. Karen wants Jack to feel welcome, where everyone in the audience can listen to his history with an open mind. Hopefully if he feels welcome at the museum he will participate in other events and we can eventually piece together his experiences in the early computer industry. Karen knows that most people will be receptive to Jack, but she was a little worried that a few might decide to throw his kind gesture back in his face by confronting him. If you know of anyone who plans to do this, please discourage them from attending.

From what I could gather, this is in celebration of the 25th anniversary of the C64. There will first be a one-on-one interview with Jack moderated by John Markoff of the NY Times. After that, Steve Wozniak (Apple II), Bill Lowe (IBM PC) and Adam Chawniac (Amiga) will take to the stage for more discussion. The discussions will probably focus on Commodore, though it's possible his Atari history will be included. Everyone is welcome and if you aren't in the area there will be a video webcast of the event available on their website. This promises to be a great event, and I hope to see you there!

More information should be available soon at:
http://www.computerhistory.org/events/

All the best,

Brian Bagnall

Nope, because I couldn't find any connectors. When I spoke to Lyndon he said
that the "A" version was much more tolerant of Ethernet card. What issue do
you have?

Well, I don't have any ethernet abilities at all and thought the EtherNEA or Ethernet Adapter II looked like good solutions for my setup as my cartridge port is already chock full.

The downloadable documentation doesn't have enough information in my opinion for me to make one on my own. I really need a PCB layout so I can just etch the PCB, solder in the components, insert it in the computer and off we go. That's why I'm trying to get hold of the authors behind it.
The "Ethernet Adapter II" is especially interesting as it has everything on one board.

Which connector did you have problems getting hold of? Were you
planning on building an EtherNEA yourself?

>

I would guess that any work on this has stopped. The page elmar.hilgart's pages has not been updated for 3 1/2 years, so the "new" and "available soon" are real oxymorons, but on http://www.eh-systems.com/ there is a phone number. You might try that... Lyndon has moved onto a new USB and Ethernet cartridge port board, which is no use to you...

The etherNEA board is very simple. Why don't you try breadboarding one up on Vero?

> Which connector did you have problems getting hold of? Were you
> planning on building an EtherNEA yourself?
>

When I build my EtherNec I really wanted to make a the EtherNEA but like you couldn't find a PCB layout or an ASCI port connector, so I built the EtherNeC as I managed to buy all the bits and it worked once I found an RTL8019AS card. I don't think any one has an Ethernet II card appart from Elmar, which is a pity. Again as the info on Elmars page say "First Prototype" then I guess he has never produced a commercial PCB layout. I wonder if the reason why is that if he does he must make the layouts available, as this is required in the license agreement for the software.

By the way, what are you using as a SCSI card. Would on ene of the Mac SCSI/Ethernet adaptors be any use?

Hope Peter doesn't mind me jumping in.

He would have used a binary file editor to directly edit the German text. We (DDP Translations) would have deal(t) with the wider distribution of the translation by generating a patch file with eed like we did with Papillon.

What tends to suffer is keyboard shortcuts, depending on how they were implemented.

Hi Derryck

Thanks for the reply, I think I may have bought some software off you in the 90's? Is there a translated file for Kobold 3 available? If there is i will happily buy the German version (if some company is willing to sell it to me) and install the pastched version. If not what utility would you use to change the texdt in the application?

Thanks

Paul

NVDI is no further supported - though it's still proposed as a commercial
application - for at least 4 years now.
And I'd better not write what I think about such behaviours... :-(

I'm sure that we can supply a patch file.

I believe that Peter would have used Harlekin, but QED has a binary
file editing option.

Hi Derryck

It would have been in the early nineties when I lived in the UK. If
you could supply a patch for Kobold 3 that would be brilliant. I have
Harlkin 3 but it crashes my Falcon.

thanks in advance.

Paul

Assuming that Peter has no objections, I have extracted the (English) text from Kobold 3.51. Let me know when you are ready for it.

Peter?

Hi,

since I replaced my TT-RAM card equipped with 32 MB by another one (64 MB) that a friend left to me, my TT resets every time after the AUTO folder programs have been launched...

I wonder what BigDOS has to deal with my TT RAM. To explain: BigDOS gives the feature (among others) to give access to drives beyond P: when running TOS and usually comes along with HDDRIVER...

And I'm pretty sure it's BigDOS, for if I remove it from the AUTO folder, I normally arrive on my TT's TOS desktop.

Any hint welcome

Thanks

Peter

Hi Paul,

PM>Is there a translated file for Kobold 3 available? If there is i will
PM>happily buy the German version (if some company is willing to sell it
PM>to me) and install the pastched version.
I think itdepends on what you intend to do with KOBOLD. If you just use it as a fast copier, maybe you won't need an English translation. If, of course, you'd prefer to execute /KOBOLD jobs/, ok, it's better to know precisely (in your mother tongue) what you are doing.

Ok, German is a hard language to learn, but in some terms it is very close to English. If you've got questions concerning KOBOLD, ask them to me, and I'll try to give you an answer. By the way: Did you ever see what happens when you click on the cactus you see when you have a look at /�ber den KOBOLD/ (about the KOBOLD) in the /Datei/ (file) menu? :-)

You know, so many people leave the Atari platform (nicknamed system changers to the industrial standard...), and at any these times a lot of hardware (and soft, of course) changes its owner.

A few weeks ago, a friend of mine got a spare TT from another friend of mine (for nothing) and got a lot of soft. I'm going to ask him if he has an original disk of KOBOLD that he won't need and if he agrees to leave it to you.

Und TTsch�
ps

>happy to try out your version of Kobold and would be willing to buy
>the 3.5 German edition if somebody would sell it to me.

I used hex_edit.prg to edit the text in the kobold.prg file and since English is normally shorter than German, it fitted; I padded with spaces where the new text was shorter than the old.

If you can obtain a legal version of the German 3.5, I will gladly let you have a translation. Note that I don't have an English translation of the manual for 3.1 - only for 2.5. There isn't much difference, except that 3 will handle long filenames - though only slowly since it copies these in GEMDOS mode, file by file.

Have you tried writing to the makers? They are (or were!):
Kaktus
H.J. Richstein & E. Dick GbR
Konrad Adenauer Str. 19
D-67663 Kaiserlautern
Germany.

Regards, /Peter/

Hello,

If its place in the auto folder is correct, it might be caused by its internal settings, that are supposed to be changed using a small utility named setter. Unfortunately for me, I couldn't find any version of this utility that could allow me to set it up. So I finally gave up and removed it from the auto folder. :-(
I hope you'll be luckier.

Regards,

J.-Luc

I do not know a current address, but this one is definitely outdated. As
far as I know Kaktus does not exist anymore.

**************** Update********************

I have so far managed to buy secondhand complete versions of the following NVDI 5, MagiC 6.2, and Calamus SL. Both Protext 6 and Positive Image 2 have been offered to me for the cost of posting I am in the process of sorting these out (thanks to those who offered). I have updated my list below:

Kobold 3.5
Jinee 2.5 or Ease 5 (or what ever was the last English version)
ImageCopy 4CD
View II
Thats Write 3
Calligrapher Professional/Gold
LayoutTC
Neodesk 4 and Gemini (Gribnif)
Harlekin 3
Interface 2
Apex Media (Falcon)
Straight Fax 2
CalAssistant (Calamus Hypertxt help)
PageAssistant (Pagestream 2 Hypertxt help)
Didot range of applications

Thanks to everyone who has taken the time to reply to the post I really appreciate it.

Thanks

Paul

Yes, it may work if you flag it to run in STram.

Mark

Foxy's Showtime on Capital FM 25/11/98 7.35pm

Certainty level: 100%

This one, I can say with absolute certainty, is about me. It was recorded on my Sony Recording Walkman on the evening of Wednesday 25 November 1998. It doesn't mention me by name, so the objective observer might have trouble understanding why I'm so sure it's about me. I'm sure, because the harassment had restarted over the period when this piece was broadcast, and what Capital transmitted would have been in context with events at the time. (Sorry if that explanation is somewhat opaque, but I don't really want to embarrass myself by giving an explanation in detail, and an intelligent reader should be able to work it out for him/her self.)

This isn't the first time Capital have "got at" me; they were doing so right at the very beginning in summer 1990, when they said, "if he listens to Capital then he can't be all bad"; and Tarrant made remarks about me in his breakfast show in spring 1994, when he said, "you know this bloke? he says we're trying to kill him. We should be done for attempted manslaughter."

Unfortunately I didn't record those previous, much more conclusive instances of harassment by Capital DJs, and Capital Radio tells me they only keep recordings for three months. But lately I've been recording everything, and here is one product of that recording.

Neil Fox was introducing some petite Swedish songstress, sounded like Amelia, when he said something about her petite-ness ;

"she's a big big girl, actually she's really about tiny, she's this big, would you say what less than....."

then one of his studio staff shouted, "six inches"

then Fox laughed and said, "less than a meter tall, definitely"

What I think the "six inches" referred to should be obvious. I think it's sexual abuse directed at me.

Also there were a lot of words like "crazy", "mad" etc on this programme, which reinforced my belief that this was on purpose directed at myself.

I think Fox may be something of an unwilling participant in this abuse, he doesn't want to be an abuser but the persecutors are using his show and his staff to get at me. This is not the first time this sort of thing has happened from his show; and my guess is that it won't be the last

Jackie King from the Flying Eye 14/3/99

Certainty level: 40%

In early March 1999, Capital Radio alleged they had received some emails, one of which was forwarded to me. It contained the words, "you know this bloke, he says we're trying to kill him, we should be done for attempted manslaughter!" which Chris Tarrant had said in 1994.

Following these emails there was an explosion in abuse activity, both from Capital Radio, and from MI5 themselves. MI5 followed me around and hurled abuse at me. The following audio file contains what may be abuse from the radio station.

Jackie King from the Flying Eye made these remarks on Sunday (14/3/99) lunchtime 12.24pm; "gas main work being, er, HANDLED if you like (laughs, embarrassed) outside Madame Tussauds, Euston Road obviously feeling the backlash of that".

The key word is "handled", which she sounds embarrassed to be saying; to me it looks like an attempt at a sexual slander. Capital Radio aren't even pretending not to get at me any more. I asked Chris Tarrant several times about his remark from 1994, and he has consistently avoided answering.

Virgin Radio-Johnny Boy (21/August/1998)

Certainty level: 60%

On Saturday 15 August 1998 I attended a gathering of contributors to newsgroup uk.misc at London's Victoria railway station. Also present was Simon G, who had previously given this description of what he would be wearing;

At 06:36 AM 13/8/98 GMT, Simon wrote:
>further clarification to aid recognition, i'll be wearing
>a t shirt, a brown suede waistcoat, a brown suede miniskirt,
>& a pair of patchwork leggings (& may have a widebrimmed straw
>hat, too).

It is my belief that my persecutors, who monitor my home telephone line (and consequently read all modem communications including email), were aware of this meeting, and may even have observed the "meat" taking place.

Following the "meat" it seemed to me that one or two attempts were made by my persecutors to portray me as "gay", on the basis of Simon's suede miniskirt, which in their inventiveness my persecutors attributed to me, not Simon. (Just for the record, Simon is hetero, and has agreed to the above email extract being published.) The following item from Johnny Boy's Wheels of Steel (between 7pm-11pm, Friday 21/8/98) is one such attempt.

(conversation) (J=Johnny-Boy, H=Hipster)

J: Texas of course part of V98 this weekend enjoy it if you're going. Keep your eyes out on Sunday in Chelmsford for Hipster, because he's going to be there. What are you going to be wearing?

H: I'll be wearing my, er, my suede shorts.
(sycophantic laughter)

J: and believe me he ain't joking, he ain't joking. OK coming next at Virgin on the Wheels of Steel...

Why do I think Hipster's "suede shorts" refers to Simon's mini-skirt? Because "suede" in both cases (obvious!); because "suede shorts" indicates "gay" which they were trying to pin on me; because "shorts" = something short, such as a "mini"-skirt; and because the two DJs both laughed as soon as Hipster said "suede shorts", they knew what the joke was, they knew that they were meant (and probably paid) to find it funny.

Virgin Radio-Johnny Boy (19/June/1999)

Certainty level: 30%

I'm not quite sure about this one, so I've given it a one in three chance of being about me. First the background.... from mid-March 1999 for some three or four months, every weekend, I bombarded Westminster MPs with faxes about the terrible, all-encompassing MI5 Persecution. (Jesting aside, it really is terrible and all-encompassing, in the UK anyway.) Of course each week some MPs replied; but in June 1999, after I'd been at it some three months, I started getting "covert" feedback from Virgin Radio.

The first feedback I got was from Danny Baker, on Sunday 13th June. That weekend I was sending an article which contained biting criticism of the police inaction in this case. Danny Baker on his Virgin radio show started an angry rant that "he knows it's rubbish", ie. he was rubbishing what I'd said in that weekend's faxed article. Unfortunately I wasn't recording this programme.

The next possible Virgin-Radio feedback was a week later on 19th June 1999. This is contained in the audio file above, in which Johnny Boy on his "Wheels of Steel" programme says;

"and if you would like to put a triple play together, ahhh.... because quite frankly Hipster and me are running out of ideas...."

He goes on to counter Hipster's "how dare you" with a protestation that he is "only joking".

What I reckon is that my article faxed to MPs that weekend was forwarded by one of the recipients to Virgin Radio. My article had included the words;

"I am beginning to run out of both new topics and energy to write these articles."

So what I reckon is that Johnny Boy read the article.... and rephrased the above line "run out of ... new topics" to "running out of ideas".
I recognise that this is a pretty tenuous inference to make.... but do listen to the audio file, from the "ahhh...." pause in JB's speech you can guess he is about to say something "risky" and at someone's expense.
Anyway, I listen to the Wheels of Steel regularly and will continue to do so, recording it as I always do - so any future funny remarks will get immortalised on these pages!

Brighton Day Trip - 24/Sept/1998

Certainty level: 5%

On a day trip to Brighton, carrying a minidisc recorder, I managed to collect several indistinct instances of what I think were people swearing at me. Between the 0.5 and 1.5 second marks of the above recording is something that sounds like "nutter". I recorded at least three other much more obscene sexual words on the same day.

I don't honestly think the "nutter" recorded here is part of the conspiracy against me. I've been called similar things elsewhere, where it's been blindingly clear that the insult does form part of the conspiracy - but not in this case. This illustrates quite a worrying point - as a result of the many years of abuse "in public", I now sometimes simply don't know whether somebody is insulting me because they think I look like a dweeb, or whether the conspiracy is in action. Sometimes, due to background noise and people talking quietly relative to ambient noise, I can't be sure of what's being said, even after listening to it again on my minidisc. Or put another way, I now have a mild form of what I recognise to be occasional auditory delusions - but these are fuelled by the many years of actual verbal abuse.

POSK Cafe - 2/Feb/1998

Here are two independent segments, both of which occurred in London on the same day, the first at a Polish cafe, the second on the Tube.

Certainty level: 100%

POSK is the Polish Social-Cultural Centre in Hammersmith, London. It has quite a nice cafe which does pierogi, golabki etc. I went there with my mother early in 1998. Seated at the window table were three Polish men talking amongst themselves. One of them let rip with a sexual obscenity which was clearly directed at me (it's the same one that's been heard again and again since about November 1995), and which was recorded on my minidisc walkman. I have not included it in the above excerpt, which shows the reaction of another of the trio to the first man's swearing - namely, "jestes swinia jednak" which in English is "nevertheless you're a swine".

Certainty level: 20%

Somewhere on the London Underground. "Psycho" (I think - a little unclear).

Leicester Square - 9/Feb/1998

In February 1998 I spent some time in Leicester Square, in the West End of London. This is a very busy area of London, and one which can be relied on to produce "contacts". Capital Radio's offices and their cafe are located here, the Trocadero is nearby, and the place is full of cinemas and entertainment venues.

Certainty level: 100%

A young girl is heard to say, "Alright I'm going to talk to myself" to her friends, followed by all of them laughing together, as I passed by.

Believe me, I do not look mad in real life, these young people would not have directed their comments and laughter at me unless they had already been told by others that I was ill. I am absolutely certain that their behaviour was directed at me, and this audio file is particularly clear.

Certainty level: 60%

This one was recorded in a cafe in Green Park. Two women are talking to each other, one of them says to the other, "something wrong with him", with an emphasis on the "wrong".

The words "something wrong with him" have been repeated at me dozens of times, at my former workplace in Canada, in England, etc. The words are quite deliberately chosen to have two meanings; they obviously imply that I am ill, without forcing the abusers to demean themselves by using more pejorative terms, although they have shown that they have no compunction in that area; and secondly, the words "wrong ... him" make me at fault, and place the guilt for the abusers' wrongdoing on my shoulders.

Certainty level: 30%

Recorded on a Victoria line tube train leaving Green Park station.
If you listen carefully you can pick up the word "hunchback". The speaker had emitted a swear word immediately before this excerpt; both the swear word, and the "hunchback", were (I believe) directed at me.

No - unfortunately - :-(
Still the same message :

```
-------------------- Quote start ---------------------
**** Unknown command. File damaged or use newer SETTER.
 Aborted!

Konfiguration beendet. / Configuration completed.
--------------------- Quote end ----------------------
```

Though both setter and bigdos are flagged to run in ST-RAM. :-(
I thought it might be due to the version of setter I own to be
compacted (who knows...), but, again, no. :-(
It behaves the same on both my FalCT60 and TT, and either under
plain TOS or MagiC! :-(

J.-Luc

I for one would love to see continued developement of Magic! It is
always nice to have more than one choice of os's, or to be able to run
both, setting up the falcon to be dual boot! :)

Gigantic surprise! Former CEO of Commodore Business Machines and of Atari Corp., Jack Tramiel, will be making a rare public appearance! Yesterday I received a message on the answering machine from Karen Tucker, CMO/VP of Public Programs for the Computer History Museum in Mountain View (San Jose area), California. Here is part of what she said:

... I thought you might be happy to know that the museum is going to have a celebration of the impact of the Commodore 64 on December 10. It's kind of a 25th anniversary celebration, and Jack Tramiel will speak as well as Steve Wozniak and William C. Lowe, the father of the IBM PC, and Adam Chulaniak (sp?) who was the Amiga guy at Commodore, and we're still settling on the moderator. But I thought that if you are still part of the Fresno Commodore User Group... that you guys might want to make the trip down to Mountain View for this event on December 10.

All day today I've been playing phone tag with Karen in order to get more details and received another message saying that the exact title of that night's program is "The Impact of the Commodore 64: A 25-Year Celebration". More details to come when I find out more.

The Computer History Museum is located at 1401 N. Shoreline Blvd., Mountain View, California 94043. The website is http://www.computerhistory.org

I am so there for this event!

Modern Macs run OSX, but is capable of booting Vista or running it in
parallel with OSX using virtualization. That's no shame, that's
increased value. I'm running OSX for most stuff, but I have a copy of
windows 2000 running in the background in case I need access to some
Windows-only stuff (mainly work).

> For a normal MagiC-user it's not interesting if a lot of new stuff is
> being added to XaAES or MyAES but rather if it runs under MagiC!
> Whatever happens with XaAES or MyAES doesn't concern me...

Personally, I've dropped support for MagiC in my stuff, since
supporting MagiC often means *not* being able to use features present
in modern AESs, thus not encouraging further development. It's also
very difficult to support MagiC since it's not designed the way Atari
originally intended.

Think if it this way. You most likely want new software for your
machine.
If you don't support the active developers, why should they support
you?

Bonjour

Sorry to repeat myself... download on my homepage or directly in the
folder http://ptonthat.club.fr/files/ -> litchi11_uk.zip (100KB)

News:
- replaced all $F by $F%, seems to react quicker (especially when sorting
  files), Merci � Lonny Pursell
+ download for folders contents
  (careful: if DOS8.+3 name conversion, folders with similar name may be merged)
+ remote delete for folders contents
+ counting informations window when scanning remote files/folders to download
  or delete (closing with window cancels the operation)
+ 'Abort' option (in the file already exist dialog box)
+ save Console contents in a text file
+ clear Console contents

Voil� !

Hoping to release it without bugs, I would like to code something else,
or read a book...

Regards.

Hello Martin,
>
Looong time ago, I was told that, due to its structure, cubase could
neither run under MagiC!, nor under whatsoever else multitasking OS,
as Cubase itself runs its own multitasking OS.
Might have I misunderstood ? In which case, switching to MiNT (I've
been thinking of this many times, without really making me up) would
solve my problem (and some others too). ;-)
Assuming that the problem should not be Cubase itself! :-/

Regards,

I don't know much about Cubase. Some years ago I did a MiNT/N_AES on the
Hades of my british friend Paul Williamson. He tried Cubase under N_AES
and it worked but with some glitches. AFAIK Cubase comes with its own
fileselector which will certainly not support LFN's.

I think Paul read this list so he certainly will enlighten you about
Cubase under MiNT/N_AES.

HTH,
Martin

My impression is just the opposite: Cubase is not at all
multitasking-friendly and expects that it can use all available
resources for itself. Of course, saying that Cubase is kind of a
multitasking operating system itself sounds much better than admitting
that it is simply not designed to coexist with other applications.

Cubase does not run well under Mint/N_AES. I used to be able to use it, but very slowly. At the moment it won't run at all and I don't know why. It is not important for me to use Cubase with Mint, as I always reboot into single TOS to use it.

It is possible that the behaviour would be different on an Atari, rather than a clone like the Hades, but I have no way to know about that.

Cubase was designed to work in single TOS, and I would be surprised if you had satisfactory results running it under Mint.

Cubase does have the ability to run its own form of multi-tasking, "M-ROS Switcher". I don't use it, but according to the manual it "lets you launch up to ten programs at the same time, and switch between them". (Of course, this won't help with LFNs).

> > It's also very difficult to support MagiC
> Maybe for MINT-user/supporter but not for MagiC-user/supporter...

I think you misinterpreted my post. My point was, that if you are a programmer (like me) and would like to actively support recent development in the AES, it gets more difficult to support obsolete systems such as MagiC and Geneva, since they are nolonger being updated.

> > it's not designed the way Atari originally intended.
> Atari intend something? Really? How long since?

Yes. And they've documented it thoroughly in their developer documentation. The physical manifestation of it all is called "TOS", "MultiTOS" and "AES". Programmers have picked up the very same code that Atari used for this stuff and developed it further, the result is called FreeMiNT. The last version of the FreeMiNT kernel and it's standard AES (called XaAES) was relased 2006-09-27, and a new version is coming soon. When was the last update of MagiC?

> > If you don't support the active developers, why should they support you?
> I support active developers and all of them develop under MagiC...

No, that's not the case. Many of them don't, since MagiC has become outdated. Most of them *try* to stay compatible with MagiC, however. That's a completely different thing.

Indeed, that is a very important difference. That is certainly true in
the case of AtarICQ, at least until now.

Btw, some FreeMiNT developers are pretty active too (compared to
average Atari coding activity), and I bet my ass they don't develop
under MagiC...

Regards,

/Joakim

Hi Paul,

You can have my copy of Positive Image 2 for the cost of the shipping box and postage. I fear that I had much instability with that program on my Falcon. Your experience may differ. Email me your worldly location with Atari somewhere in the heading, and I'll reply.

Galen (currently occupying a coffee shop in S. California)

Today I was able to make phone contact with Karen Tucker of the Computer History Museum and question her on the details for the event, "The Impact of the Commodore 64: A 25-Year Celebration". Here are the specifics:

Location: Computer History Museum, 1401 N. Shoreline Blvd,
(exit from the 101 Freeway) Mountain View, California
94043 Phone: 650 810-1010

Time and format of the event: Monday, Dec. 10
6 pm - 7 pm -- Museum member's reception with the guests. Beer, wine, and hors' doeuvres served.
7 pm - 8:30 or 9 pm -- First words/speech by Jack Tramiel, panel discussion, question-and-answer session
Afterwards, informal chit-chat and possible autographs

Admission -- for the reception, free to museum members ($65 membership)
for the event, free general admission ($10 donation requested)

Seating capacity -- 400

Webpage -- Karen remarks that they are "stupidly slow" at updating the events' page at http://www.computerhistory.org/events/ but assures that the event "is really going to happen... definitely".

Guests to speak/appear (updated) -- Jack Tramiel (pronounced /tra mel/, Karen tells), former CEO of Commodore Business Machines

Steve Wozniak of Apple fame

William C. Lowe, father of the IBM PC

Adam Chowaniec, former vice-president of technology for Amiga at Commodore Business Machines

John Markoff, moderator of the panel discussion and New York Times reporter and author of the computer history book, "What the Dormouse"

Leonard Tramiel, former vice-president of software development and v.p. of advanced technology at Atari Corporation

Jeri Ellsworth, engineer behind the CommodoreOne and the C64 DTV

Media recording - photography (no flash), videography, and audio-taping permitted. Possible webcast from Liquid Computing of Canada (Chowaniec's current company), which is sponsoring the event.

Some items are still in flux; when I have further updates, I will post them.

Truly,
Robert Bernardo

After all these years of reliable service, its time for one of my
Atari TT030 systems to look for a new home.  The system is in
excellent condition and fully functional with 8MB of RAM (4MB of
ST-RAM and 4MB of TT-RAM) and an internal 340MB SCSI hard drive.  Its
listed on eBay as item #190165477414, or you can go directly to it at:
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=190165477414

Exactly the point on this discussion. If you stick to what TOS and MinT
do define, you clearly follow what Atari intended back then. Maybe their
MultiTOS wasn't the most perfect way to implement this API but it did work.

A vote for Single TOS compatibility at this point! :D

cheers,
Matthias

GokMasE <gokmase@gmail.com> worte:

> some FreeMiNT developers are pretty active too (compared to average
> Atari coding activity), and I bet my ass they don't develop under
> MagiC...

I work only with MagiC [1] or do you mean that they work on FreeMiNT? OK, my last entrie to FreeMiNT (COPS) is from the 2006-03-12, cflib is form the 2007-05-19.

But from Smurf is 2007-10-14. ;-)

I develop programs for Ataris and I try to fix problems with MagiC,FreeMiNT or TOS. Why should I exclude someone, there are so few users.

Gerhard, and now I go on to work on two programs which need MagiC. :-)

[1] FreeMiNT is only good for CVS, but some tell me that this works also with MagiCNet.

for sale: a comprehensive collection of sound files for the
MT32.D10/D110 Roland synths. �5.00 inc �7.50 $10.00

Contains many patches that the later D synths were famous for and even
some emulations of D70 and Yamaha SY77 'misty' pads. Also powerful,
clean analogue voices and some good FX tones.

Available as either *.snd file format so that can be easily loaded via
the Steinberg Satellite desk accessory on the Atari St or as sysex
patches for all platforms.

The Atari St version also comes with other useful desk accessories for
the MT32 to enable 'beneath front panel' extension of Reverb functions
(full range of digital delay for example) and a 'partials' remapper to
any of the 16 midi channels so you never run out of notes on the
fullest of pds and exotic voices!

17 sound banks of in excess of 16 patches per bank (depending on
type). Supplied on CD for PC and /or FDD for ST.

MG
UK

> Which sort of contradicts that first point!

I get some sourcecode from a programmer, who make this between 1998 and 2000.
So he use the thread and the editable object from MagiC.

I think it is better to release this source, instead of delete them.

> Now that's silly but you get away with it.

Why is that silly? The problem is that I can use only FreeMiNT 1.15.12. With
newer version are problems with VFAT32 and CVS. I won't wast my time in testing
all applictions I have if they run with FreeMiNT 1.16.x or not.

Fair enough.

> > Now that's silly but you get away with it.

> Why is that silly?

You said that FreeMiNT is only good for CVS. I took that as a joke,
since I've been using it for everything the last 2 years.

> The problem is that I can use only FreeMiNT 1.15.12. With
> newer version are problems with VFAT32 and CVS. I won't wast my time in testing

I'm using CVS and VFAT32 without problems, but it's possible that there are some trouble with it, perhaps in combination with MagiCs implementation of it. Can't someone test your stuff with the new kernel version? After all, it is the only Atari OS that is still being actively maintained...

Bill,

Yeah, it wasn't an easy decision, but its time to clear some desk
space. The system I'm selling wasn't getting much use any more and
was primarily serving as my "backup" CADD system for old files. I'd
find myself "playing" with it every once in a while, but it wasn't
getting much serious use any more.

I'll still have one TT030 system left after this one finds a new home,
but since I've pretty much moved most of my new CADD work to a newer
platform, I'll probably be selling that one also before too long --
unless of course the nostalgia bug takes a permanent bite out of me.
;-)

I also have several Syquest backup drives and monitors which I need to
clear out to make space for new equipment.

Gotta give Atari credit though -- how many computer systems can you
find that are reliable enough and powerful enough to last as long as
these fantastic Atari machines. After all, these TT030 systems are
about 16 years old, have been used heavily for serious business
applications, and are still capable of functioning effectively today.

```
I guess you're right though --- ". . . this is really passing an Atari
milestone."

Good to hear from you again.

Regards,
Sheldon
(formerly Computer STudio --- had to say that just once more ;-)

I think that what Atari intended is irrelevant. Relevant is everything
the users want.

As long as the CVS repository is on the same machine as the checked out
```

files CVS also works with MagiC and FAT32 partitions. This is what I use for maintaining my sources.

```

"if Steve Jobs ever returned to Apple, he would destroy it before he even got started. He is an arrogant bonehead" - The iDiot Forever Known As Sinclap. (of course, after Steve came back and did save Apple, TiFKAS immediately began applying his tongue to Steve's boots :))

Reality check - TiFKAS has a history of trying to start flame wars and having Atari users hand him back his ass on a platter with a side of mint sauce. Especially after Particle Salad ripped him to shreds by showing that TiFKAS didn't know beans about the video market :)

Actually, with Apple doing so well, I'm surprised TiFKAS doesn't go to comp.sys.mac.advocacy and try his boasts there - after all, there's a whole bunch of WinTrolls his own IQ to play with :)

oh yeah, just one more thing - this is part of the header from
TiFKAS' latest brain fart. Interesting to note that for all his rah-rah
about Apple, he appears to be using a Dell. Not to mention he's still
too stupid to know how to set up a real newsreader program :)

Hello,

I upload the source and program Chatter 1.11 (IRC-Client) and Teli 1.15
(Telnet-Client). The docu is only in german.

Both program work only with Iconnect since V1.5 or Draconis since V1.6 and
need:
- NVDI since V3.0
- KEYTAB since Release 06

Chatter needs also:
- MagiC (Atari, Mac, PC) since 5.2

Teli needs also:
- MagiC (Atari, Mac, PC) since 4.5

This versions based on the source from J�rgen Koneczny.

Gerhard

It's great to see the sources for these previously commercial programs
being released to the public :-) Let's hope that this is a trend!

Well now, I'm all for keeping what few remaining Atari based BBSs there are, up and running...bet others are too! :)

It was a few years ago that I complained that the printer driver for the SLM printer in C S TeX was broken, and a German reader of this English group reminded me that I could use the printer driver from Lindner TeX.

I can, of course, use Magic SLM, and write to file for a HP deskjet, but Lindner's printer driver would be neater. So I finally moved Lindner TeX off a CTAN disk, and un-zooed it, and found that there was one multidvi.ttp, and a bunch of .inf files.

If that helpful person is still around, I would like a single sample of what, from a .inf file, goes on the command line of multidvi.ttp.

Please and thank you in advance.

Jim

Hi Jim,

JD>It was a few years ago that I complained that the printer driver for
JD>the SLM printer in C S TeX was broken, and a German reader of this
JD>English group reminded me that I could use the printer driver from
JD>Lindner TeX.
what do you mean by "driver is broken"? CS TeX was IIRC PD. So it
would be no problem to give you a driver.

JD>I can, of course, use Magic SLM, and write to file for a HP deskjet,
JD>but Lindner's printer driver would be neater. So I finally moved
JD>Lindner TeX off a CTAN disk, and un-zooed it, and found that there was
JD>one multidvi.ttp, and a bunch of .inf files.
Right, but Lindner TeX uses a different name convention for the PK
files. You may tell any Strunk driver to use Lindner (better Birkhahn)
fonts, but I don't think you may use a Lindner driver with Strunk

produced fonts, of course, you may rename the directories and copy the fonts to their appropriate place...

JD>If that helpful person is still around, I would like a single sample
JD>of what, from a .inf file, goes on the command line of multidvi.ttp.
Maybe it was me, I don't remember. I'm going to send you my .inf file for my Laserjet 5L in 300*300 resolution.

JD>Please and thank you in advance.
Don't mind about that. We could continue this discussion by personal e-mail, can't we?

Update

I have managed to get hold of NVDI 5 and I am still looking to get hold of the other applications mentioned.

Thanks

Paul

Hi, I'm Ben Smith here in Portland, Oregon USA! Proprietor of Bravo Sierra Computers! Occupying a unique niche in the Atari World! Most Atari Dealers sell NEW, I also sell Used Atari Goods! Not only do I sell NEW Atari Goods at a competitive price, I also sell used Atari Goods you wont find at Swap Meets, Thrift Stores or Auction Sites! And I sell for less! Unlike those remaining anonymous! I test Goods before I sell them. Not only can I sell you some Great New stuff! But I can sell you hard to find 2nd Hand Goods, because I'm the guy people goto to give Ataris a New Home! Saving Orphaned Atari's from Oblivion!Goto http://BensCatalogs.Atari.org or (503)256-9974!

I've got a fast turnaround rate. Usually, Once I receive payment your order goes out the same day. Customers love the speedy service! I have lots of Atari SoftWare & Books. Which I can send by Media Mail Rate!

Please Direct all Replies Through E-Mail to: BenSells@Atari.org or Atari@aracnet.com. If you can't reach me, see my info at the Bottom!

Atari Jaguar, 8 Bit and ST Games/Software, Hardware/Accessories & References/ Books. FREE Catalogs on Ben's Domain at http://BensCatalogs.Atari.org or at http://BenSells.Atari.org Catalogs can be attached to,Requested by & Received Through E-Mail at Atari@aracnet.com or BenSells@Atari.org and Please Specify Atari 8 Bit, ST, Jaguar and/or all 3! Or Call Ben anytime at (503)256-9974!!!

For what do you need support? MagiC usually works, as it should...

Yep, I agree. For those who got something faster than an 8mhz Atari with >4mb of RAM, FreeMiNT is probably the best bet.

If nothing else, do consider encouraging Ozk, Frank and the other FreeMiNT developers by *using* the stuff they put down efforts into supplying to the community! The remainings of the platform will only last for as long as ppl still find it rewarding enough to keep on writing software, making demos, chip music - well, doing whatever! - with their Ataris :)

Regards,

/Joakim

I have been a MiNT-user since 1996. I want to test my own software under MagiC though, and while I do have MagiC 6.0x on my TT I can't use it as I don't have any space for other computers than my Milan.

There is no such thing as a bug free piece of software, and for 100 euros
I expect at least some bugfixes. Also, there's a lot of new stuff being
added to XaAES and MyAES now, if these are not added to MagiC in the
future there is no point in developing software for it.

For a normal MagiC-user it's not interesting if a lot of new stuff is
being added to XaAES or MyAES but rather if it runs under MagiC!
Whatever happens with XaAES or MyAES doesn't concern me...

You know that MagiC often behaves differently as on original hardware?

I know that MagiCMilan differs from MagiC on original hardware, but I thought that was only at the hardware-level? From the application's point of view these systems should be identical, right?

The point is that stuff written to take advantage of the new features in
XaAES/MyAES won't work on MagiC. In that sense developments in XaAES and
MyAES will affect MagiC-users in the future. Currently there's only minor
things that differs MagiC and XaAES (XaAES supports nearly everything in
MagiC now, and adds some new features as well), but that will add up in
the future.

Hello,

Got bnet working between mint and magic 6.00

At the 'magic6.00' falcon, I can see the folders from the 'mint'
falcon.
I can copy in both directions.

Thanks,

Mark

Hi,
I'm the one who bought the board.
Do you guys know if it's compatible with a PuPla/2 (or is it equivalent to a PuPla/1)? It's important to me, as I'm planning to use it with a Panther/1 graphics card adapter.

Regards Marius

The Great Shism between MagiC and MINT is long ago a matter of fact...

Nope! MagiC is on non-original hardware significantly more tolerantly
than on original hardware! Therefore MagiC is on non-original hardware
IMHO absolutly inappropriate for developers - as the only one...

    Sure but with the MagiC sources, some improvements made to XaAES and
MyAES could be ported to MagiC, just for compatibility.

    Guillaume.

Considering that the MagiC sources are in assembler and the MiNT sources are in C you would have to rewrite everything in assembler. I think that when Andreas Kromke says that understanding MagiC's assembler code is very difficult (or something similar) he is serious.

One should not assume that simply by releasing the sources of such a project others will be able to maintain these sources. One must at least have an excellent knowledge of the problem domain. In the case of MagiC one would have to have an excellent knowledge of assembler programming, of operating systems in general and of the details in the specifications released for TOS, the AES, VDI etc. My guess is that most of those still writing software for the Atari do not even have a complete set of valid

```
specifications.

Hallo Gerhard,

>This is the latest version. I read in april 2007 that Andreas Kromke
>work on a MagiCMac X 2.

That's true. The new MagiCMacX 2 is a new emulator, but the MagiC in this
emulator is the well known MagiC 6.2 as in MagiCMacX 1.2.

I have a Falcon030 and I am trying to get BigDOS and MetaDOS working together. One or the other works, but when I try to use them together they do not work. One or the other does not work. I tried to run the rest of the AUTO programs from the CONFIG.SYS file to no avail. Here is what I am trying to run:

BIGDOS-F.PRG
METADOS.PRG

In C:\AUTO\BOOT folder the CONFIG.SYS runs:

FPATCH2.PRG
MACCEL.34.PRG
SAM.PRG
SPDGDOS.PRG

I get further this way but the CD ROM drive does not work I know I have to run BIGDOS first but is there a trick to get these all to work?

Well I was finally able to desolder the old chip and install a socket.  Now
removing any future dead chips will be easy.  It fits fine in a stock falcon
btw...

Ozk would be the ideal person to do this, but he's not interested in MagiC
at all ;-)

I can do this task, 68K assembler is not a problem for me.
I remember to post here an answer about a MagiC thread of Andreas (some
years old).
My last task was to rewrite the the main part of the VDI in 68K/Coldfire
assembler (who use fVDI C routine and Radeon C driver).
And I think I have also build the biggest program in assembler for
Atari...Aniplayer.

Regards,

Didier.

Is it bigger than the text program TempusWord, which immediately comes
to my mind when thinking about big programs written in assembler?

Do you think somebody else would be able to maintain your assembler
sources, fix bugs and add new features?
Maintaining software like MagiC may be particularly difficult. Not only
because the author says so, but also because software that works on a
very low level, in the case of MagiC the operating system itself, is
hard to debug. Additionally one must have access to all the officially
supported hardware (ST, TT, Falcon, Milan) in order to ensure that new
versions still run on all platforms. And one needs beta testers willing
to risk losing their data if. Bugs in operating systems - and hard disk
drivers ;-) - can cause serious problems.

    I think that Didier can do it.
    In my opinion, you don't have to understand the whole program to add
something. For example, I have disassembled the SUPERCHARGER software
(driver for the DMA hard PC emulator), and I'm really not good at DMA
transferts, etc... But I changed lots of things to adapt it to my NOVA card
and to get the Hercules resolution. I changed what I understood.

> versions still run on all platforms. And one needs beta testers willing to

    For this, you're totaly right, a beta OS can be dangerous! Well, this
can be done by booting from a ZIP drive, or from a floppy and "hiding" the
other partitions you want to preserve.
    But MagiC looks to me as a very good program, easy to install and with
good performances, it's a pity to let it behind with no improvements.

    Guillaume.

Wouldn't efforts be best spent on FreeMiNT, a free and time-proven OS,
to make it faster (if possible, it's already pretty fast) and easier to
install and more compatible with MagiC so that current MagiC users will
be motivated to switch to FreeMiNT knowing that their programs will run
in the same manner as under MagiC? As someone already said in this
thread, XaAES is already very close, AES-wise, to MagiC).

Well, just my 2 cents, as the expression goes.

JFL

I also think so, even though I have preferred MagiC. But as far as maintenance is concerned one needs much less time to improve software with its sources available (most of it in C I think, not in assembler) than it takes to work on undocumented assembler code.

Hello Didier

I think better should be to have source code of NVDI rather than Magic
because if fVDI is enough good, this software does not support
printing support at all and we have no substitue of speedogdos
unfortunatly.

Olivier

Hi All

I am looking for full copies of the following Atari applications in
English please with manuals etc.

Kobold 3.5
NVDI 5 (Upgrade is fine as I already have version 4)
Jinee 2.5 or Ease 5
MagiC 6.2
ImageCopy 4CD
Positive Image 2
View II
Thats Write 3

Protext 6

Thanks for looking.

Paul

I'm using FreeMiNT with XaAES now, and speedwise it's already very good. Compatibility to MagiC is also good (wdialog implemented, pdlg implemented, all RSC objects from MagiC is supported). Stability is very good. So on these points I don't see any benefit in using MagiC, unless you want to use software that absolutely requires MagiC. There are some things in MagiC that I don't see coming in MiNT/XaAES, like AES threads.

Also, some things are just different between MagiC and MiNT/XaAES, and changing this in XaAES would break existing apps one way or the other.

- Should there be a limit on the number of windows in XaAES (there is in MagiC).
- Should MiNT be changed to allocate pid's the same way MagiC does? MagiC re-use slots in the pid-list, MiNT doesn't. This means that under MagiC, when you exit application one and then start application two, application two will have the same pid as application one has. I had to change a lot of internal structures in Taskbar when I adapted it to MagiC a few years ago because of this.
- Should we limit the number of running accessories under XaAES?
- Should there be a MaGX-cookie installed when running MiNT/XaAES.
- Should the special SM_M_SPECIAL messages be supported, including

emulating the bugs which you need to work around when using these?

Any application that makes any assumptions about such conditions will
break under XaAES, to get these to work you'll basically have to make
XaAES a clone of MagiC, including all of it's limitations. This is why
it's very difficult to be able to run all applications properly under
XaAES. Most will work, as they look for the features they use and not
their prefered OS.

I do see the point in having a simple installer that focus purely on the
GEM/desktop side of MiNT/XaAES though. EasyMiNT is a very good
distribution with a very smooth and nice installer, but it's probably to
unix-biased for most MagiC users.

Hello Jo

Just for be a defender of Magic I just want to said you speak as an
developer under Mint like me, but as any developers we write in
function of our system configuration, we not remember problems we have
find during our work, but we are very disappointed if we need do some
changed on an other system due to a limitation, this is human but
generally not very objective.
I have start write some software on an old STf, I stop for a time and
after some years I bought MagicMac, really all my work was near need
to rewrite! After a time all work correctly, and I have pass a lot of
time to fix last bugs when I try to run my software on real hardware!
One day I start writing MyAES (how crazy I was!), I do the kernel, I
plane only it work on multitask system and I have imagine a very
beautiful scheme for stop and start process, with very low time
consumption, using Signal of Mint, it work marvelous on Magic at the
first time, I was very happy! On day (this was not public), I have
start to work on Mint, I can't imagine that my use of signals can't
work on Mint :-(simply because under signal I can't use during signal
interupt any gemdos function (here Pkill()), I have need to rewrite.
No system is perfect!

Olivier

This is exactly my point :-) Like I said, I had to rewrite some key parts of Taskbar when I ported it to MagiC as MagiC allocated pids differently than MiNT. However, neither MagiC nor MiNT is "wrong" - both methods are correct implementations of the specifications. There is no rule that says that you can't re-use available pids until they roll over from 999 to 0 - I made an assumption when I originally designed this code and had to pay for that later.

Unfortunately there are lots of such differences between MagiC and MiNT/XaAES, and if an application makes any assumptions about non-documented behaviour it's difficult to support such applications under any other OS than the one it was originally developed for.

```

Oh yes, but most of time there is bugs in software, for example in past version of Kronos I have a trouble in a new xaaes version, xaaes killed it when I start opengl tests, as I remember it was link to an action I done on a windows that not exist! In all AES, when you try to do this the function return 0 that's all, in xaaes they prefer kill application! This was a bug of Kronos, now it's fixed!.

So the moral of the story is: "programmers should never make any assumptions about non-documented behaviours" :-)

I have Atari 520 ST complete in box. Looks like it did the day it came out of the factory.   I hate to part with it, but I am going to anyway.   The price is low ($10) so bid on it or I will tell everyone you are an Amiga lover!!!!

check out the auction here:

     http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=320172227642

There are 2,6 MB of sources with an average of just 3 spaces / line.

> Do you think somebody else would be able to maintain your assembler
> sources, fix bugs and add new features?
> Maintaining software like MagiC may be particularly difficult. Not only

Since one year I have also a TOS404 with lot of low level part rewrited for the Coldfire (it's a Falcon clone with a Radeon but there always some problems with thr CF68KLIB). Before I have already patched the TOS and MagiC who runs on the CT60. The Coldfire TOS boot also on a Compact Flash without driver ;-), the Radeon boot screen is selected by a Setscreen, there are a list up new modes selectable by a CPX (actually 1280 x 1024 x 16M), like the VDI. The XBIOS, BIOS, and VDI are rewrited in assembler (and C for the VDI with fVDI sources), the GEMDOS is replaced by BDOS where I have add SLB functions. There are also FreeRTOS (an embbeded OS) with a TCIP stack lwIP with a Telnet, TFTP, HTTP servers, (the TOS is just a TASK) and since his week I use also a Gluestik part (always in Flash !) tested with AFTP.
The story is here: http://ctpci.atari.org but i'ts not updated since some months :-(
If I had the sources of MagiC, you can imagine a new TOS machine with MagiC in Flash. Actually there a just one TSR program actually disabled... MiNT!
Since more than 20 years I know, and I write in assembler, 6502, 6809, 68000, 68030, 68060, Coldfire and a little bit PPC at factory. I use only C langage since 15 years, and also since 6 years at factory where I write drivers and systems parts for VME boards (68K and PPC) on multitasking embbeded OS pSOS. My last project is on a Phytec board with a Coldfire ;-) like at home excepted than is a M6484LITE from Freescale.

So I said... I can do this job. Maybe it's that last chance for MagiC.

> hard to debug. Additionally one must have access to all the officially

Yes, but that's not so easy to do with applications you don't have the
sources for ;-)

I can imagine that :-) I wouldnt be either.
His work has made MagiC de facto obsolete.
Mint/XaAES is the future of Atari GEM.

Besides that, the original TOS x.06 remains to be simple
and usable if you only need 1 program at a time.

I personally only consider single TOS and XaAES as target OS's
for my programs.

Yeah, yeah. And in pre MiNT and pre MagiC times this was
half of all the fun on Ataris. :-)

Gigantic surprise! Former CEO of Commodore Business Machines and of Atari Corp., Jack Tramiel, will be making a rare public appearance! Yesterday I received a message on the answering machine from Karen Tucker, CMO/VP of Public Programs for the Computer History Museum in Mountain View (San Jose area), California. Here is part of what she said:

... I thought you might be happy to know that the museum is going to have a celebration of the impact of the Commodore 64 on December 10. It's kind of a 25th anniversary celebration, and Jack Tramiel will speak as well as Steve Wozniak and William C. Lowe, the father of the IBM PC, and Adam Chulaniak (sp?) who was the Amiga guy at Commodore, and we're still settling on the moderator. But I thought that if you are still part of the Fresno Commodore User Group... that you guys might want to make the trip down to Mountain View for this event on December 10.

All day today I've been playing phone tag with Karen in order to get more details and received another message saying that the exact title of that night's program is "The Impact of the Commodore 64: A 25-Year Celebration". More details to come when I find out more.

The Computer History Museum is located at 1401 N. Shoreline Blvd., Mountain View, California 94043. The website is http://www.computerhistory.org

I am so there for this event!

Indeed. My favourite was to use self-modifying code to speed up my graphics routines - I got into serious trouble when I got my first 030 ;-)

TOS better? let's say that for equivalent hardware configurations, I'd say you're right.

Where can I find a PC, 48MHz, 16MHz bus, no USB, no memory card reader, no Ethernet, no sound input, to compare it to my TT?

Today, human time is more expensive than hardware. So it's cheaper to write an unoptimized program on a PC with 2Gb ram than paying for a programmer to make it run on a 64Mb ram.

And... Who would like to pay more?
Isn't the goal to have the program running?

Even if the philosophy is the total opposite of the one we had some years ago with TOS, aren't we satisfied to use MP3, DivX, ADSL, internet, etc...?

Guillaume.

You mean like email, www, writing, playing games, browsing Usenet,
watching movies, listening to music, making music, shopping images,
programming, and so on?

> Same problem as modern
> PCs have.

> If you want to write a short text, write a small program or if you

In what way? Be specific here. I'd really like to know in what way
it's easier to write a short text on the Atari than it is on OS X.

> So you should better throw away your Mac and get an ATARI ST!!!

Well, an ataritroll is an interesting change from all the wintrolls
that frequent this group...

Yes I fully agree with that, these are good examples of CPU power
being put to use.

>   Today, human time is more expensive than hardware. So it's cheaper to

On the other hand, there are tons of bad software that grind the
machine to a halt just to do some simple stuff (e.g. using M$ Office
apps makes you think you have a very old machine in your hands! And
for those who laugh I think that even openoffice is bloated and slow)

In the end each user has to find a small set of apps to feel
comfortable with and to perform his tasks with ease and speed. For
example in my windows installation I use Total commander, Media player
classic, Winamp, gvim, Opera and irssi (and steem engine ;) mostly.
They do their job quick and reliably, so I made my peace.

I should have known!
For sure!

I remember having programmed an adaptation of my "FAMILY.PRG" (a family tree) under Windows in assembly language.
The result is a 14Kb executable FAMILY.EXE that manages the window, the dialog with the user, the files I/O, the display of text and images, the call to MediaPlayer for videos and sound replay.

I can't imagine how many hundreds of Kb it would have weighted written with Delphi... So yes, the new tools are not so good, so optimized, etc...
And I agree that it's a pity because we could do much more with a modern PC with correct tools.

Guillaume.

Hello,

I upload the source and program IFusion. While I don't need this, I make no test. I only clean up the sourcecode a little bit.

Gerhard

> TOS better? let's say that for equivalent hardware configurations, I'd say you're right.

Even at the time, that wasn't true. I ran Mac emulators on my STFM, and they ran faster than on the then-current Mac Plus and the OS plus apps, -mostly-, had better productivity than TOS.

The ST hardware better than Macs? I'd agree (with the exception of the keyboard). The operating system better? No, would disagree.

(oh and yep - I realise the original bomb chucked in that started this thread was all just to start a conversation and for no other real purpose. I'm not going to fight to the death over this...)

Cheers,
Ian

     Oh!    Hello,

That's  -   mmh  jolly, ridiculous, absurd?  Let us count the mistakes
made - for example - with DOS/Windows.

     Gr=C3=BC=C3=9Fe,  Gerhard

That one sound familar and could be one of the ones I came in contact with.
But I do know I saw one that I just downloaded. I would check the various ftp
sites for any kind of floppy disk formatting programs. I think one of them was
called RedHat Formatter. If you cannnot find any, let me know (either or by

```
email). I have it on a ST backup CD and I can check it out.

Yes it is great, but the really incredible thing is that I paid over $300 for the system. That was a really hefty price for back then. But, it really was worth it. I still have mine and it works.

Well I have seen them from time to time on various WWW and FTP sites. I would check out the Belgian site. I am sure it is there or try one of he Atari UTSI sites. I know have seen one listed. I bought the Falcon Diagnostic Cart from Best Electronics and it tested my RAM with precision.

Yes it is a shame that modern Macs have Windows Vista. I heard that Vista has all kinds of problems which is just like any new Microsoft software. Always being released too early. Yes, I will just stick with my Atari TOS. My wife (who owns a PC), still things that I am nuts.

Hello everyone,

As Cubase can neither run under MagiC! nor MiNT, and as I need to handle loads of midifiles with looooong names, I wonder if there is a way to do this.
Any idea ?

Regards,

J.-Luc

AFAIK, Cubase do work under N_AES/MiNT but I would be surprised if Cubase
would understand LFNs.

First I heard of a 2600 was in a Tepe's catalog which listed it at $299.  I
think the catalog was out before the system was officially released so I
don't know for sure if it actually sold for that price at the very
beginning.  The regular old selling price for a long time was $199 and that
was the target price I was saving up for.  By the time I hit $150, Toys R Us
put it on sale for $150...I was very happy to get it early.

There is no alternative to MagiC or MiNT for support of long filenames.
Organizing files in nested folders is probably the best way in your case
to handle a huge number of files.

That's the way they (over 9 000!) already are sorted.
But the problem is, that they have long names, and the only way
I have to know which is what under TOS is to rename each one
under MagiC! so the name is more, say, obvious.
Can you imagine renaming over 9000 files under MagiC! ?
Moreover, when loading one of these with Cubase, and saving it
again, it will converted in 8+3... so, again, problems... :-(
That's why I hoped there could be a solution to make LFNs readable
under plain TOS. Assumed that, as Martin did point it out, Cubase
should be able to handle them. :-/ Not that obvious... :-(

Regards,

J.-Luc

I can imagine doing this under MiNT. This is a typical task for
scripting, a small perl script preferably.

What's R3? An update to 6.20? I'm interested in aquiring MagiC for my
Milan, but I'm *not* interested in paying ASH 100 euros for a product that
has no support and has not been updated since 2001...

That is certainly an option - if you're a mad genious or have a crack
addiction ;-) I did some fixes to ST-Guide this way, I have absolutely no
intentions of doing this to a binary 10 times bigger.

It's been a long time since I used BNET, but IIRC only the server will
work with MiNTnet. There is no bnet.xfs for MiNT, only for MagiC.

This is the latest version. I read in april 2007 that Andreas Kromke work on a
MagiCMac X 2.

MagiC is *not free* and sourcecode is not available. Yon can always buy it by
ASH.

Looks like MiNT is what you should use in this case. In this case you
even have the advantage of the sources being available.

Turns out I had rebooted the computer and not saved the 8MHz/no cache
settings :-(
It's hard to tell what are legit error messages about the
configuration and when it's just picky about blank disks that it
writes to.
Any idea what that RPM checker is called? I've looked around several
places, but can't find anything suitable by name-guessing.

Hi there,

I just bought a 520 STe which works ok except for one thing :
The sound output (on the video plug) is very weak compared to my other
STe. I bet it's a common issue like a nearly dead decoupling
condensator somewhere between the YM chip and the output (WIIIILD GUESS).

Any help, service guide or even schematics is welcomed !

Thanks for your time.

The one that I know of is the commercial software ProCopy.

Now that's DIY ! o_O
Thanks for the links.

Still, if the low sound volume issue happened to you, please let me know
what you did or where the problem was.

Are you in the US? If so I've some dups if you are interested. Might be easier than trying to clean water-damaged ones. Below is a list of titles and the number of issues. Just e-mail me (lener@vt.edu) with details on specific ones of interest. As you probably know though mags are heavy so shipping a large quantity can add up.

```

Hi,

I have a ST Ram expansion board in my TT with 2Mb on it. I heard that this could be changed to a 8Mb board just changing the ram chips, is it true?
The problem is that I can't find any ST Ram board to sell at a normal price! If anyone has one...

Guillaume.

Indeed. It might be easier to find TT-RAM boards.
Guillaume, do you already have TT-RAM in your TT? Since TT-RAM is
condiderably faster than ST-RAM adding TT-RAM sounds more promising to
me than adding ST-RAM.

    Yes for sure, I have a Magnum 64Mb (and maybe a TTRamide coming soon).
    But... I need a lot of ST Ram to store and replay large sounds

Woh Mama. I just googled. looks like a nice idea. I toyed with the idea
of designing a VME IDE controller for MegaSTE and TT030. Should finish
that:-/

I have not owned a STe or personally come across this problem, however from
looking at the circuit diagram there appears to be three Audo lines...

AUDIOI (Audio in?), AUDIOS (Stereo Audio mixed to a mono channel?) and AUDIO. The Audio appears to be generated from U508 (LM1892?, page 10 of the PDF) as Left/Right audio which is them mixed together by U504 (LM347) to provide the audio feed to the video socket and so I would suspect one on these as the problem and it probably has more to do with U504 then U508.

The first thing I would try it to compare the output from the Left/Right audio sockets to that of your Working STe, if it appears to be the same then you can eliminate U508.
If you can elimate U508 as the problem then compare the sound you get from the L/R audio sockets to the that comming from the video socket and see if you can tell if one channel or both channels are quite although ideally you would be better comparing them with an ocsilloscope if you have asscess to one.

There are could be several causes for low volume as follows...
1) The output of U504 is defective.
2) Over time some of the resistor have gone high resistance, if either of the 10K resistors (R527, R5338) have gone high then the gain will be reduced and so the volume will decrease.
3) Capacitors (C529, C543) could have gone open circuit resulting is a loss of signal transfer to U504.

I think that is the area of the PCB you should be looking at but if all that appears to be fine then look at capacitor C416 and inductor L409 which are the final two componets the audio goes through on it way to the video connector.

Hope that helps,
Stephen Moss

Yes please! As I have a MegaSTe I would be very interested in any kind of IDE solution as there currently are none that I can use (the cartridge based ones are unsuitable as I already have my cartridge port filled up with 4 devices).
The other piece of hardware solution (again, not cartridge-port based) that I would like to see for my MegaSTe is some sort of ethernet board.

How far have you gotten with your project?

Roughed it out on paper. It shouldn't be too tricky, there was only one issue iirc. Been a few months since I last looked. Ah, dtack, thats right. Which can be got from the DMA port. Derived the cct from the internal ST IDE hack.

Mark

It's not my project!!!!!!
Frederic Pecourt did it. I'm just a potential client.

For the TTRamide, I had some infos this morning: it's only be validated on revision 1 boards (the TT with a daughterboard) but not on revision 2 (the CPU soldered on the motherboard).

So the author needs a second TT to finish his tests.

The speed of TT Ram access is increased by 25 to 31% compared to the original Atari TTRam board.

The boot could be possible on a IDE unit (for example a CompactFlash) with changing the Roms of the TT. With the original roms, you must have a SCSI unit to boot but the IDE will be accessible.

Next week Frederic may be able to give more informations.

Nothing about the MegaSTE extensions (one thing at a time I suppose! He

makes everything during his spare time and has no professional pretentions
as he declares).

Guillaume.

Huh? I quoted Mark in my reply.
But it's nice to hear other people working on hardware projects for
the ST :-)

If you're interested I have a scanned article from the German C't
magazine with a schematic on how to build an IDE interface for the ST.
I would have used that if I didn't have an STe, and later a MegaSTe.
Anyway, give me a shout if you're interested as the schematics might
be of help even if you're going to use the VME port.

PS: have you had a look at "Eagle"?
It's a great piece of software for designing schematics and PCBs and
works with Windows, Linux and MacOSXs. The basic version is free,
which is one of the reasons it's become so popular with hobbyists.
And if Atari hardware hackers stick together by using the same
designing software it'll be a lot easier to share files and possibly
work out the problems together. Take a look here: http://www.cadsoftusa.com/

Hi Daniel,

Frederic says up to 64mb but, he made a succesfull test with 2*64Mb = 128mb.
Will it work with 2*128Mb? I don't know.

Guillaume.

Hi Guillaume!

I am very happy to hear about such a development. Making the IDE Controller Device bootable by patching the TOS is very good. SCSI is better, but you can't get proper HD's, only 10.000RPM and faster. With IDE I might go with an ultra-silent 5400RPM many GB ;-) HD, or with a Compact Flash, which I don't favour really (many broken cards with Dig-Camera user... maybe it's better today), a HD is a HD.

64MB sounds very well. I don't know if more is possible, I think The Operating System has the limit by 256MB, the 32bit 030 should be able to address 4GB AFAIK (like "Server" operating environments, Database Server OS, etc.).

Kind regards,

Daniel Mandic

Hello,

Since the TT seems to be the current topic... one feature seems to
have been forgotten among the many wanted ones : a video board!
Such a powerful machine being limited to 640x480x16c, it's a pity!
Of course, it has a hig resolution connector but... how easy is it
to find a monitor to display it ?
If at least it was possible to build some kind of interface ton
convert the outpout so as it could be connected to an SVGA monitor,
so one could benefit TT hi-res... should this interface not be as
expensive as a new computer... :-/

Regards,

J-Luc

A basic TT can be connected to a SVGA monitor... but does a SVGA monitor support the TT Hires?

Else, a graphic card is highly recommended.
The NOVA system was great I think because making an interface VME-ISA you could find a ISA/ET4000 easely.

Guillaume.

Hi Guillaume!

Hmmm, I think a new compatible Monitor should do the trick. ;-)

TT Hires is wonderful!!! (Although, I'll go with Med-Res, as my
Application which I have planned to buy, does support nicely the 16
Colors.)

>   Else, a graphic card is highly recommended.

Not to speak for other purposes, the ST/TT might do, but NVDI is doing
very well (for me). Exceptional trick, IMHO!

>   Guillaume.

My TT is great with the SuperNova VME gfx card, the CPU could do with
a bit of a kick though...

Hi!

68060?

:-) (I have already one and I can say it's plenty fast. I can imagine how fast a 060 in a TT would work. Intel 32bit CPU have much MHz but work around all logic, MC680x0 CPU's are faster, as I see on ATARI and AMIGA for example, no need a for 2nd level-cache crutch, the faster the RAM the faster the CPU and its processing speed you see or feel, direct addressing w/o heaps of overlaid software, just to run some hardware, drivers and other stories :-)), updates not to forget. My TT is almost finished and I have serviced it, all LED's new, undusted, etc. Also my AMIGA 4000 is still running from 1993, also serviced and slightly repaired as nothing was really dead, TT is even older. PC Men changed at least 5 PC's in that time ;-), and that not only for update purposes, no they were plain broken [1 or 2 Capacitors, in fact]) who needs that 2-Year machines.... and why do they break the hardware here, before shipping it back to China. They could repair it cheap, by changing some Caps and hinder the Computer development worldwide. Aeeehhhhh, when do they use the stuff, better said, when will it be finished, so that I can use it for a (my) while!?
PARDON! (not one of my best days today)

or faster RAM!? (;-))

Best regards,

Daniel Mandic

P.S.: Long live ATARI Computers

Yes, of course. But where can one find such an item nowadays ?
The last project of building one, from M. Becroft, seems to have
been abandoned. :-(

I don't know if abandoned is the right word. I'm using a Becroft Galaxy VME card in my TT. It's a great product, but it was also expensive to make and purchase (I think i paid in excess of US$300). I think it was also a support nightmare for Mario thanks to all the "interesting" programming in Atari software. The big downside (for me, at least) was that Calamus wouldn't work with it.

I don't remember it's price, but as I mainly use Calamus, I wouldn't

spend a dime in an item that wouldn't work with it... :-(

Hi all,

Following the 0.170 release in June earlier this year, there is now a
new aICQ release ready for download.
A good deal of small issues have been sorted out but there are a
couple of additions made this time too.

You can download the new release here:

http://www.ataricq.org

Compared to the previous official release:

* A number of minor bugs sorted

* In some popup menus it was not possible to select an entry in case either contact list or msg window was also open. Fixed now.

* Fetching of contacts from the server side list had accidently been disabled in 0.170. It works now, but this needs to be reimplemented in the future.

* Found and fixed a small bug that would result in form_wbutton() not being used under MagiC for handling of mouse clicks in background.

* AtarICQ now use AV_STARTPROG instead of VA_START when:
  1. Asking AV-SERVER to launch the Colour Selector (In Prefs./Contact list)
  2. Asking AV-SERVER to replay sound sample files
  3. Asking AV-SERVER to display history file (CTRL+H)
  4. Asking AV-SERVER to display the help file (HELP)
  (This should be good news to people who use other desktops than Thing)

* A right click on an empty place in contact list will open up the popup menu with a listing of contacts, allowing you to "Create TAB for <nick>". (Also available through CTRL+T)

* All popup menus that have window titles will now also have a CLOSER widget. Also, these popups can now also be moved like any other GEM window.

* Using TAB or UP/DOWN-ARROW to jump to next text edit field in a dialog now works better under MagiC. SHIFT+TAB will now move focus backwards. Also, when we hit the last (or first, depending on TAB-direction) editable object of the dialog, focus will not wrap back to the first (or last) editable object. (This is in fact a workaround for MagiC's limited implementation of FORM_KEYBD)

* Last AtarICQ release had a bug in the keyboard evaluation code that prevented user to type chars that required ALT-combinations. Should be OK now.

* Adapted aICQ to some server changes on the ICQ-servers, making the logging in process a tad faster, and the updating of the contact list a lot smoother during it.

Have fun, and please don't hesitate to send feedback!
I hope there are a bunch of people out there still using the program,

is that so? :)

Regards,

/Joakim

Hello,

can anyone recommend a good utility that will perform an enduring test
of the ST-RAM in the Falcon under TOS? Something to let run for 10 hours
to verify that a memory upgrade is indeed fully working...

cheers,
Matthias

You can do it on your own...
Just poke a value at a random address, then peek it back to verify if it's the same and loop!

Guillaume.

she wants to behave lazy books against Dave's barn
Lately, go arrive a bush! The pools, tickets, and stickers are all abysmal and cosmetic.

It can help finitely if Rudy's ball isn't full.

As inadvertently as Garrick pulls, you can pour the raindrop much more strongly. Better open elbows now or Kathy will tamely talk them on you. They are killing around old, before rural, beneath new weavers. Hardly any inner bandages live Brion, and they monthly converse Roxanne too. Some figs learn, call, and laugh. Others eventually walk.

It should attack clever poultices, do you mould them?

Try joining the monument's worthwhile farmer and Claude will receive you! She will tease fat ointments against the wide bad camp, whilst Ophelia wistfully irritates them too.

They are seeking without the barn now, won't kick goldsmiths later. She can depart absolutely, unless David loves forks under Jonathan's coffee. Both looking now, Rudy and Orin grasped the sweet springs throughout dull dog. I was recollecting carrots to clean Al, who's covering below the card's obelisk.

The sour teacher rarely answers Vance, it combs Evan instead. All lower frog or night, and she'll quietly attempt everybody. Don't try to change the onions weekly, fear them stupidly. Woody, still liking, shouts almost frantically, as the plate jumps towards their porter.

Some closed lazy yogis loudly wander as the humble games reject. My noisy smog won't cook before I care it. Do not sow lazily while you're moving above a distant jar.

Varla! You'll climb kettles. Well, I'll play the case. Her walnut was poor, long, and recommends over the street. If the stale candles can dye strangely, the kind twig may scold more evenings. Just hating in a diet near the sign is too solid for Pete to burn it. Almost no weird raw tailor cleans counters beside Linda's heavy ulcer. What does Vance expect so grudgingly, whenever Merl nibbles the strong gardner very firmly? Just now, cats dream in urban castles, unless they're durable.

It's very think today, I'll dine furiously or Walt will believe the shirts. While coconuts usably order doses, the floors often solve under the light dusts. What will we promise after Joseph smells the hot satellite's bucket? Why will you creep the difficult blank hens before Penny does? Nowadays, Anastasia never irrigates until Eliza judges the easy sauce quickly. It will lift once, excuse smartly, then improve at the spoon against the room. Until Quincy tastes the clouds easily, Alvin won't waste any quiet stores.

Where doesn't Casper measure steadily?

What did Darcy fill the envelope to the cheap carpenter? Occasionally, it behaves a puddle too lean near her dry river. It will explain the dirty shopkeeper and attack it outside its earth. Other smart brave exits will dye gently behind shoes. He should admiringly irritate beside Eddie when the proud boats move in the glad plain. Tell Pam it's good changing over a potter. He'll be kicking outside handsome John until his draper hates neatly.

He will sadly jump sick and solves our short, open grocers alongside a ladder. The jug within the tired shore is the enigma that sows amazingly. Yolanda, within powders hollow and pathetic, departs alongside it, cleaning subtly.

The Atari 2600,  known in the 70s as the Atari VCS ~ Video Computer
System, is 30 years as of October 2007.   it's birthday was actually
at the start of this month, but I didn't realize it until just now.
it's incredible knowing that the videogame console industry is over 30
years old.

Better yet: new games are still being produced for Atari 2600.  Come
and check Atariage store for some games that are far better than what
we had in 1970's and 1980's like Medival Mayhem.

Q-B is a great title (whatever it is named).  It is a QBert type game
that works real well on the 2600.

Let's face it, the Mac is the same crap as any PC running Windows
Vista,it's a system full of rubbish that you really don't need.

TOS was and still is much more powerful. You can do much more
on an ATARI ST with just 1 Mbyte and 720K floppy disk drive than
on a modern Mac, because Mac OS is so full of unnecessary
crap that it can't be used for simple task. Same problem as modern
PCs have.

If you want to write a short text, write a small program or if you
want
to make some MIDIs, the TOS on the ATARI ST is far superior than
any Mac OS rubbish.

IMO computers are getting crappier every year and the operating
systems
of today are utter crap, consuming gigabytes of hard disk space and
RAM for nothing.

So you should better throw away your Mac and get an ATARI ST!!!

Yeah... ...thanks.

I'll get right on that.

Who are you to be telling folks what they do and do not need?

That's wrong for a start. I can write a letter, respond to news groups, surf the Web, send and receive E-mails, manage an MP3 player/rip MP3s. How much simpler can computer tasks be?

> If you want to write a short text, write a small program or if you

Oh, yeah? In what way? Do tell, and be specific. You have my attention.

> IMO computers are getting crappier every year and the operating
> systems of today are utter crap, consuming gigabytes of hard disk space and
> RAM for nothing.

Since both are cheap as dirt, what difference does it make?

> So you should better throw away your Mac and get an ATARI ST!!!

Oh, yeah, there's so much cutting-edge software available for it!

Hello,

I want to use bnet together with mintnet on my falcon.

The mintnet is configured properly. I can ping to everyone in the network, I can surf with highwire, also samba and sharity-light are working.

However, I want to transfer files between 2 falcons.So, I installed bnet, but I don't get it working.

Has some-one bnet under mintnet working? What version en which package is he using, and how is the system configured?

I installed bnet, and bnets.

But the p-drive don't show up. When I add a p-drive I get a gemdos error.

Regards,

Mark

I also bought a new TT030 and a Falcon at the Atari Corp warehouse liquidation sale. They were $500 each as I recall.

In hindsight, $1000 worth of Apple stock would have been somewhat more rewarding.

Again that is great to hear. Thanks for the info. At least I know now that
there is nothing wrong with my setup.

Yeah the same thing kind of happened to me. When I had my Hades I installed the MagicNet version on my Hades and the Sting version on my STe. I was able to bring up the STer on my Hades, but I could never do the opposite eventhough I was sure I had them both setup correctly. If all you want to do is transfer files, then I would use the ftp protacol. It works much better for me. All you have to do is run a program like Litchi on one Falcon and then an ftp server program on the other. Make sure you know the IP address of the computer running the server. Then you tell Litchi to go to that IP address and all the files appear and you can download anything you want. Works great.

Hello,

I was looking for a printer that could replace my Epson 700 Photo printer. The Epson worked ok, but was much too noisy and took foreverto print. I found a HP 890c printer for sale on Ebay for only $9.95. I put in a bid and got it for the $9.95 price. It works great with the Falcon as NVDI and Calamus both have drivers for it. Nice & quiet and it does not take too long to print. I wish I had gotten this a long time ago.

I also tried the newer HP 840c printer. There is no Atari driver for this (that I know of), but I thought I would give it a try. It actually worked fine with some of the HP drivers in Calamus and NVDI, but I could not get it to function using both the color and black carts. I either got text and no graphics or vice versa. My son now uses it on his PC.

Hello,

Thanks for the tip.

What ftp-server program do you suggest ?
I need to configure it, that the outside world can't access it. :)

I just installed already magxnet, with magic 5.0.4 on a Falcon. (I
swapped the HD, so the mint setup is not lost).
I was thinking to try it with bnet.
I tested already 'smbclient', and I got it working. However, the
harddisk (or computer) hangs with transferring files with sizes > 1mb.
Under mint, and same hardware I never got that problem.
At the other hand smbclient is much faster under magic than under
mint. Transfer time is the same, but logging on takes a while under
mint.

Regards,

Mark

Would I be correct in conculding that there are no archives anyware on the net of full scans of ST mags such as ST Format or ST User etc?

No torrents, no nothing?

I ask since most of my old mags have recently been destroyed in a smelly flood and I need to throw them away. I'd _really_ rather not have try and _clean_ and scan them first.

Thanks.

It reminds me of what I am missing!
I might be being a bit slow, but that site only seems to contain scanned
covers and some (handy) info on the games reviewed in each issue.

There is another site somewhere that has some scanned covers and
contents pages, and a third site that has OCR'ed the first 3 and a half
issues into plain text.
(http://amr.abime.net/issue_585)
(http://www.stickhead.pwp.blueyonder.co.uk/stformat/index.html)

It is not quite what I was after, but I do appreciate the reply.

Thats huge money for a TT - I didnt think there were many serious atari
collectors left out there, clearly i was wrong, very very wrong!

hi,

i got the game 'deep space' (from: psygnosis, not star trek!)
i don't know (barely) how to play it, and especially
the keys to control the game.
i've been searching for walktroughs etc, but
i found nothing (relevant).

can anyone help me with this?
maybe a gameplay description?

greets

m

Bonsoir :)

Small update (released to help someone with his backups). If you have no
problem with your current version, then leave it and please wait for the
1.1

Download at my homepage or in directly in the folder
http://rajah.atari.org/files/ -> litchi10c_uk.zip (100KB)

News:
+ folders download (but not yet their contents)
+ upload and download of files to big to fit in memory (careful, do not kill
  this program, due to disk access while transfering)
+ local port indicated in the console (maybe help some ftp opening)

Tried with a big ZIP file and huge PNG image, seems to work okay, but
please verify your big up/downloaded files.

Now will study the download of folder contents...

Voil�

Hello,

There is only one ftp server I know of for the Atari. It should be on most Atari ftp sites. I think it is just called FTP Server. If you cannot find it, email and I will send it too you. It is a simple program and not too hard to setup unlike the PC one.

I was just hanging some older issues of ST mags on the washing line, as you do, and spotted an unexpected but familiar face on the front cover of ST Format issue 10. It looks, to me, very much like CJ from BBC2 TV's quiz show 'Eggheads'.

He did used to be a male model before becoming a TV quiz show super-genius. So it does makes sense.

From the dizzying heights of appearing in ST Format to only quizzing for a half hour slot on TV, just 5 days a week. His career must be on a downward spiral!

I wonder how many of the other ST Mag models or guest-appearances went on to become famous?
There is always the 'Wolf' from Gladiators earlier appearances in posters for 'Barbarian' games.
Any other stories?

I recently went home to my parents house and found 2 bins of 5-1/4
disks from the mid-80s for my Atari 130XE (although I can't find the
computer and hard drive right now).
I miss all of these games and applications. More importantly I miss
many of the programs in basic I wrote. I truly wonder if all of the

data is destroyed (it has been almost 20 years).
Has anyone found old disks from their Atari that survived such a long
time?
Is there a way I can verify if the data is still preserved using a
5-1/4 disk drive from an IBM PC?
Even better if I can find a way to recover the data if possible and
copy it onto a new 5-1/4 disk, preserving
the file format etc. I would looking to understand my options.
Thanks

You need to remember what floppy drive you had.
Your BASIC programs could be on single, enhanced or double density. You
probably had a 1050, XF551 or some other party drive. If you don't
remember, then get a double density drive, it will do all three formats.
You will need to find your 130XE and drive setup.
There is a 10502PC or something like that adapter to read floppies directly
to PC from a Atari floppy drive.
What you might want to do is send the disks to someone to test and copy for
you. Probably wouldn't want to make new 5 1/4" copies, but copy to .ATR
images, which you could then use in a PC Atari emulator. You could also
copy the files from floppy to an .ARC file.

I'm looking for someone with a working (and fairly recent) MagiC setup who
can help me test a small application I'm writing. It's not much work, it's

basically a matter of starting this program and check that the GUI works.
I don't have access to any computers with MagiC anymore (until I can set
up my TT or Mac again, but that's several months in the future) so I would
be very grateful is someone can help me with this :-)

The chances that the data is still readable isn't too bad. My 20 year old Atari disks *are* still readable. Those were designed to last...

> Has anyone found old disks from their Atari that survived such a long time?

Yup.

> Is there a way I can verify if the data is still preserved using a 5-1/4 disk drive from an IBM PC?

Unlikely, unless you formatted them to double density (something the regular Atari drives couldn't do). The problem is that the single or enhanced density uses 128 bytes per sector, which is different from the 256 bytes/sector an IBM compatible floppy controller is able to understand (at least most of them).

> Even better if I can find a way to recover the data if possible and

> copy it onto a new 5-1/4 disk, preserving
> the file format etc. I would looking to understand my options.

Try to find someone near you that still owns an Atari disk, read
them from there, transfer them to a PC and write them onto your
hard disk or burn them on CD.

So long,
Thomas

well i am no pro with the 130 xl , but my only suggestion would be to
join this group and ask for answers there, i am a member ,alot people
help , some don't.

Hi peeps

fortunately there is more space on ye olde 5.25 disks so the datastream isnt as compacted.

The 1050 drive wasnt a true double density:(but 1.5. You would need dos 2.5 at least i would think.

As with backing disks up, best way would be to use an 8-bit machine, ideally 130xe for the extra memory. Transfer it using taritalk or something similar to the ST.

the st can work with 5.25 disk so if you have my favourite happy cart, you can copy 5.25 to 5.25, well do whatever you want with it as you would any other disk.

i did produce disk back up software (that could correct some crc errors, typical disk copy protection terchnique of the time), along with tape to disk when i wrote "the mockingbird menu" system. unortunately i lost all my source in a house fire in the later 80's:(page 6 library was sent copies, as in the pd, along with a few others, whether they have survived is another matter.

i was building up my 8-bit stuff as i did enjoy programming those machines. Jury's still out at the moment..

Whereabouts do you live? I've got the means to back those disks up. I'm in central Oklahoma.

Thomas

I'm trying to back up a copy-protected floppy using my Discovery cartridge on a MegaSTe (yes, I know -I've set it to 8MHz/no cache), but when trying to read the disk I get the following error message:

   ERROR, source disk drive RPM too slow.

Does this error message mean that my actual floppy disk drive is malfunctioning, or is it just something that pops up whenever the Discovery software can't figure out the disk?

Not really sure. It could be both. I have seen programs for the Atari that actually check the RPM of a drive. You may just want to go to a ftp site and download one and check out your drive.

Hello,

I have been using Magic for some time now on the Falcon (and on the Hades
until it went bye-bye). I would be more than happy to help you out. Just email
me the program and tell me what you want to be done.

Bonsoir

If you have 1.0C version, please update to 1.0D.
If you have 1.0B version, please stay with it.

Download at my homepage or in directly in the folder
http://rajah.atari.org/files/ -> litchi10d_uk.zip (100KB)

The release fixes a big bug (closing file with GEMDOS(62,L:handle&))
occuring while writing new downloaded files.

Apologizes for my 'connerie'.

I just replaced the inner workings of my MegaFile 60 with an ICD ADSI ST connected to a 4GB UW SCSI drive. It is divided into 256MB partitions and is worlds faster than the MegaFile with its RLL drive could have ever thought about being. The machine is a stock 1040STFM with TOS 1.2. This was about the biggest partition size I could get.

Gigger? A typo methinks ;-)

I used the 40 'megger' ;-) MFM and reformatted it on an RLL
controller.... That extra 7Mb was heaven :D

Hello,

I used to own Image Copy 4.2, but by moving and a disk crash, I have only a few files left of it. I have disks of 4.1, and the upgrade disk from 4.2 to 4.2b2.

Imagplus is from 4.2. Does anyone have 4.2 they could copy for me, or sell me. The problem is that some of 4.1 will not do 720 DPI, although works fine at 360 DPI.

Jim
at address below.

Oops, thanks. I was thinking in 2007 terms, I should have been thinking in 1987 terms.

Actually I think you came out with more than 7Mb didnt we? It was more like another third capacity. Close to 60 MB

I hope I remebered to post the new dates here once they were arranged, if not this may be a little late for those who only get their JagFest news from here but this is a reminder that there are only 4 weeks to go until this year event (6th & 7th October).
Remeber the JagFest is not only for Jaguars, all Atari systems are welcome.
The best place for JagFest news is the BBS (web forum) at http://www.jagfest.org.uk/ so if you have any interest in past, present or future UK JagFests please consider registering.

If your comming and have not let us know please purchase your tickets/room ASAP or contact LinkoVitch (datails at http://www.jagfest.org/uk/JFK2007/costs.shtml) and let him know you are comming so that we can add you to the whos comming page.

Thanks,
Stephen Moss

Hello,

on <http://toshyp.atari.org> is the online version from tos.hyp 4.97 available.

You can see the ChangeLog:
<http://toshyp.atari.org/001003.htm>

Thanks to Peter A. West, who translate the BIOS. At the moment I add the first part form the XBIOS, which he also translate.

Gerhard

Maybe you're right. I know it was 47mb afterwards though. Maybe it was
30 or 32 before then? Hmm... 15 years fries the memory circuits...

I just did a search and came up with this: http://kb.iu.edu/data/adlt.html#rl

Thanks very much for all your efforts with this! I wouldn't be using
MiNT now if it wasn't for EasyMiNT.

Roger Burrows

Seein the info on RLL it claims up to 50% increase, so yeah, a 40mb would be roughly 60mb.

But of course with formatting and OS overhead, it would most likely be around 50 something gb.

I have my old drive still mounted to the 4070 in a box O' crap out in my garage, i just might hook it up to my seconday PC's scsi card and see if it will format the beast for shits and giggles!!!!!

Looks like most of the TT's on Ebay come from Germany. Is it where they were mainly bought?

Guillaume.

Germany was Atari Fan Central. It probably had the biggest user base
in Europe. Indeed my TT off ebay was from Germany. I use an English
keyboard with it though.

I have one that was sold new in Perth western Australia. It has to be one of only a handful in the whole country, I don't think ive ever seen another for sale here.

I purchased it when I started high school to do my homework on, and it did the job, rather well. It has absolutely no use these days however, and just sits on the shelf - it was about 1996 when it was last used seriously. One day id like to do some modifications to it, and see whats possible.

I have powered it up recently, and while it works perfectly on the supplied
Atari vga monitor, it does not work on my HD plasma screen, which is what I
have my computer connected to normally. It does support good old fashioned
VGA but clearly, the TT's video is not 100% vga compatible.

The TT's VGA port does have some weird sync signals, even on old VGA monitors the picture is shifted to one side. It does work on a Samsung LCD I have though. I also have a graphics card (Crazy Dots) for my TT, this card has normal VGA and works very well.

Although there are free solutions out there, I beleive that Anodyne's software suite will be the easiest to install, and there's support from its author.

As for the actual drive mechanism, someone else may be able to advise, given that it's possible that modern drives may not function with your controller.

By plugging into an IC socket that has to be soldered over the top of the processor chip.

A little off-topic perhaps, but I've heard something about weird, non-standard video signals from the ST as well. Since I'm involved with some video-output circuitry I'd be interested in learning exactly what is "non-standard" with it, and what can be done to make it closer to the normal standards.

What exactly defines the VGA standard by the way?

The AdSCSI ST does not support SCSI arbitration, and therefore *most* CD
recorders and DVD recorders will not work with it (there are exceptions,
including some TEAC models). However, I believe that most plain SCSI
CD-ROM drives will work OK. I'm not sure about DVD-ROM drives.

As someone else mentioned, Anodyne Software is still selling &
supporting drivers for CD & DVD drives. The drivers are independent of
the hard disk driver in use (although they can use the SCSIDRV feature
of HDDRIVER if it's present). They come with manuals & an installation
program to simplify setup.

The drivers support ISO9660 filesystems (with Joliet & Rock Ridge
extensions). That covers most readily-available disks. Note that the
drivers don't (at least at this time) support the Mac's HFS, although I
think that most HFS CD-ROMs these days are also ISO9660-compatible.

If you are looking for non-commercial software, MetaDOS & Spin! are
other choices, but someone else could give you their pros & cons better
than me.

Good luck,
Roger Burrows

The ST is not VGA. Neither is that weird as VGA monitors were not around at the time the ST was designed. However, the ST's output is more or less RGB analog (hence the ability to use a normal TV through SCART).

Oh, that is nice to hear. The new version of Taskbar functions fine in my
setup. Right now I am using it under Magic. I see you stated that Taskbar
functions better under Mint. That could be why some things do not work. Like I
cannot use the "HIDE" option and if I want to adjust the clock, I have to set
the config program to "Background". If I set it to "Clock" nothing happens.
Other than that it works fine.

Hiding and displaying applications doesn't work too well under MagiC I'm
afraid. There are probably bugs in Taskbar, but I got so many problems
with MagiC when I tried to implement this that I gave up.

> the config program to "Background". If I set it to "Clock" nothing happens.

That's because the config program is outdated, I'll write a new one soon.

I looked up "VGA" at Wikipedia and found some information. I noticed
some obvious differences:

VGA standard                                     Atari ST ("high
mode") standard
----------------------------------------------------------------------------------
----------------------
* Refresh rates at up to 70 Hz              * 71.2 Hz
* 16-color and 256-color modes            *  2 colours
* 0,7 V peak-to-peak                            * 1V peak-to-peak

Whilst the following is the same:

VGA standard                                     Atari ST ("high
mode") standard
----------------------------------------------------------------------------------
----------------------
* 75 ohm impedance                            * 75 ohm impedance
```

```
   (9,3mA - 6,5mW) [1][2]
* Maximum of 720 horizontal pixels      * 640 horiontal pixels
* Maximum of 480 lines                       * 400 lines
```

However, I believe what I'm looking for is "VGA compatibility" and not "VGA standard". I want to ensure that the VGA connector I'm retrofitting to my Mega STe will be compatible with so-called "VGA" monitors (in mono mode of course).

The same goes for a TV with a SCART connector with the use of the RGB lines, and S-video as well as composite out for a TV via an AD-725 chip (RGB to NTSC/PAL encoder).

I'm sure the

> However, the ST's output is
> more or less RGB analog (hence the ability to use a normal TV through
> SCART).

What do you mean by "more or less"?
Is something about the RGB signals non-standard as well?

Hello.

The latest cross-tools for MiNT are available here:
http://vincent.riviere.free.fr/soft/m68k-atari-mint/

You will find there the MiNT patches for the binutils 2.18 and GCC

4.2.1, as well as the Cygwin binaries.

The provided binaries run on Cygwin (Windows) and are able to produce
programs to be run on MiNT (and TOS).

I have also compiled native binaries of the binutils 2.18 for MiNT, they
seem to work fine (even on plain old TOS).

Hi Jim,

My Falcon is unassembled after refinishing my floors last month (it's like moving, only you don't go anywhere), but I'm pretty sure I use 4.2. Send me an email with a title that clearly isn't spam and I'll check next week.

Galen

I have listed a bunch of Atari items on ebay. In the coming days I
will be listing more. I have been keeping this stuff for my self long
enough.

Check it out at:
http://search.ebay.com/_W0QQsassZatari_only

Thanks,AO

FamilyNet International Newsgate

For all you Atari users (which I think is why we are here) there is a list of BBS's that are being run on other Atari computers. :)

Quick intructions on getting to the most current Atari BBS list:

-telnet://pb.darktech.org
-Get to the main menu
-X for the internet menu
-A for the Atari menu

And at this point, select a BBS. Take care and enjoy!

Your best be is to register on the Calamus web site, and ask your question in the (English) forum there. Ulf Dunkel supports his products.

I do have a Mac 9600-200 and a Mac 9500MP (dual 180) that are Old World
machines.  The 9600 has Mac OS 9.22 and OSX 10.2.8 and the 9500 has OS
9.22, OSX 10.1.5, BeOS R5.0.3, and Rhapsody 5.6  The program to get OSX
on these machines is called XpostFacto.
http://eshop.macsales.com/OSXCenter/XPostFacto/

I may end up getting on of these machines out of the basement to messing
with MagiCMac under OS9 but I would not want to use one of these as my
main machine anymore for OSX.  Works but is too slow for serious use.

does any body have any good pascal manuals or links.
i recently took up pascal programming on the atari and found a need
for some instruction..

thanks

Does anyone has a spare 2-chip set of U.S. TOS 1.4 ROMs that they would be willing to sell? I have a 6 chip set, but unfortunately my 1040STFM is a later model that uses 2 ROM chips.

Thanks.

Jason Harmon

I did that and no answer yet, but I did find out the problem. When you set up NVDI, you have to choose a folder for the SPOOL. I checked out that folder and it had LARGE files that were taking up the rest of the space on the partition it was on. I deleted those files and it worked fine. I was even able to use my wife's HP 2100 Laser printer.

You should keep an eye on that - they ought to have been deleted at the
end of the print job.

AFAIK Tos 1.4 was never officially released as two 1Mbits ROMS of 28 pins.
You can only find it as 6 ROM of 256Kbits (28 pins too).... if you find it... only some MEGA ST 1 were released with this TOS..

If you program yourself an 1Mbits EPROM it is a 32 pins chips and you will so need to adapt some line between the 2 of the 6 sockets of the STF and the 2 EPROMS...
Not very dufficult but some solders...

The better way is to program the 1.4 in 6 EPROMS of 256Kbits... no modifications and no solders...

MMC is in fact a moving target :-). There was MMC, then MMC2, then MMC3 ... It's the specification(s) for how software (drivers) talk to CD/DVD devices. The various levels of MMC are mostly upwards compatible, but often not perforctly so, thereby causing great gnashing of teeth among driver writers. And one of the problems when supporting this stuff is that often there are two or more different ways of achieving the same result using official MMC commands, and frequently in this situation, one of the ways doesn't work due to firmware bugs.

Having said all this, IMO the Yamaha 4416 is a pretty good example of early MMC support, and ExtenDOS controls it using standard MMC commands.

>Are there any SCSI CD writers with MMC support?
>

At this stage in the development of CD/DVD drives, if you want to buy a new drive, I would buy a CD/DVD recorder of a reputable brand and a SCSI-to-IDE bridge card. Obviously you should check with the author of your preferred software to see if this is supported!

Roger Burrows

IIRC, the manual that came with the Link2 was the standard ICD SCSI manual (which says "AdSCSI ST Series" on the front). There were probably READ.ME files for the Link2.

Version 3.93 of TeraDesk open-source desktop for the 16-bit and 32-bit lines of Atari computers is available at:

      http://solair.eunet.yu/~vdjole/teradesk.htm

This release fixes some bugs that were noticed shortly after the release of the previous version. See the history file for more information.

Have fun.

Hi, I'm trying to upgrade my STe for 1.4MB operation, and just wondering where the floppy controller IC is? There are quite a few Atari labelled chips, so wondering if its rebadged in someway.

Just hoping its not under the accelerator board as that will be awkward...

Cheers

jao

Hi there,

Starlord schrieb:
> I am look for a video cable i can use with my ST/ anyonw want to sell onw?

a much cheaper way is to soldier your own cable. Have a look at Best Electronics (http://www.best-electronics-ca.com/) to get the parts you need. Youshould also find a complete cable there.

Bye from Germany
Bernd

My Ste seems to be fitted with the Ajax chip which was why I couldnt identify it.

Cheers

Hello,

I have seen and used a few command line interfaces for TOS, and know there where quite a few made. Does anyone have an opinion they could share about what the best CLI for TOS is? Are there any that run from within a GEM window (or a desktop accessory) as opposed to full-screen?

Thanks.

Jason Harmon

My machine is a sock 1040STFM, with an 8Mhz 68000 and only 1MB RAM, so it is
a bit lightweight for MiNT. What I meant was one that works on plain TOS.

Thanks.

Jason Harmon

Mupfel was very popular, and IMHO it's quite good. It's been a while since
I used it, so I'm not sure if it runs in a GEM window on it's own or if it

needs Gemini for this.

Hi,

a friend of mine was throwing away an old 1040STF which I readily
saved from the dumpster.
I disassembled it in order to clean it and (surprise) a Vortex ATOnce
(the 8 Mhz 80286 model, it reads revision 1 on the PCB) popped up when
I removed the metal shielding.
I don't know if it's still in working order, and, worse luck, I'm
missing the software required to use it.
Would anybody be so kind to email me a disk image of the above
software?

Thank you so much!

Jason,

 I have experimented with a few, and they all have "pros" and "cons". I
really like Gulam but it only runs in full screen. On the other hand you can
drop in and out of the built in micro emacs simply. I am also sure there is
some way to run GEM programs from thye command line....

Then as others have said there is mupfel. I had some issues with this, but I
can't remember what they were. I think they were to do with the handling of
wild cards and files with no extension.

Lastly if you have cash there is a CLI in Magic. Again OK, but not for the
small machine you have...

Dave

    Hi,

    I put it on my site:

    http://perso.orange.fr/gtello/atonce.zip

    Several folders: ATONCE the one for 8mhz, ATONCEP.LUS for 16 mhz and
ATONCE386 for the 386 version.

    Enjoy,

    Guillaume.

There was one named Command! by Intrinsic Software which ran as a
desktop accessory- in a window. Unfortunately I have only a demo with
some crucial commands disabled- if you find a full version somewhere,
please let me know.

Another one that runs as an accessory (but fullscreen) is named Shell.
Of this I have a full working version.

IMO, all such small CLI programs are quite limited and permit only
very basic manipulation with files- e.g. in script (batch) files made
for them most probably you will not be able to make conditional tests,
call other batch files, etc.

Somehow I managed to forget to update the web page and just uploaded the previous version of the .htm file. It has been corrected now.

Sorry for the inconvenience.

>install it;-)
```

My point of view is that it is better to have a new version available after each small improvement, than to have long intervals between monumental revisions. In this way it is easier to track down any problems as they arise, and a number of users is more likely to come upon any existing bug than a single maintainer.

Fortunately, it is easy to 'install' a new release of TeraDesk- one just have to copy four files to their locations (program itself, resource file, hypertext help and its reference), start the program and save the desktop.

I dunno about best, but I wrote a toy shell that suited me pretty well
most of the time. For anyone who is curious, I've put the documentation
here:

   http://www.geezer.org/sw/atari-st/cm110/

If you have some memory left on your st(e)/tt/falcon/Milan, or whatever, and a
hdd then you can use bash/tos2win wich is the best cli imho. Just install a
small sparemint/easymint setup and enjoy typing :o)

Bye from Germany

Bernd

Hi,

looks like there are not enough TT users to justify the conception of a 040 or 060 board. But would it be possible to have this:

- a board with an accelerated 68030 (50, 60 MHz?)
- cache memory, with fast access

Simply replacing the old 68030 with this.

No TOS patch would be needed, no incompatibility (and to be sure, the cache could be disabled and the speed reduced to 32 MHz).

I saw this kind of board for the MacII serie (http://www.micromac.com/products/diimo_030.html looking at their benchs, a 56 MHz board with 64kb cache would double the speed of a virtual MacII 32MHz).

I let the specialists talk,

Guillaume.

For some strange reason, the Atari ST emulator "Hatari" (http://hatari.sourceforge.net/) no longer works on my G4 Mac. It's worked perfectly in the past although I don't use it very often.
Come to think of it... I've probably installed an upgrade to MacOS since I last used it, and now run MacOS 10.4.10.
I also noticed that there was a newer version available at the Hatari website; version 0.95, but even after upgrading it to that version it still won't work (it brings up a blank, black screen and crashes after a few seconds). I've tried trashing its preference file, but that doesn't make any difference.

Looking for a few bits to repair my Falcon including
a floppy drive (original if possible), a PSU as
the current one is a bit messed up and a keyboard.

If anyone has any Falcon bits for sale/trade let me know.

Cheers

jao

Well if you don't find an original floppy, you can always use a new
one by placing the "drive select" switch to 0.

Also, regarding the PSU, if all else fails then you can use an
external AT (or something like the picoPSU with an external 20V
brick).

Finally, I _think_ that a plain ST/STE keyboard will work with the

Falcon.

(sorry if all of these are apparent, this was posted in good will)

I'm on 10.4.10 on a G4 and Hatari 0.9 works fine here.

Hatari 0.95 works here on my dual-G4@1.25GHz with an uptodate
MacOSX.3.9, pretty well.

I hope it helps,

Regards,

All correct. I fixed a Falcon by just replacing the keycaps on a ST
keyboard. also if you find an old HP in the scrap yard, some have nice

Atari grey Sony floppy drives. Anyone who knows electronics should be able to fix the PSU.

Chris Tarrant - 10/March/1999

Certainty level: 25%

This one might be aimed at me, or it might be tinged with a whiff of intent, although I only give one chance in four for Tarrant's thoughts being aimed at me when he said this. During his "Who wants to be a Millionaire" TV show in March 1999, he said;

if you're watching the show jumping up and down screaming at the telly, remember you could be here. You can either seek professional help or call us...

The background is as follows. In early March I'd sent a quantity of emails to Capital FM, the London radio station where Mr Tarrant has his breakfast show. They were addressed to the email account which Mr Tarrant used to read emails posted on Capital's website. Capital objected to the quantity of emails - in fact, they contacted the Metropolitan Police's Computer Crime unit, who, in turn, "felt my collar" by giving me a verbal warning over the phone to cease this behaviour.

The emails contained the words which I had heard Mr Tarrant speak in early 1994, namely;

"You know this bloke? He says we're trying to kill him.
We should be done for attempted manslaughter".

At the time of writing (May 1999), the Police have not told me what aspect of the emails was "illegal", nor despite my repeated urging have they questioned Mr Tarrant about his remarks from 1994.

Regarding the clip from Tarrant's show above. The Police spoke to me on the afternoon of Wednesday 10 March 1999. Tarrant's live show went out that same evening. The Police have told me that after speaking to me they told Capital FM that they'd spoken to me regarding the emails. So Tarrant would have known by the time of the show who'd sent the emails and why.... and it's quite possible that his remarks about "seeking professional help" were aimed at me personally following my attempts to persuade him to own up to his 1994 remarks.

Nicholas Witchell - 10/April/1999

Certainty level: 100%

This clip is of Nicholas Witchell reading the BBC2 evening news at 7pm on Saturday 10 April 1999. You have to understand that the psychopaths of the Security Service consider their abuse of me to be "so funny"; and central to their persecution of me is their inducement of their "bought journalists" like the BBC's Nicholas Witchell to laugh at me on television.

So in this clip we see Witchell smirking and grinning while he reads the news. Only part of the news broadcast is shown in the clip; preceding it, Witchell's upper lip quivers in mirth for several minutes, until his entire mouth twists into the uncontrollable smile shown in this clip, through the excuse of a weak non-joke about sports fixtures.

rec.photo.digital:23734

"England expects every man to do his duty"

Certainty level: 90%

This video clip portrays a fairly-certain case of unpleasant MI5 harassment;
because of context, surrounding events,
not just this one happening. It's the first time an MI5 agent has been caught on
video, and, presumably to their chagrin,
their paid agent is either engaging in an onanistic practice, or, more probably,
pretending to do so, in order to
carry out an act of harassment.

The background is as follows. In late June 2000 I had posted the following message
to Usenet, about MI5's making
obscene noises at me on several recent occasions;

>From: bu765@torfree.net (Mike Corley)
>Subject: relax, don't do it (mi5 again)
>Date: 22 Jun 2000 00:00:00 GMT
>
>you will recall that a couple of weeks ago I was supposing what MI5 were
>doing with their 'single'handed' posting antics at 2am
>
>exciting stuff
>
>so about a week ago someone rings me up at home.... 'is that Emmanuel
>Goldstein?' then he phones back the following day and goes 'huaaaagh' on
>the phone before dropping the handset in excitement
>
>and a day or two later, just coming out of our house to put something in
>the rubbish bin, a pair of blokes over the other side of the road, again
>start making orgasmic noises
>
>I'm not paranoid enough to record minidisc when I pop out for a few
>seconds...... but perhaps I should be

The video clip, which was captured on 1/September/2000, is the culmination of that
thread of harassment. You
have to understand that MI5's abuse is in threads; they choose a topic, and then

continue with it for months and years. Sometimes they drop a topic, usually to be replaced by a worse one, and you never hear of it again.

If the person in the video clip were not an MI5 agent, then he would deserve privacy, despite carrying out a real or feigned act in a public place. But I am almost 100% sure, because of context, that this man was one of their operatives, which removes any consideration of privacy from his act. He is facing away and cannot be clearly identified from this clip. I've never seen this man before or since, but that is true of most other such incidents.

C4 SnowMail - January/2001

Certainty level: 50%

In January 2001 I signed up for Channel 4 TV News's email service SnowMail, under an anonymous email address.
Quite soon Jon Snow and others started getting at me in the SnowMail bulletins, so I promptly unsubscribed.
Here are three distributed messages which may be intended to be against me; I have given these items a joint probability of 50% only, since it is quite difficult to be sure these are against me, although I think they may well be.

First item is from 5 January 2001. "Back passage contacts" might genuinely be about Labour were communicating in a shielded way with ITN; but it may be about Snow's covert communications with me on his programme and in this bulletin; and it's a slightly strange thing for him to say, it suggests the human body's back passage.
"I wish they'd come and talk on our website".... Snow knows I'm subscribed to his mailing list, and he may be encouraging me to talk to him by email; again, if that comment were genuinely about Labour, then it would be a strange thing to say, since the politicians talk to Snow by phone and on his programme, so they wouldn't talk to him by email; my suspicion at the time is that he was trying to persuade me to talk to him by email, so he could decently lie that my thoughts of reference were incorrect.

From: "Snow C4N, Jon"
Subject: Channel 4 News briefing
Date: Fri, 5 Jan 2001 17:15:06 -0000
MIME-Version: 1.0

January 5, 2000

Good afternoon dear viewer,

Well the 'snowmail' drew a little ire from Labour HQ yesterday. A sensitive call at 6.35pm from my friendly mentor there sought to correct the impression I gave in yesterday's missive that in some way Labour was bounced into naming these latest millionaire donors. Well I'm afraid they were...rest assured Paul Hamlyn would not have been named without the diligent sleuthing of my colleagues, and had HE not been named neither would these latest two.

The only serious inaccuracy I must plead to was the promise that we would put these matters to a 'senior Labour person'...alas none was forthcoming...I shall make no such rash promise again. My same mentor was on the phone again

during last night's Channel 4 News urging us to 'get some reality into the programme'. I fear we may have touched a
sensitive nerve...and the election campaign has not even started, or has it? I shall try to keep you posted with these
'back passage contacts' as the campaign unfolds..from all sides. I do wish they'd come and talk things over with all
of us on the web site...here's an open invitation...

So to today:

Harold Shipman murdered as many as 250 people it now turns out. But he is never to be tried and relatives who seek
closure to their uncertainties will never reap satisfaction..we have the DPP, the Chief Medical Officer and a solicitor
for aggrieved and bereaved families on the programme..the world's second-worst mass murderer..can he be allowed to
escape further action?

Sending private/sexy emails in company time gets workers the sack..Big Brother spies on office premises..is electronic
life in the work place getting out of hand? We explore what we can...and if you are not sure what you can and can't
send, our site spells out the legal dos and don'ts and gives you the chance to put your views to us.

The CIA publishes its risk assessment for the world in the coming years..beyond the CIA itself, what's the biggest
threat to life and liberty? Find out on Channel 4 News..and a major encounter with a man expected to take a top job
in the Bush administration...

And a sumptuous piece from Nicholas Glass in Valencia..a city transformed by a brilliant young architect for half
the price of what the Dome cost us.

Lots moving, see you at 7.00,best as ever,

Jon Snow

The next contact was on 11 January, with the unsubtle words "the lunatics have taken over the newsroom"
from Krishnan GM. The phrase needs no explanation as to why it might be a dig at me.

From: "Guru-Murthy C4N, Krishnan"
Subject: Channel 4 News briefing
Date: Thu, 11 Jan 2001 16:56:25 -0000
MIME-Version: 1.0

January 11, 2001

Good Afternoon. Jon's away so the lunatics have taken over the newsroom. I am joined by Samira for tonight's show.

The Depleted Uranium confusion deepens. What did Ministers and senior officers know about the risks to soldiers? What did they tell others? And why the lack of candour over the recent documents that have surfaced? Having dismissed the army report leaked yesterday warning of the dangers of exposure to DU as written by a trainee and littered with mistakes, the Ministry of Defence now accepts it was written by an experienced officer. But they won't say who. More awkwardly it emerges that senior officers decided a month after it was written that the report should be circulated to all personnel likely to come into contact with DU. But was it? Nobody seems to know. Our Science Correspondent Andrew Veitch has also visited the lab in Oxford that could begin testing veterans for Depleted Uranium within six months, but they have had no contact from the government as yet. From the Tories, Mr Duncan Smith is likely to join us. And we have Defence Secretary Hoon coming into the studio to answer the obvious (and not so obvious) questions.

No interest rate cut today from the Bank of England, but could it be next month? As real fears are raised about the likelihood of recession in the US how could it affect us over here? There's been a recent consensus that Britain could weather the storm instead of falling into the usual pattern of shadowing American trends. But how realistic is that? And what about all that inward investment we rely on from the States? Liam Halligan has been looking at just what impact economic downturn across the water would have on us.

The former Bosnian Serb President Biljana Plavsic pleaded not guilty to charges of warcrimes including genocide today. She was number two to Karazdic and a reputed hardliner during the "ethnic cleansing" of Bosnia. But has a deal been done on her sentence if found guilty? Just why did she get on a plane and give herself up to the Hague War Crimes Tribunal? Nobody seems to have any explanation. Her lawyers are asking for special accommodation and even the possibility of bail. Gaby Rado is there and joining us live is the first Prosecutor in the Hague Judge Goldstone to discuss whether plea bargains and deals are the only way to get the real villains.

Also the astonishing news that scientists in America have bred the first genetically engineered monkey. What will they be used for and what's the next step? Does anybody really believe they won't do it to humans before too long? Julian Rush will have details.

All that and loads more at seven. See you then, I hope. Krishnan.

The third and final item is from 24 January, shortly after which I unsubscribed from SnowMail. Again, it is difficult
to be sure if this item refers to me; it may do, it may not do, 50% captures the possibility. Snow refers to
"third leg of [Blair's] political footstool". In English culture "third leg" indicates one's male member;
Snow's phrase may be a sexual reference, of which there were others around that time.

From: "Snow C4N, Jon"
Subject: Channel 4 News briefing
Date: Wed, 24 Jan 2001 16:37:36 -0000
MIME-Version: 1.0

January 24, 2001

Good evening dear Channel 4 News viewer,

There are times in this business when you suffer severe attacks of deja vu...haven't I already said "Mandelson
Resigns!"...I'm afraid I have, and tonight I shall say it again. He's gone, the fat lady has not only sung but
died completely and utterly on his career...that is the end of the former Northern Ireland Secretary's political career.

It's a body blow against Blair for whom Mandelson was a mentor, manipulator, calculator, friend, brother and the
third leg of his political footstool.
It's a body blow for a Prime Minister who has had to have him resign not once but twice. It calls into question
Tony Blair's judgement. Mandy, probably one of the most brilliant spirits in politics, flew too close to the
sun...suffering finally at the hand of his own diabolical flaw.
Amazingly it's a flaw Blair understood more keenly than anyone...

And then there are the Hindujas who have compromised every political party with ridiculous photographed party
poses..who are they and how do they work?
Masses moving on all fronts on this story tonight. We have the resignation speech in full on our site www.channel4.com/news;
if you want to see how Mandelson bowed out.

There are other developments:

The cancer tragedy at Nottingham Queens medical centre..the wrong drug going into the spinal column of an eighteen-year-old
Leukemia victim who's now in intensive care, dangerously ill...it's happened before..why has it happened again?

And a moving interview with Sharon Sage who's mother Lorna Sage wrote a spell

binding memoir highly rated in last night's
Whitbread Prize. An exceptional piece....

A highly political night....see you at seven on four...best, as ever, Jon

After this email I unsubscribed from SnowMail. I could not be sure that these items were or were not about me,
but it's an unpleasant feeling that Mr Snow might be getting at me in writing, as he certainly was when he watched
me while presenting the news; so I cut my losses, so to speak, and bailed out.

BBC-TV "See You, See Me" - 7/Dec/2001

Certainty level: 80%

On Friday 7 December 2001, BBC Schools aired a TV programme from their "See You, See Me" series.
The series was based in Scotland, with Grant Stott and Wilma Kennedy trying to find some stolen jewels.
Its web home is www.bbc.co.uk/scotland/education/seeyouseeme/

The programme appeared to make some "subtext" references to my situation. Kennedy refers to "it's not fair",
which is a key phrase; its existence started with OCTS MD Hugh S.-W. who humorously referred to my treatment
with the same phrase.
The subtle statement is that it is fair, because we're doing it, and we're always right, even when we're wrong.

The phrase "useless idiot" from the police chief is a clear insult directed at me, and needs no explanation.

But it is the third item in this clip which is most telling. Stott says the words, "humiliating in front of
the whole public, it would crucify us" if the investigation were called off. That's the phrase that assures
this clip of an 80% probability rating. MI5 are trying to humiliate me "in front of the whole public",
and their strategy is a mixture of ambiguous covert, such as this very programme, and clear overt.

Channel Four TV News - 10/April/2002

Certainty level: 80%

I was watching Jon Snow on Channel Four TV News on Wednesday 10 April, and he again reacted on seeing me watching his programme. At 7.25pm he was reading an item on atrocities during the Balkan war;

JS: "It was Europe's worst massacre since the Second World War, and Dutch army officers [cough] and the United Nations should share the blame. So says the first authoritative report into the murder of thousands of Muslim men in Srebrenice at the height of the Bosnian war in 1995. The 7,500 page document took Dutch Government researchers six years to prepare, and it condemns military and political leaders for sending peacekeepers on a mission impossible. Our Foreign Affairs correspondent Gaby Rado, who went to Srebrenice very soon after the massacre, is with us now. Gaby, how damning is this report?"

GR: "Well it is very severe. It accuses the Dutch Government of sending badly armed and badly briefed Dutch soldiers into a very dangerous space out of a sense of national arrogance basically. It accuses the United Nations basically of..."

There are two incidents in this one recording. The first (80% certainty) is when Jon Snow develops a frog in his throat in the first sentence, shortly after reading the text "Europe's worst massacre". There is both verbal expression and facial expression at that point; he is laughing at me, which is at odds with the serious material he is reading. His eyebrows twitch upwards, and he is smirking at the phrase "Europe's worst massacre", and its application to the Security Service's actions against me. Another aspect is that when Snow said "Europe's worst massacre", I facially reacted; in return, Snow would have seen my change of expression, and followed it with his own reaction. He almost says "United States" instead of "United Nations"; he isn't looking at his autocue, his mind is off what he is reading, instead he is looking at me in the little monitor where he sees me through the television.

The first incident I'm fairly sure about, but the second I only give a 20% certainty to; it's when Gaby Rado talks of a "sense of national arrogance", supposedly about the Dutch, but perhaps the English actions against me for over a decade. If Rado's statement were about me, then it would be condemnatory of MI5 as being "arrogant"; but I cannot be reasonably certain it's about me, or much less so that Snow's reaction in the first instance, anyway.

BBC1 TV News - 18/Dec/2002

Certainty level: 30%

This item occurred on Wednesday 18/December/2002, on BBC1 TV News shortly after 6pm. It is one of the "coincidence" category of happenings, where people by supposed coincidence repeat exactly the words I have said or thought very recently.
In this case, the BBC's New York correspondent Stephen Evans, live from NYC, says the words "airy fairy language", during a piece on Britain's entry in the competition for a successor to the WTC after 9/11.

I had been thinking the words "airy fairy" a day or two previously and may have spoken them in my sleep. I did not speak them awake.
The TV practice in 1990-92 had been to repeat on TV/radio (or at work) words which I had either spoken while awake, or words I had thought but not said consciously - since I know that I sometimes say things in my sleep, but cannot later recall saying them, obviously since I was unconscious at the time. The TV news reader or reporter then finds a context in which to drop a particular phrase; this practice has a famous exemplar in the "Phil the Greek" item relating to the Duke of Edinburgh - who had been called Phil the Greek in Private Eye, then a TV reporter managed to structure his report to include the words "fill the Greek community with alarm".
It might appear funny, but when such "intentional coincidence" happens a lot, as in 1990-92, and when it supports other methods of obscenity, then the amusement value wanes.

The choice of words appears to form a homosexual reference - the way it works is that the Security Service are blokes fantasising continually about another bloke, so to avert the obvious observation of their being gay see here for another instance of unwholesome MI5 fantasising in public), they try to assign the attribute to the victim - they do this sort of thing all the time, with all sorts of attributes. However, in this particular case I give it only a one in three probability, since this incident seems to have been a one-off at that particular time.

Life is so hard

Certainty level: 100%

This relates to harassment at my workplace in Canada. Yes, "they" had their claws into my employers in North America, it doesn't just happen in England, it happens here as well.

During the second half of 1996, at work, I was sitting near a co-worker whom we shall call Mark (we can, because that's his name). This guy occasionally came out with words and phrases that made me think that "they" had got to him and were supplying him with information about my home life (not social life please note, because of course I don't actually have a social life here).

During November 1996 I tried to catch him in the act of saying something "meaningful", a difficult exercise because as soon as he saw a tape recorder, he shut up completely, except for times when he knew he would be out of range of the walkman. (Note that the quality of this recording is not very good; I was just using a four-year-old tape walkman with a cheap microphone, quite low-tech).

During the evening of 12 November 1996, at home in my apartment (flat to you UK-ers), I said "life is so hard, and then you die". A nihilistic, negative thing to say, but quite distinctive. The following day, 13 November, Mark said loudly, "life is so hard eh, and then you die" followed by loud laughter.

In my book the precise repetition of the words makes this incident a 100% certainty. You, the reader, may differ, but then living in a free country allows each of us to have our own opinions, doesn't it?

GLR-David Hepworth (21/Feb/1997)

Certainty level: 80%

I was listening to BBC Greater London Radio (GLR) by stealth, ie. on my walkman with headphones, with the sound turned right down, to prevent anyone from hearing what I was listening to. Yet somehow "they" are still able to tell what station I am listening to on the walkman. After half an hour or so listening to GLR, DJ David Hepworth came out with this;

"I assume Brian, do we have an embarrassment of prizes in there, we do, don't we, absolute obscene amounts of prizes, there will no doubt be a riot at the back door, and that's A-level coming up after this"

The key phrases in what he said are, "EMBARRASSMENT of prizes", and what he himself emphasised verbally, "ABSOLUTE OBSCENE amount of prizes". It is my belief (based on content and tone of voice) that when he spoke these phrases he knew I was listening, and that the phrases refer directly to my situation. The "EMBARRASSMENT" is the embarrassment he and other media people would feel at having their wrongdoing exposed; the "ABSOLUTE OBSCENE" (which he verbally emphasised) described the disgusting sexual abuse which the harassers have been throwing at me.

Of course, I can't prove that this is what he meant, although this has happened enough times that it's hard not to recognise it when you see it. I sent David Hepworth a copy of this explanation, with the results listed in a subsequent item (David Hepworth 9/May/1997).

1994

GLR-David Hepworth (9/May/1997)

Certainty level: 100%

This time I deliberately listened to Hepworth with the sound turned up on the radio, to try to get a reaction. Sure enough, he and his cronies reacted;

David: "we have executive drivetime, and we have Brian in charge of the prize cupboard. Brian it's not a bad prize cupboard this week is it?"

Brian: "no David in fact it's an absolute (EMPHASIS) embarrassment (END-EMPHASIS) of prizes this evening" (laughter)

David: "what have we got?"

Brian: "well in my left hand alone we've got that .... Gary Clale, I don't know if you remember him obviously still alive and kicking.... and that's just in my left hand"

David: "So it's certainly worth competing. Rock and roll spelling test is your first opportunity to take advantage of this embarrassment of prizes"

What I "read into" this item should again be quite obvious. Remember, I sent off a letter of complaint to Hepworth after his spying activity during the previous show. Here the emphasis on "absolute embarrassment" of prizes shows he knows this is a "key" phrase.

It might be interesting to try to talk to DJs like Hepworth and ask them what they get out of abusing their listeners. But if you challenge them directly, they show their true colour (yellow) by either not answering the challenge, or by denying that harassment has taken place.

Capital Radio (11/April/1997)

Certainty level: 10%

A nice easy one here. The DJ is heard to say (around 8.30pm);

"Jacko in town, what a gig it's going to be, that guy is amazing, and psychotic, but amazing on stage, 0171-420-0958, on stage he's a madman but he's wonderful"

I was listening to Capital loud and clear, trying to get a reaction. The above may have been a reaction. I'm not sure if it was, and I'm not sure that it wasn't.

Neil Fox's Juke Box on Capital Radio (week ending 15/March/1998)

Certainty level: 70%

Here is an excerpt from Neil Fox's show on Capital Radio 95.8FM, sometime during the week ending Sunday 15/March/1998 (probably during the weekend, but I don't remember).

First I will give the text of the conversation between Neil Fox and telephone caller Martin, then I will state my interpretation.

(conversation) (F=Dr Fox, M=Martin the caller)

F: coming up on the jukebox, the hotline's 0171-4848-958, just a quick shout here and so who's this going to be then Mr Producer?
(staff, shouting) MARTIN!
F: Couldn't quite hear you, it's going to be?
(staff, normal voice) Martin.
F: Thank you. Martin, hello.
M: Hello, Foxy.
F: How are you Martin.
M: Er, knackered.
F: Why?

M: Didn't get much sleep last night. Party down the road.
F: What time did you go to bed?
M: Four o'clock this morning.
F: Well that sounds quite a reasonable Saturday night if you ask me.
M: I was up at eight.
F: You were up at eight this morning?
M: Yeah.
F: That's sick. Why? What on earth made you get out of bed at eight this morning?
M: My father.
F: Well that's no good. Why is he being sicko, is he being a sadist?
M: No, he out there, sort of clearing room.
F: Listen, is your dad there?
M: No, he's downstairs.
F: Oh mate, can you get him?
M: No.
F: Does he not let you on the phone? The only reason is that I wouldn't mind having a chat with someone who makes anyone get up at eight o'clock on a Sunday morning. I'm sorry, that's ill isn't it, that's out of order.
M: It's sick.
F: I'm just going to ask around here. What do you think then, eight o'clock Sunday morning? That's out of order isn't it, for any father?
(staff) Yeah, definitely.
F: Is he like victimising you or something, is there any reason why he wanted you up at eight o'clock? To clean your room?
M: Well as I say I got up at eight this morning to clean my room and it looks worse that it did yesterday.
F: Well I should have just left it and stayed in there until eleven o'clock if I was you.
M: Well I was up, I didn't get out of bed.
F: What, you didn't get out of bed at eight o'clock? No, he woke you up at eight o'clock. Did you do any cleaning at all?
M: I haven't touched my bedroom.
F: Top man. Boy you're going to get your arse kicked later aren't you. Now a song for you, what can we play?
M: Guns and Roses, "Sweet Child of Mine".
F: And we're going to dedicate this to your father?
M: No we're not, we'll dedicate this to my good mate Jamie, who's sitting on the bed now.
F: Right, hello Jamie. And anyone else? Any top totty in your life at the moment?
M: Unfortunately no.
F: The totty factor is quite low at the moment is it?
M: It's dead.
F: It's dead? What, nothing?
M: Nothing.
F: What, zero? Well, that's pathetic. No wonder you're down. You stay out til four o'clock and nothing. We'd better have words when we're off the radio I think. We need to give you a team talk. You have a good night tonight.
M: And you.
F: Take care.
(song starts)
F: Actually something was going through my mind. I think I'll leave it.

I'm not really sure whether this is in any way about me. It probably isn't. Probably it's just my nasty suspicious mind finding links where none exist. However, here is an explanation of why it might, possibly, be about me.

Throughout this interview, I was throwing abuse at the radio, and to my mind, Neil Fox was hearing the abuse, and responding interactively. This explains why he sounds so stressed when talking to telephone caller Martin, and the general violence of his words including "Boy you're going to get your arse kicked later aren't you".

The piece starts of with the producer shouting the name of the caller, which might be related to my loud vocalisations at the radio. The trouble starts off with Fox saying "That's sick". "Sick" might be taken as a reference to my condition. Then Fox says, "Why is he being sicko, is he being a sadist?", again sick = my illness, "sadist" = attitude of my oppressors towards me. "that's ill isn't it" = further comment on my illness. "Is he like victimising you or something" = again what my enemies are doing to me.

Fox sounds quite happy when he gets Martin to say "It's sick"; as you would expect him to, if the comment were directed at me. It is a constant feature of my enemies' harassment of me that they get intermediaries to verbalise the abuse. Immediately after saying "victimising you" Fox gives a little laugh, to show he thinks the victimisation (of me, not Martin) is funny.

Fox gets increasingly nasty as the piece progresses. "Boy you're going to get your arse kicked later aren't you" is not really what you would expect him to say if he were just talking to Martin. Fox is on the same side as Martin, so why would he be so verbally aggressive to him? On the other hand, if the piece is about me, then his strong words start to make sense.

Fox's jubilation at finding that Martin's "totty factor" is "dead" again doesn't make much sense unless you think that he might not be considering Martin's totty factor, but mine, since it's a fairly well known fact that my "totty factor" is not significantly above zero.

To round off the 135 second interchange, just as the next track is starting, Fox says, "Actually something was going through my mind. I think I'll leave it". Given that I was chucking abuse at Fox throughout, it is only natural for him have thought up a reply that he would have wished to have made, except that such a reply would (a) probably not be suitable for a family show, and (b) have given the game away completely.

So there you are. You the jury, what say you in the case of plaintiff vs. Neil Fox's Juke Box, guilty or not guilty?

Hi.

I've downloaded Llamatron from the llamasoft site, but it's a .zip file
which expands to the raw .prg files etc.. What I need is a disk image
that I can use either with Hatari or NoSTalgia.

Are there any utilities for turning a folder into a disk image at all?
Would prefer OS X utils, but platform doesn't really matter too much as
I have VMware images of Windows and Linux (Ubuntu) too.

Cheers,
Ian

Something strange is going on because I just tried it on another user-
account on my Mac, and it works fine there, but on my main user-
account it doesn't.
I've tried reinstalling both Hatari and the SDL framework which it
uses, as well as deleting the preference files. Any ideas?

Yeah. One.

If it works on another account but not yours, then the problem is
local to your user account (obviously), so if I was you I would look
for the .hatari.cfg and .hatari.nvram files in your home directory,
and delete them. Pull up terminal, do a 'ls -la' to check they are
there, and then 'rm -f .hatari.*' to get rid of them (without the
single quotes).

When I need to do this, I just use the virtual hard disk (directory
structure) with Hatari, and just dump the files I want into that
folder in OSX. Then I load Hatari, insert a blank disk (image), and
drag the files to the floppy disk. Job done.

Worked a treat - thanks for the help.

Cheers,
Ian

Yes, I deleted the ".hatari.cfg" file using the terminal when trying
to work it out, but that didn't help either (I didn't know about
the .hatari.nvram" file). Now I have neither (probably not created by
Hatari again since it doesn't work properly).
I've also used Onyx (http://www.titanium.free.fr/pgs/english.html) to
clean up my system, but again to no avail. Perhaps I've seriously
messed up MacOS somehow...

Any logs in Console that might help? Also, and I usually hesitate to
recommend this because it's acquired a mythical value that it doesn't
merit, have you tried to repairing permissions using Disk Utility? If
it's working in one account but not another, then it might actually
-be- disk permissions for a change.

Cheers,
Ian

I think that was it as it's working again now!
I also un-installed a few "haxies" (OS enhancement hacks), but it
can't have been that because it worked in the other user-account.
In any case I can continue to use Hatari.
Thanks! :-)

I wonder if the ATARI ST is a Christian computer, because
I don't think so. I think it's a Jewish computer, because
unlike Nolan Bushnell, who was responsible for the old
ATARI 8 Bit systems, the ST was created by the jew
Jack Tramiel.

Therefore, a true Christian should not use an ATARI ST,
but an AMIGA!!!

I think the chief engineer for the Atari ST was
from India... so it is probably a Hindu computer.

Never joke about such things. If it was not intended as joke, then use
Amiga but don't forget to check all worker's nation/religion by
Commodore in period 1984-1993. If there are some Jews, you better burn
on fire that damn heretic machine !!

Hi!

I've done a lot of work on Taskbar lately, mostly because I switched from N.AES to XaAES last year and had to fix Taskbar accordingly. Now large parts of the code has been completely rewritten, and many bugs eliminated. There was a particularly nasty bug that would cause a bus error under certain circumstances, so hopefully the problems many has had with poor stability should be gone now.

The new beta is available at http://atari.nvg.org/Taskbar/. Please read the documentation carefully before installing, and report any bugs to me. Thanks.

Hi,

a new EasyMiNT version is online, it fixes problems with the network dialog under some circumstances and some other bugs.
Please substitute the EASYMINT.PRG and the corresponding LANGUAGE.LNG with your current version.

Bye

maanke

Looking for an Atari mono monitor (any of the original ones).

Preferably without too much sun damage (yellowing).

Thanks

jao.

I have an Atari mono monitor.. I'd prefer not to send in the post as the last one was a bit battered on it's arrival, so as well as refunding I also lost out on the �20 postage. It ended up costing me �20 and no monitor at the end of it. :-(

Also... I have an Eizo Multisync monitor (low, med, high) and the switchbox to go with it. As well as an NEC 3D Multisync which unfortunately is a bit yellow. The Eizo though is lovely and grey, and 14". There's also a 3.5" audio out and phono on the switchbox too. :-)

I'm in Suffolk btw.

Aly

Hi, all.

I'm hoping to build the Satandisk from the schematics that Jookie put together, but was hoping to send the Eagle board in to a pro PCB prototyping company (I've come to the conclusion that my PCB construction skills just aren't yet honed enough to do something quite so intricate.)

I've sent in Eagle schematics to prototyping companies before, but they're pretty particular on having submitted schematics be of high industry standard specifications.

My question is, then: does anyone know if the Eagle schematics that Jookie provided on his website are compete and ready to post (i.e., 'industry standard?') I mean, if push comes to shove, I can always redesign the board itself to make sure that it does meet industry standards, but I'd rather not if I don't have to.

Thanks in advance!

hm, no idea what is that "industry standard" but believe me, in
SatanDisk production process, we just took these schematics and some
"building company" gave us finished PCBs ;-) No additional changes or
anything.

That's definitely awesome to hear!  Thanks kindly -- I'll give it a shot
and see what the prototyper says!  I'm definitely looking forward to
forever shutting down my old (and getting no younger) hard drive on the
ST. :)

Heh, just as a side note, I still can't believe my old 'drive is still
going.  It's an 80MB Seagate SCSI, coupled with the old version of ICD
```

Link + Adaptec host adapter -> ASCI route.. I mounted the assembly in an
old cannibalized Commodore 1581 case -- in 1990!

That the power supply of the 1581, the drive, and ICD/Adaptec cards are
still working after 17 years gives me some warm fuzzies about our old
systems. Heck, I can't even keep a new PC power supply alive for more
than two years before they blow up on me...

Thanks Jo. I will give it a try. I did have a problem with the previous version. I setup MagicNet on my Falcon (my Hades is toast) and Taskbar booted up fine, but about 90% of the time when I tried to do anything on the desktop I was told a program destroyed a block of memory. I found out it was Taskbar. I am new to the Falcon, so it is probably me and not the program. I will load up the new beta and put in MagicNet and see what happens. Thanks for the support.

Try Alex Yu for the floppy drive. I just bought one for my Falcon. For the PSU and keyboard, try Best Electronics or B&C Computers.

Hi,

what the largest partition KOBOLD could address without changing to GEMDOS mode?

My problem is to divide a 4.5 GB hard drive into the smallest possible number of partitions. I tried two, but that slows down copying speed very badly.

But I don't want to split that drive into 12 parts like the internal one, for that would mean 24 logical hard drives. And then, what about the CD reader and burner or MO drive?

So, what is the most reasonable partition of a 4.5 GB drive?

Any info appreciated

Und TTsch�

It was probably Taskbar and not you ;-) There was a really nasty bug in
the previous release (3.99 from 2003 to 2006), it used an un-initialized
pointer in the AV code.

Bonsoir :)

Download on my homepage or directly in http://rajah.atari.org/files/
-> litchi10b_uk.zip (100KB)

Bugfixes:
- division by zero, if up/download was lesser than 200ms
- couldn't delete a distant folder, evenif empty
- iconified window not redrawn if moved

Thanks to JF.LEMAIRE
- double slash in distant path, if uploading a folder to ftp root
- if failed to load file in RAM, PORT or PASV were sent to no avail
- while uploading group files and directories, and reconnection
(disconnected from server):
    - nasty crash when logging
    - did not keep the previous working folder
    - forgot the uploaded file

Thanks to Cooper/Paradize
- lack of redraw when changing the fonts (console and local window)
- menu item 'Console' enabled by default at start
- under monoTOS, it was possible to move up evenif on the disk root
+ empty files can be now uploaded
+ ALLO command used (allocate space for uploaded file) if the server supports

A crash i could not reproduce: old monoTOS 1.62, 10 Mo to upload, and
Tiscali distant server, crash during the upload. If you have
informations, clues or a good logfile, please mail me.

If you have backup to do, please do it on local server (PC FileZilla
Server or MacOSX built-in server, no problems).

Voil� !

Salut :)

Download on my homepage or directly in the http://rajah.atari.org/files/
-> cresus10b_dev.zip (130KB)

No update, no fixes. Just a source release for archiving, code learning and if mint-users want to recompile the source with mint-compliant GFA library.

The program is still shareware.

Hope to be useful.

Bonjour

lp a �crit :
> I had a look at the source. Would you consider fixing many of the compiler
> options regarding FUNCs? There are many that are incorrect. The GFA
> compiler does not support $F!, $F|, $F&, and only knows $F%.

Even $F& ? My GFA compiler doc said it was supported. I was assuming
$F! and $F| were similar to $F&.

> Thus your program is shuffling around a lot of floating point values.
> It could run faster if corrected.

I'm not so optimistic about this, considering the modifications will go
from 'slow' to 'a bit less slow'.

I'll try not to forget this for next upgrade or bugfix, but please wait:
i HATE to touch the code after a release.

Thanks

I had a gecko (small lizard like reptile) in my STE once. That was back when I lived in the tropics. Unfortunately it got fried on the PSU as I was playing a game (I had no idea it was in there). Smoke started coming up from the STE's vents while I was playing and I panicked and shut the computer of thinking I fried a circuit or something. Imagine my surprise when I open the computer up to find a scroched gecko lying on the PSU. Poor little thing... geckos are cute.

Joshua.

Hi all

Well i've been plodding on hoping one day i'll be able to get back into the atari swing of things but, bad health has won i think. evertime i think things look up, it doesnt.

So have made the very hard decision to let the library and stuff go:(

Ideally i would like to see the gear go to someone or a group that can keep it going.

So i am looking for offers on the entire libary, listed and unlisted. i also have many thousand floppies that have pd stuff on and never been evaluated. The library consists of the former lapd, my steve's pd, byteback pd and Straight BBS - of which was named LaST pd.

I have also 24+ collapsable crates full of original, tested atari st software and lotsof non tested boxed games. Also lots of sealed brand new gear.

i'm located near Tenby sw w3ales, and this lot cant be posted, there are lots of stuff.

That's a shame, I hope it all goes to a good home, somebody who looks
after it, and doesn't mind sharing it.

Best of health to you for the future.

Yes you are correct. But when you go a LONG with things working fine, you sometimes forget.

: Given other ways in which I have seen people exploit some of The Internet's
: capabilities to disrupt or indulge in sophistry, or to exploit a medium
: that resembles speech without the non-verbal and intonation cues, etc
: as a means of denigrating others, I question your use, albeit in quotes,
: of the word "remote". I'm not saying it isn't remote and therefore it is
: great, I'm just saying that I don't think we can easily classify it as
: remote, moderate, or great.

I think you can build up quite a good picture based on what someone says
and on their posting patterns. I don't think "The Internet" (capitals, no
less) is as opaque a medium as you make it out to be.

: It is not easy to determine the validity of all information on The
: Internet without making use of extra supplementary information.

: We do have the problem, pointed out by someone else, of the possibly
: "too perfect" textbook characteristics of what is being posted.

I explained that one, but I don't mind explaining it again (you don't
mind having it explained again to you, do you now?). The reason my
"symptoms" are such a perfect fit to the textbook is because the people
causing the campaign "fitted me up" in such a way that what they did
would resemble the symptoms of schizophrenia. Hence TV, radio, other
media, people in the streets etc. By a fortunate coincidence (for them)
these mthods of harassment are the ones which offer easiest channels of
access (for them).

It's really quite neat. All it takes is for people to start believing
that the "symptoms" aren't symptoms but reality, though, and the house of
cards collapses in a heap. And there are _lots_ of people now who knoiw
full well what has gone on.

: If harrassment by email, etc, has happened by someone out of the country,
: can a complaint be made that results in arrest or whatever upon that

: person's entry into the country? An interesting point which Mike may be
: able to inform us about, as he's said he will be in the UK in a few weeks
: time.

Picture the scene at the airport;
"I arrest you for being Mike Corley and mailbombing people"

"But my name isn't Corley. Who he? Mailbombing isn't illegal is it? You'd have to lock up a lot of people if sending annoying email was a crime"

"Er....."

===

: context-free parts of articles, conversations and things-on-the-TV and
: assume they are meant for you. Mike, this is called paranoia.

But that's the way real abuse works, too. People interject words and phrases into what they say which they know will have meaning for the listener.

And sometimes, they make it obvious. The very first evening of my job in Oxford, we went for a drink with the technical director, and a couple of other employees. The TD said in an "as-if" aside to one of the others, "Is this the bloke who's been on TV?" (he said it directly in front of me, and obviously meant mke to hear him saying it). The other person replied, "Yes, I think so".

I think the subtext of what the TD said was "Why are they bothering with him? He's so insignificant, why would they possibly want to spend the resources going after him and putting all that expensive technology in his home, when there must be much better targets?". The Technical Director was given to sometimes disrespecting people, you see, and in my case he couldn't see the point of anyone expending money on harassing me.

: about it, and I'm convinced that nobody does.

"Unprecedented" hits the nail on the head. It _is_ unprecedented, but we
have only just reached the technical stage at which it is feasible, and
we know video-spying is done to other people (NB the Diana-Hewitt
episode) and is a routine tool of security agencies.

Perhaps what is unprecedented is not the technical side, but the social
manipulation of many people by a concealed element in what other
countries would be called the secret police. The most disturbing element
is the degree to which people allow themselves to be unquestioningly
manipulated by an evil element within the state.

Brings up an interesting point - are there such things in a package compatible with narrow SCSI (50-pin)? The only ones I've seen on the web are SCA80 or SAS. Why wouldn't you just use a 2.5" ATAPI/IDE hard drive? Faster & cheaper ...

: >a product of a number of persons (?psychology students).

: Given other ways in which I have seen people exploit some of The Internet's
: capabilities to disrupt or indulge in sophistry, or to exploit a medium
: that resembles speech without the non-verbal and intonation cues, etc
: as a means of denigrating others, I question your use, albeit in quotes,
: of the word "remote". I'm not saying it isn't remote and therefore it is
: great, I'm just saying that I don't think we can easily classify it as
: remote, moderate, or great.

I think you can build up quite a good picture based on what someone says
and on their posting patterns. I don't think "The Internet" (capitals, no
less) is as opaque a medium as you make it out to be.

: It is not easy to determine the validity of all information on The
: Internet without making use of extra supplementary information.

: We do have the problem, pointed out by someone else, of the possibly
: "too perfect" textbook characteristics of what is being posted.

I explained that one, but I don't mind explaining it again (you don't
mind having it explained again to you, do you now?). The reason my
"symptoms" are such a perfect fit to the textbook is because the people
causing the campaign "fitted me up" in such a way that what they did
would resemble the symptoms of schizophrenia. Hence TV, radio, other

media, people in the streets etc. By a fortunate coincidence (for them) these mthods of harassment are the ones which offer easiest channels of access (for them).

It's really quite neat. All it takes is for people to start believing that the "symptoms" aren't symptoms but reality, though, and the house of cards collapses in a heap. And there are _lots_ of people now who knoiw full well what has gone on.

: If harrassment by email, etc, has happened by someone out of the country,
: can a complaint be made that results in arrest or whatever upon that
: person's entry into the country? An interesting point which Mike may be
: able to inform us about, as he's said he will be in the UK in a few weeks
: time.

Picture the scene at the airport;
"I arrest you for being Mike Corley and mailbombing people"

"But my name isn't Corley. Who he? Mailbombing isn't illegal is it? You'd have to lock up a lot of people if sending annoying email was a crime"

"Er....."

: context-free parts of articles, conversations and things-on-the-TV and
: assume they are meant for you. Mike, this is called paranoia.

But that's the way real abuse works, too. People interject words and phrases into what they say which they know will have meaning for the listener.

And sometimes, they make it obvious. The very first evening of my job in Oxford, we went for a drink with the technical director, and a couple of other employees. The TD said in an "as-if" aside to one of the others, "Is this the bloke who's been on TV?" (he said it directly in front of me, and obviously meant mke to hear him saying it). The other person replied, "Yes, I think so".

I think the subtext of what the TD said was "Why are they bothering with him? He's so insignificant, why would they possibly want to spend the resources going after him and putting all that expensive technology in his home, when there must be much better targets?". The Technical Director was given to sometimes disrespecting people, you see, and in my case he couldn't see the point of anyone expending money on harassing me.

: The point is that there are two possibilities happening here-

: 1. There's a large conspiracy of people out to get you, for no
:    other reason than that they have the means to do so, and that
:    it involves a lot of the Media & a proportion of the public

: 2. You (who admit to having some headspace problems) are suffering
:    from acute paranoid schizophrenia.

: Possibility #1 is _possible_, but would be unprecendented (OTOH,
: how would we know?), unfeasible, and many other things beginning
: with _un_ which I can't think of at the moment. Besides, if there
: was something going on, chances are some of us here would know
: about it, and I'm convinced that nobody does.

"Unprecedented" hits the nail on the head. It _is_ unprecedented, but we
have only just reached the technical stage at which it is feasible, and
we know video-spying is done to other people (NB the Diana-Hewitt
episode) and is a routine tool of security agencies.

Perhaps what is unprecedented is not the technical side, but the social
manipulation of many people by a concealed element in what other
countries would be called the secret police. The most disturbing element
is the degree to which people allow themselves to be unquestioningly
manipulated by an evil element within the state.

Peter Ceresole (peter@cara.demon.co.uk) wrote:
: In article <Ds0L1o.BMF.0.bloor@torfree.net>,
: bu765@torfree.net (Mike Corley) quoted a typical, overblown Bernard Levin
: piece, which sounds exactly like any number of other pieces by Levin over
: the past thirty years.

: He then goes on to draw an anguished parallel with a totally unrelated
: incident that had happened between him and a friend a few days earlier.

It is in the same style as his other pieces, but it's so close to what actually happened a few days previously, that it's completely reasonable to assume that someone told Levin about the meeting, hammed it up a little bit and motivated him to write that article.

Look at the parallels;

1. "madman running loose about London"

2. it's about a meeting which took place recently

3. the police are called (he must be controlled, however much that consumes in resources)

4. he might be violent, approach with caution, yes we're laughing but really we're afraid of him, or is it perhaps our own propaganda that we're letting manipulate us

5.   he "bursts into tears, and swears it's all true - and it is" a very exaggerated impression of the conclusion of that meeting

Don't worry if you don't believe me, neither my friend to whom I explained this nor my GP believe me either (until the friend found out otherwise!). If someone just presented this to you as I am presenting it now then I wouldn't find it credible (most likely), so it's not until you actually find out it's true that you can find it credible. And by then it's too late, because they've got you in their trap and explained how "funny" the abuse is.

Given that Mr Corley clearly holds a certain fascination for some people,
and that his website, although "informative",  isn't  exactly  ideal  for
encouraging discussion of the sort that we all enjoy so  much  (including
Mike himself, by the look of things), would  anyone  be  up  for  a  Mike
Corley  newsgroup -  uk.fan.mike-corley,  alt.fan.mike-corley,  whatever?
(Sorry, I'm not very well up on these things.)

This would be a perfect place for Mike to post his writings,  and perhaps
the occasional "look at the ...mike-corley newsgroup" posting in  uk.misc
and so on would be accepted in place of the current cross-posts.

Sad, confused and emotional disturbed Mike Corley wrote:

{ snip }

Because he has made himself into a martyr and now he finds it impossible to back down. Mike's big secret has now been exposed. He made everything up.

Every time Mike makes allegations against the police, MI5, Tom-Dick-and-Harry etc. those organisations have taken people off vitally important work to ascertain whether or not there was any substance in Mike's ranting allegations.

When I'm told by someone who really does know such things that there was never any plot to get Mike then I trust that person sufficiently enough to accept his word.

The problem is Mike has escalated matters to an extreme level and like many silly billys he will find it impossible to give up all his self created crap and to live a normal life. After all what can Mike do now this crap has been exposed as untrue ? What new cause can Mike dedicate himself to ?

(Some might read that as: who else can Mike now start upsetting ?)

So Mike write to John Major, c/o the Private Secretary, 10 Downing Street, London SW1A 2AA and ask the Prime Minister to help you. I'd normally disclose his fax numbers but if I did that you might jam up the lines with abusive postings just like you do here on Usenet.

Is anyone interested in joining with me to do a mass e-mailing of protests to Anon Penet and to Toronto Free Net in an attempt to flood their computer systems thus forcing them to seriously consider pulling the plug on Mike ? I'm not sure but is my proposal called a "flame" ?

> for email addresses.

Perhaps we should give Mike 7 days from today (6 July 96) to come to his senses and they start a massive multiple E-mailing campaign to Toronto Free Net. If all us victims send multiple copies of E-mails to the right addresses in Toronto then perhaps the Canadians will begin to get the appropriate message.

Copy e-mailed to Mike, just so he knows what is coming if he persists.

I see. So they're not wasting six years of manpower to persecute you. They're wasting six years of manpower to prove I'm _not_ being persecuted.

I wish I was clever enough to think of something like that. I really, really do.

>When I'm told by someone who really does know such things that there was
>never any plot to get Mike then I trust that person sufficiently enough to
>accept his word.

Come on "Big Ears", why don't you admit that you made this posting? This is exactly the same line you were feeding me a few months ago. The posts are from the same news server, it's even the same newsreading software (Forte Agent .99e/16.227).

I'm afraid that if you friend "in the know" denied the existence of a plot then he was being, as they say, economical with the truth. Judging by the extreme reaction in London in May, and the panic you're showing now, as well as the replay post yesterday, I would say that things are hotting up again. But for you this time, not for me. I am out of harm's way, and there is very little you can do as long as I stay out of the UK.

Just to put the CLAB back into its original state. There is an internal SCSI connector on the Mk II (and later). I do have a 1GB IBM 2.5" SCSI drive - but they are unusual.

Sad, confused and emotional disturbed Mike Corley wrote:

{ snip }

Because he has made himself into a martyr and now he finds it impossible to back down. Mike's big secret has now been exposed. He made everything up.

Every time Mike makes allegations against the police, MI5, Tom-Dick-and-Harry etc. those organisations have taken people off vitally important work to ascertain whether or not there was any substance in Mike's ranting allegations.

When I'm told by someone who really does know such things that there was never any plot to get Mike then I trust that person sufficiently enough to accept his word.

The problem is Mike has escalated matters to an extreme level and like many silly billys he will find it impossible to give up all his self created crap and to live a normal life. After all what can Mike do now this crap has been exposed as untrue ? What new cause can Mike dedicate himself to ? (Some might read that as: who else can Mike now start upsetting ?)

So Mike write to John Major, c/o the Private Secretary, 10 Downing Street, London SW1A 2AA and ask the Prime Minister to help you. I'd normally disclose his fax numbers but if I did that you might jam up the lines with abusive postings just like you do here on Usenet.

Is anyone interested in joining with me to do a mass e-mailing of protests to Anon Penet and to Toronto Free Net in an attempt to flood their computer systems thus forcing them to seriously consider pulling the plug on Mike ? I'm not sure but is my proposal called a "flame" ?

Perhaps we should give Mike 7 days from today (6 July 96) to come to his senses and they start a massive multiple E-mailing campaign to Toronto Free Net. If all us victims send multiple copies of E-mails to the right addresses in Toronto then perhaps the Canadians will begin to get the appropriate message.

Copy e-mailed to Mike, just so he knows what is coming if he persists.

Organization: Toronto Free-Net
Summary:
Keywords:

It's such a pity that the Security Service has no powers of arrest. How are they supposed to implement a proper secret police state without the ability to snatch Joe Citizen off the street whenever they feel like it?

"Old_500" aka "Big Ears" aka "PC Plod" wrote:

I see. So they're not wasting six years of manpower to persecute you. They're wasting six years of manpower to prove I'm _not_ being persecuted.

I wish I was clever enough to think of something like that. I really, really do.

>When I'm told by someone who really does know such things that there was
>never any plot to get Mike then I trust that person sufficiently enough to
>accept his word.

Come on "Big Ears", why don't you admit that you made this posting? This is exactly the same line you were feeding me a few months ago. The posts are from the same news server, it's even the same newsreading software (Forte Agent .99e/16.227).

I'm afraid that if you friend "in the know" denied the existence of a plot then he was being, as they say, economical with the truth. Judging by the extreme reaction in London in May, and the panic you're showing now, as well as the replay post yesterday, I would say that things are hotting up again. But for you this time, not for me. I am out of harm's way, and there is very little you can do as long as I stay out of the UK.

Can't disagree with that sentiment.

Wasn't it documented that MI5 sometimes "bought" journalists and broadcasters?
I remember reading a report by some jouralist who had been offered an extra
tax-free income by MI5 to become their covert mouthpiece, and had refused.

Bet you lots of others didn't refuse. Why do you think MI5 have such easy
access to the BBC and media? Because they're directly paying them off, that's why.

It has been reported several times. The most recent was in Private Eye,
a few months back. As I recall they also wanted information from him;
journalists would be a natural choice for members of the Security Service
and the Secret Intelligence Service for information sources.

> It might be interesting to see what he had to say regarding their
> attempt to recruit him.

He was most concerned that many others would have accepted such an
offer. However, we can probably make an educated guess as to some of
those who accepted: Nigel West (Rupert Allason, MP) and Chapman Pincher
would come near to the top of the list.

This is true. I frequently employ private detectives to spy on people (there's a good reason for this and I'll tell you if you guess correctly) and one such detective showed me the latest technology only last week. A small rucksack. One strap of the rucksack has a tiny hole in it that you wouldn't notice unless someone pointed to it. That's the camera: the wires lead into the rucksack itself where there is a video tape recorder little bigger than a Walkman. I don't know if that's what Roger Cook uses but it certainly explains why it is that the subject can look straight into the lens and not realise (s)he's being filmed. Now, I say "latest technology" and I think that's the technology that the police use as well as the retired police who become private detectives, but no doubt the security services have far more sophisticated equipment.

: >his part. Secondly, there needs to be evidence of MI5 taking
```

: >measures to counter this subversive activity, in proportion to the
: >magnitude of the threat posed. Upon reading Mike Corley's posts,

: Alan,

: What about the following scenario? MI5 conducts "experiments" including
: field trials of novel surveillance methods. Say there was a "research
: project" underway to see just how invasive a surveillance of an
: individual could be. Perhaps it wasn't research, perhaps it was for
: training of novice personnel. Either way, there is a sizeable risk of
: detection. In order to minimise the consequences of this, you choose
: someone who is out of the public eye, and if possible someone whose
: credibility is already damaged - by diagnosis of schizophrenia, for example.
: This will facilitate the "plausible denial" if something goes wrong.

: I think this would be closer to Mike's theory.

: Mike, if you are reading, please don't post the story again. Anyone can
: read it at [snip] if they are interested. Also, don't
: think that I actually *believe* the above. On cost alone, it is extremely
: unlikely to be true, and some elements of the story (people in the media
: being "in on it") are just too crazy (though I can see how the paranoia
: builds to the extent that you can see "them" everywhere).

My argument is that the fact that it's so totally crazy is what makes it so plausible and so hard to prove.

I shall continue to try to find ways to kick down the house of cards. Because it is a brittle structure. It only needs one person to corroborate, and then it's all over.

: P.S. Anyone else ever thought of "what-ifs" along the same lines? I
: remember as a boy daydreaming that maybe I was the focus of national
: attention in a "let's follow the life of one person from life to
: death" study - that while I was out or in bed there were programmes on
: the television about my life so far, etc. It makes for a good fiction,

Perhaps MI5 have become victims of their own paranoia. Their agency has been thought of as acting disreputably, so when their decision arrives, they don't think twice about breaking the law. Whereas say CSIS (the Canadian equivalent) is at pains to point out how it would never ever do anything in contravention of the law, and how it is strictly controlled in what it does and how it does it.

If this matter does ever make it into the public gaze, then it won't just be a few individuals in the media or security service who'll get hit. The UK is supposed to be a civilized democratic country (East Germany called themselves a democracy and they had the Stasi, but anyway). In a civilized country these things shouldn't be happening - and it is ultimately Parliament and the government who are answerable for not imposing sufficient restraints and accountability on those who are supposed to be ensuring security for citizens, not jeopardising it.

....

I don't have florid symptoms. But I'm in a difficult situation, because those people who don't know, aren't going to believe, and those who do, they just go along with the crowd. It's never a good idea to go against the grain, and the grain here is defined by interests in the establishment and the media. Even people who could say out loud what was happening won't, because then there's a risk that they'll be seen as traitors and ostracised.

Usually this type of 'hidden abuse' is racial and targetted at a racial minority within a country. You keep the minorities out of the good jobs, but you don't admit discrimination exists. It happens everywhere, not just in Britain. The persecution that is going on now is in reality a refined form of racism. Instead of "nigger" it's "nutter", and abusing the mentally ill is still socially acceptable today. In 50 years it might not be, but today there isn't any social or legal sanction against it.

So really they've refined racial harassment down to a minority of one. The words may be different, but the methods are the same.

Considering he spammed it far and wide (well, at least to alt.angst and
alt.folklore.urban which I saw and each of those included other groups
in the Newsgroups line) I doubt he'll be seen anywhere for long. Using
the xs4all remailer doesn't really help if you post the url to a

web site which makes it clear who you are.

Nuala, who thinks that the sad thing is he used frames much better
than many sites done by supposedly 'sane' people.

Subject: No Justice for those with mental illness

Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net
Summary:
Keywords:

Well, the "legal option" has just foundered on the rock of lawyers refusing to deal with me on the grounds that my perception of harassment must be due to the disease.

So we're back to square one again, the same place we were two years ago.

Now perhaps one of our uk.legal participants can clarify this point. To me it seems illogical that lawyers should have the final say on whether you are allowed to proceed with a civil case or not. Is there a default mechanism or agency for cases such as mine where it is difficult to find a solicitor to represent you? What exactly is the "official Solicitor"? What is it possible to do if you can't find a lawyer to represent you?

A chance to get a useful response out of the uk newsgroups! perhaps they can be good for something else besides spamming.

....

Represent yourself....like the defendants in the McLibel trial.
you will need to read some law..but you CAN legally represent yourself I believe.
Mike W.

....

From: burridge@osiris.win-uk.net (Paul Burridge)

Yes, a lot of people do this nowadays. Saves on legal fees too. Lots of reading up required first, though.

What can I do to get competent legal help though? If the case is on the face of it so bizarre that no solicitor would represent me or talk to me, then surely there must be a default mechanism? What is the "official Solicitor" that's been mentioned?
....

All you need do is go to a good library & read up about it - that's what the McLibel 2 did.

Subject: "Absolute Obscene" David Hepworth (GLR)
Newsgroups: uk.misc,uk.legal,alt.radio.uk,uk.media,uk.media.radio.misc
Organization: Toronto Free-Net
Summary:
Keywords:

Last night (21/Feb/97), I was listening to BBC GLR. You have to understand that I was listening by stealth. Back in 1990 I used to have Capital blaring out of the speakers all over the garden ("if he listens to Capital then he can't be all bad", thanks ever so much). But now I listen on my walkman on headphones with the volume turned right down. It could not possibly be overheard by any listening device, no matter how sensitive, because sound does not carry from the headphones.

Yet somehow they are still able to tell which station I am listening to on the walkman. And last night, I bravely tuned to GLR 94.9FM at around 8.45pm. Everything went well for the first half hour or so. The DJ (today GLR told me it was David Hepworth) had a "rock star spelling competition" (how do you spell Shakespear's Sister?), no trouble there. I was recording the show onto tape just in case anything unpleasant happened, as I had reason to think it might.

Around 9.10pm, it did. Here, precisely, is what Hepworth said after the song "Come Around" by the Muttonbirds (I have this on tape, and at some point will be posting the audio on my website);

"New album's called 'Envy of Angels', that comes out soon, that's the single that's already out, I would imagine, that's 'Come Around', the Muttonbirds, er, coming up after this, we got the rock-and-roll A-level, we have, I assume, Brian do we have an embarrassment of prizes in there, we do, don't we, (EMPHASIS) absolute obscene (END-EMPHASIS) amounts of prizes, there will no doubt be a riot at the back door", and that's, er, A-level coming up after this"

The key phrases in what he said are, "EMBARRASSMENT of prizes", and what he himself emphasized verbally, "ABSOLUTE OBSCENE amount of prizes". It is my belief (based on content and tone of voice) that when he spoke these phrases he knew I was listening, and that the phrases refer directly to my situation. The "EMBARRASSMENT" is the embarrassment he and other media people would feel at having their wrongdoing exposed; the "ABSOLUTE OBSCENE" (which he verbally emphasized) described the disgusting sexual abuse which the harassers have been throwing at me.

Needless to say, I can't prove this is what he meant, although this has happened enough times that it's hard not to recognise it when you see it. But I shall be sending him a copy of this explanation. We'll see what he has to say for himself.

I will try to explain with greater clarity.

I am prone to have ideas of "interactive watching" by people on TV, and "interactive listening" by people on the radio; which means as I listen to their programme, they are aware that I am listening (because my home is spied on, and those doing the spying phone up the radio station and tell them that I am listening to them), and they then interject nasty remarks in what they say. This is what I believe may have happened on Friday night with GLR, and what I was trying to explain in my article.

It's happened before with other radio stations, most worryingly when I am listening quietly on my walkman as happened on Friday. This time, the interjected words were "embarrassment" and "absolute obscene". The "absolute obscene" referred to the abuse which is currently being directed at me.

I hope that's a little clearer.

But it is possible that those two sets of interjected words could have
validly referred to something else.

Subject: "Scandalous, Frivolous or Vexatious"
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net
Summary:
Keywords:

A couple of weeks ago I issued a summons against the BBC in my local county court, for the tort of private nuisance caused by the spying by their newsreaders on my home. My argument was that their spying had prevented me watching the news at home, and therefore interfered with my normal use of my home.

The BBC's Litigation Dept at White City have replied not with a defence, but with an application for my claim to be struck out because;

(a) it discloses no reasonable cause of action; and/or
(b) it is scandalous, frivolous or vexatious.

Their application will be heard next week. They have not made any affidavit in support of their application, nor have they given particulars as to why they consider my summons to be unarguable in law, which would be a necessary condition for there to be no reasonable cause of action.

I am more worried about point (b). Allegations are scandalous (says Stuart Sime's book) if they impute dishonesty against another party; which my allegations do, against the BBC's newsreaders. As for frivolous or vexatious, I think that will be up to me to make a good argument for the effect the BBC's spying has had on my life, and up to the district judge's opinion of my case.

Apparently seeking to have a claim struck out in this way is common practice
when the plaintiff is a litigant-in-person. Even if it is struck out, there is
always the opportunity to appeal. I think we could be in for a fight next week.

Thank you for your kind thought.

I'm not telling you which court it is. I don't want to be hounded by irate
uk-miscreants!

As for raising eyebrows, the member of staff who took the summons form didn't
change their facial expression at all. Seen it all before, no doubt.

I'm not so fond of the threats of violence against the persistent (yet
quiet for a bit, and probably soon to restart..) spammer that is Mike
Corley. Yet, encouraging the fantasies of the mentally ill isn't
exactly healthy either. Do you go up to homeless mad people as say
things like: "They're coming to get you", or "Look out behind you?".

Smid

....

Quite the contary Mike. Your recent posts have been no problem. By
explaining things rationally, and not spamming us, you have made more
friends than you know.

I hope that you sort out your problem, sincerely.

Yep. Just not, the, I think 180 posts, one week, when his illness
got really bad. Oh yeah, and there was only three real posts,
just repeated 60 times.

>Mike does a first class job of drawing out the real personality
>of the person hiding behind a node name. The way people react

Erm, explain this rather dubious statement.

>As for you. Don't you think it's a trifle condescending to refer
>to people as mad. I know they are homeless and without internet
>access, but maybe they are just eccentric.

Congratulations. This is my first real flame for about a year.

I try to control my anger when I come across another uninformed
naive idiot on usenet, but sometimes it goes free. We've had Corley
for well over three years now, and his constant spams of various degrees
have killed a couple of usenet groups I really rather lied. uk.media,
to name but one. I gets my goat to read another useless fucker
thinking he is a harmless eccentric.

Mike is mentally ill. He is unwilling to deal with it. He seems to think that uk.misc is some sort of forum that MI5 reads. And it should be avenged. He's mailbombed a large quantity of people, because they opposed his spamming.

1. He thinks MI5 watches him through his television
2. He thinks all references to mad people, refer to him
3. He thinks all people shouting, are shouting at him.
4. He's been diagnosed as mentally ill, just not a paranoid schizophrenic.
5. He gives not a shit about any newsgroups he abuses.
6. He goes through quiet periods, then _very_ nasty periods.
7. All evidence of this great conspiracy is laughable, to say the least.
8. He gives internet/usenet a bad name to the media. Including mailbombing Chris Tarrant and faxing various celebrities.

I do not condescend to him. I actually know what he does, and has done in the past, and am frankly not too respectful of him. He can be openly referred to as "mad" because he is. Let's check my mailbox saves:

Repost of when I thought I'd seen the last of loopy mike:

>WTGROMT (well that's got rid of me then!)

Have you actually visited his web page, and read the massive conspiracy that is supposed to be against him? Apparently MI5 watch him, but for no reason. They do it for a laugh. Because they can. It costs them a lot of money, but they still do it. Reality is but a memory for this man.

>MC had seen the light and stopped spamming.

He hadn't seen the light at all. His level of spamming had got to
such outrageous proportions that we had to mount a concerted
attempt to get his account(s) closed. The reason for the lack of
spam lately is that Mike has been furiously swotting up on Law so
he can bring an action as a LIP against the BBC (all solicitors
having quite rightly and honourably declined to act for him). When
this course of action is exhausted without result, I confidently
predict that we will once again be the innocent victims of his ire
and the spamming will commence again.

Subject: I am being ignored
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net
Summary:
Keywords:

Something mildly unusual is happening. Nobody has been getting at me for the last couple of weeks. Best of all, about three weeks ago I bought a video recorder to try to get some evidence from the News etc, and despite having watched Martyn Lewis, Michael Buerk and the whole lot of them, not one of them has said anything to me in the last three weeks. And I have been listening to and recording Capital, with no ill effect. All in all, I am being comprehensively ignored.

Of course, I should have video-taped the news programmes back in 1990/91/92 (and even 93) when it was still all going on. Anthony Johnsson (casually name-drop to stick the knife in) will tell you how intelligent a person I am, yet I didn't have the good sense to record the programmes at the time, and it's a bit late now.

Today another avenue of exploration closed when my second summons against the BBC was struck out (basically through lack of evidence), and an order was made by the district judge saying that I could not sue John Birt again without the express permission of the court. She explained that this was for my own good, to save me the summons fees. Costs were not awarded though (the BBC didn't even really seek costs), and I am free to sue anyone else I take a shine to.

....

It is not that you are being ignored.... it is just that as your mental health improves, so your paranoia eases.

OR...

The dark forces are gathering strength for the final battle with you...

Seriously though, it's nice to see you back - cos as long as they are persecuting you, I can relax knowing they haven't got time to bother me!

Mike Corley (bu765@torfree.net) wrote:

[unreasonable optimism snipped]

Well, that didn't last very long, did it?

Capital Radio this evening approx 8.35pm, Neil Long's programme a few moments after I switched to it (I am listening to it as I type this). The following spouted from his mouth;

"want to see Jacko in town? what a gig it's going to be, that guy is amazing, and PSYCHOTIC, but amazing on stage, 0171-4200958, on stage he's a MADMAN but he's wonderful"

God, I am so tired of this. It's been going on for seven years. When's it going to stop?

I have the above extract on tape. When I get around to it I will post it, and the Hepworth snippet, as audio files on the website. Of course, all the doubting Thomases and Smids can carry on doubting, because the mere fact that moments after switching on the DJ starts talking about "psychotic", that's not proof is it?

I wrote an aggrieved letter to Chris Tarrant at Capital and sent it off today, copied to Richard Park, Group Director of Programmes. I suppose they'll just lie as usual. Bastards, basically.
....
The solution is surely to not have a TV, video, radio or telephone in
the house, Mike. That way they can't be used to watch you.

No. I tried that strategy in 1990/91 when I sold my television and stopped listening to the radio. It didn't work because they got at me through co-workers and eventually the general public.

The solution is to gather evidence by recording everything, and then complain or sue if possible. I wish I'd recorded it all five or six years ago, then I might be more successful in a legal action now.
....
Did anyone else watch the X-Files on Sky last night (Sunday 13th April) and recognise Mike's symptons in the chap with the tattoo? It was quite interesting to see someone responding in precisely the same way, picking up on individual words and phrases in ordinary sentences and applying parts to themselves as though they were intended.

Not a pleasant ending though. You take care, Mike, and keep taking the medication. uk.misc just wouldn't be the same without you now.

No, it isn't, but you knew that anyway.

Mike, how is it that you think that this can't be a coincidence because it happened 'moments' after you switched on the radio? Haven't you just told us that you haven't heard a thing for two weeks? Going two weeks watching TV & listening to the radio without a reference to 'mad', 'crazy' or 'loony' is quite an acheivement, especially given the trashy radio you seem to prefer.

I've just spent a lot of the weekend trying to keep a manic depressive under control, so that she doesn't have to go back into hospital and lose the last few months' memories to ECT. One thing I've noticed is that manic depressives almost seek to foster their fantasies, they enjoy the control and the high. You seem to be the same - you refuse to answer the points put to you that explain away what you call persecution totally - do you have the courage of your convictions to reply to this? Or do you enjoy the attention your illness brings you?

Do please tell the *truth*. It has been longer than *2* weeks as I'm sure
you have noticed, hasn't it ?

Well I claim responsibility for the absence of persecution. When I rang
John Major's personal private secretary, not the personal political one or
any of the others in the same office, and I said you would vote for the
Conservative Party at the General Election the secretary said Johnny would
be so happy and as a sign of gratitude he rang-up the Head of MI5 and told
them to save money for tax cuts by abandoning forthwith their campaign
against you. Consequently MI5 and MI6 have been able to redeploy urgently
needed resources (i.e. manpower and telecoms interceptions) against an
international band of (*****censored*****).

On behalf of the law-abiding and decent citizens in the British islands, I
would like to sincerely thank you for your invaluable contribution to
crime fighting by your instrumental achievement in releasing badly needed
and very scarce MI5 and MI6 resources.

Many thanks,

Please don't forget it is National Election time and the news broadcasts
at 21:00 on BBC1 are preoccupied with British politics.

> (and even 93) when it was still all going on.

Any particular date in mind ? I have a few in the library. You can also
purchase copies from the BBC on 0181-743 8000 (central switchboard).

> Anthony Johnsson (casually name-drop to stick the knife in) will tell you how

Perhaps it is for the best. Now that it is all over, you can return to
Canada. Did you manage to get your Canadian citizenship ?   What did your
contracts at MI5 say about you becoming Canadian ?   You never did mention
the name of your MI5 liaison officer nor of any of the others.

That's true. But as it is now all over there is no need to worry about
the past. MI5 said your file has been removed from the Registry and put
in a burn-bag so there is nothing left for anyone ever to find.

By the way, what was the URL of your famous Corley web site ?

I have to admit that it is actually mildly amusing to have newsreaders watching
you, although it is tiresome after a bit. I am currently in an interesting
situation, because after my lawsuits against them I think the BBC newscasters
have stopped watching me entirely; I also think that ITN, in particular John
Suchet, *are* still watching but they're being subtle about it (his blink
pattern followed mine).

Being called nasty words is quite horrible though, and seems gratuitous; what
do they gain by it, except to exercise their sadism?

: >I think we all ought to remember that schizophrenia is a

You have. They're not pleasant atmospheres, especially the secure wings, which have more in common with prisons ('airlock' doors, list of 'banned' articles, continuous observation). They have to be that way, unfortunately.
